YOUR TRAINER

About the Trainer

Role Principal Trainer, Tertiary Infotech Academy Pte Ltd

Expertise eCommerce, WordPress and WooCommerce content management systems, applied AI

Delivers Courses on eCommerce, web development, digital marketing and data analytics

Founder Founder and lead instructor at Tertiary Infotech / Tertiary Courses

© Tertiary Infotech Academy Pte Ltd

ICE-BREAKER

Let's Know Each Other

One minute each — then we build a fashion store together.

Your name and role

Your experience with WordPress or online selling

How you use AI today

One product you would sell online

© Tertiary Infotech Academy Pte Ltd

HOUSEKEEPING

Ground Rules

Phones on silent

Step out quietly for calls.

Participate actively

No question is too small.

Mutual respect

Agree to disagree.

Be punctual

Return from breaks on time.

Full attendance

Stay for the whole day to finish every lab.

Stay hands-on

Build along in every lab.

© Tertiary Infotech Academy Pte Ltd

BEFORE WE START

Prerequisite

Basic WordPress

Basic WordPress operation is assumed in this course.

Comfortable with a browser

You can find your way round the WordPress admin and upload an image.

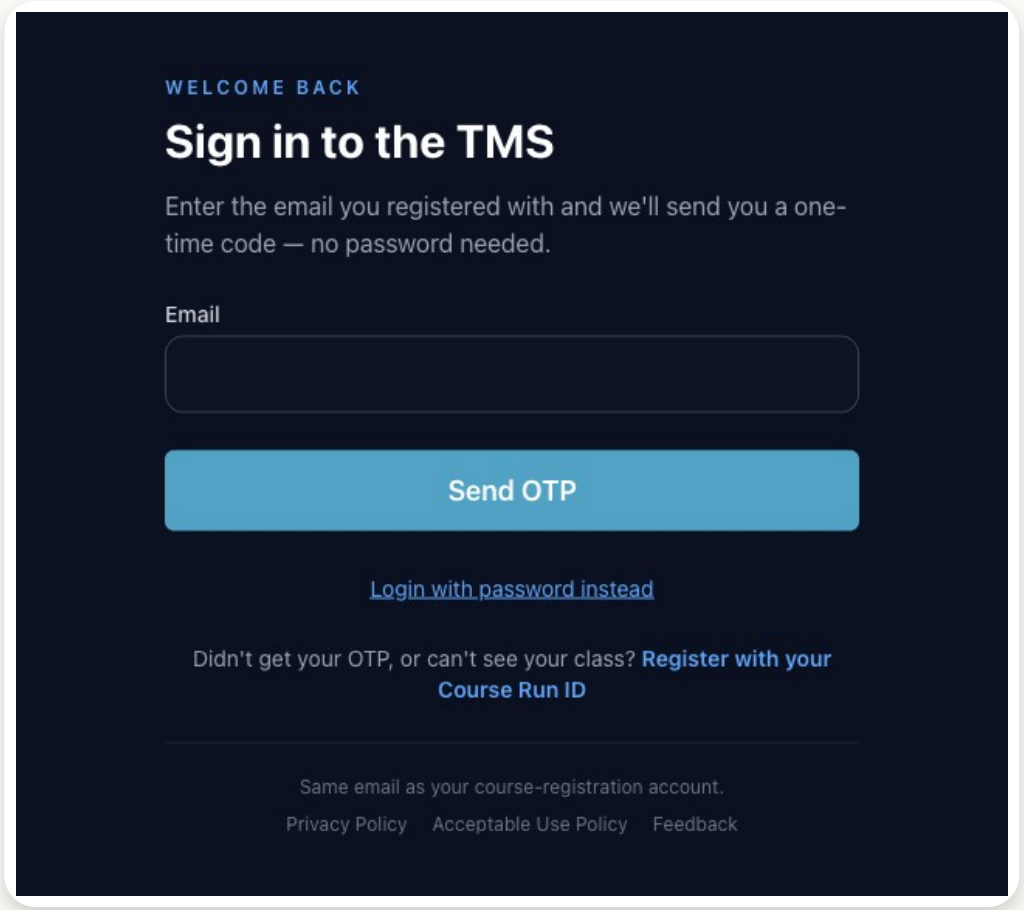

A ChatGPT account

A free account works; image generation may be slower on the free tier.

Lesson Plan — Day 1 (9:30am – 1:00pm)

Time	Session	Topic
9:30am–9:45am	Welcome, trainer and learner introductions, and ground rules	—
9:45am–10:00am	Learning outcomes and course outline	—
10:00am–10:35am	Topic 1 — AI for WordPress and WooCommerce	T1
10:35am–11:20am	Topic 2 — Overview of WooCommerce CMS	T2
11:20am–11:45am	HANDS-ON — Lab 1: Launch Harbour & Co — WooCommerce Plus an AI-Designed Homepage	T2
11:45am–12:20pm	Topic 3 — Manage Products	T3
12:20pm–12:30pm	HANDS-ON — Lab 2: Shoot and Write a Product with AI	T3
12:30pm–12:50pm	Topic 3 — Variable products, categories, tags and attributes, up-sells and cross-sells, the CSV importer, the Customizer and WooCommerce Blocks	T3
12:50pm–1:00pm	HANDS-ON — Lab 3: Let AI Build the New-Season Catalogue	T3
1:00pm–1:30pm	Lunch break	—

© Tertiary Infotech Academy Pte Ltd

Lesson Plan — Day 1 (1:30pm – 5:30pm)

Time	Session	Topic
1:30pm–2:15pm	Topic 4 — Manage Payments and Shipping	T4
2:15pm–2:40pm	HANDS-ON — Lab 4: AI Drafts the Policies, You Switch On Payments and Shipping	T4
2:40pm–3:20pm	Topic 5 — Manage Sales	T5
3:20pm–3:45pm	HANDS-ON — Lab 5: Run a Day of Orders — Refund, Restock, Reply with AI	T5
3:45pm–4:20pm	Topic 6 — Manage Performance	T6
4:20pm–4:55pm	Topic 7 — SEO in the Age of AI Search	T7
4:55pm–5:05pm	HANDS-ON — Lab 6: Get Found — AI Writes the SEO, You Approve It	T7
5:05pm–5:15pm	HANDS-ON — Lab 7: Launch the Resort Linen Drop — Social, Newsletter, Results	T7
5:15pm–5:30pm	Course summary, Q&A, next steps and course feedback	—

TIP 9:30am – 5:30pm · 7.5 instructional hours · seven topics, seven hands-on labs.

© Tertiary Infotech Academy Pte Ltd

THE COURSE SCENARIO

Meet Harbour & Co

A Singapore fashion label — the store every lab builds. All data is synthetic.

City wear for the tropics

Linen shirts, polos, tees, skirts, trousers, bags — breathable for 32°C, sharp at 20°C.

Studio at 71 Ayer Rajah Crescent

Founder Rachel Lim sells in person. Today she sells online.

Launch: the Resort Linen Drop

Four new-season pieces · RESORT15 for 15% off · 14 days.

Rules that matter

S$ inclusive of 9% GST · no unprovable claims · Rachel approves anything public.

© Tertiary Infotech Academy Pte Ltd

HANDS-ON · ONE STORYLINE

Seven Labs, One Fashion Store

Set up with GenAI → get found in search → get customers.

LAB 1 · PHASE 1

Launch the store

Set up the store with GenAI

LAB 2 · PHASE 1

AI product photos & copy

Set up the store with GenAI

LAB 3 · PHASE 1

AI builds the catalogue

Set up the store with GenAI

LAB 4 · PHASE 1

Policies, payments & shipping

Set up the store with GenAI

LAB 5 · PHASE 1

Orders, refunds & AI replies

Set up the store with GenAI

LAB 6 · PHASE 2

SEO with AI

Get found — SEO with GenAI

LAB 7 · PHASE 3

Digital marketing with AI

Get customers — digital marketing with GenAI

Your Demo WordPress Site and Login

The trainer assigns ONE site per learner. Sites are wiped and re-imaged before every class — experiment freely.

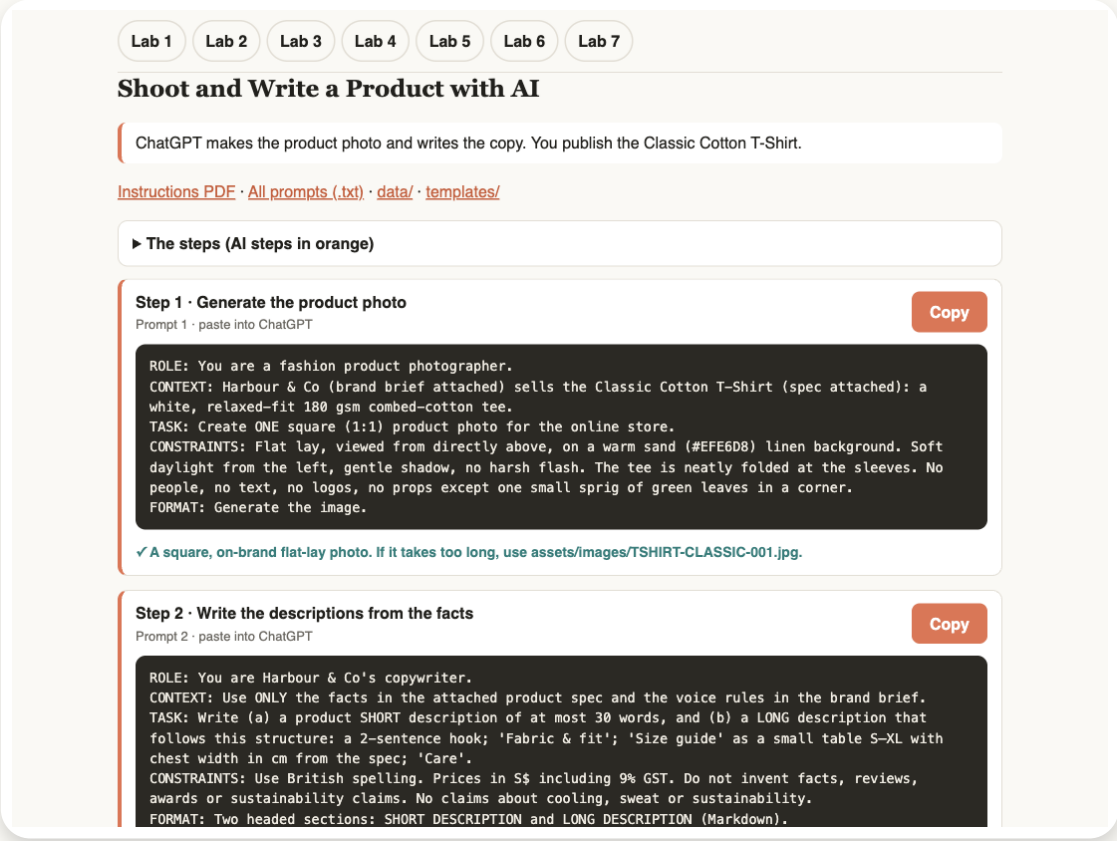

Site	Login page	Username	Password
wp1	`https://wp1.tertiarytraining.com/wp-admin`	`training1@tertiaryinfotech.com`	`given by your trainer`
wp2	`https://wp2.tertiarytraining.com/wp-admin`	`training2@tertiaryinfotech.com`	`given by your trainer`
wp3	`https://wp3.tertiarytraining.com/wp-admin`	`training3@tertiaryinfotech.com`	`given by your trainer`
wp4	`https://wp4.tertiarytraining.com/wp-admin`	`training4@tertiaryinfotech.com`	`given by your trainer`
wp5	`https://wp5.tertiarytraining.com/wp-admin`	`training5@tertiaryinfotech.com`	`given by your trainer`

TIP Your username matches your site number: wp3 → training3@tertiaryinfotech.com. Never use these sites for a real shop.

© Tertiary Infotech Academy Pte Ltd

Every Lab Has Its Own Folder

labs/lab-NN-.../ — instructions PDF, prompts, mock data, product assets, templates.

LAB-NN-Instructions.pdf

Steps, values, logins, plugins — and a Prompt Playbook page: step → prompt → step → prompt.

COPY-PROMPTS.txt + prompts page

labs/prompts/index.html — click Copy, paste into ChatGPT. Works offline.

data/ · assets/ · templates/

Brand brief, CSV catalogue, product images and copy, homepage and policy templates.

plugin/ (Lab 1)

The Harbour & Co Toolkit WordPress plugin — brand styles and block patterns.

© Tertiary Infotech Academy Pte Ltd

SECTION 1 · TOPIC 1

AI for WordPress and WooCommerce

The AI toolkit you use in every lab.

1. Choosing an AI tool
2. Model tiers
3. Effective prompts
4. WordPress AI Connectors
5. AI features in the editor

© Tertiary Infotech Academy Pte Ltd · C6

TOPIC 1 · WHAT YOU'LL LEARN

Key Concepts in This Topic

Choosing an AI tool

ChatGPT, Gemini and Claude compared on strengths, ease of use and price.

Model tiers

From fast and budget to heavy-duty models, for each provider.

Effective prompts

Role, context, task, constraints, format and examples.

Prompting in practice

Generate a replacement About Us page in line with E-E-A-T.

WordPress AI Connectors

Connect Google, Anthropic or OpenAI from Settings > Connectors (WordPress 7.0+).

AI in the editor

Enable AI features, and know the WooCommerce Classic Editor limits.

© Tertiary Infotech Academy Pte Ltd

ChatGPT, Gemini or Claude?

Dimension	ChatGPT (OpenAI)	Google Gemini (Google)	Claude (Anthropic)
Best Suited For	Generalist tool for daily tasks Image generation (DALL-E) Complex multi-step reasoning Voice interactions & custom GPTs	Deep integration with Google Workspace (Docs, Gmail, Drive) Processing massive files/documents (up to 1M-2M context window) Video/multimodal processing & YouTube research	Natural, human-like writing & long-form text editing Complex coding, refactoring & technical work Deep document analysis & instruction following
Ease of Use	Very High Extremely intuitive interface, smooth mobile app, versatile cross-modality (voice, image, text) in one chat.	Very High Easiest if you already use Google products—works directly inside your Docs, Gmail, and Drive without copy-pasting.	High Clean, minimalist UI focused on text and code. Includes helpful project sidebars, though lacks native voice/image generation.
Free Tier	Free (Access to default models with message rate limits).	Free (Generous usage limits and web/search grounding).	Free (Strict rate limits on standard model).
Individual Paid Tier	$20 / month (ChatGPT Plus) Includes advanced voice, custom GPTs, DALL-E, higher limits.	$19.99 / month (Google AI Pro) Includes 2TB–5TB Google One storage & Workspace integrations.	$20 / month (Claude Pro) Discounted to ~$17/mo if billed annually. Includes higher limits & Claude Code access.

© Tertiary Infotech Academy Pte Ltd

Which Tool for Which Job

ChatGPT — best for content creation

An all-in-one Swiss Army knife that handles images, voice chat, web searching and everyday broad assistance.

Gemini — best for SEO / GEO work

Use it within Google Workspace (Gmail, Docs, Drive), or to upload and summarise massive files, PDFs or videos.

Claude — best for detailed, complex work

Choose it when the priority is writing quality, nuanced editing, long-form content or serious software engineering.

TIP In this course's labs we use ChatGPT for copy and images — swap in Gemini or Claude if your company prefers.

© Tertiary Infotech Academy Pte Ltd

Models — Claude vs Gemini vs ChatGPT / Codex

Provider	Least Powerful (Fast / Budget)	Mid-Tier (Balanced)	Most Powerful (Heavy Duty)	Agentic (Maximum Capacity)
Claude	Haiku	Sonnet	Opus	Fable
Gemini	Flash	Pro	Argon	Covered By Argon
Codex	Luna	Sol	Astra	Covered By Astra

TIP Ordered from least to most powerful — match the model tier to the task.

© Tertiary Infotech Academy Pte Ltd

Structure of an Effective Prompt

Component	What It Does	Example
1. Role / Persona	Sets the AI's perspective, tone, and level of expertise.	"Act as a senior B2B content strategist..."
2. Context	Background details, target audience, constraints, or current situation.	"We are launching a B2B SaaS product for small accounting firms with tight budgets."
3. Task (Instruction)	The specific action you want the AI to perform (use strong verbs).	"Draft a 3-paragraph cold email sequence..."
4. Constraints & Rules	What to avoid, negative constraints, word counts, or strict boundaries.	"Do not use jargon or buzzwords like 'synergy'. Keep each email under 120 words."
5. Format / Output	How you want the final response laid out (table, bullet list, markdown).	"Format as a table with columns: Subject Line | Email Body | Call to Action."
6. Examples (Optional)	One or two target examples showing the style or logic to emulate.	"Style reference: Short, punchy, conversational tone similar to..."

TIP Role · Context · Task · Constraint · Output — every lab prompt in this course uses this shape.

© Tertiary Infotech Academy Pte Ltd

Prompt to Generate a Replacement About Us Page

PROMPT · copy from the Lab Prompts page

```
You are a professional website designer and we are going to
revamp our website https://wp1.tertiarytraining.com. Please
review the products that we sell and design a modern,
professional and inviting about us page in line with Google's
EEAT elements. Use existing theme colours and layouts. Do not
generate header. Ask me for more information should you require.
```

Reply from AI

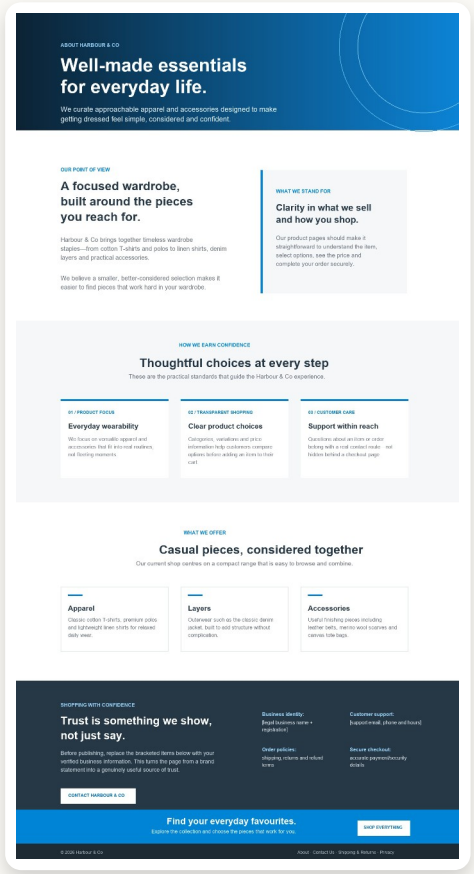

I've produced a modern About Us concept that uses Harbour & Co's existing Lato typeface, blue accent, retail navigation language, and catalogue focus. It replaces the generic template team section with an E-E-A-T-oriented story, product relevance, and a real t

Why it works

Role, the live site, the audience, E-E-A-T and the brand look are all in the prompt.

© Tertiary Infotech Academy Pte Ltd

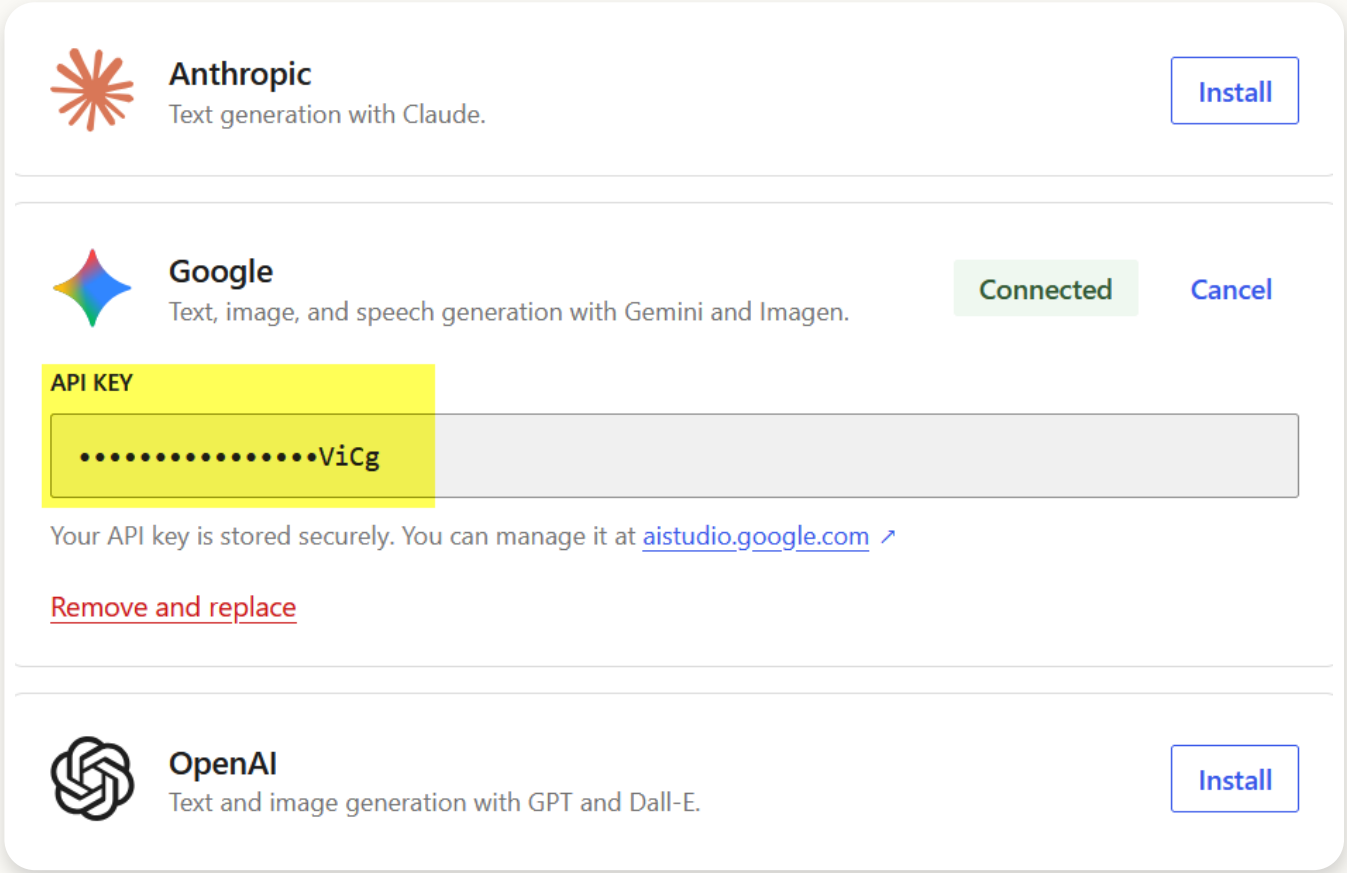

What the AI Produced

- The AI's About Us concept, built from the store's existing typeface, colours and catalogue.

© Tertiary Infotech Academy Pte Ltd

Using WordPress AI Connectors

Settings > Connectors

Core WordPress from version 7.0 — your API keys live here, shared across plugins.

Choose the provider

Anthropic (Claude), Google (Gemini, Imagen) or OpenAI (GPT, DALL·E).

Install the connector

Each provider installs as a small plugin.

Create an API key

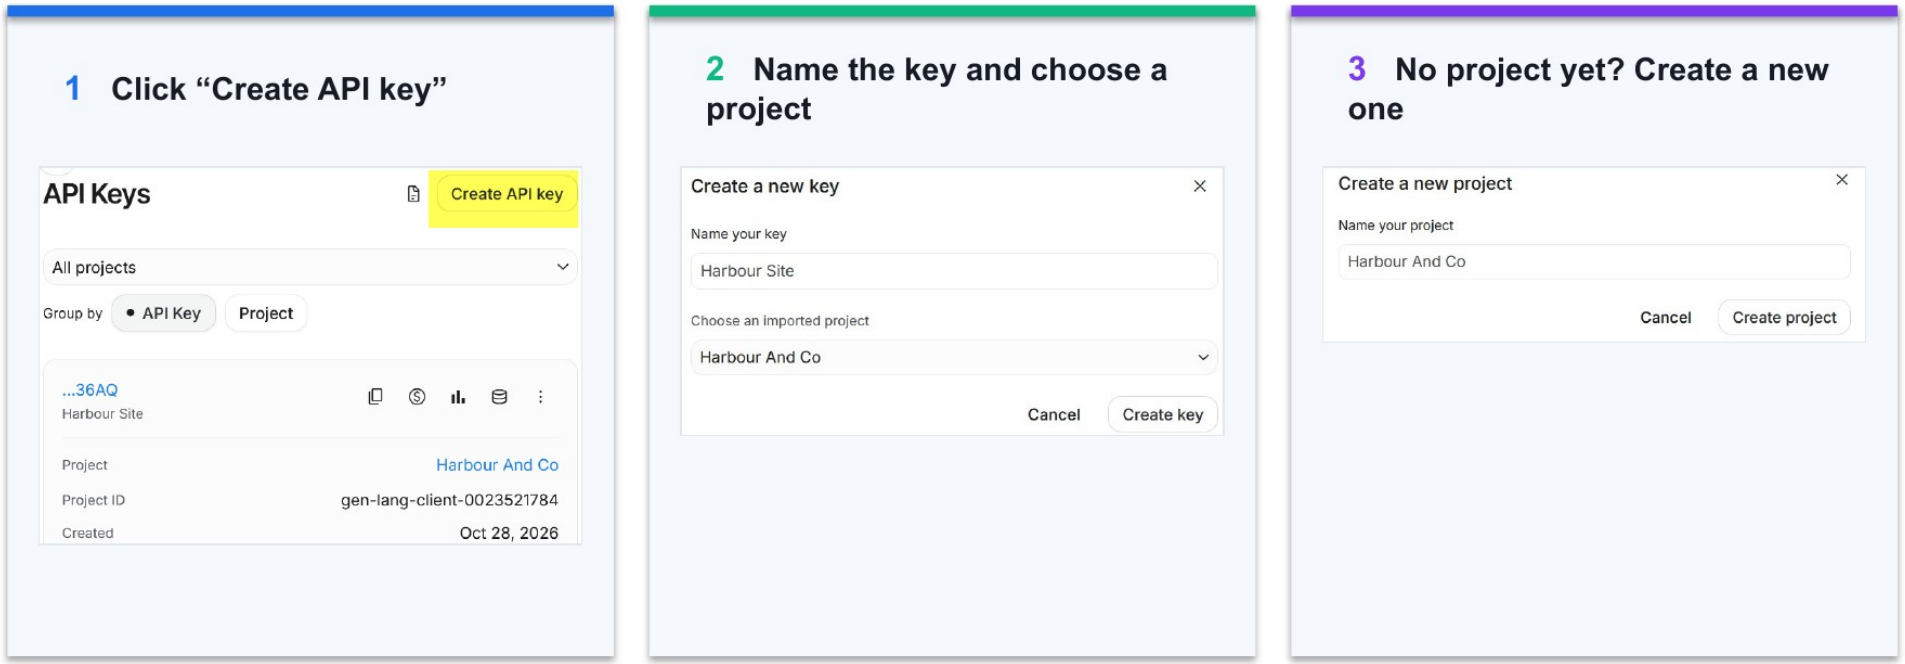

From the AI platform — next two slides use Google AI Studio.

- Verified on WordPress 7.1.4: Settings > Connectors lists Anthropic, Google and OpenAI plus 'Install the AI plugin'.

© Tertiary Infotech Academy Pte Ltd

Create an API Key (Google) — Part 1

https://aistudio.google.com/app/api-keys · you need to log in with a Google account

- https://aistudio.google.com/app/api-keys — log in with a Google account, Create API key, name it, pick or create a project.

© Tertiary Infotech Academy Pte Ltd

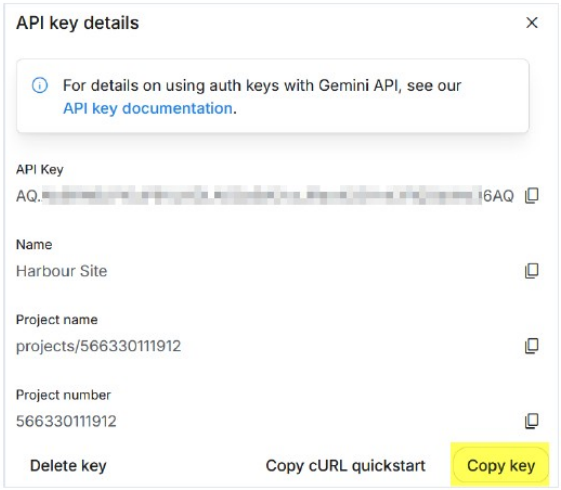

Create an API Key (Google) — Part 2

1 Copy the key

2 Paste it into the connector

3 Click Save

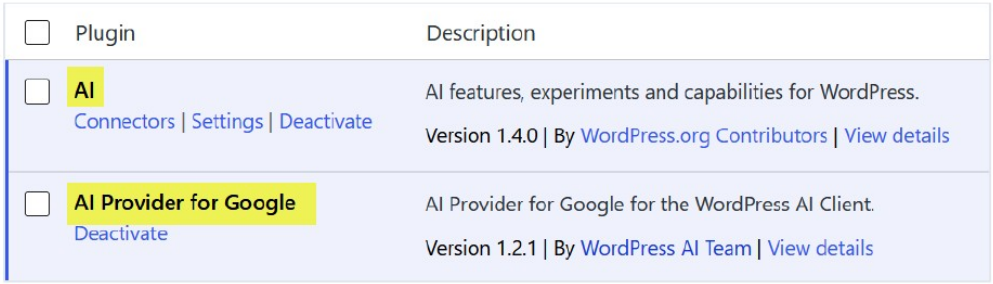

4 Check for “Connected”

The API key details, with the copy button highlighted

Two NEW plugins are installed:

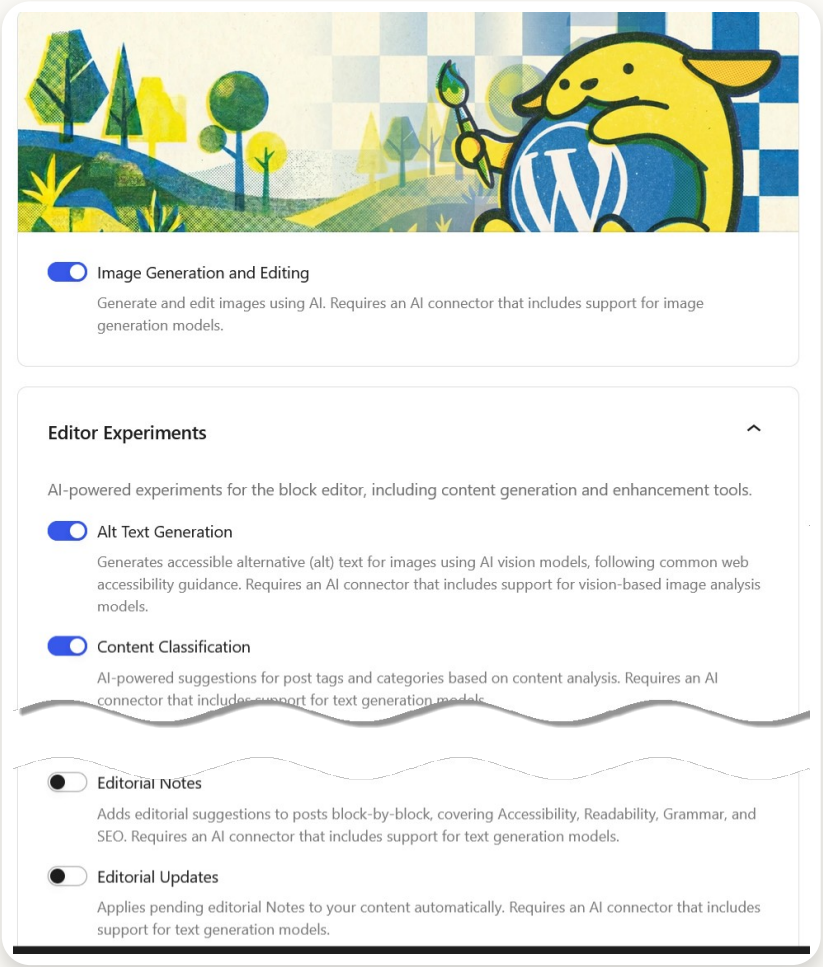

- AI
- AI Provider for Google

- Copy the key, paste it into the connector, Save, and check for 'Connected'. Two new plugins appear: AI and AI Provider for Google.

© Tertiary Infotech Academy Pte Ltd

Configure AI Features

Settings > AI

Turn features on or off for your site.

Image generation and editing

Create featured images from a prompt.

Editor experiments

Alt text generation, content classification.

Editorial notes

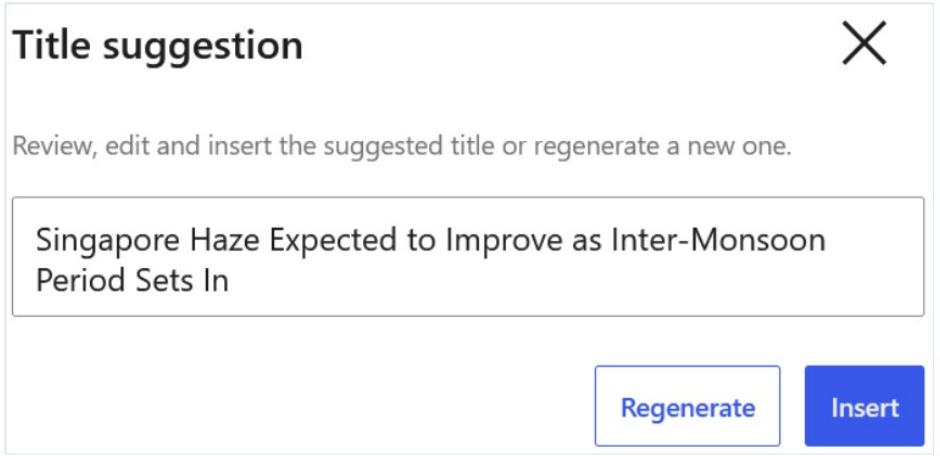

Suggested updates while you write.

© Tertiary Infotech Academy Pte Ltd

Put It to the Test

- Pages > Add New, then use the AI Generate and Title suggestion tools

- Pages > Add New, then try the AI Generate and Title suggestion tools.

© Tertiary Infotech Academy Pte Ltd

WordPress “AI Provider for Google” vs Google Gemini

Feature / Aspect	WordPress "AI Provider for Google"	Google Gemini (Standalone Ecosystem)
Primary Usefulness	Acts as a standardized bridge to connect your WordPress backend directly to Gemini models for automating site tasks (text, image generation, speech).	A versatile, standalone AI assistant and multimodal engine used for general research, coding, content creation, and data analysis.
Pros	Native Integration: Works smoothly with the PHP AI Client SDK inside modern WordPress environments. Flexibility: Allows different plugins to tap into Google AI smoothly through a unified layer. Direct Model Discovery: Automatically pulls available Gemini and Imagen models via API.	Massive Context Window: Exceptional at processing huge files, long videos, or entire codebases at once. Multimodal Excellence: Native understanding across text, code, audio, image, and video. Ready-to-Use UI: Accessible immediately via web or app without needing site configuration.
Cons	Dependent Infrastructure: Requires manual API key configuration and relies heavily on other plugins or core components to deliver user-facing features. Cost/Token Management: Unmonitored plugins can rack up unexpected API usage bills.	Disconnected Workflow: Content generated must be manually copied and pasted into WordPress (no automated native execution unless bridged by third-party tools). Prompt Dependency: Output quality varies heavily based on user prompt engineering skills.

© Tertiary Infotech Academy Pte Ltd

WordPress.org's Official AI Plugin and WooCommerce

PHP · what the toolkit plugin switches on for you

```php
// Enable Gutenberg / Block Editor for WooCommerce Products
add_filter( 'use_block_editor_for_post_type',
    'enable_block_editor_for_woocommerce', 10, 2 );
function enable_block_editor_for_woocommerce( $can_edit,
$post_type ) {
    if ( 'product' === $post_type ) { $can_edit = true; }
    return $can_edit;
}
```

The catch

The official AI plugin draws its toolbar in the block editor; WooCommerce products still default to the classic editor.

No code needed today

The Harbour & Co Toolkit plugin (Lab 1) has this as a tick box: Settings > Harbour & Co.

Trade-off

Product screens look different in the block editor — the labs use the classic product editor.

© Tertiary Infotech Academy Pte Ltd

The Brand Brief Goes Into Every Prompt

Attach it once per chat

labs/.../data/brand-brief.txt — voice, colours, promises, banned claims.

Role + context + task

Every lab prompt names a role, gives the brief, and asks for one job.

Constraints stop drift

British spelling, S$ incl. 9% GST, no invented reviews or sustainability claims.

You are the editor

AI drafts; you check every fact against the spec before it goes live.

TIP The single rule of this course: AI writes the first draft, a human approves anything public.

© Tertiary Infotech Academy Pte Ltd

SECTION 2 · TOPICS 2–6

WooCommerce

1. Store setup
2. Products
3. Payments & shipping
4. Sales
5. Performance

© Tertiary Infotech Academy Pte Ltd · C6

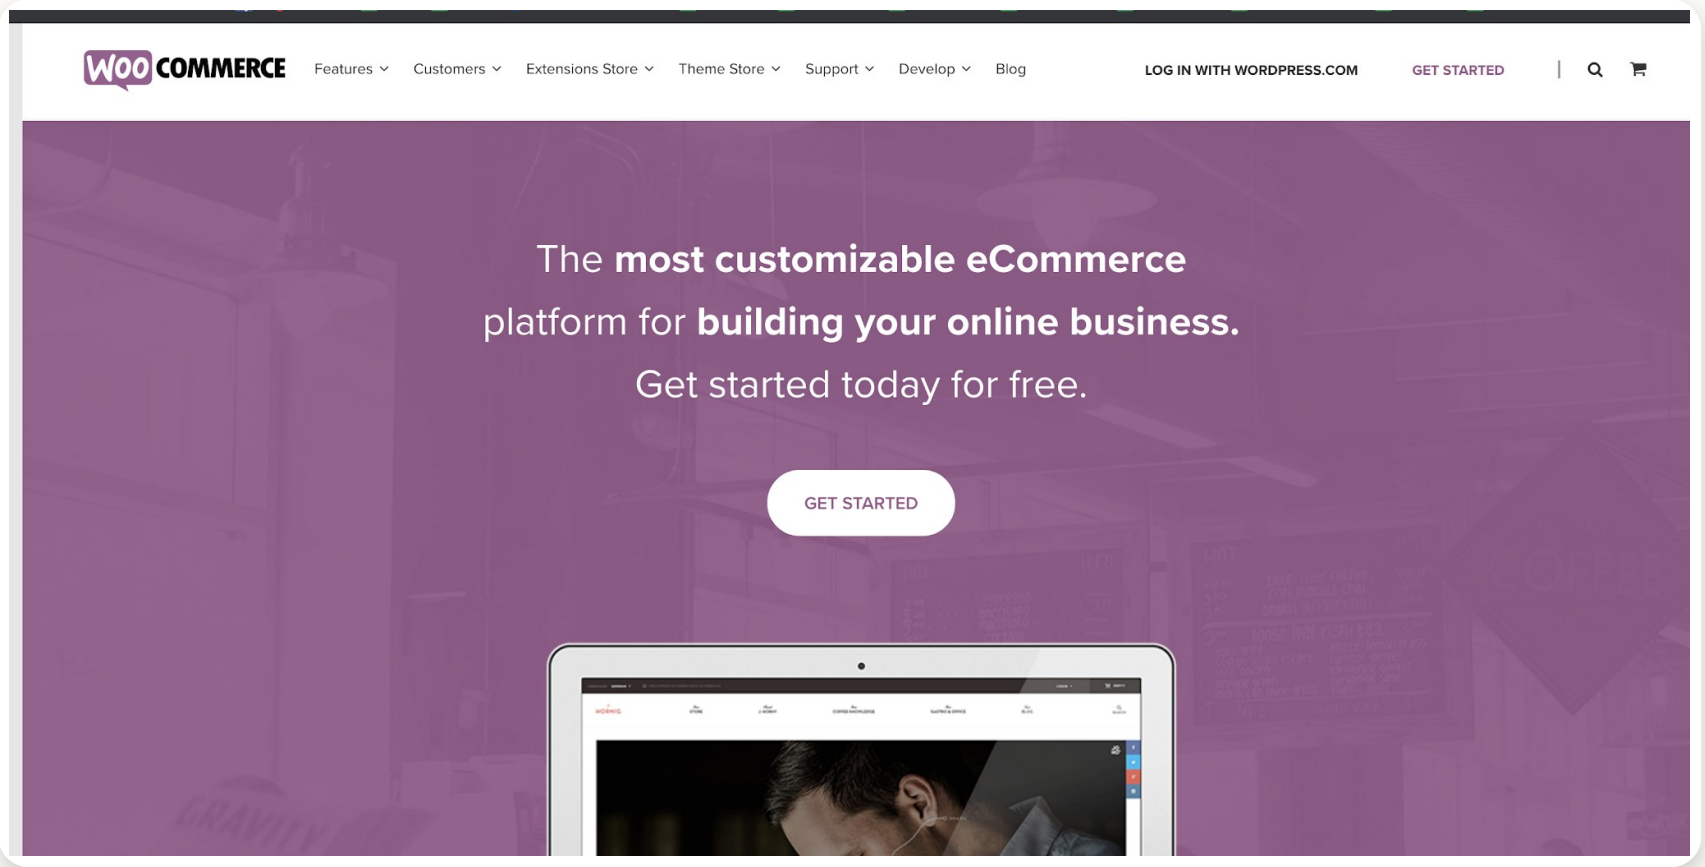

TOPIC 2

Overview of WooCommerce CMS

1. What WooCommerce is
2. Installing it
3. Setup wizard
4. Themes & widgets
5. Settings, currency & tax

© Tertiary Infotech Academy Pte Ltd

What is WooCommerce

- WooCommerce is an open-source, fully customisable eCommerce platform built on WordPress.

© Tertiary Infotech Academy Pte Ltd

THE OPPORTUNITY

Why WooCommerce

Open source

Free to use, fully customisable, and owned by you — not rented from a hosted platform.

Built on WordPress

Runs on the world's most widely used CMS, so your shop and your content live together.

Every product type

Physical, digital, virtual, variable, subscription and bookable products.

Endlessly extensible

Hundreds of themes, payment gateways and extensions, plus a full developer API.

© Tertiary Infotech Academy Pte Ltd

Key Concepts in This Topic

What WooCommerce is

An open-source, fully customisable eCommerce platform built on WordPress, powering a large share of the world's online stores.

Six steps to a store

Choose hosting, install WordPress, pick a theme, activate WooCommerce, run the setup wizard, then extend with plugins.

System requirements

PHP 7.2+, MySQL 5.6+ or MariaDB 10.0+, a 128 MB WordPress memory limit, and HTTPS support.

Taxonomies and post types

WooCommerce adds its own post types and taxonomies to WordPress to group and structure products.

Themes and widgets

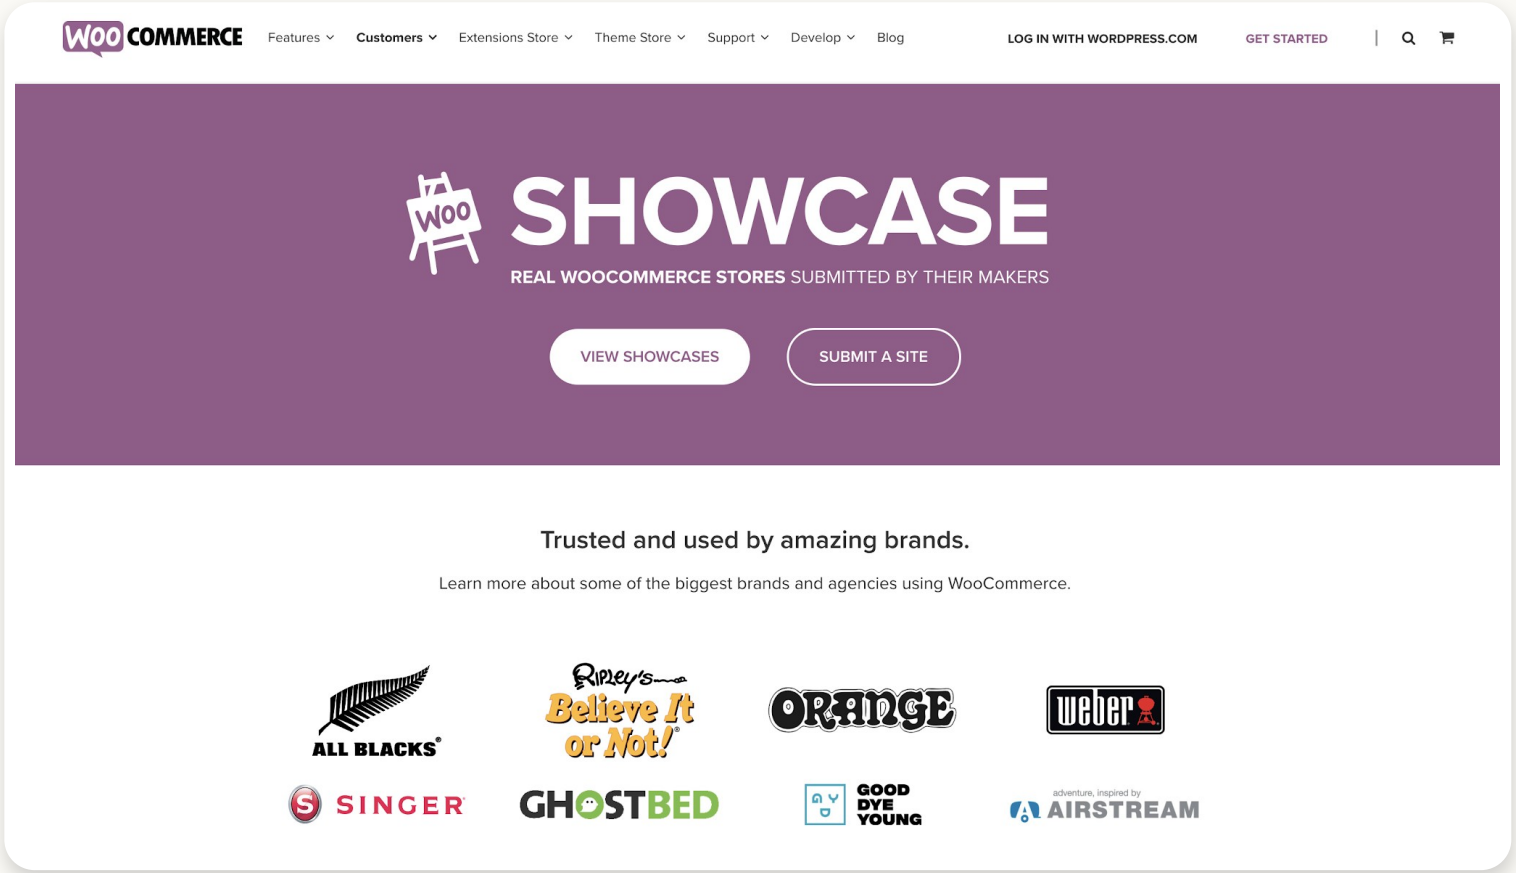

The theme sets the storefront's look; widgets surface products, filters and categories in widgetised areas.

Settings, currency and tax

General, Products, Tax, Shipping, Payments and Privacy settings define how the store behaves and prices goods.

© Tertiary Infotech Academy Pte Ltd

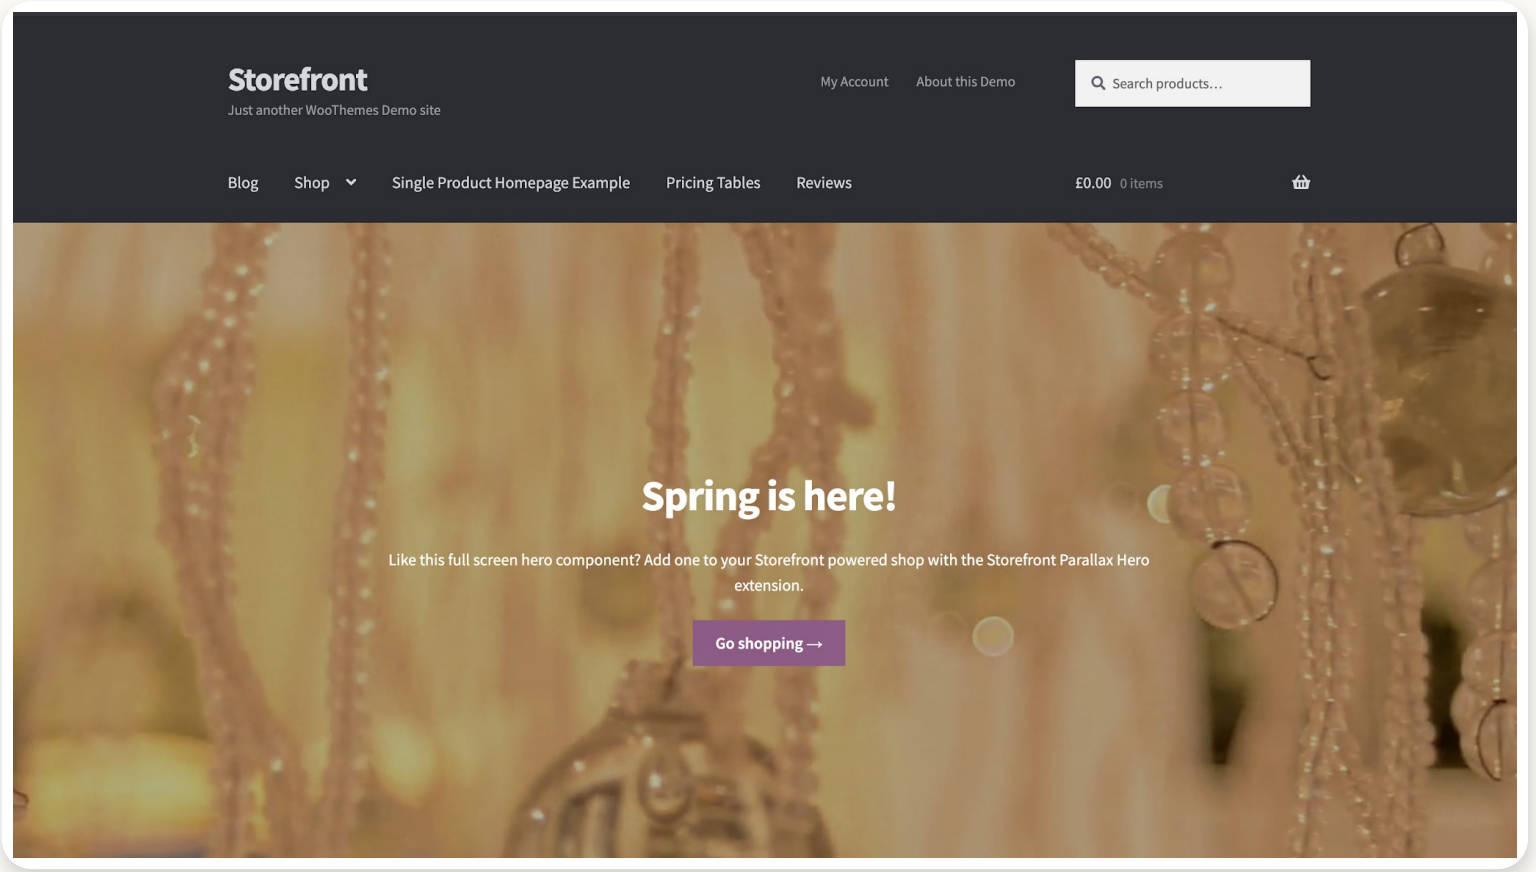

WooCommerce Store Showcases

- Real stores built on WooCommerce — https://woocommerce.com/showcase/

© Tertiary Infotech Academy Pte Ltd

WooCommerce Demo Store

- The Storefront demo — https://themes.woocommerce.com/storefront/

© Tertiary Infotech Academy Pte Ltd

Start with WooCommerce in Six Steps

HOSTING

Meet the requirements

INSTALL WP

Set up WordPress

THEME

Pick Storefront

ACTIVATE

Install the plugin

SET UP

Run the wizard

EXTEND

Add plugins

© Tertiary Infotech Academy Pte Ltd

System Requirements

PHP 7.2 or greater

The server-side language WordPress and WooCommerce run on.

MySQL 5.6+ / MariaDB 10.0+

The database that stores products, orders and customers.

Memory limit 128 MB+

WordPress needs headroom to process a catalogue and orders.

HTTPS support

Essential — you are handling payment and customer data.

© Tertiary Infotech Academy Pte Ltd

TOPIC 2 · INSTALL

Install WooCommerce on WordPress — Step by Step

Verified on WordPress 7.1.4 with WooCommerce 11.2.1.

STEP 1

Log in

Your demo site /wp-admin with your training login.

STEP 2

Find the plugin

Plugins > Add Plugin > search 'WooCommerce' — author Automattic.

STEP 3

Install & activate

Install Now, then Activate. The setup wizard opens.

STEP 4

Run the wizard

Set up my store → describe yourself → store name, industry, location.

STEP 5

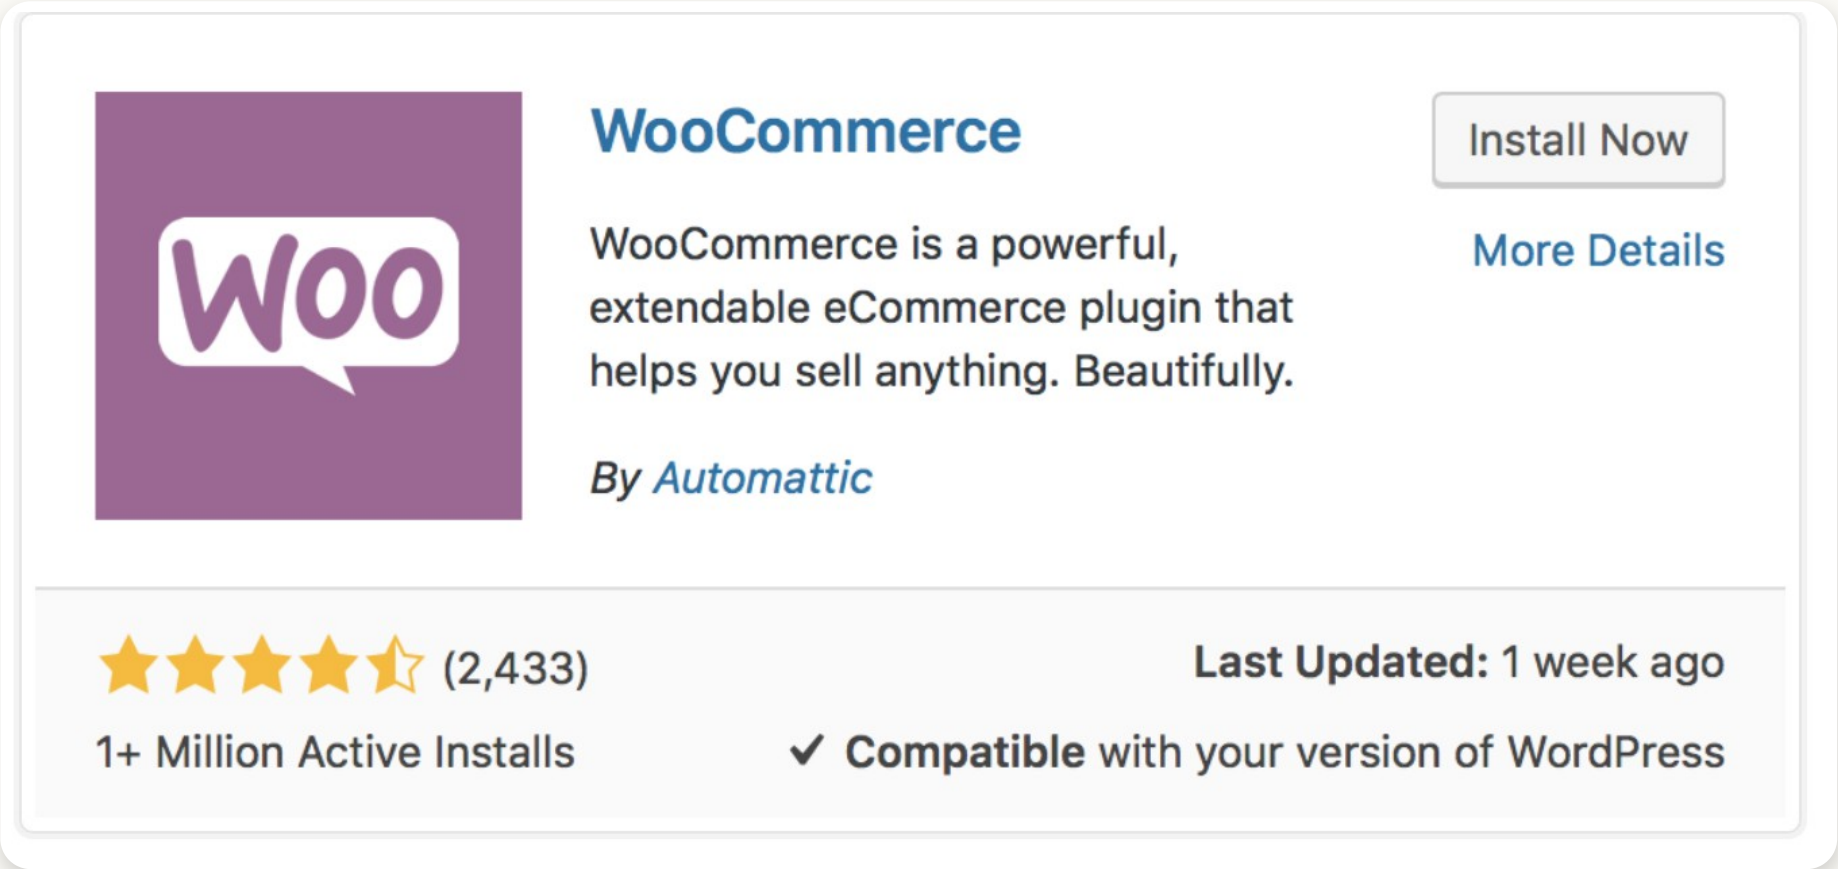

Theme + settings

Storefront theme, then currency and tax settings.

TIP On 'Get a boost with our free features' click Skip this step — Harbour & Co adds its own plugins.

© Tertiary Infotech Academy Pte Ltd

Install WooCommerce

- Plugins > Add Plugin > search 'WooCommerce' by Automattic > Install Now > Activate.

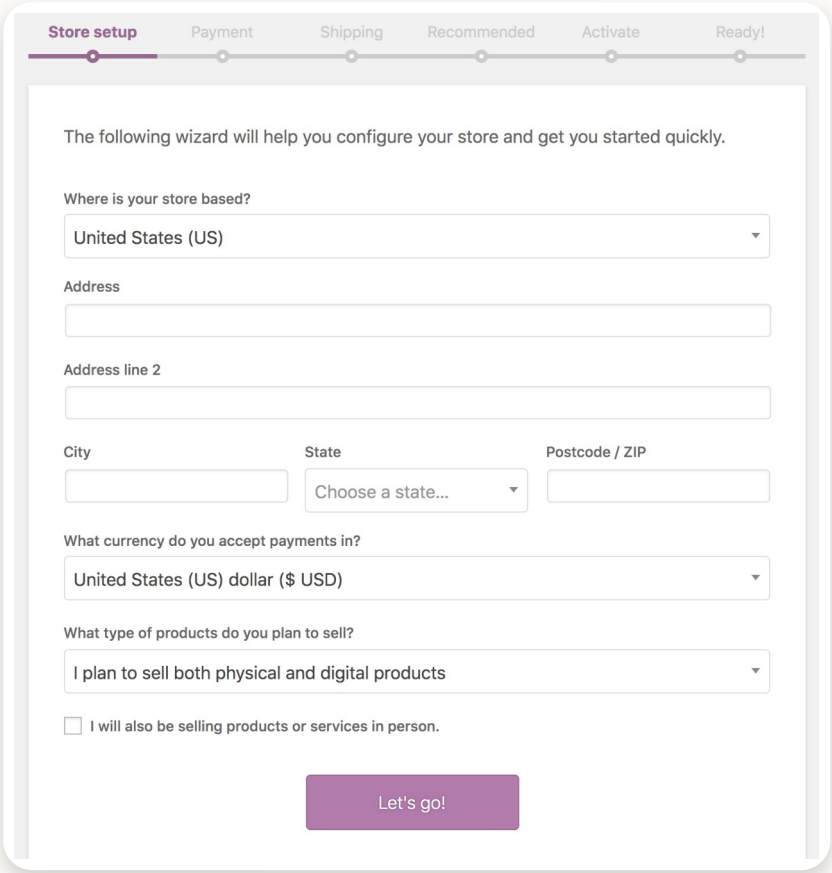

© Tertiary Infotech Academy Pte Ltd

The Setup Wizard, Screen by Screen — for Harbour & Co

Screen	What it asks	Harbour & Co answer
Welcome to Woo!	Set up my store / Skip guided setup	Set up my store
Which one of these best describes you?	Just starting · Already selling · Setting up for a client	I'm already selling (in person, at the studio)
Tell us a bit about your store	Store name · Industry · Location · Email	Harbour & Co · Clothing and accessories · Singapore
Get a boost with our free features	PayPal, Jetpack, Pinterest, Klaviyo, Google, Snapchat, Reddit	Skip this step
WooCommerce > Home	Task list: products, payments, shipping, tax, appearance	Continue in Settings (Lab 1, steps 4–5)

© Tertiary Infotech Academy Pte Ltd

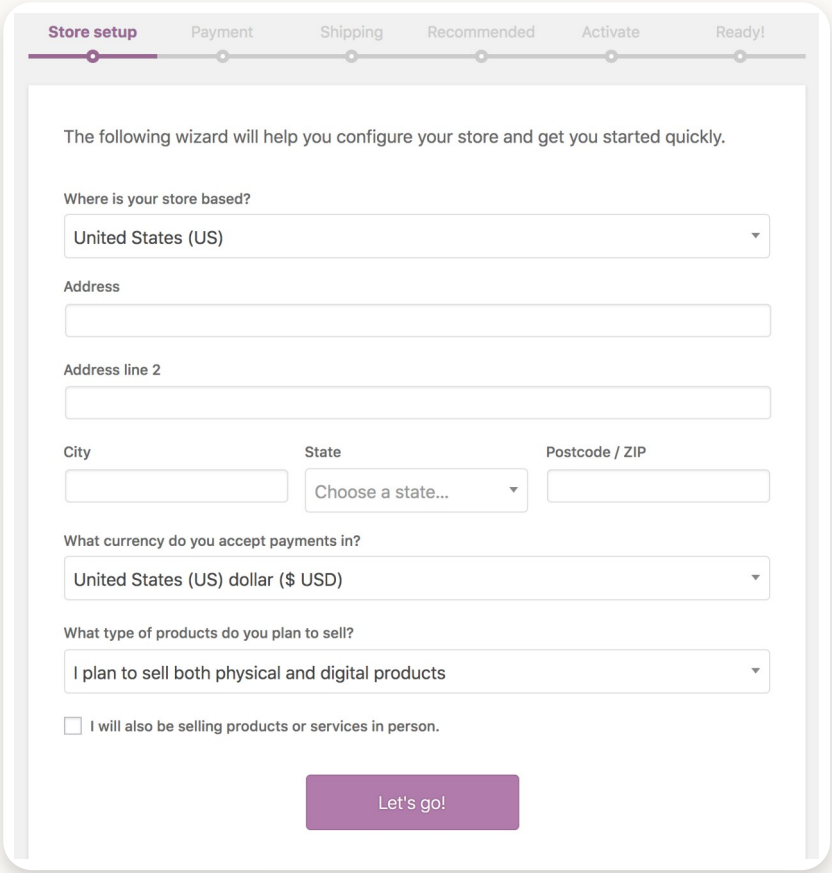

The WooCommerce Setup Wizard

- On first activation the Setup Wizard configures the store for you.

© Tertiary Infotech Academy Pte Ltd

Store Setup

- Location and currency, the type of goods you sell, and whether you sell in person.

© Tertiary Infotech Academy Pte Ltd

Taxonomies and Post Types

Post types

WordPress separates content into types — posts, pages, attachments. WooCommerce adds 'product'.

Taxonomies

A grouping of post types — categories and tags. WooCommerce adds product categories, tags and attributes.

What it gives you

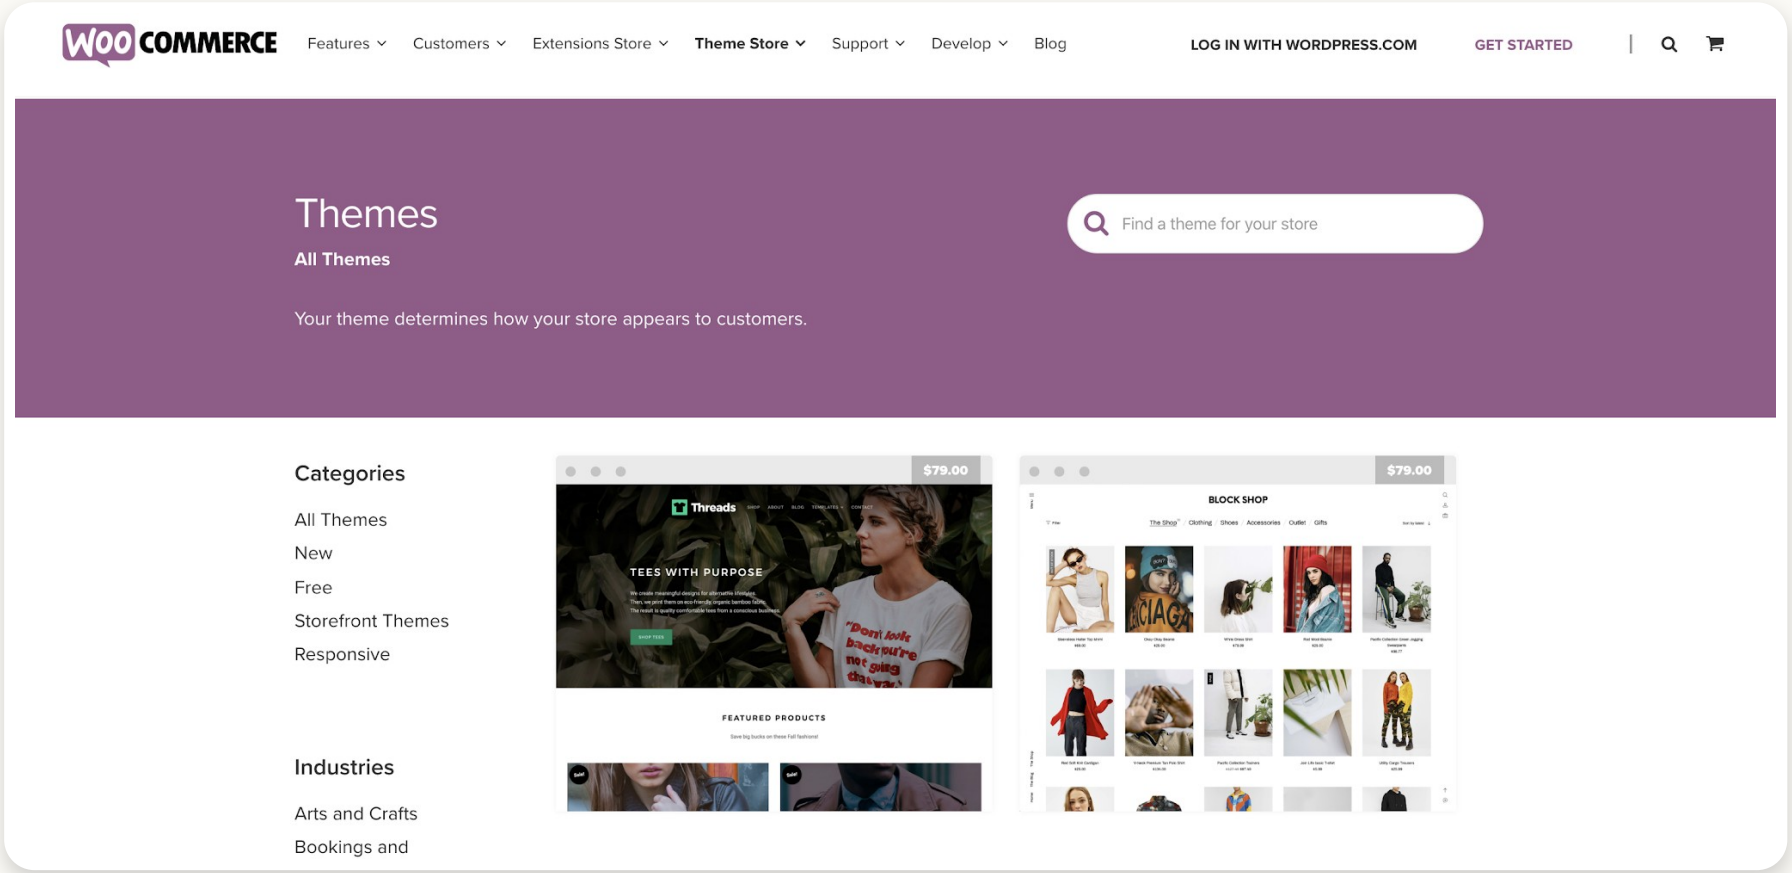

This structure is what lets you filter, browse and curate a catalogue rather than a pile of pages.

Created for you

The setup wizard registers these automatically when WooCommerce is activated.

© Tertiary Infotech Academy Pte Ltd

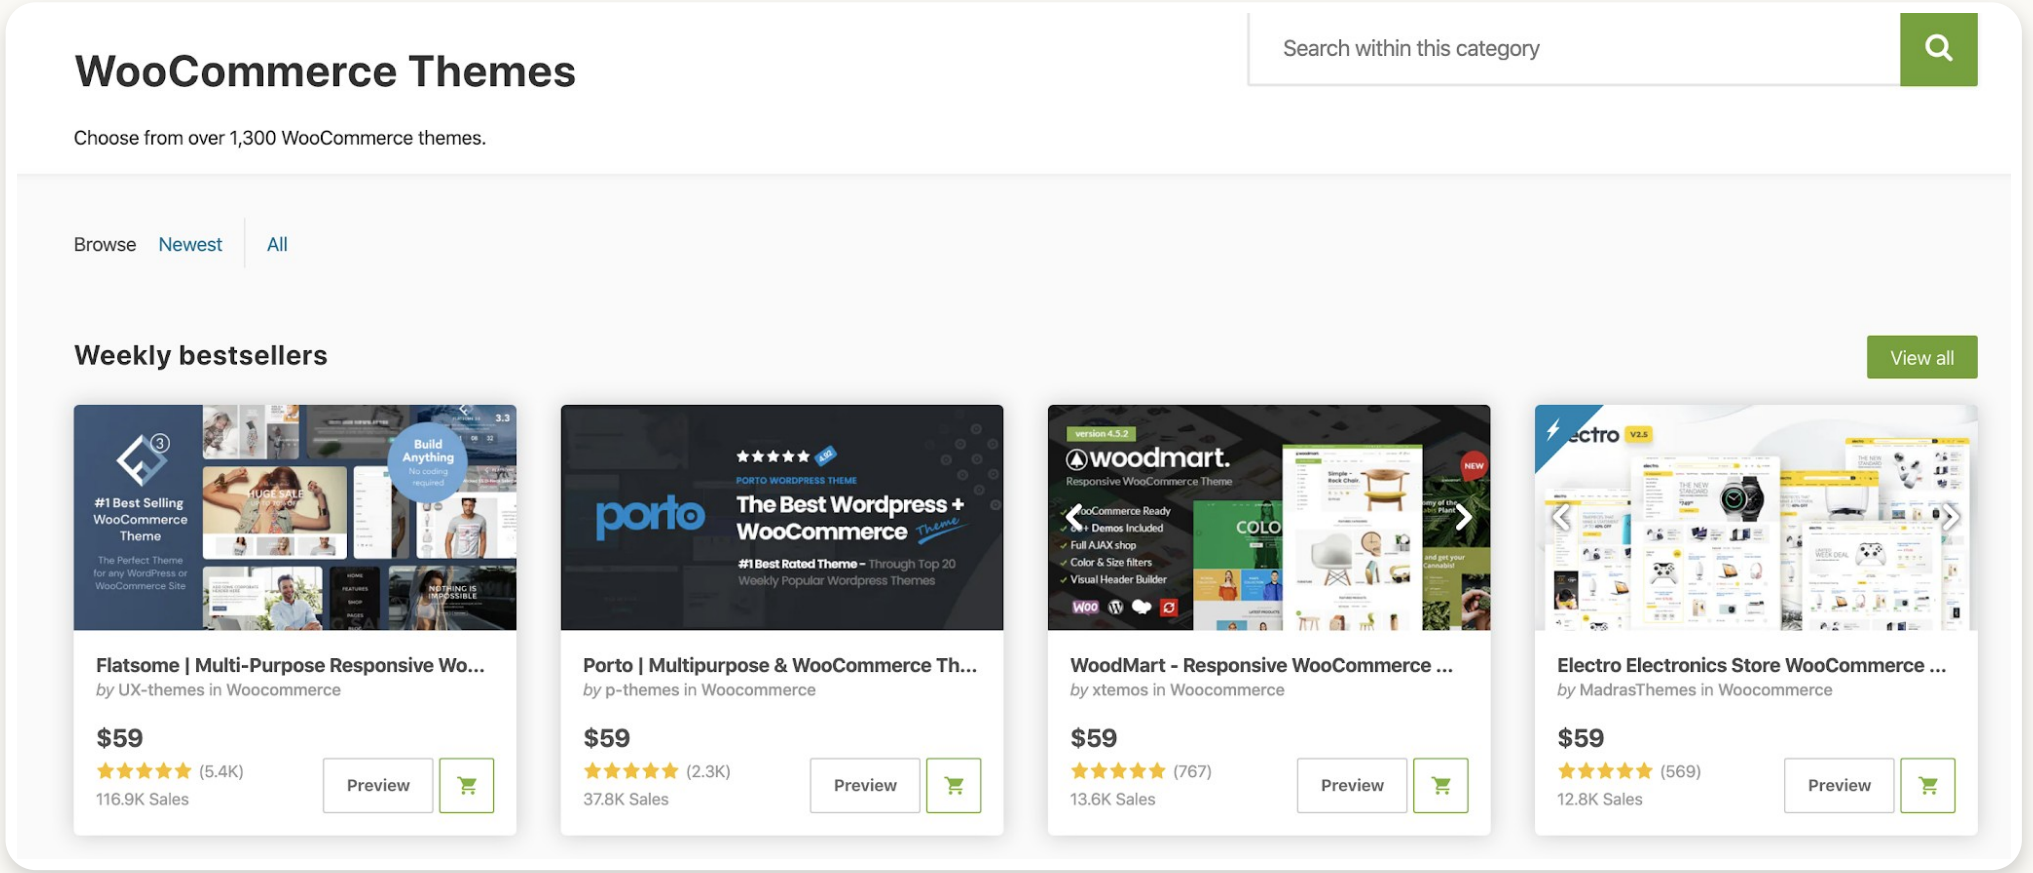

Professional WooCommerce Themes

- Official themes — https://woocommerce.com/product-category/themes

© Tertiary Infotech Academy Pte Ltd

Third-Party WooCommerce Themes

- ThemeForest — https://themeforest.net/category/wordpress/ecommerce/woocommerce

© Tertiary Infotech Academy Pte Ltd

Choosing the Right Theme

Aesthetic

Does it suit your brand and the products you sell?

Release frequency

An actively maintained theme keeps pace with WooCommerce updates.

Support

Is there documentation and a responsive support channel?

Custom functionality

What does it add beyond styling — and will that lock you in?

Responsive

It must work on a phone; most storefront traffic is mobile.

Compatibility

Confirm it declares WooCommerce support explicitly.

© Tertiary Infotech Academy Pte Ltd

WooCommerce Widgets

Product widgets

Products, Products by Rating, Recent Product Reviews, Recently Viewed Products.

Filter widgets

Filter by Attribute, Filter by Price, Filter by Rating, plus Active Product Filters.

Navigation widgets

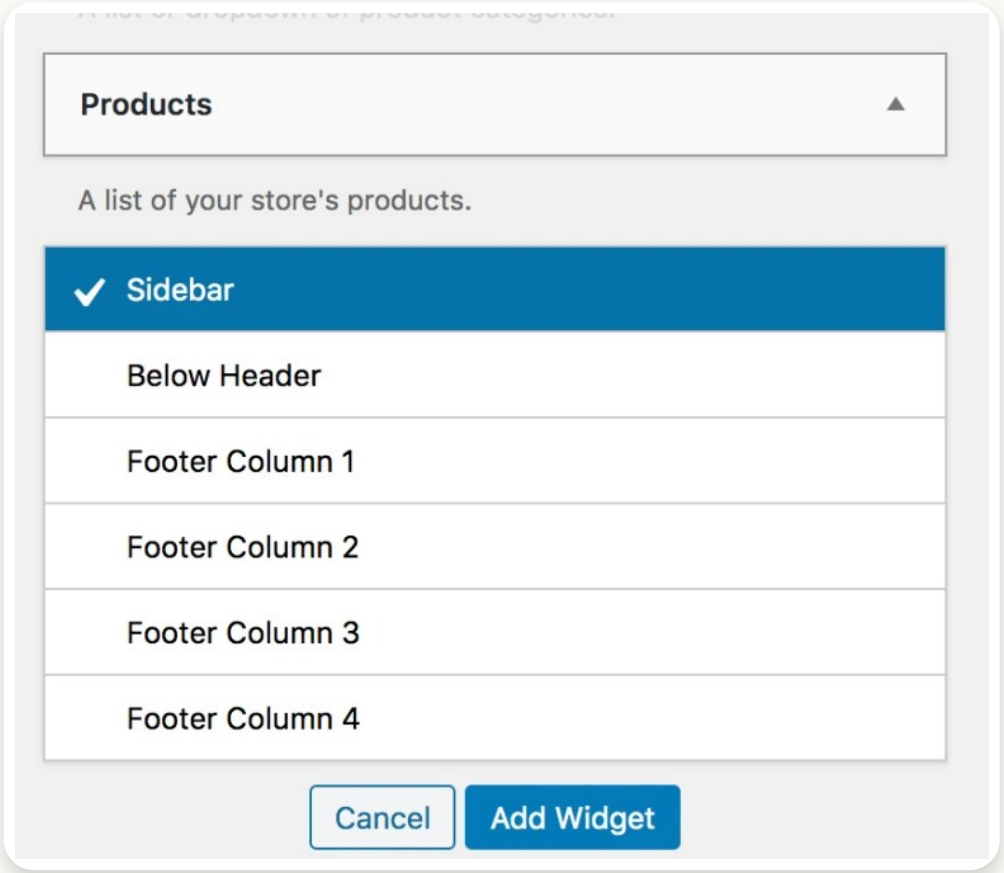

Product Categories as a list or dropdown, and a Product Tag Cloud.

Utility widgets

Cart and Product Search, so customers can buy and find from any page.

© Tertiary Infotech Academy Pte Ltd

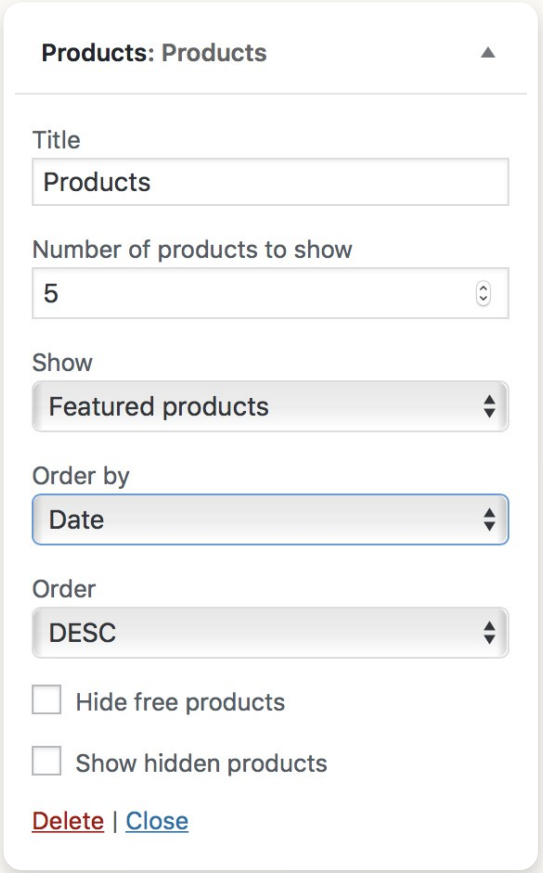

Adding a Widget

- Appearance > Widgets — choose a widget area, then Add Widget.

© Tertiary Infotech Academy Pte Ltd

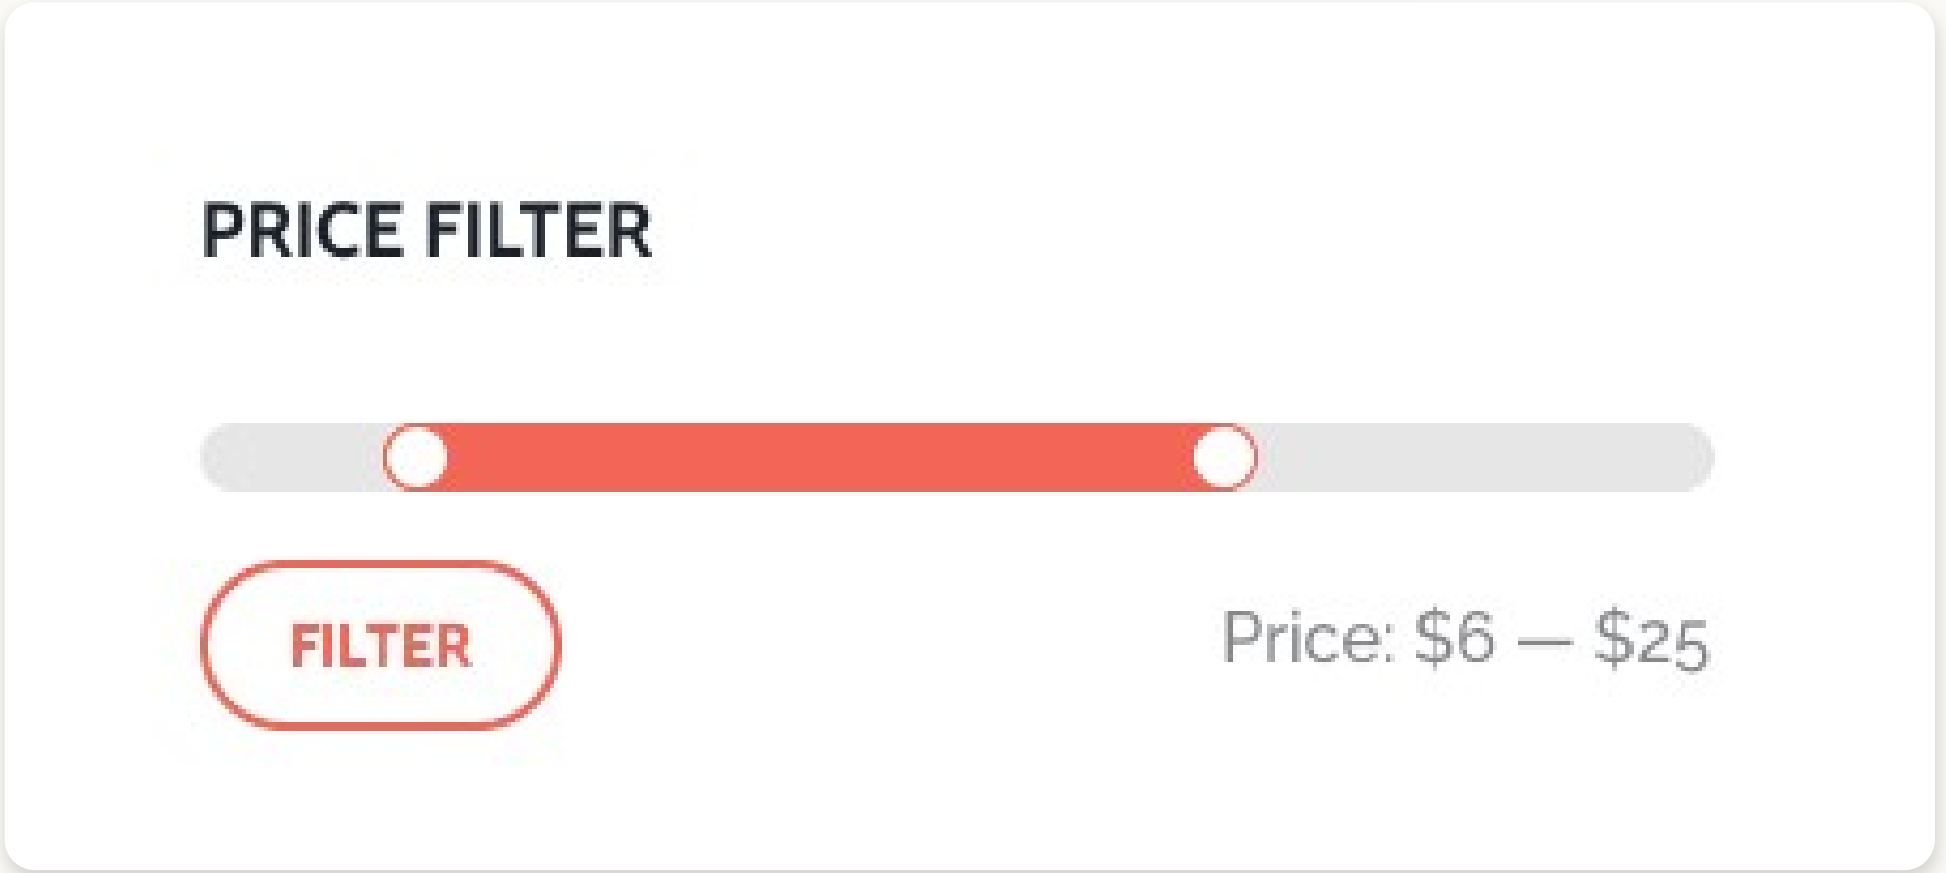

The Products Widget

- Show products by date, price, sales or randomly — all, featured only, or on sale.

© Tertiary Infotech Academy Pte Ltd

Filter Products by Price

- A slider that auto-detects the minimum and maximum prices on the page.

© Tertiary Infotech Academy Pte Ltd

Filter Products by Attribute

- Layered navigation — AND returns products matching both terms, OR matches either.

© Tertiary Infotech Academy Pte Ltd

Shortcodes Included with WooCommerce

[woocommerce_cart]

Renders the cart page.

[woocommerce_checkout]

Renders the checkout page.

[woocommerce_my_account]

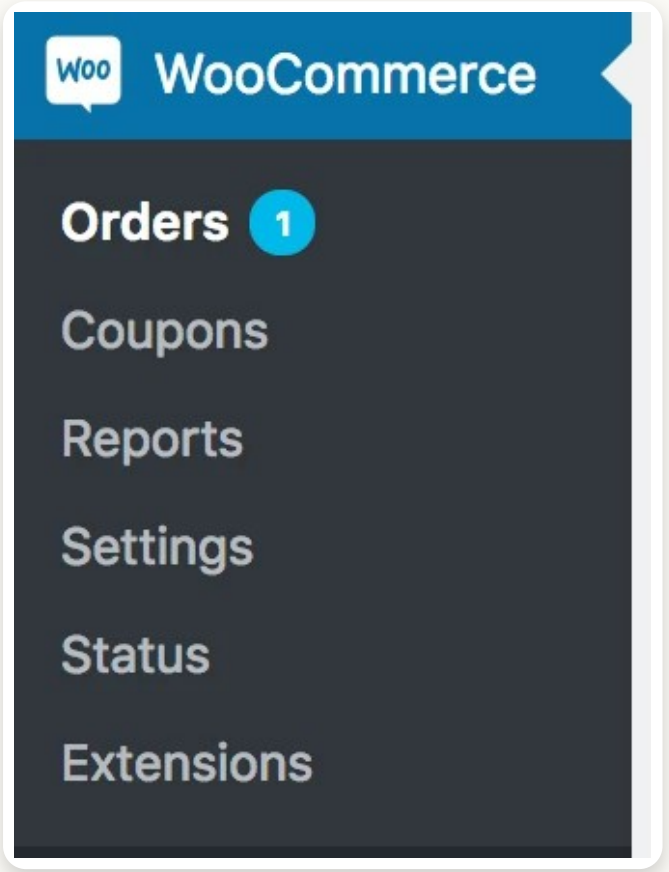

Renders the customer account page.

[woocommerce_order_tracking]

Renders the order tracking form.

© Tertiary Infotech Academy Pte Ltd

WooCommerce Menu Items

- Orders, Coupons, Reports and Settings — the four places you work every day.

© Tertiary Infotech Academy Pte Ltd

Configuring WooCommerce Settings

General

Store address, selling and shipping locations, taxes and currency options.

Products

Shop pages, measurements, reviews, inventory and downloadable products.

Tax

Prices entered with tax, tax rates, and how tax is calculated and displayed.

Shipping

Shipping zones, methods, classes and shipping options.

Payments

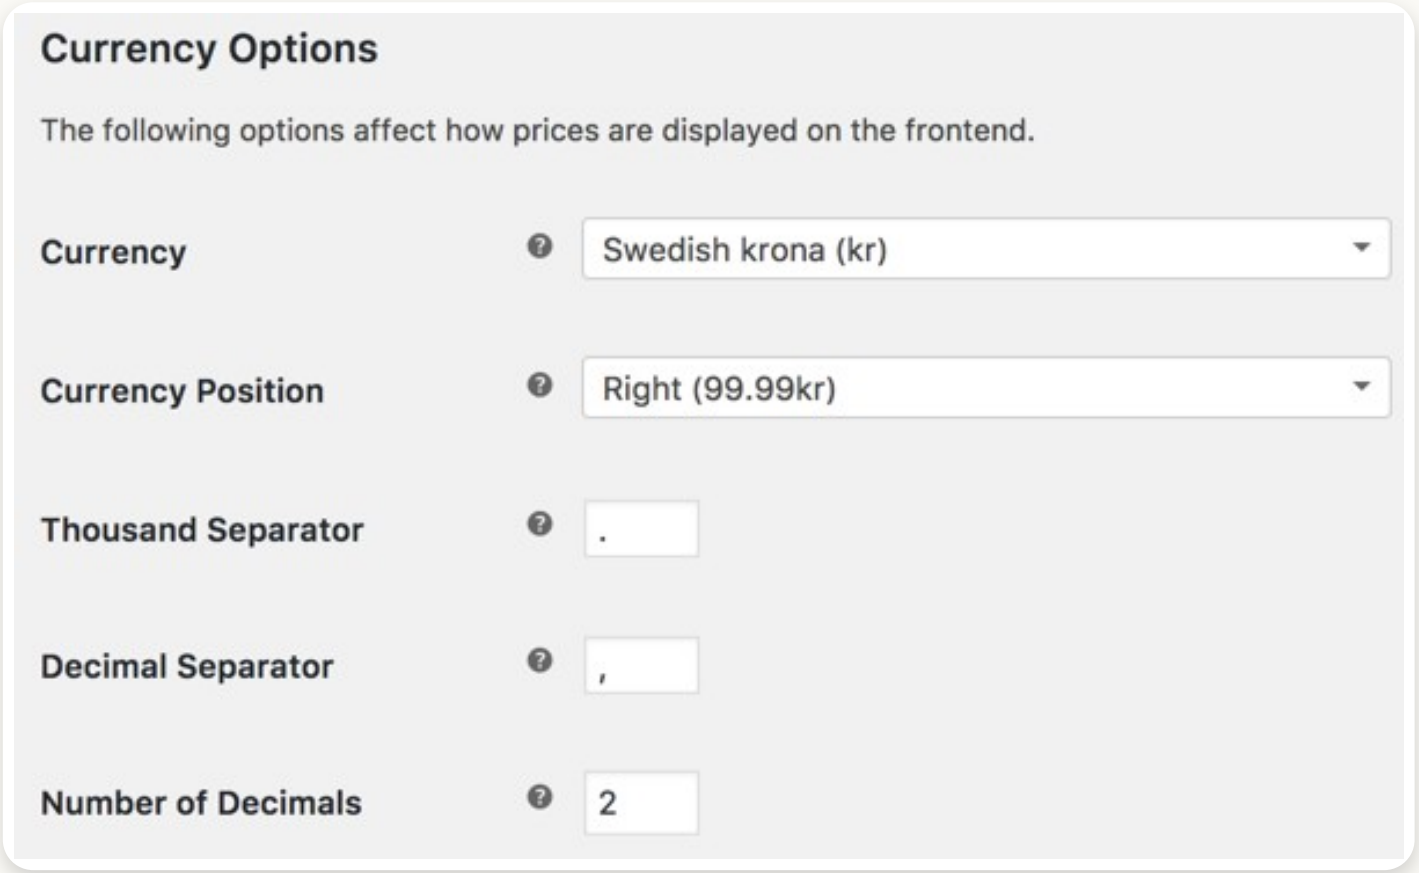

Which gateways are enabled and the order they appear at checkout.

Accounts & Privacy

Guest checkout, account creation, and data retention policy.

© Tertiary Infotech Academy Pte Ltd

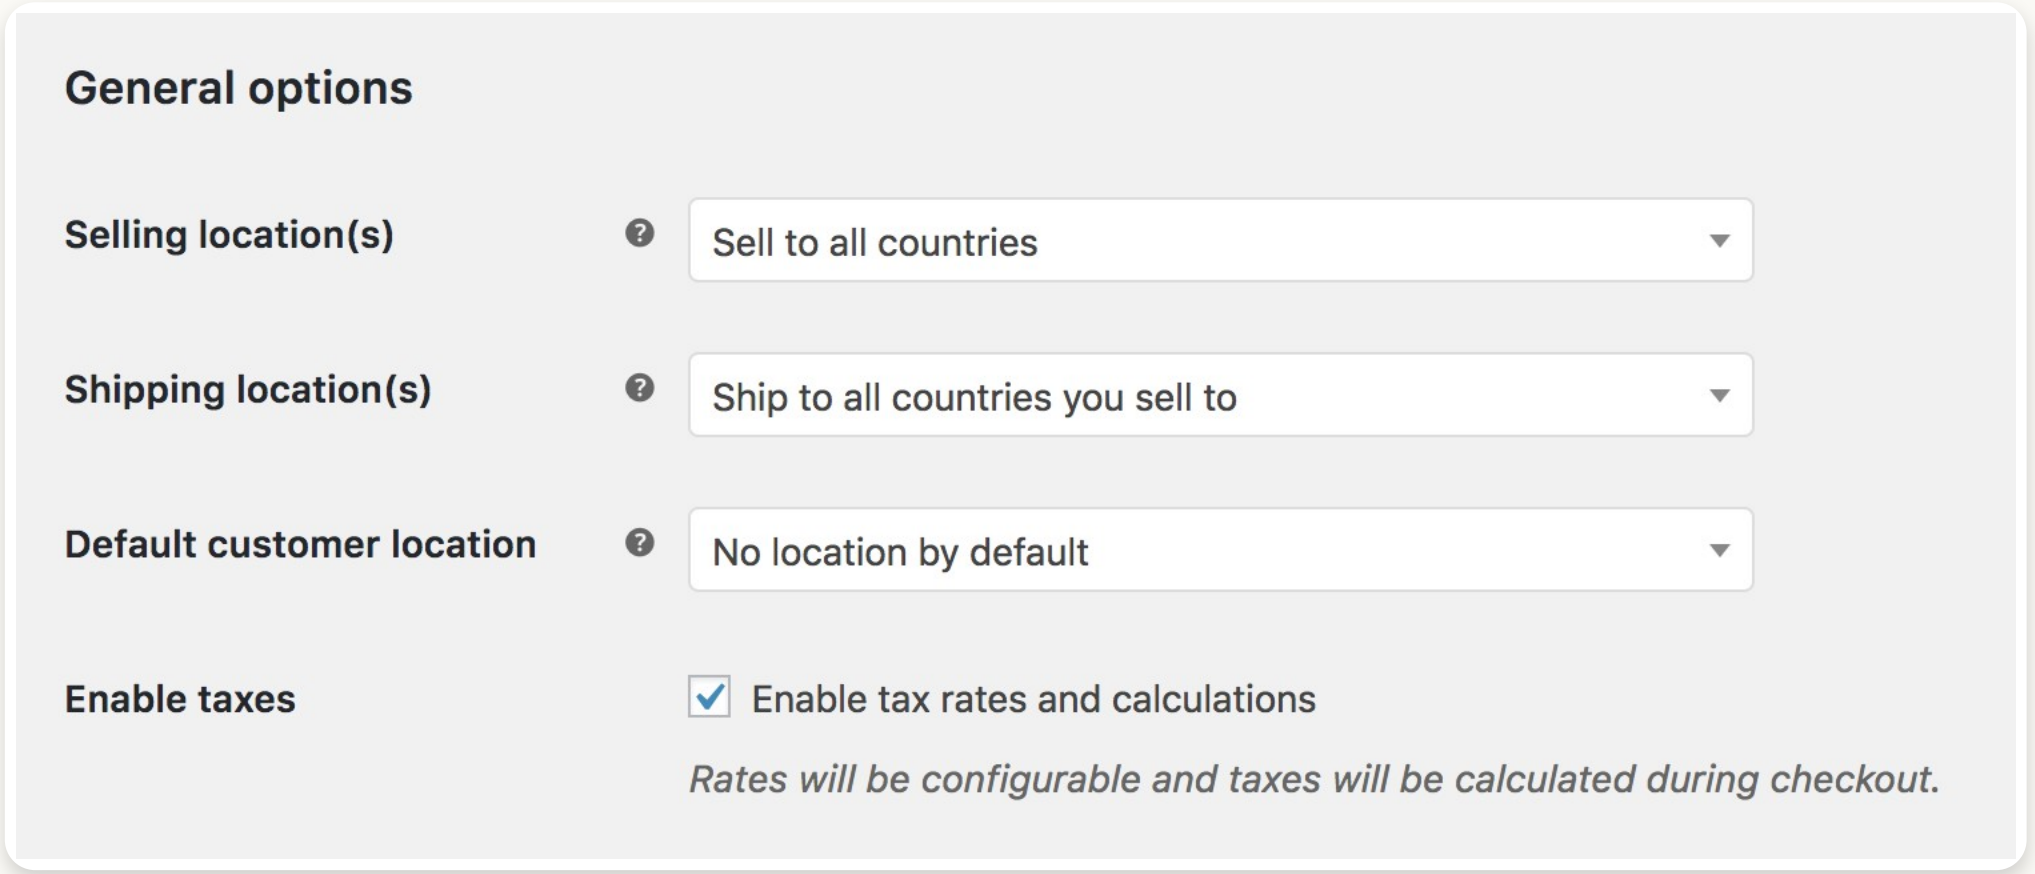

Shop Currency

- WooCommerce > Settings > General > Currency options.

© Tertiary Infotech Academy Pte Ltd

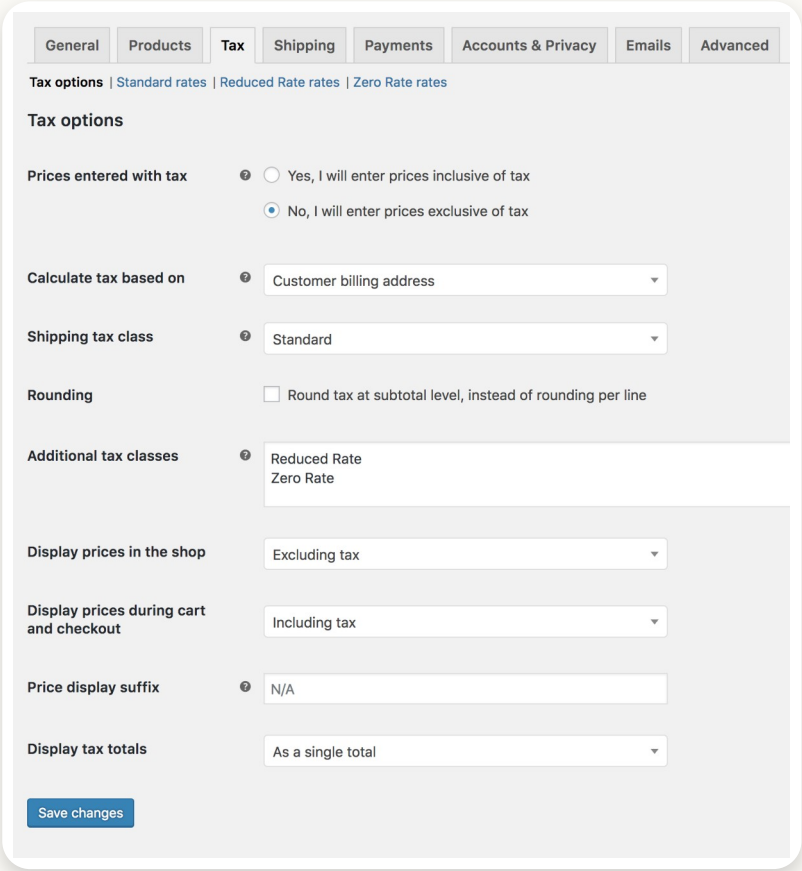

Enabling Taxes

- Tick 'Enable taxes and tax calculations' — the Tax tab then appears.

© Tertiary Infotech Academy Pte Ltd

Configuring Tax Options

- WooCommerce > Settings > Tax — visible only once taxes are enabled.

© Tertiary Infotech Academy Pte Ltd

Prices Entered With Tax

Inclusive

'Yes, I will enter prices inclusive of tax' — catalogue prices already contain the base tax rate.

Exclusive

'No, I will enter prices exclusive of tax' — tax is added on top at checkout.

Inclusive formula

tax_amount = price − (price / ((tax_rate% / 100) + 1))

Exclusive formula

tax_amount = price × (tax_rate% / 100)

© Tertiary Infotech Academy Pte Ltd

Singapore Dollars and 9% GST — the Settings That Matter

Setting	Where	Harbour & Co value	Why
Currency	Settings > General	Singapore dollar — shown as S$ by the toolkit	WooCommerce's SGD symbol is a plain $
Default customer location	Settings > General	Shop country/region	Unknown visitors otherwise see prices without GST
Prices entered with tax	Settings > Tax	Yes — inclusive	Every product price already contains GST
Standard rate	Tax > Standard rates	SG · 9% · GST	Singapore GST rate since 1 Jan 2024
Shipping cost	Shipping > zone > Flat rate	4.59, taxable	Shipping costs are entered excluding tax: 4.59 + 9% = S$5.00

TIP Every row here was checked on a live WooCommerce 11 store before it went on this slide.

© Tertiary Infotech Academy Pte Ltd

Three Ways AI Output Becomes a WordPress Page

Custom HTML block

Paste the AI's HTML + CSS into one block. Fast, exact, but edited as code.

Block patterns

Reusable designed sections — the toolkit adds Hero, Collections, New arrivals, Trust bar, Policy links.

Paste Markdown

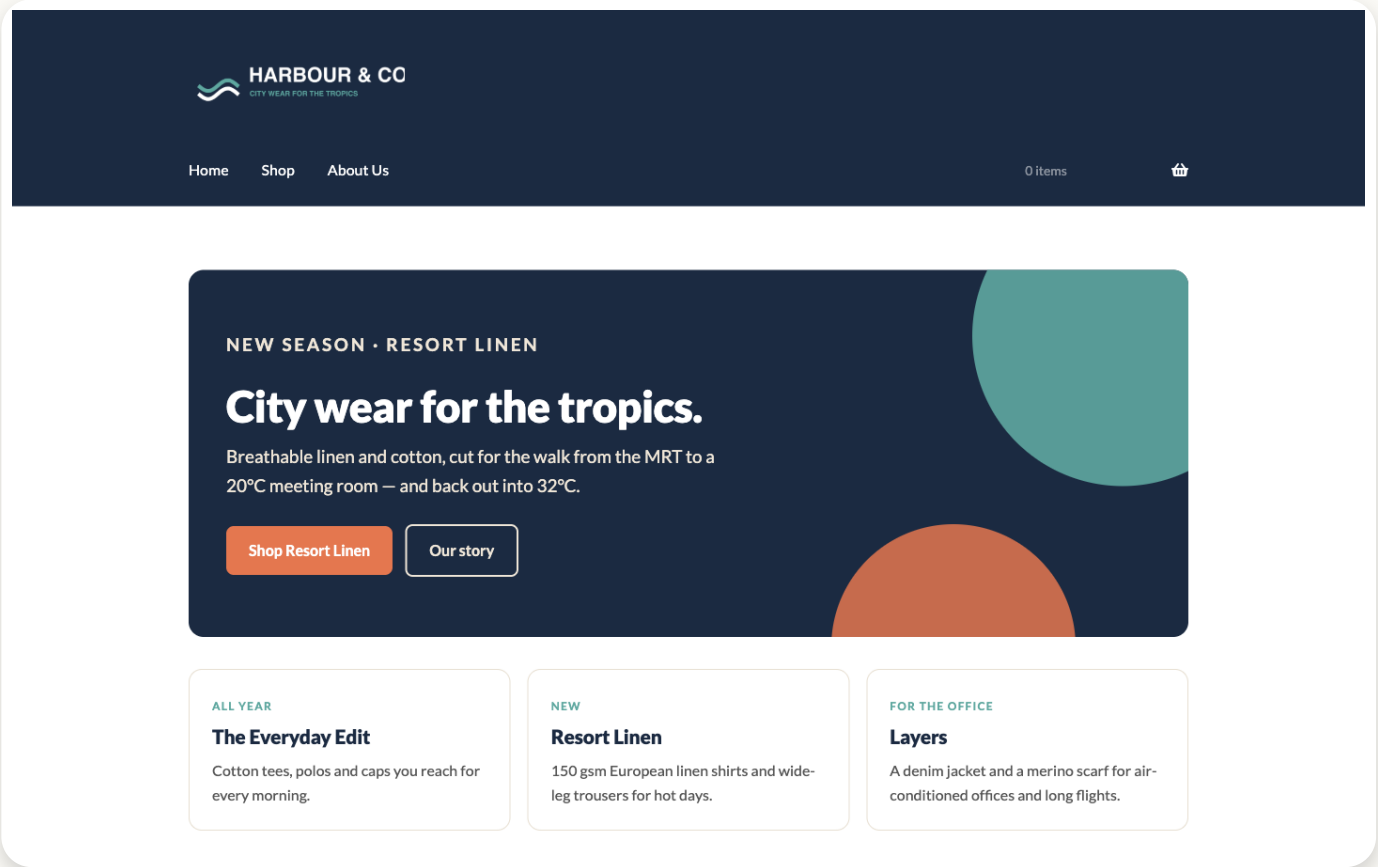

Paste AI Markdown into the editor: # headings and lists turn into real blocks.

TIP Lab 1 uses the first two: the AI-written homepage in a Custom HTML block, plus the live New arrivals pattern.

© Tertiary Infotech Academy Pte Ltd

TOPIC 2 · WHAT YOU'LL BUILD

The Harbour & Co Homepage — AI-Designed, Live on WooCommerce

- Built in the docker test store from the Lab 1 template and the toolkit plugin — your version will differ.

© Tertiary Infotech Academy Pte Ltd

TOPIC 2 · LAB 1 · PHASE 1

Lab 1 — Launch Harbour & Co — WooCommerce Plus an AI-Designed Homepage

Install WooCommerce, run the wizard, then let ChatGPT design the homepage you publish.

The business scenario

Rachel Lim has a WordPress site and a studio shop, but no online store. Today you install WooCommerce, set Singapore dollars and 9% GST the way her accountant wants, give her shop manager the right role, and publish a homepage that ChatGPT designs from the Harbour & Co brand brief.

You will deliver

- ✓ WooCommerce installed and the setup wizard completed for Harbour & Co
- ✓ Store address, S$ currency and 9% GST (prices inclusive) saved
- ✓ Storefront theme and the Harbour & Co Toolkit plugin active
- ✓ An AI-designed homepage published and set as the front page
- ✓ A Shop manager user for Daniel Koh — the permissions policy in action

AI does ChatGPT writes the homepage copy and the page layout as WordPress-ready HTML.

You decide You choose the layout, check every claim against the brand brief, and decide who may publish.

Time 25 min · LO1

© Tertiary Infotech Academy Pte Ltd

Lab 1 — How it runs

Orange cards are you; dark cards are the AI. Nothing goes live without you.

YOU · STEP 1

Log in

Your demo site /wp-admin with your training login.

YOU · STEP 2

Install WooCommerce

Plugins > Add Plugin, then run the setup wizard.

YOU · STEP 3

Set money rules

S$, 9% GST inclusive, Singapore selling location.

AI · STEP 4

AI designs the homepage

ChatGPT turns the brand brief into page HTML.

YOU · STEP 5

You check and publish

Fix any claim the brief does not support; publish.

YOU · STEP 6

Set permissions

Daniel Koh becomes Shop manager, not Administrator.

Checkpoint Your site's front page shows the Harbour & Co homepage, prices display in S$, and Users lists Daniel Koh as Shop manager.

© Tertiary Infotech Academy Pte Ltd

Lab 1 — The Steps

#	Step	Where
1	Log in to your demo site	Browser
2	Install and activate WooCommerce	Plugins > Add Plugin
3	Run the setup wizard for Harbour & Co	WooCommerce setup wizard
4	Set the address, selling location and currency	WooCommerce > Settings > General
5	Enter prices inclusive of 9% GST	WooCommerce > Settings > Tax
6	Apply the Storefront theme	Appearance > Themes > Add New Theme
7	Upload the Harbour & Co Toolkit plugin	Plugins > Add Plugin > Upload Plugin
8	Ask ChatGPT to design the homepage [AI prompt]	ChatGPT (chatgpt.com) — a new chat
9	Publish the homepage	Pages > Add Page
10	Make it the front page	Settings > Reading
11	Add the logo and the main menu	Appearance > Customize > Site Identity · Appearance > Menus
12	Give the shop manager the right role	Users > Add User

TIP Full instructions, values and the Prompt Playbook: labs/lab-01-launch-harbour-and-co/LAB-01-Instructions.pdf

© Tertiary Infotech Academy Pte Ltd

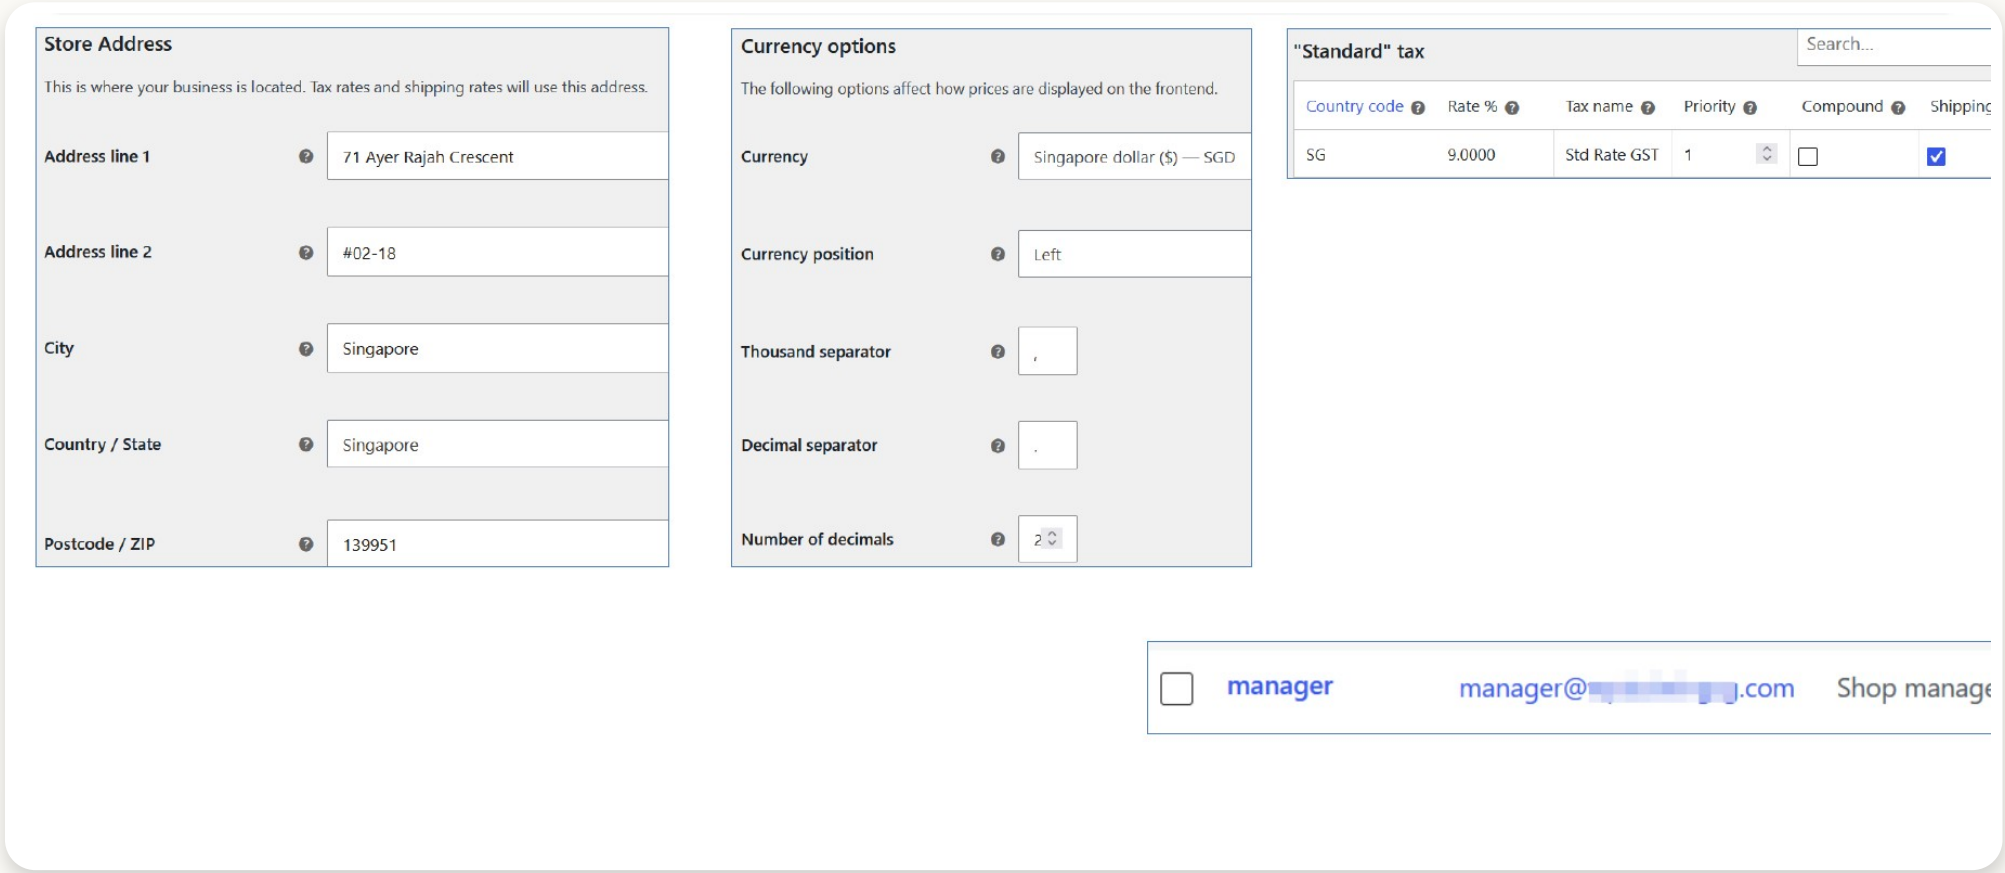

Step 8 · Ask ChatGPT to design the homepage

PROMPT · copy from labs/prompts/index.html or COPY-PROMPTS.txt

```
ROLE: You are a senior eCommerce web designer who builds WooCommerce storefronts.
CONTEXT: The attached brand brief describes Harbour & Co, a Singapore fashion label. The site runs
WordPress with the Storefront theme. The page will go inside ONE WordPress 'Custom HTML' block.
TASK: Write the homepage as a single self-contained HTML snippet with these sections in order:
1. Hero — headline, one-line pitch, two buttons: 'Shop Resort Linen' (/product-category/apparel/) and 'Our
story' (/about-us/)
2. Three collection cards — The Everyday Edit, Resort Linen, Layers — one sentence each
3. A trust bar — free delivery above S$100, 14-day returns, PayNow and card, studio pickup
4. A short founder note from Rachel Lim (3 sentences)
CONSTRAINTS: Use only inline CSS in a <style> block scoped to a .hc-home wrapper. Colours #1B2A41,
#5FA8A0, #EFE6D8, #E4774F; font Lato. No JavaScript, no external images, no <html>/<head>/<body> tags.
Mobile-friendly (stack cards under 700px). Use British spelling. Prices in S$ including 9% GST. Do not
invent facts, reviews, awards or sustainability claims.
FORMAT: One HTML code block, then a 3-bullet list of any claim I should double-check.
```

© Tertiary Infotech Academy Pte Ltd

What the Settings Look Like

- Store address, Singapore dollar currency and the GST standard rate; Daniel Koh as Shop manager.

© Tertiary Infotech Academy Pte Ltd

Lab 1 — Checkpoint

Verify

WooCommerce > Settings > General shows the Ayer Rajah address, Singapore dollar and shop-base customer location

Verify

Tax > Standard rates has SG · 9% · GST, and prices are entered inclusive of tax

Verify

Storefront and Harbour & Co Toolkit are active

Stretch challenge

Ask ChatGPT for an About Us page that meets E-E-A-T (founder byline, first-hand story, real address) and publish it at /about-us/.

© Tertiary Infotech Academy Pte Ltd

TOPIC 2 · DISCUSSION · 15 MIN

Discussion — Content Management Policies for Your Store

In pairs, consider a store you would run. Decide what content management policies, guidelines and user permissions it needs, and how you would monitor that people actually follow them.

Question 1

Who should be able to publish a product, and who should only be able to draft one?

Question 2

Which WordPress/WooCommerce roles map to those responsibilities?

Question 3

What product-content guidelines would you set — image size, description length, mandatory fields?

Question 4

Who checks AI-written copy before it goes live, and against which brand rules?

TIP Produce: A short policy statement: the roles, the content guidelines, and how adherence is monitored.

© Tertiary Infotech Academy Pte Ltd

TOPIC 3

Manage Products on WooCommerce Store

1. Product types
2. AI product photos & copy
3. Variations
4. Categories, tags & attributes
5. Up-sells & CSV import

© Tertiary Infotech Academy Pte Ltd

TOPIC 3 • WHAT YOU'LL LEARN

Key Concepts in This Topic

Product types

Simple, Grouped, Virtual, Downloadable, External/Affiliate and Variable each model a different kind of offer.

The Product Data panel

General, Inventory, Shipping, Linked Products and Attributes — where the substance of a product is defined.

Images and galleries

A featured image plus a gallery, with catalogue visibility controlling where the product appears.

Categories, tags, attributes

Categories are hierarchical, tags are flat, and attributes drive filtering and product variations.

Up-sells and cross-sells

Up-sells appear on the product page; cross-sells appear in the cart; related products are automatic.

CSV import and export

Create or update hundreds of products in one pass, including variations, from a single CSV file.

© Tertiary Infotech Academy Pte Ltd

Product Types

Simple

The majority of products — shipped, with no options. For example, a book.

Grouped

A collection of related simple products bought individually, e.g. a set of six glasses.

Virtual

Needs no shipping — a service. Disables all shipping fields and the cart calculator.

Downloadable

The customer receives a file after purchase — an album, PDF or photo.

External / Affiliate

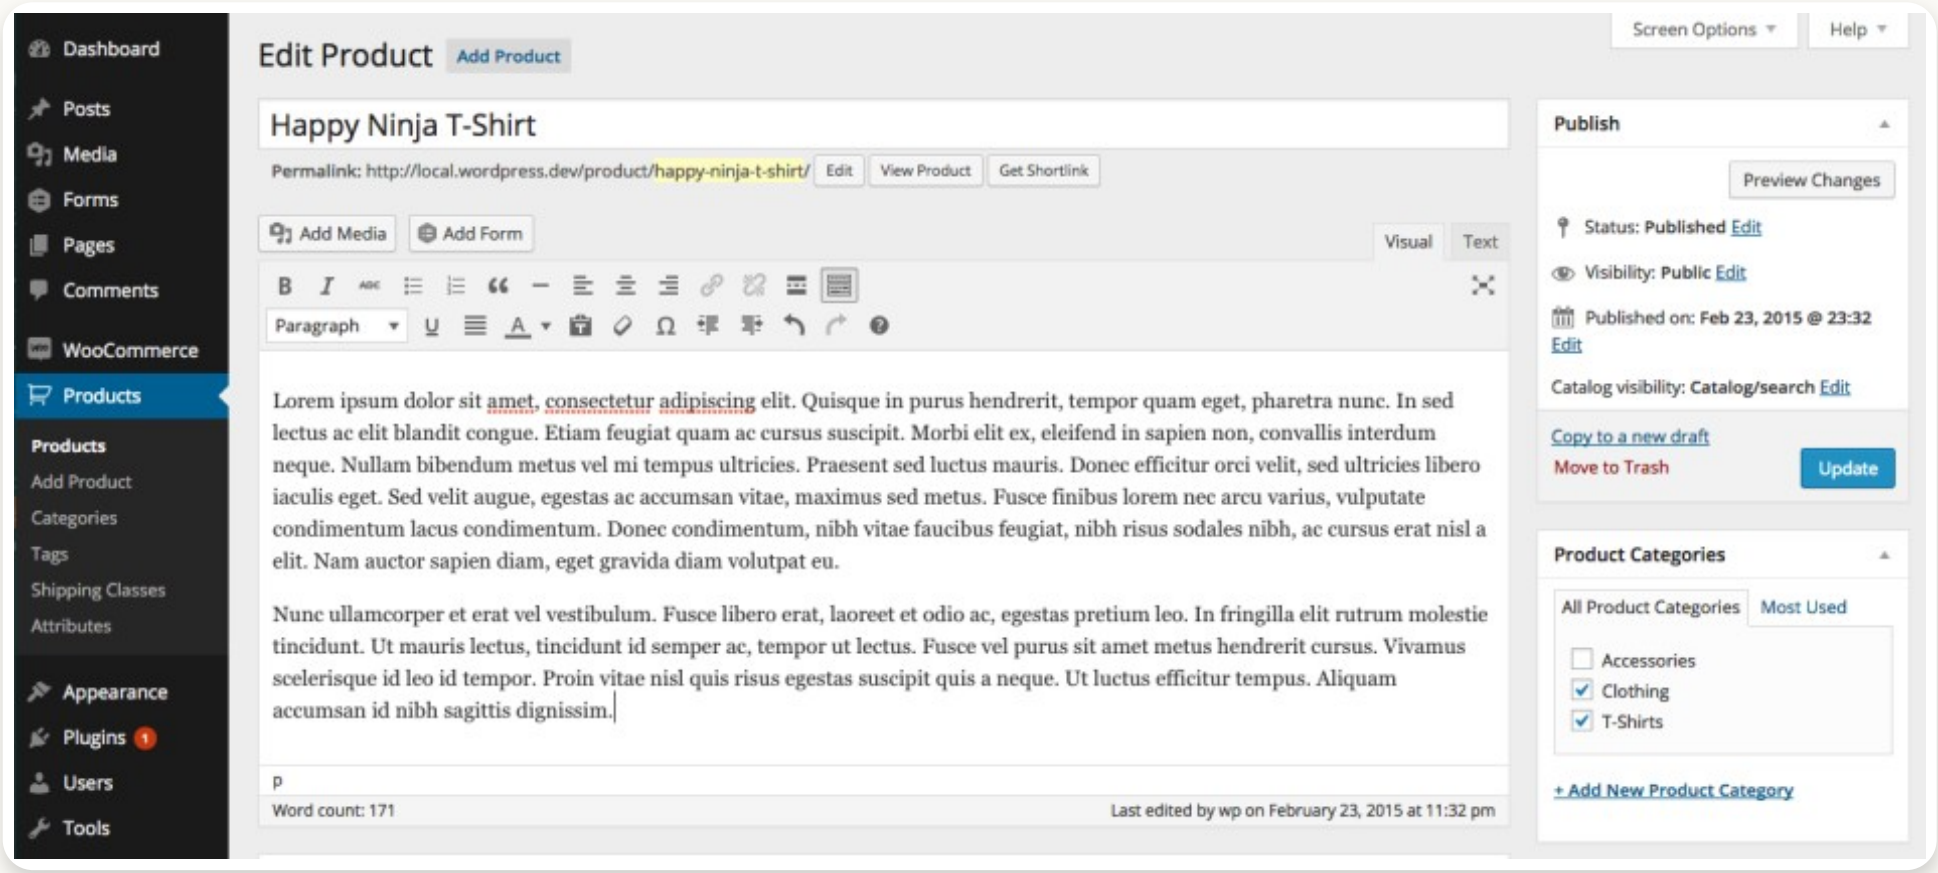

Listed and described on your site, but sold elsewhere.

Variable

Variations with their own SKU, price and stock — e.g. a t-shirt in sizes and colours.

© Tertiary Infotech Academy Pte Ltd

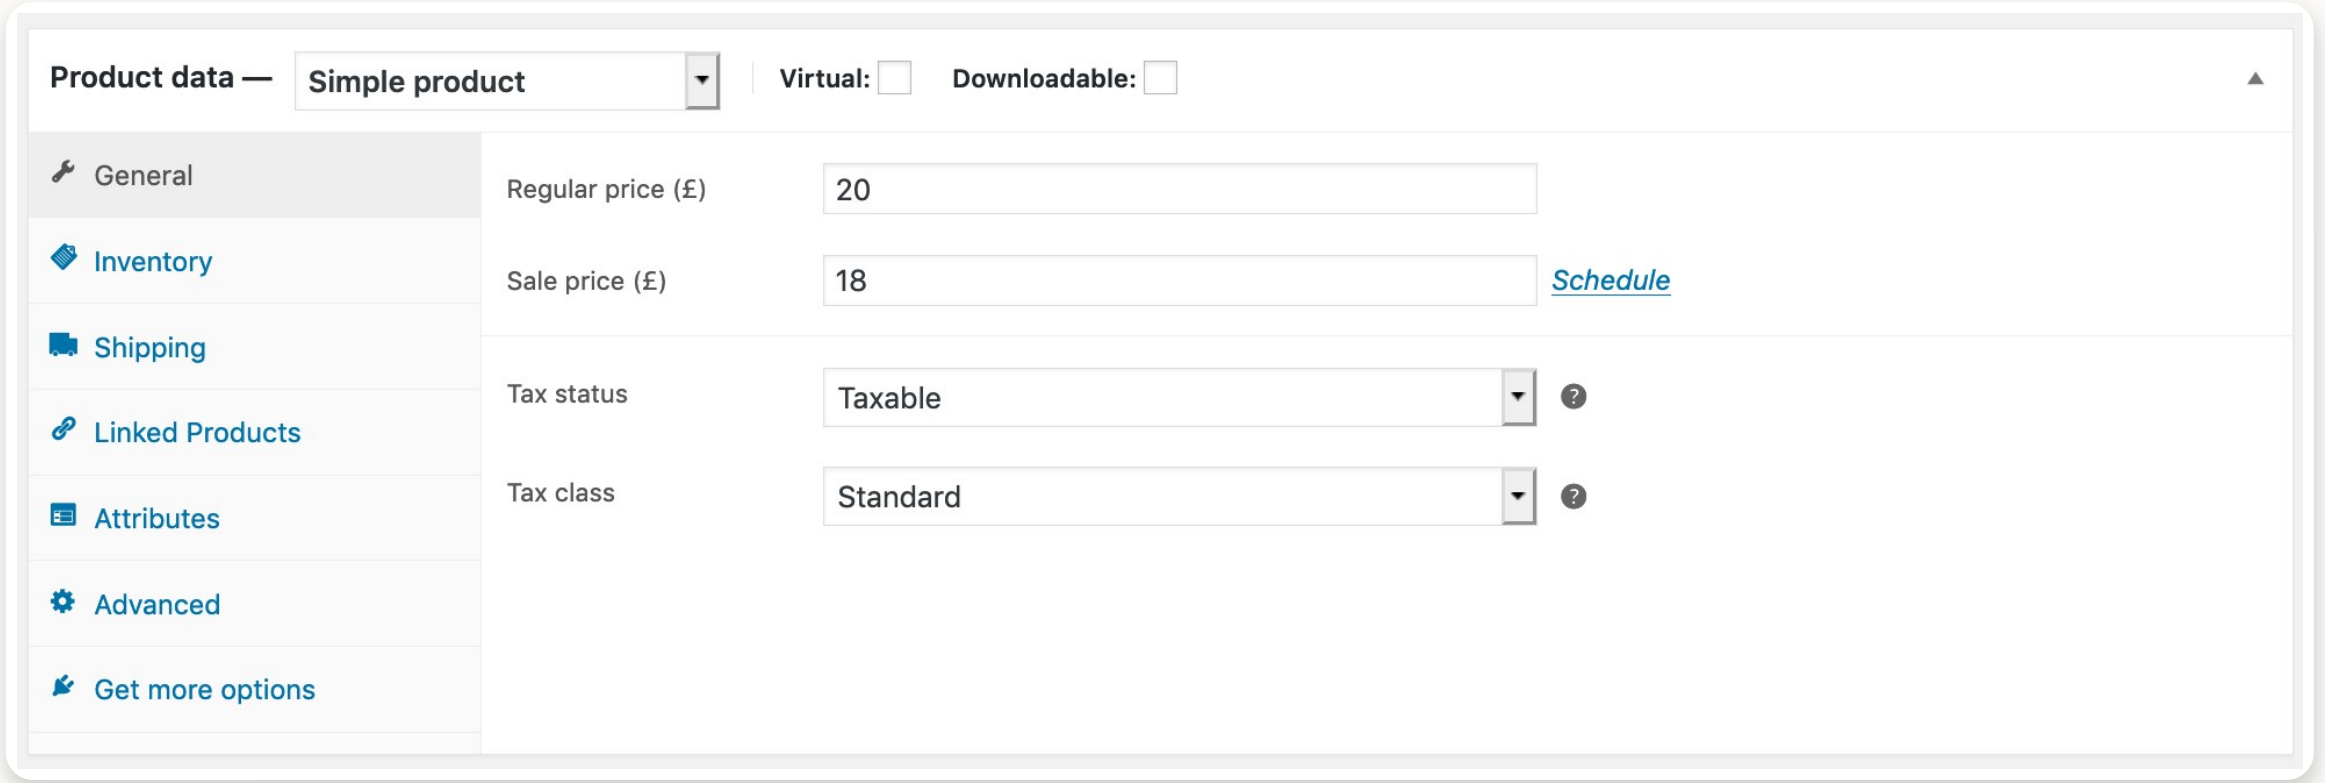

Adding a Simple Product

- Products > Add New — a familiar WordPress editing interface.

© Tertiary Infotech Academy Pte Ltd

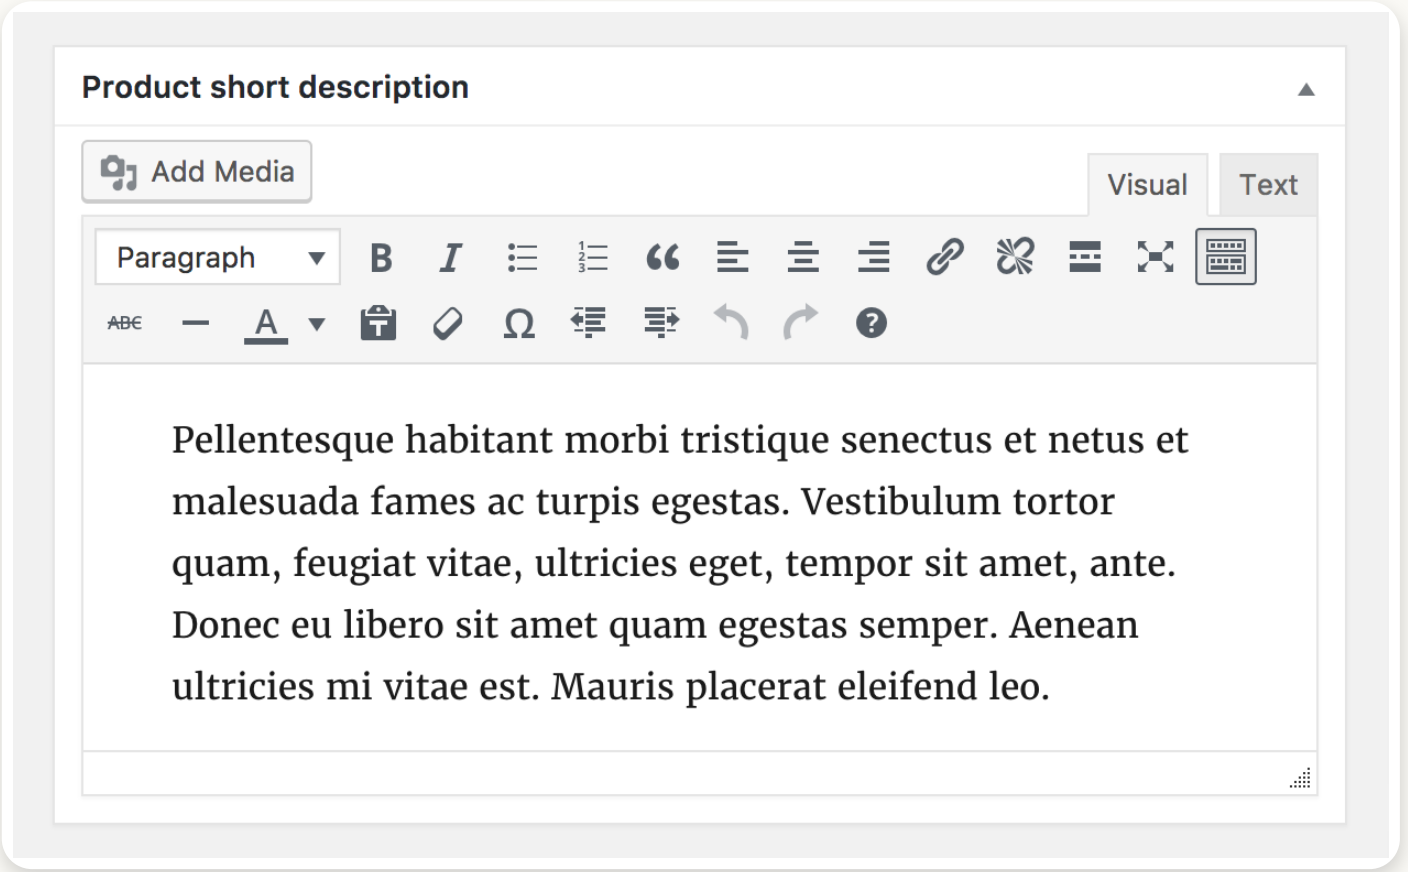

The Product Data Panel

- General, Inventory, Shipping, Linked Products, Attributes and Advanced.

© Tertiary Infotech Academy Pte Ltd

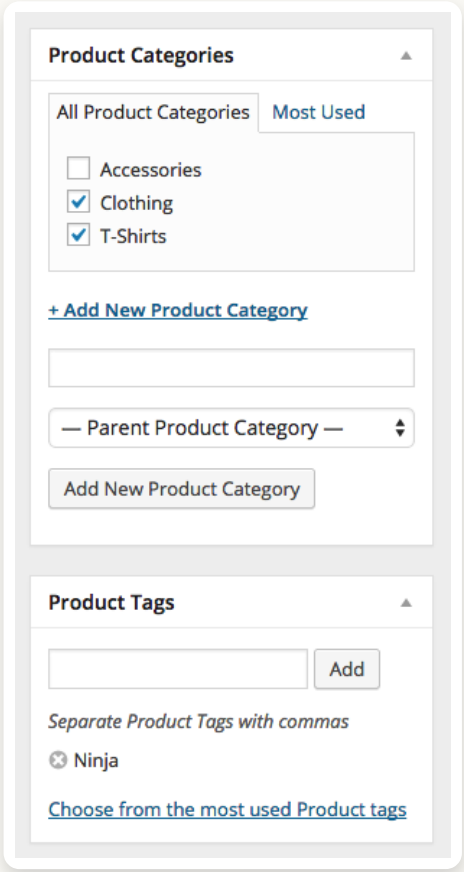

Product Short Description

- The excerpt beside the product image; the long description fills the Description tab.

© Tertiary Infotech Academy Pte Ltd

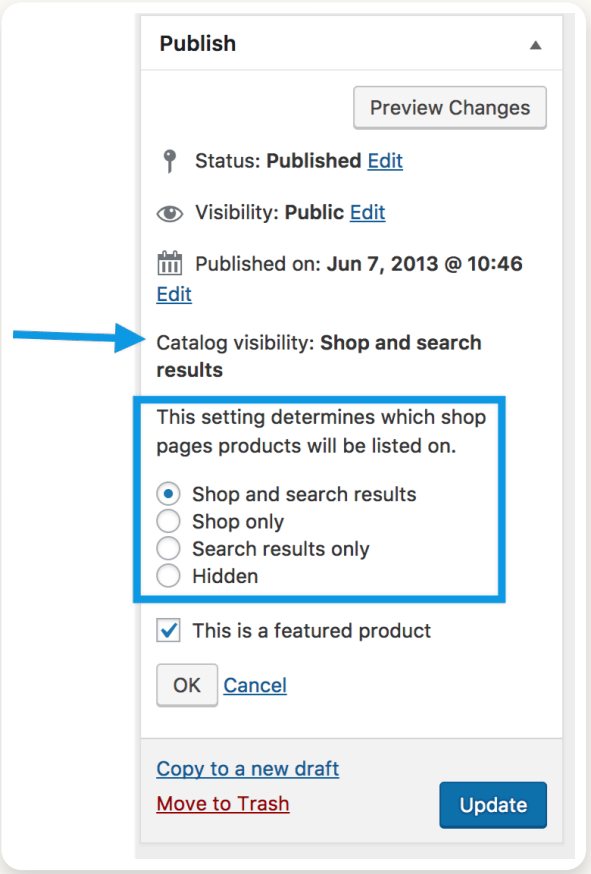

Product Categories and Tags

- Assigned from the right-hand column, exactly like a WordPress post.

© Tertiary Infotech Academy Pte Ltd

Product Images and Galleries

- A featured image plus a gallery — and catalogue visibility controls where it appears.

© Tertiary Infotech Academy Pte Ltd

Catalog Visibility Options

Shop and search

Visible everywhere — shop pages, category pages and search results.

Shop only

Visible in shop and category pages, but not in search results.

Search only

Visible in search results, but not in the shop or category pages.

Hidden

Only reachable on its own product page — useful for unlisted or bundled items.

© Tertiary Infotech Academy Pte Ltd

Prompt the Photo, Then Fact-Check the Copy

Photo prompt

Square 1:1 · flat lay from above · sand linen background · soft daylight · no text, no logos, no people.

Copy prompt

Only facts from the spec sheet · short ≤ 30 words · long: hook, Fabric & fit, Size guide, Care.

Fact-check

Delete 'cooling', 'eco-friendly', 'luxurious' — anything the spec cannot prove.

Alt text

Plain description for screen readers and image search: colour + product + setting.

TIP A product shoot costs time and money; an AI flat lay takes a minute. The facts still come from you.

© Tertiary Infotech Academy Pte Ltd

TOPIC 3 · LAB 2 · PHASE 1

Lab 2 — Shoot and Write a Product with AI

ChatGPT makes the product photo and writes the copy. You publish the Classic Cotton T-Shirt.

The business scenario

Harbour & Co's best-seller, the Classic Cotton T-Shirt, has no photo and no copy. A photo shoot costs S$800 and takes a week. You have nine minutes and ChatGPT. Generate an on-brand product photo, write the description from the spec sheet, and publish the product.

You will deliver

✓ An AI-generated product photo that follows the brand photography rules
✓ A short description (under 30 words) and a long description written by AI, checked by you
✓ The Classic Cotton T-Shirt published: S$29.90, sale S$24.90, SKU, stock 50, category, tags, image, alt text

AI does ChatGPT generates the product photo and drafts the short and long descriptions.

You decide You reject any photo or sentence that breaks the brand brief, and you enter the facts (price, SKU, stock) yourself.

Time 10 min · LO2

© Tertiary Infotech Academy Pte Ltd

Lab 2 — How it runs

Orange cards are you; dark cards are the AI. Nothing goes live without you.

YOU · STEP 1

Spec sheet in

Attach the brand brief and product spec.

AI · STEP 2

AI shoots the photo

ChatGPT generates a 1:1 flat-lay on sand.

AI · STEP 3

AI writes the copy

Short and long description from facts only.

YOU · STEP 4

You fact-check

Delete anything the spec does not say.

YOU · STEP 5

Publish

Products > Add new product with every field filled.

Checkpoint The product page shows your AI photo, the short description beside it, S$24.90 sale price and the Apparel > Shirts category.

© Tertiary Infotech Academy Pte Ltd

Lab 2 — The Steps

#	Step	Where
1	Generate the product photo [AI prompt]	ChatGPT (chatgpt.com) — a new chat
2	Write the descriptions from the facts [AI prompt]	Same ChatGPT chat
3	Fact-check before you paste	You
4	Create the product	Products > Add new product
5	Price, SKU and stock	Product data > General / Inventory / Shipping
6	Category and tags	Product categories / Product tags (right sidebar)
7	Product image and alt text	Product image > Set product image
8	Publish and view it as a customer	Publish > View product

TIP Full instructions, values and the Prompt Playbook: labs/lab-02-ai-product-photos-and-copy/LAB-02-Instructions.pdf

© Tertiary Infotech Academy Pte Ltd

Step 1 · Generate the product photo

PROMPT · copy from labs/prompts/index.html or COPY-PROMPTS.txt

```
ROLE: You are a fashion product photographer.
CONTEXT: Harbour & Co (brand brief attached) sells the Classic
Cotton T-Shirt (spec attached): a white, relaxed-fit 180 gsm
combed-cotton tee.
TASK: Create ONE square (1:1) product photo for the online store.
CONSTRAINTS: Flat lay, viewed from directly above, on a warm sand
(#EFE6D8) linen background. Soft daylight from the left, gentle
shadow, no harsh flash. The tee is neatly folded at the sleeves.
No people, no text, no logos, no props except one small sprig of
green leaves in a corner.
FORMAT: Generate the image.
```

Paste into

ChatGPT — attach data/brand-brief.txt first

Expect

A square, on-brand flat-lay photo. If it takes too long, use assets/images/TSHIRT-CLASSIC-001.jpg.

You decide

You reject any photo or sentence that breaks the brand brief, and you enter the facts (price, SKU, stock) yourself.

© Tertiary Infotech Academy Pte Ltd

Step 2 · Write the descriptions from the facts

PROMPT · copy from labs/prompts/index.html or COPY-PROMPTS.txt

```
ROLE: You are Harbour & Co's copywriter.
CONTEXT: Use ONLY the facts in the attached product spec and the
voice rules in the brand brief.
TASK: Write (a) a product SHORT description of at most 30 words,
and (b) a LONG description that follows this structure: a 2-
sentence hook; 'Fabric & fit'; 'Size guide' as a small table S–XL
with chest width in cm from the spec; 'Care'.
CONSTRAINTS: Use British spelling. Prices in S$ including 9% GST.
Do not invent facts, reviews, awards or sustainability claims. No
claims about cooling, sweat or sustainability.
FORMAT: Two headed sections: SHORT DESCRIPTION and LONG
DESCRIPTION (Markdown).
```

Paste into

ChatGPT — attach data/brand-brief.txt first

Expect

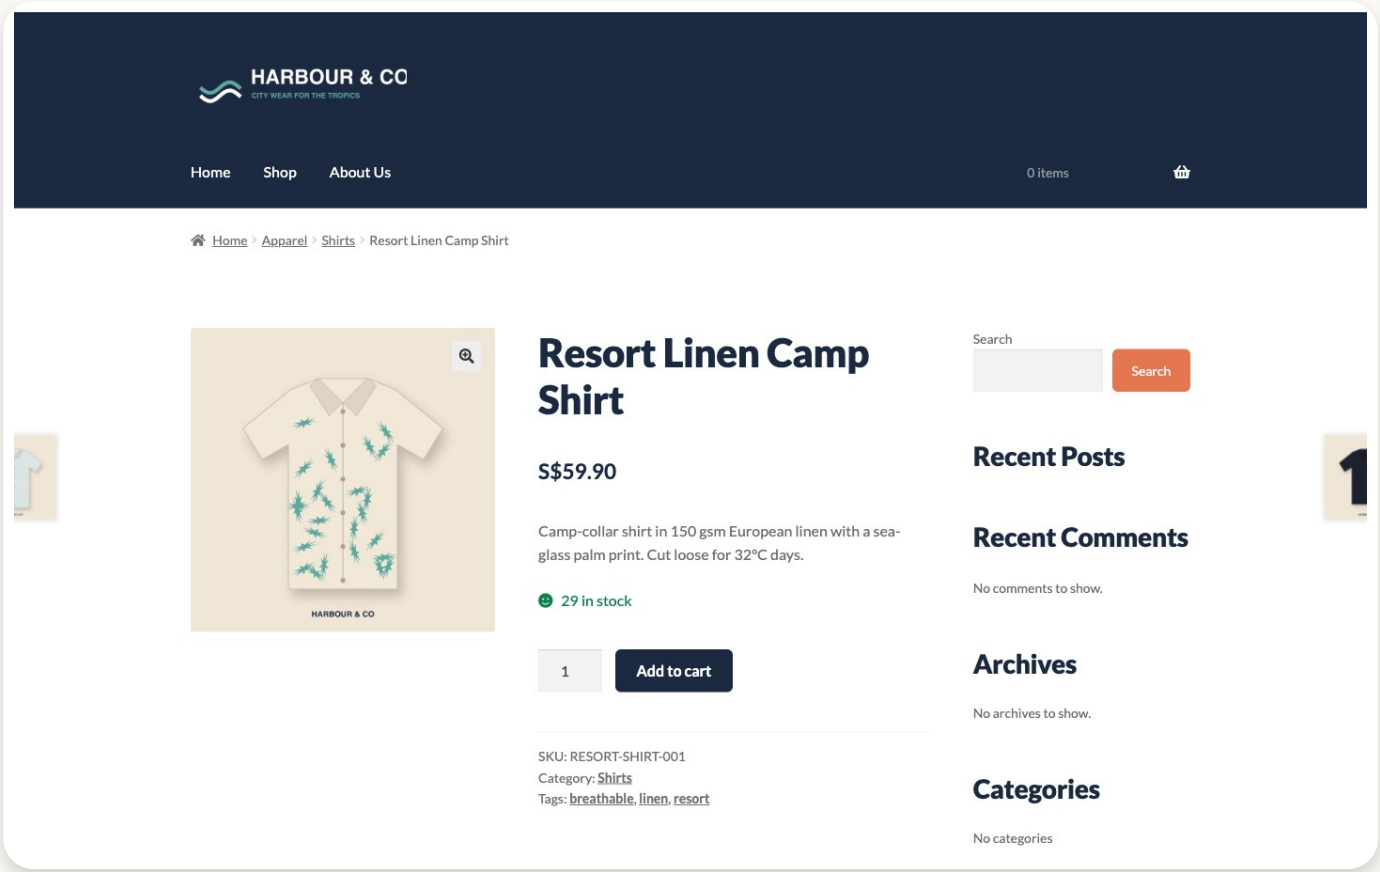

Copy that only uses spec facts. Compare with assets/descriptions/TSHIRT-CLASSIC-001.txt.

You decide

You reject any photo or sentence that breaks the brand brief, and you enter the facts (price, SKU, stock) yourself.

© Tertiary Infotech Academy Pte Ltd

What Done Looks Like

- Product photo, short description, S$ price, stock and the Apparel > Shirts breadcrumb.

© Tertiary Infotech Academy Pte Ltd

Lab 2 — Checkpoint

Verify

The product photo is AI-generated (or the starter image) and follows the brand photo rules

Verify

Short description ≤ 30 words; long description uses only spec facts

Verify

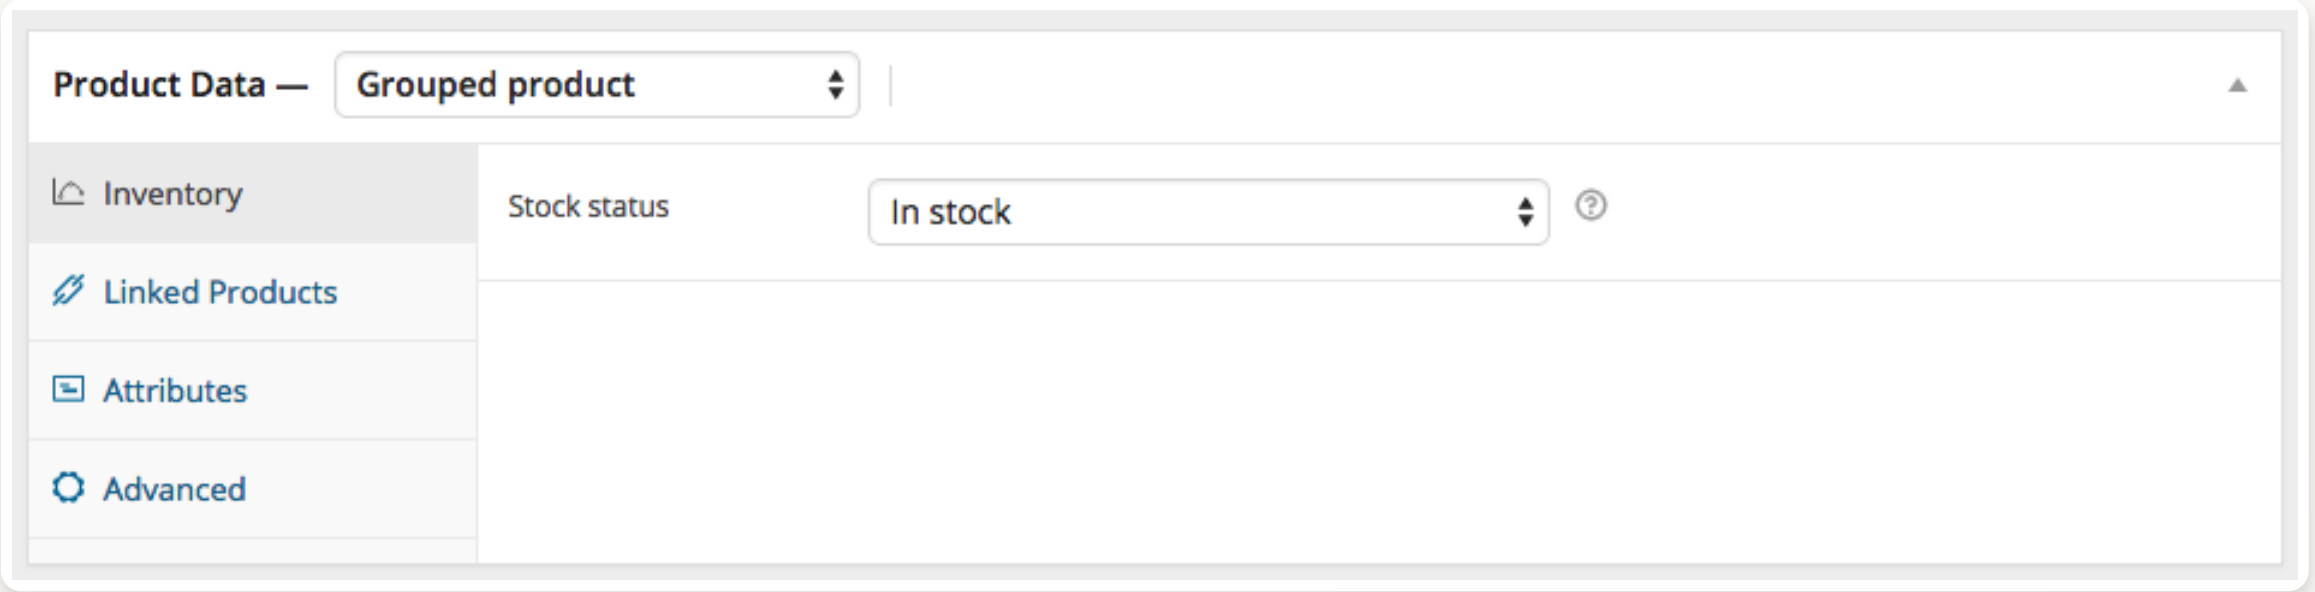

Regular S$29.90, sale S$24.90, SKU TSHIRT-CLASSIC-001, stock 50

Stretch challenge

Repeat for the Cotton Cap (CAP-COTTON-001, S$19.90, Accessories) and ask ChatGPT for three photo variations — pick the one that best matches the brief.

© Tertiary Infotech Academy Pte Ltd

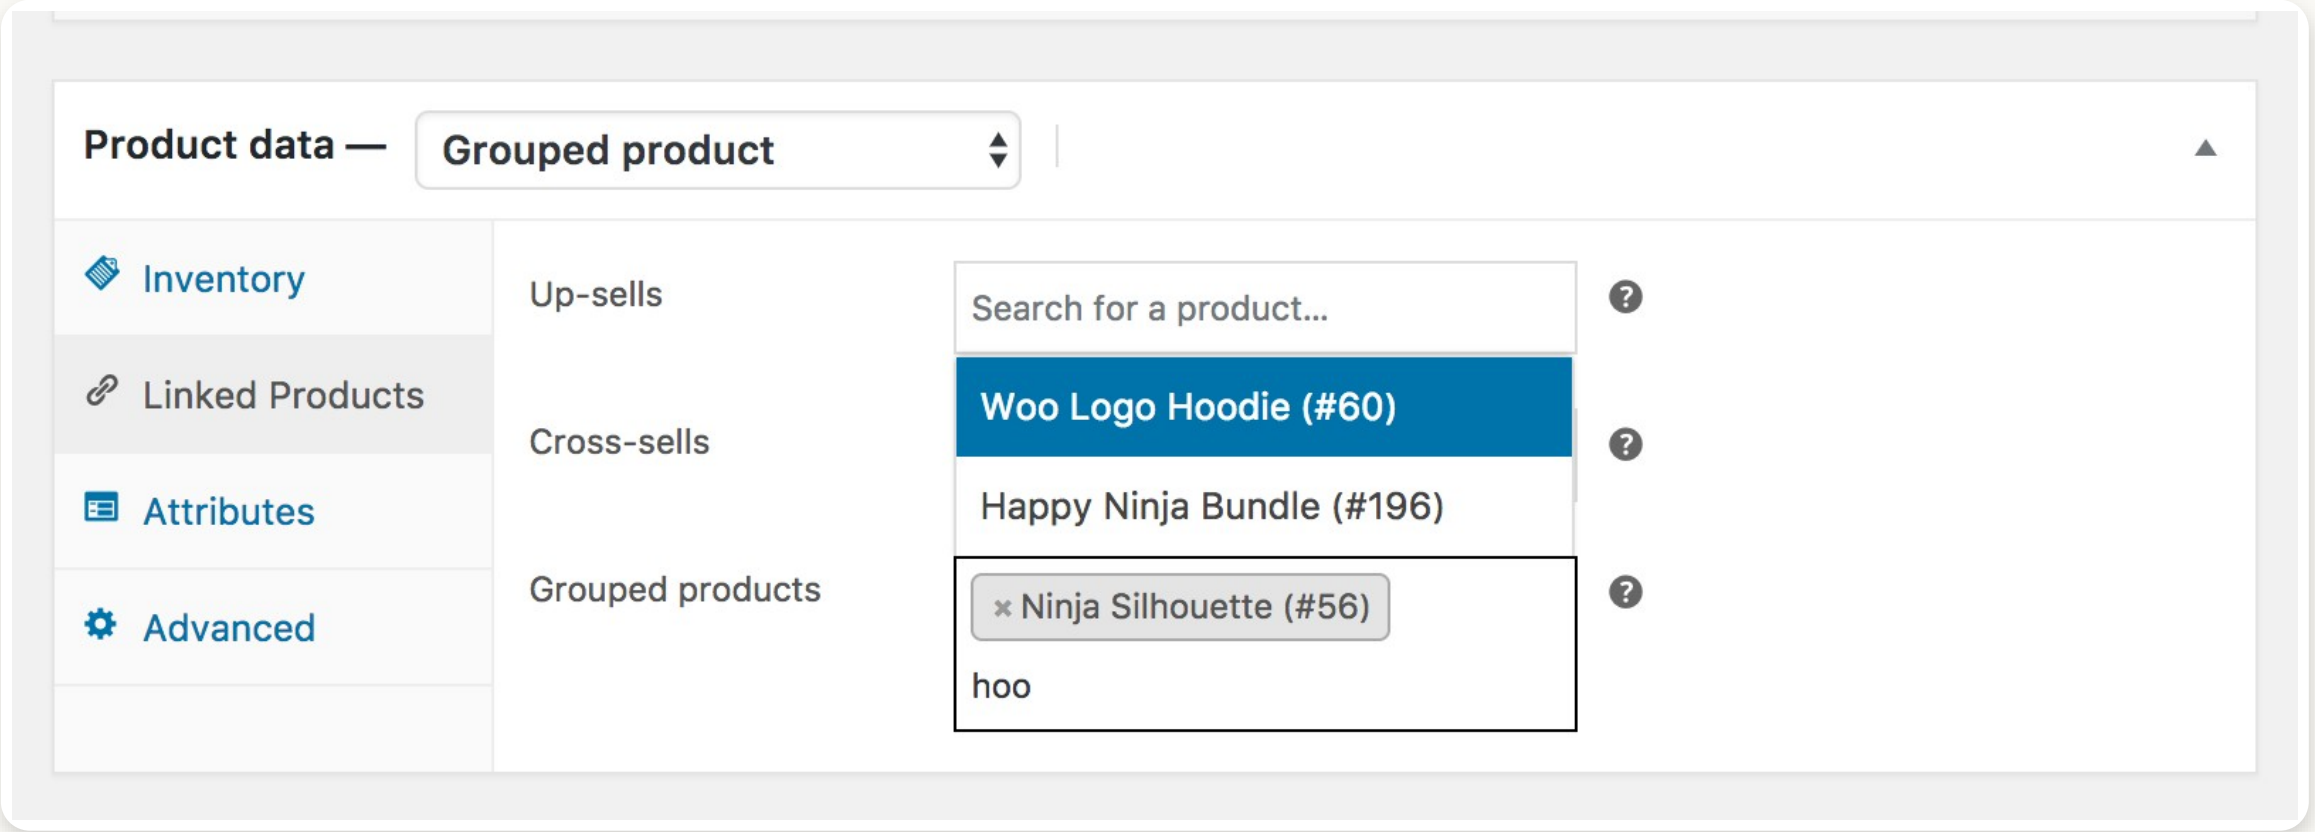

Adding a Grouped Product

- Select Grouped from the Product data dropdown — price fields disappear.

© Tertiary Infotech Academy Pte Ltd

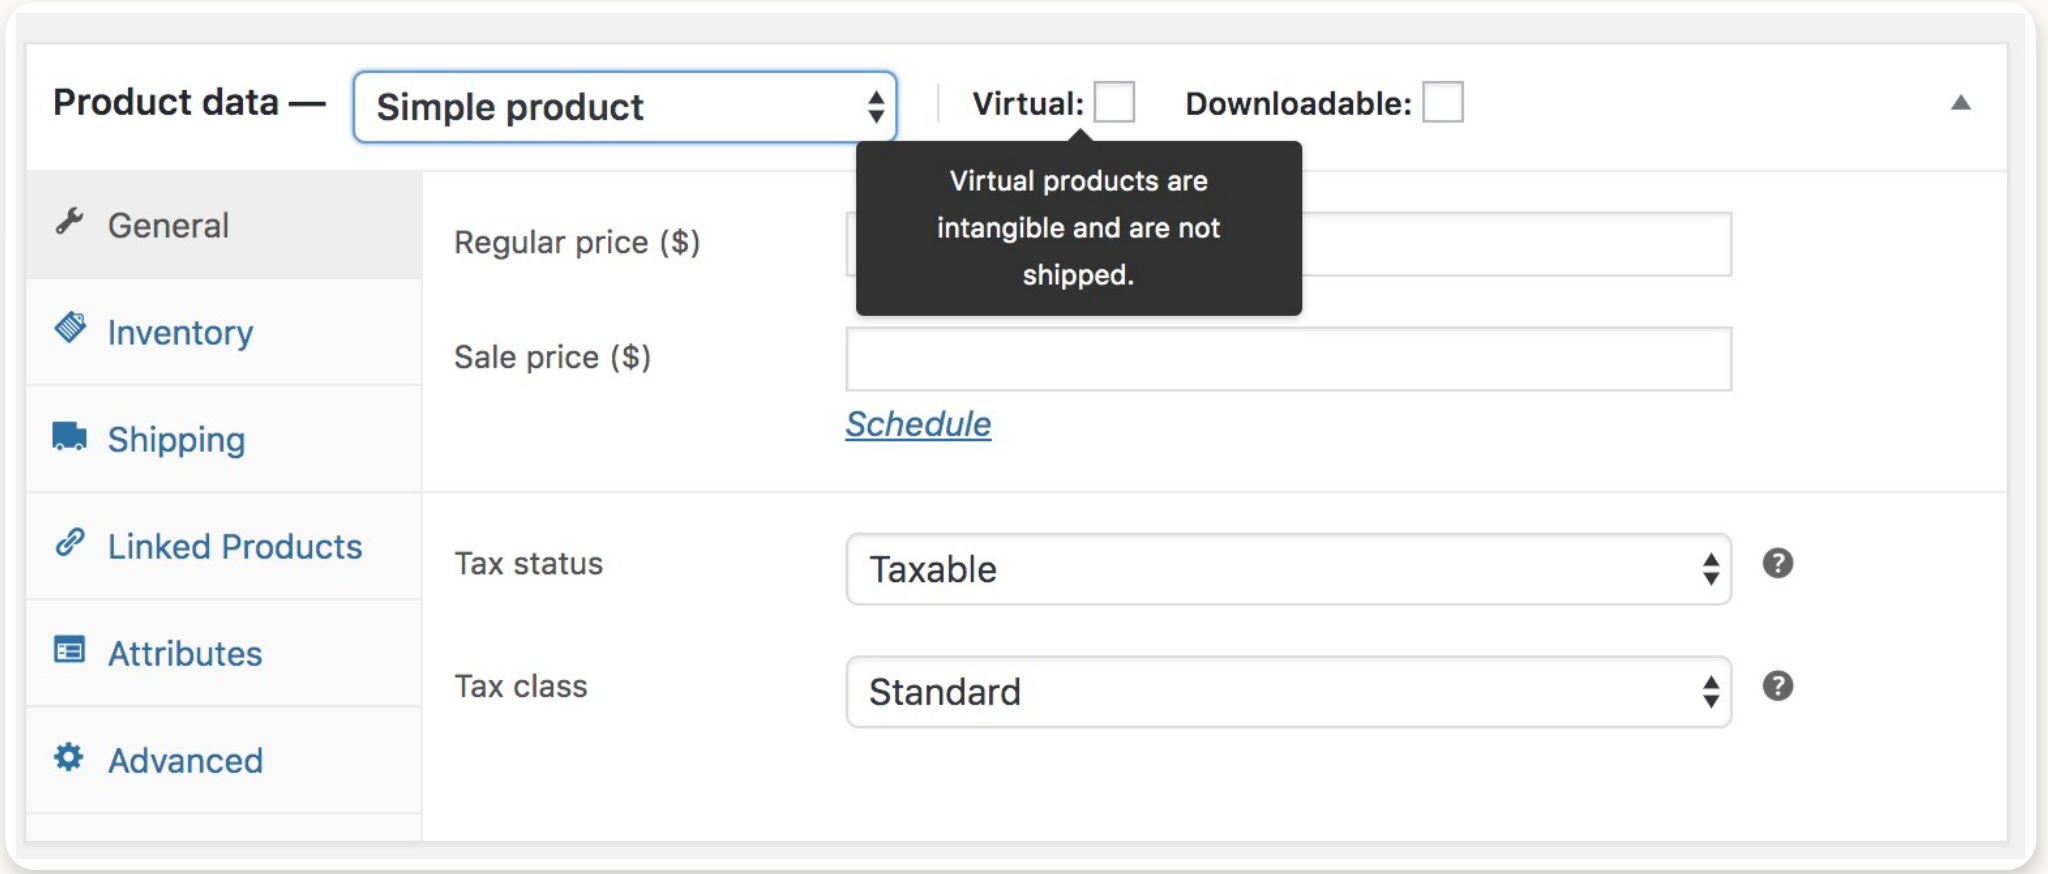

Populating a Grouped Product

- Add child products from Linked Products > Grouped products, then reorder by dragging.

© Tertiary Infotech Academy Pte Ltd

Virtual and Downloadable Products

- Tick Virtual to remove shipping; tick Downloadable to add a file path and download limit.

© Tertiary Infotech Academy Pte Ltd

Creating a Variable Product

ADD ATTRIBUTE

e.g. Size, Colour

ENTER VALUES

Small | Medium | Large

USE FOR VARIATIONS

Tick the box, save

GENERATE VARIATIONS

All combinations at once

SET PRICE & STOCK

Per variation

© Tertiary Infotech Academy Pte Ltd

Categories, Tags and Attributes

Product categories

Hierarchical — parents and subcategories, with a slug, description, display type and image.

Product tags

Flat, with no hierarchy. Use them for cross-cutting themes such as 'cat print' or 'summer'.

Product attributes

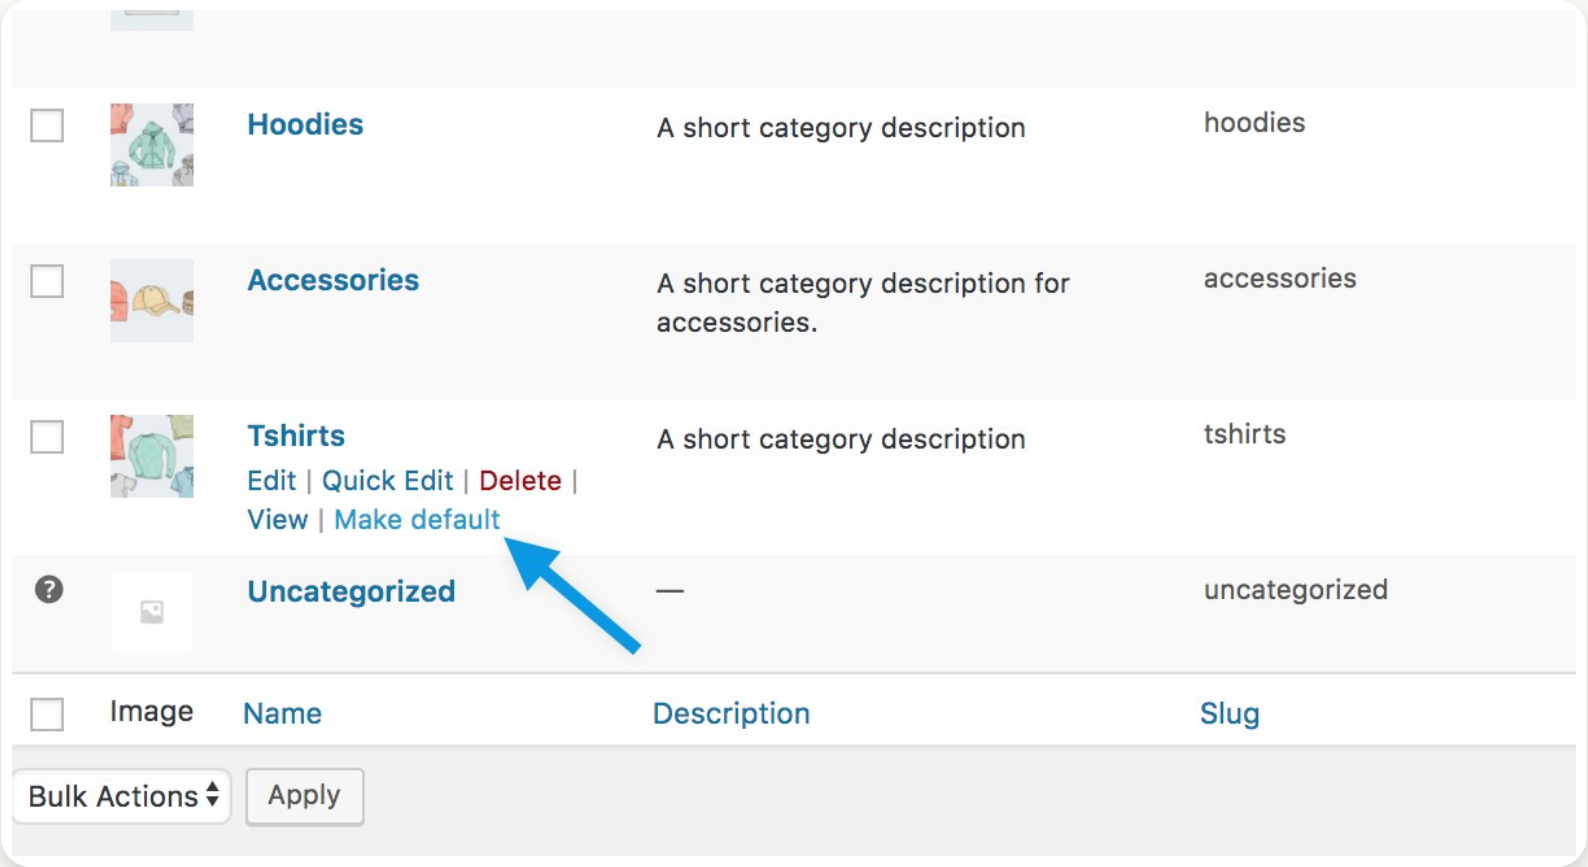

Per-product or global. Global attributes power layered navigation and variations.

The default category

Every product must have a category; unassigned products fall into 'Uncategorized'.

© Tertiary Infotech Academy Pte Ltd

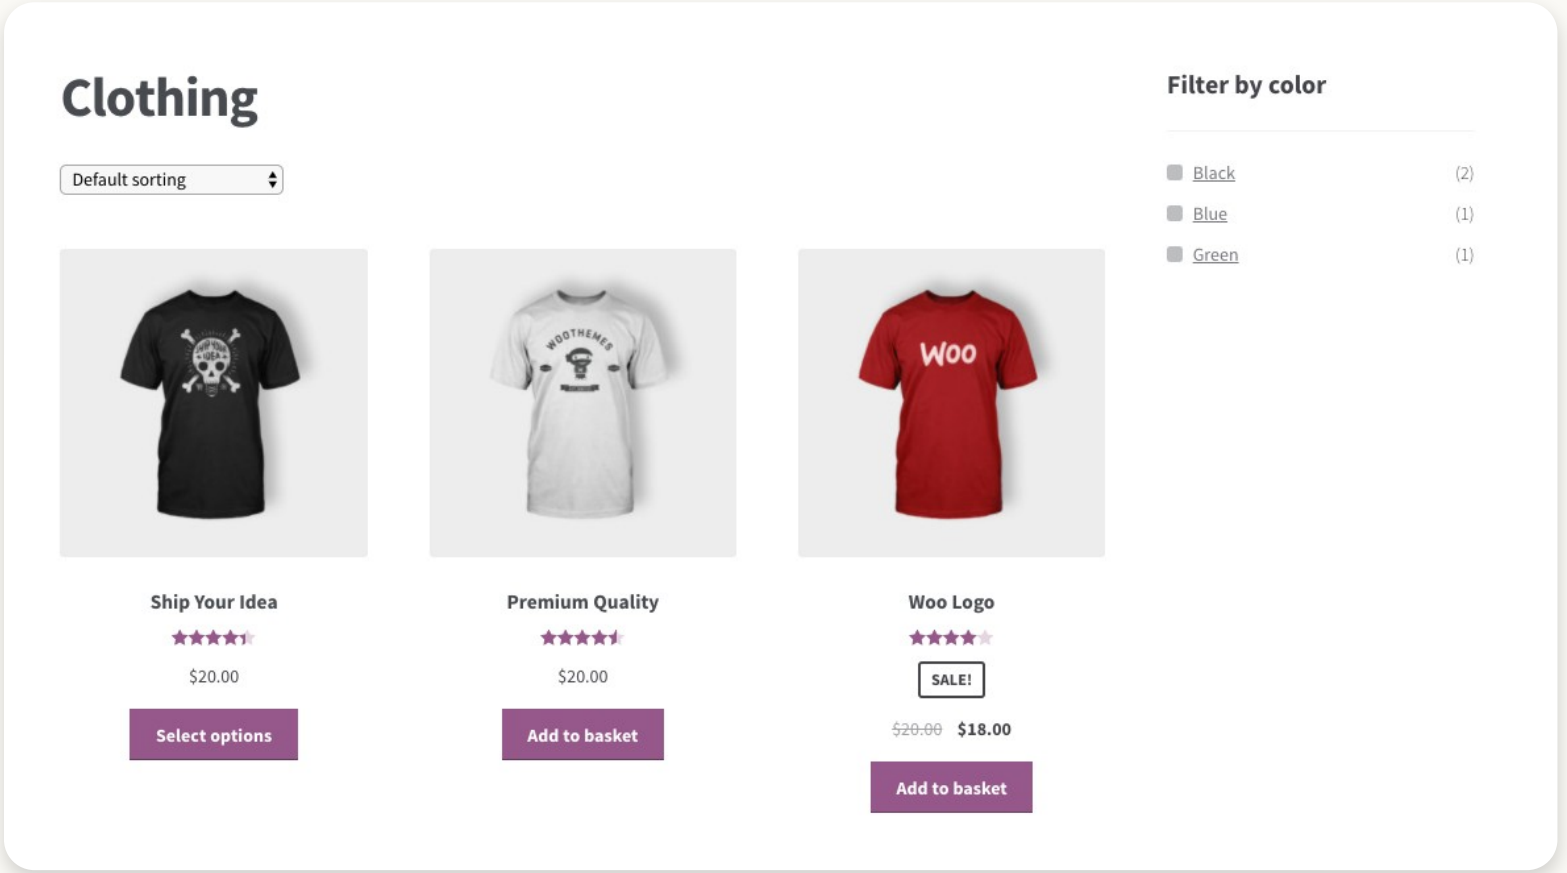

The Default Category

- 'Uncategorized' cannot be deleted while it is the default — but it can be renamed or switched.

© Tertiary Infotech Academy Pte Ltd

Product Attributes

- Attributes drive the Filter by Attribute widget and are required for variations.

© Tertiary Infotech Academy Pte Ltd

Managing Global Attributes

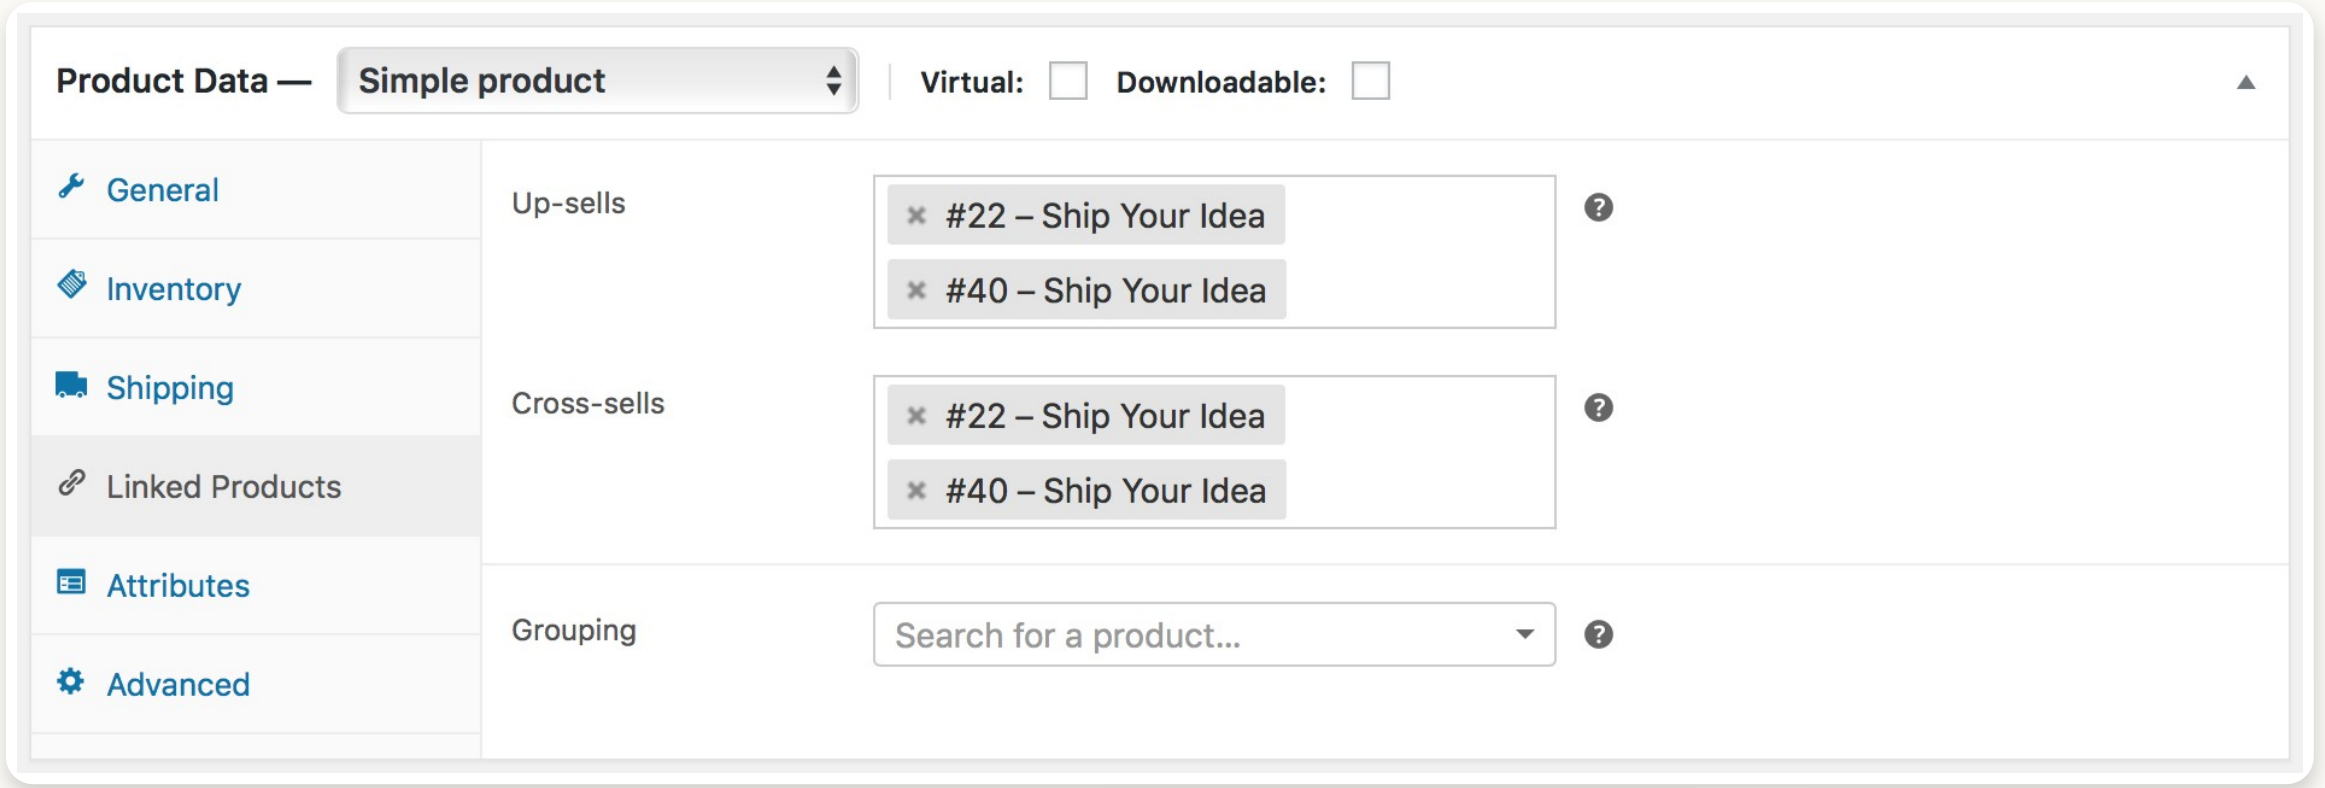

Name	Slug	Order by	Terms
color	color	Custom ordering	Black, Blue, Green Configure terms
Numbers	numbers	Name (numeric)	– Configure terms

- Products > Attributes — add a name, slug, archives option and default sort order.

© Tertiary Infotech Academy Pte Ltd

Linked Products

- Product data > Linked Products — search for the product you want to link.

© Tertiary Infotech Academy Pte Ltd

Up-Sells, Cross-Sells and Related Products

Up-sells & cross-sells — you choose

- Up-sells: on the PRODUCT page, recommended INSTEAD of this item, usually higher value
- Cross-sells: in the CART, complementary to what's being bought
- Harbour & Co: T-shirt up-sells the polo; cross-sells the cap and tote

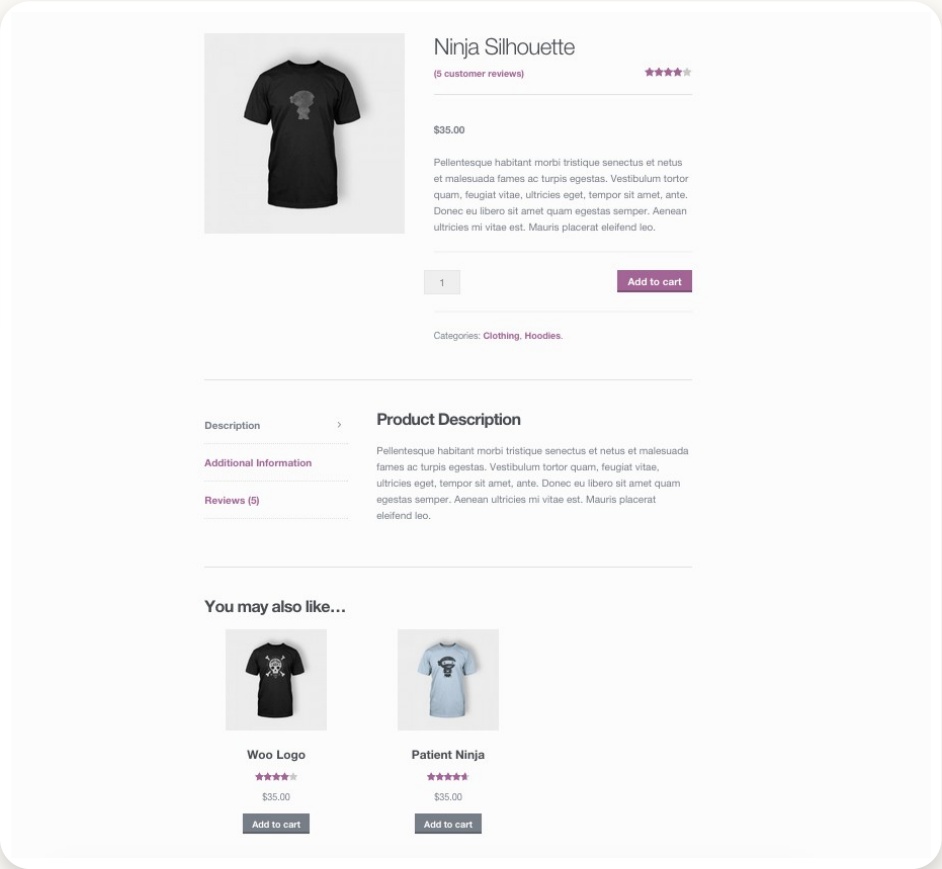

Related products — automatic

- Shown on the PRODUCT page
- Chosen AUTOMATICALLY from shared categories or tags
- You influence them by how you categorise and tag

© Tertiary Infotech Academy Pte Ltd

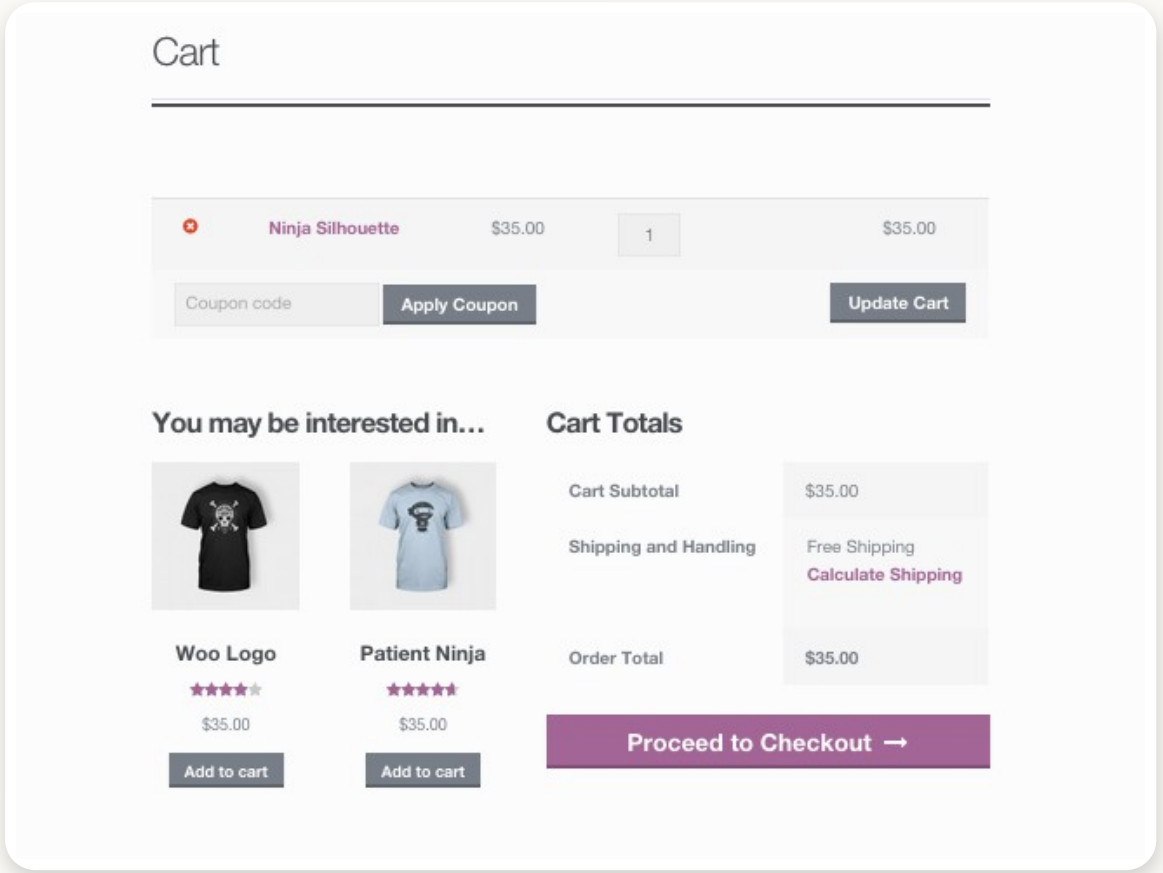

Up-Sells on the Product Page

- Up-sells display beneath the product description.

© Tertiary Infotech Academy Pte Ltd

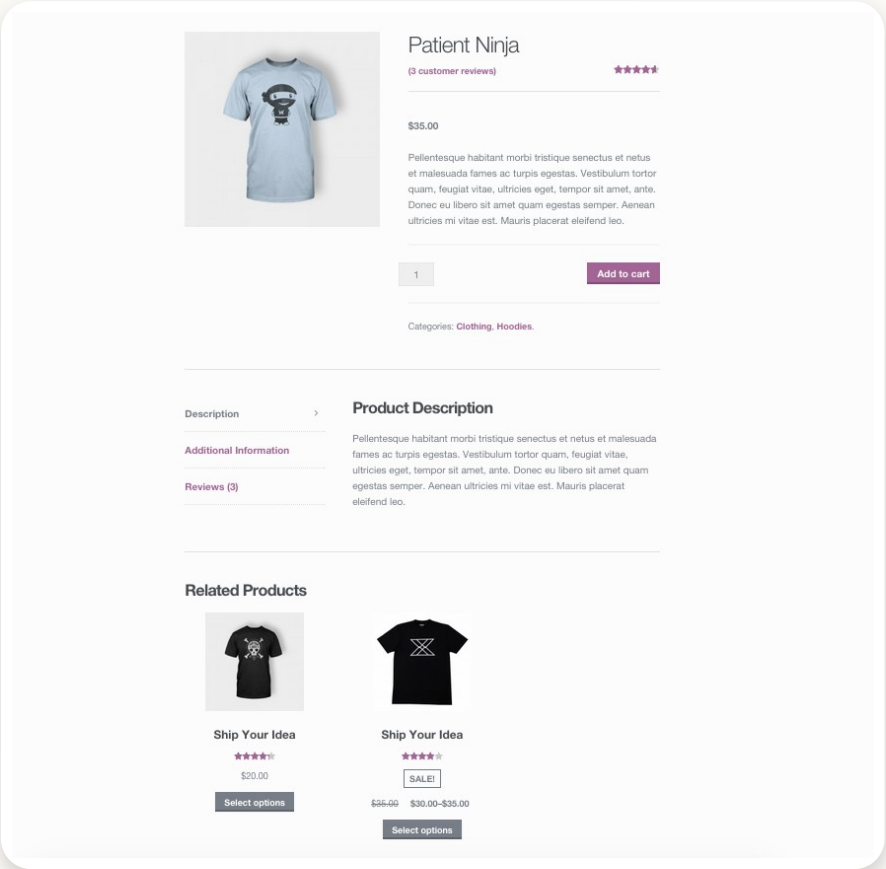

Cross-Sells in the Cart

- Cross-sells are promoted on the cart page, based on what is already in it.

© Tertiary Infotech Academy Pte Ltd

Related Products

- Automatic — pulled from products sharing the same categories or tags.

© Tertiary Infotech Academy Pte Ltd

Product CSV Importer and Exporter

Built in

Included since WooCommerce 3.1 — no plugin required.

Every product type

Supports simple, grouped, external and variable products, including variations.

For new stores

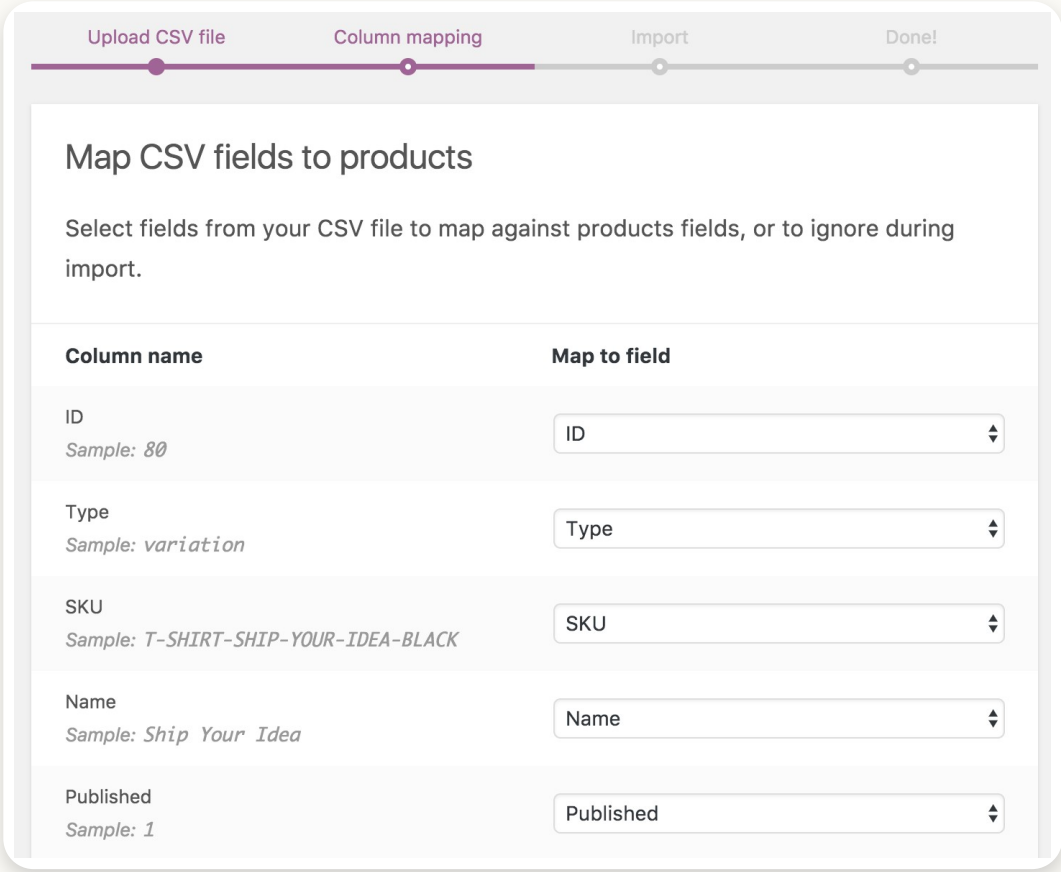

Export a template, fill it in, and launch a whole catalogue in one pass.

For existing stores

Update hundreds of products, run a sale, or sync multiple storefronts.

© Tertiary Infotech Academy Pte Ltd

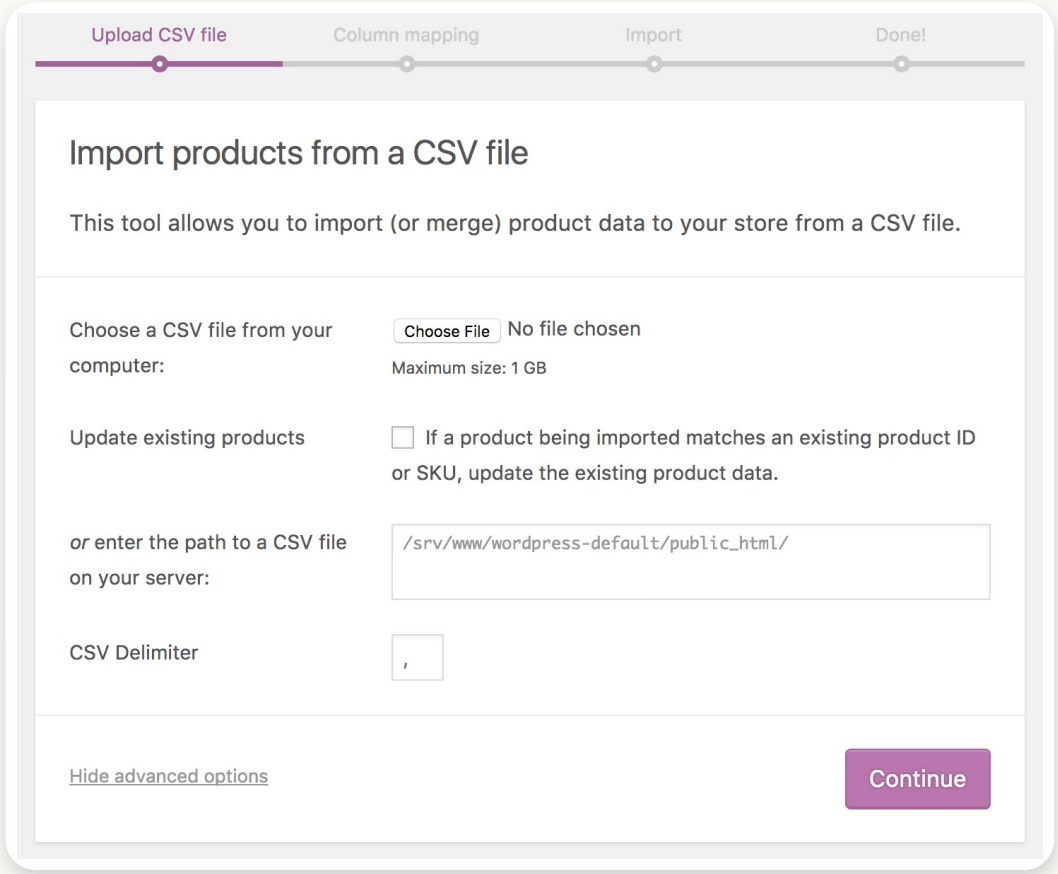

Importing Products

- Products > Import > choose your CSV > Continue > map columns > Run the importer.

© Tertiary Infotech Academy Pte Ltd

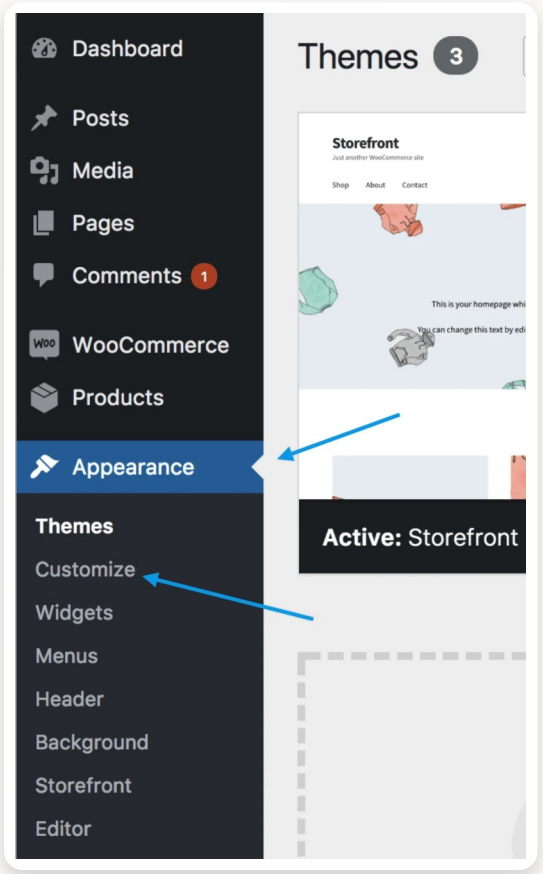

Mapping CSV Columns

- WooCommerce proposes a column mapping — review it before running the importer.

© Tertiary Infotech Academy Pte Ltd

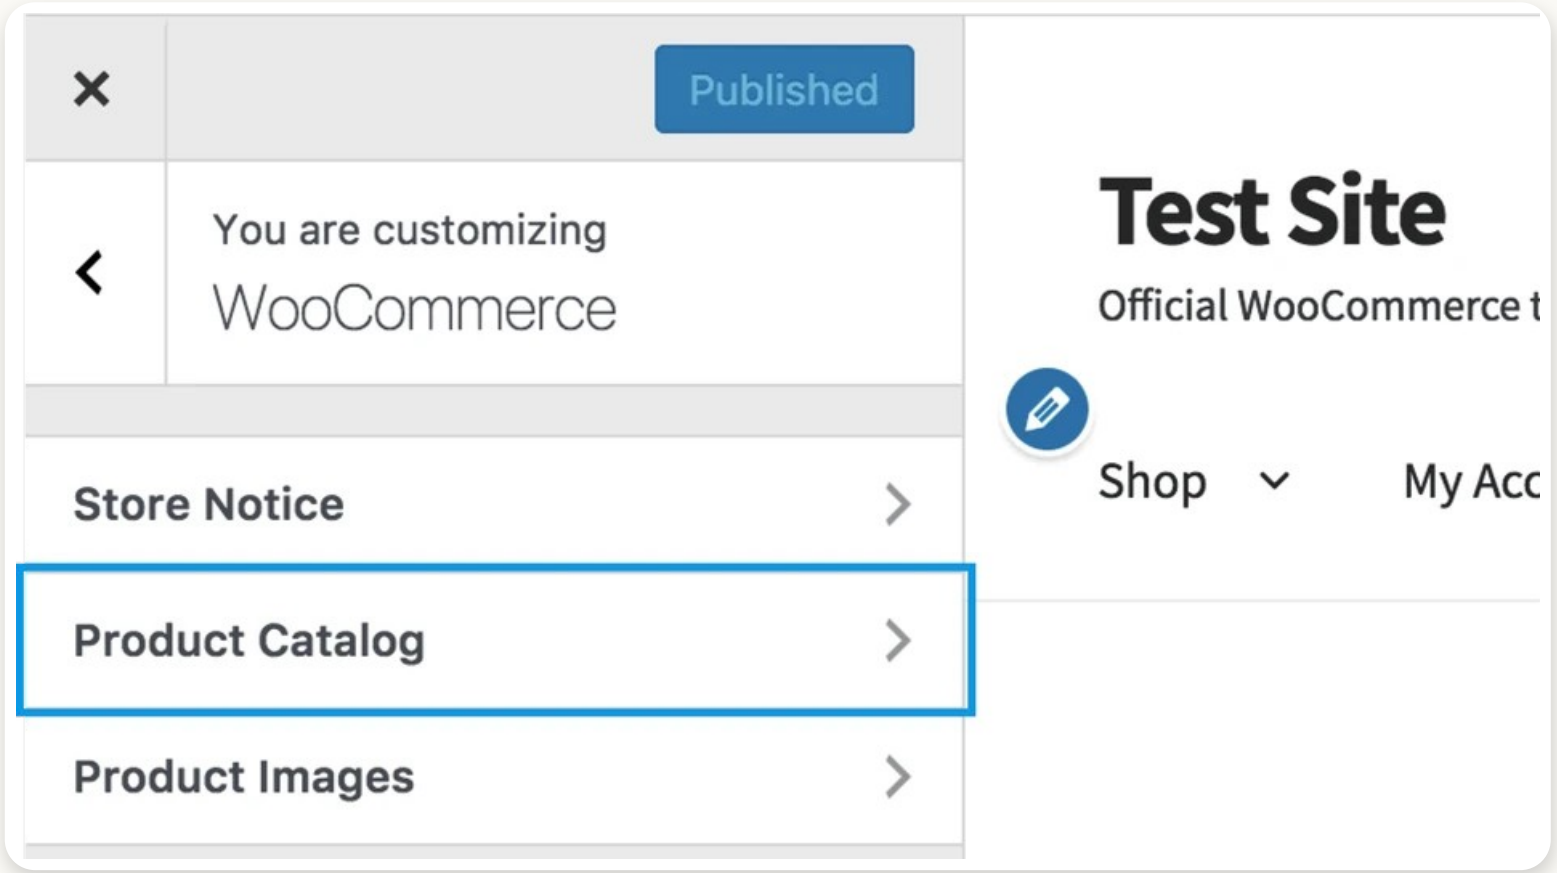

The WooCommerce Customizer

- Appearance > Customize > WooCommerce — Store Notice, Product Catalog and Product Images.

© Tertiary Infotech Academy Pte Ltd

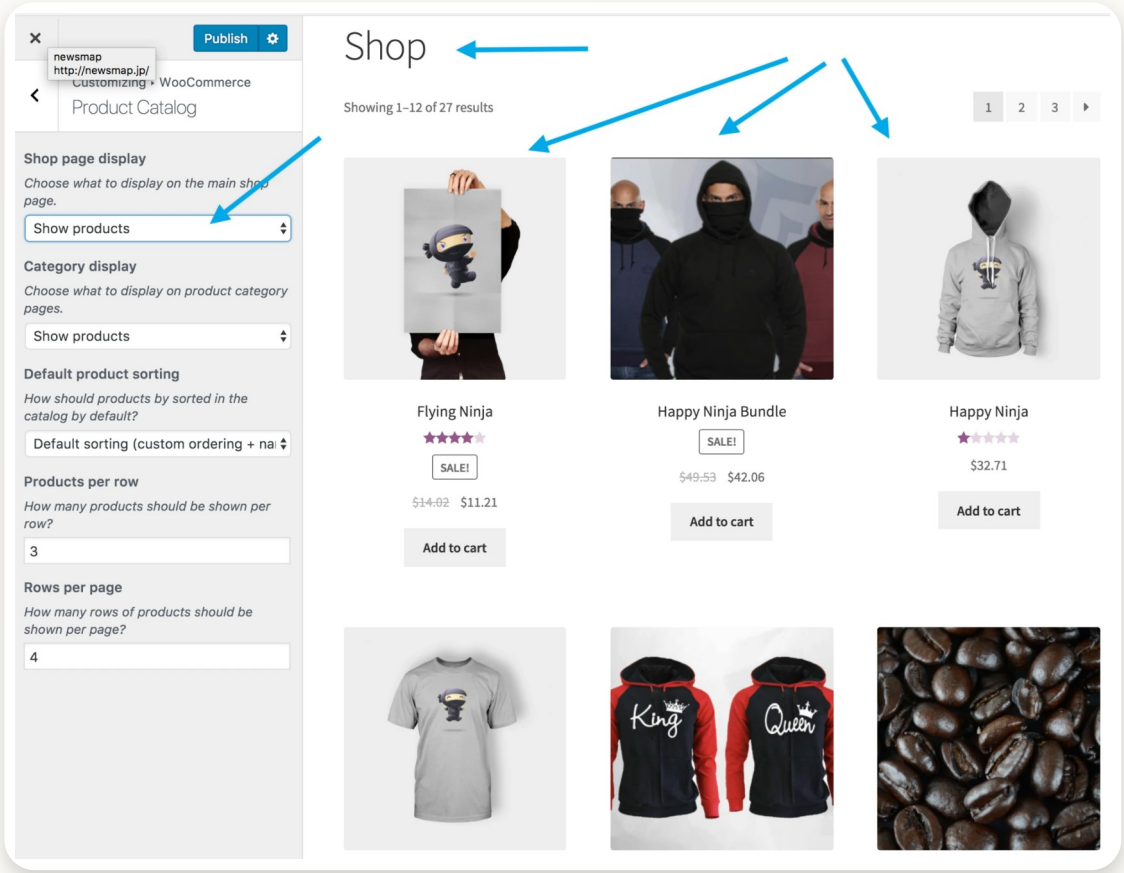

Product Catalog Options

- Appearance > Customize > WooCommerce > Product Catalog.

© Tertiary Infotech Academy Pte Ltd

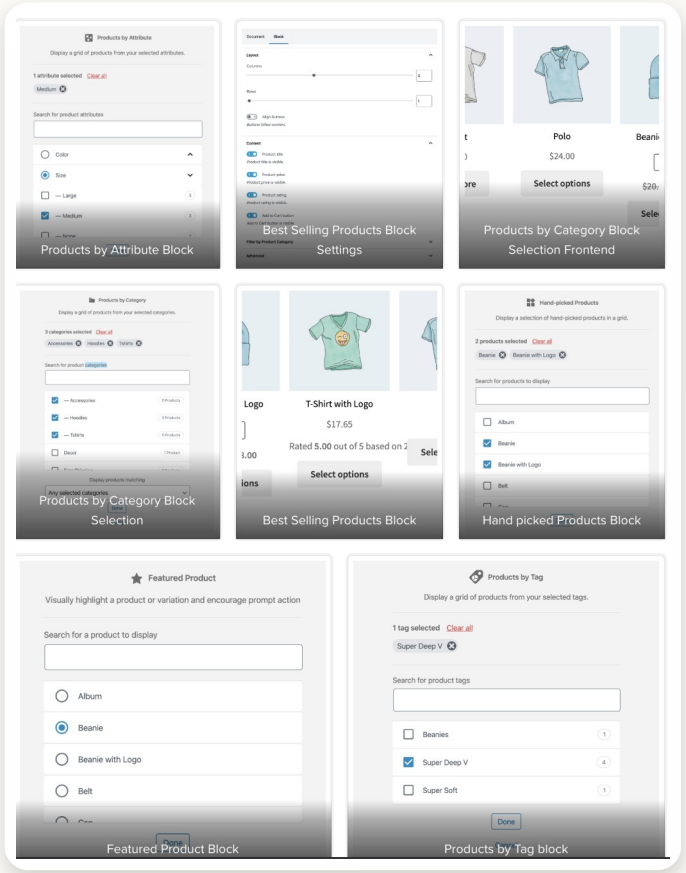

The Shop Page

- Display Products, Categories, or both — one choice gives the cleanest look.

© Tertiary Infotech Academy Pte Ltd

WooCommerce Blocks

- Product blocks for any post or page — by tag, category, attribute, best selling, on sale and more.

© Tertiary Infotech Academy Pte Ltd

From WhatsApp Notes to an Import-Ready CSV

Give the exact headers

Type, SKU, Name, Published, Short description, Regular price, Sale price, Categories, Tags, In stock?, Stock, Weight (kg).

Spell out the rules

Categories with ' > ' · weight in kg · no S$ sign · quote fields with commas.

Check before import

SKU, price, sale price and stock against the notes — the importer will not.

First import: create

Leave 'Update existing products' unticked — that option skips SKUs not yet in the store.

© Tertiary Infotech Academy Pte Ltd

TOPIC 3 · LAB 3 · PHASE 1

Lab 3 — Let AI Build the New-Season Catalogue

Rachel's WhatsApp notes become a WooCommerce CSV. Import it, add the polo's six variations, link the up-sells.

The business scenario

The Resort Linen pieces arrive next week. Rachel's product details are scattered WhatsApp messages. Typing four products by hand invites typos in SKUs and prices. ChatGPT turns her notes into an import-ready CSV; you import it with the core range, build the Premium Polo's size and colour variations, and link up-sells so customers see the next-best item.

You will deliver

✓ harbour-co-new-season.csv generated by AI from the supplier notes and checked by you
✓ Nine products imported by CSV into Apparel > Shirts, Apparel > Bottoms, Apparel > Outerwear and Accessories
✓ The Premium Polo Shirt as a variable product: 3 sizes × 2 colours = 6 priced, stocked variations
✓ Up-sell and cross-sell links on the Classic Cotton T-Shirt

AI does ChatGPT converts messy notes into a CSV with WooCommerce's exact column headers.

You decide You check SKUs, prices and stock against the notes before importing — the importer will not.

Time 10 min · LO3

© Tertiary Infotech Academy Pte Ltd

Lab 3 — How it runs

Orange cards are you; dark cards are the AI. Nothing goes live without you.

YOU · STEP 1

Notes in

Attach supplier-notes.txt.

AI · STEP 2

AI writes the CSV

Exact WooCommerce headers, one row per product.

YOU · STEP 3

You check it

SKU, price, sale price, stock, category against the notes.

YOU · STEP 4

Import

Core CSV + AI CSV through the importer.

YOU · STEP 5

Variations

Polo: Size × Colour, generated and priced.

YOU · STEP 6

Link products

Up-sells and cross-sells.

Checkpoint All Products lists 11 products, the polo shows S$39.90 – S$41.90, and Apparel has Shirts, Bottoms and Outerwear under it.

© Tertiary Infotech Academy Pte Ltd

Lab 3 — The Steps

#	Step	Where
1	Turn the supplier notes into a CSV [AI prompt]	ChatGPT (chatgpt.com) — a new chat
2	Check the CSV against the notes	You (a spreadsheet or text editor)
3	Import the core range	Products > All Products > Import
4	Import your AI-generated CSV	Products > All Products > Import
5	Create the variable polo	Products > Add new product
6	Add Size and Colour attributes	Product data > Attributes
7	Generate and price the six variations	Product data > Variations
8	Link up-sells and cross-sells	Classic Cotton T-Shirt > Product data > Linked Products
9	Ask AI for a catalogue audit [AI prompt]	Same ChatGPT chat

TIP Full instructions, values and the Prompt Playbook: labs/lab-03-ai-builds-the-catalogue/LAB-03-Instructions.pdf

© Tertiary Infotech Academy Pte Ltd

Step 1 · Turn the supplier notes into a CSV

PROMPT · copy from labs/prompts/index.html or COPY-PROMPTS.txt

```
ROLE: You are an eCommerce catalogue manager who prepares WooCommerce imports.
CONTEXT: The attached supplier notes list four new Harbour & Co products. The brand brief sets the voice.
TASK: Produce a CSV for the WooCommerce product importer, one row per product.
CONSTRAINTS: Use exactly these headers in this order: Type,SKU,Name,Published,Short description,Regular
price,Sale price,Categories,Tags,In stock?,Stock,Weight (kg)
Type = simple. Published = 1. In stock? = 1. Categories use ' > ' for hierarchy, e.g. Apparel > Bottoms.
Weight in kg (250g = 0.25). Prices are numbers with no S$ sign. Leave Sale price empty when there is no
promo. Short description ≤ 25 words in the brand voice, built only from the notes. Wrap any field
containing a comma in double quotes. Tag every linen or resort item with 'resort'.
FORMAT: One CSV code block only, then a table listing each SKU with its price and stock so I can check
them.
```

© Tertiary Infotech Academy Pte Ltd

Step 9 · Ask AI for a catalogue audit

PROMPT · copy from labs/prompts/index.html or COPY-PROMPTS.txt

```
ROLE: You are a catalogue QA analyst.
CONTEXT: The attached file is Harbour & Co's full product export.
TASK: Find maintenance problems: missing images, missing short
descriptions, duplicate or malformed SKUs, products with no
category or still in 'Uncategorized', sale prices higher than
regular prices, stock of 0.
FORMAT: A table: SKU · problem · fix. Then the three fixes that
matter most for customers.
```

Paste into

ChatGPT — attach data/brand-brief.txt first

Expect

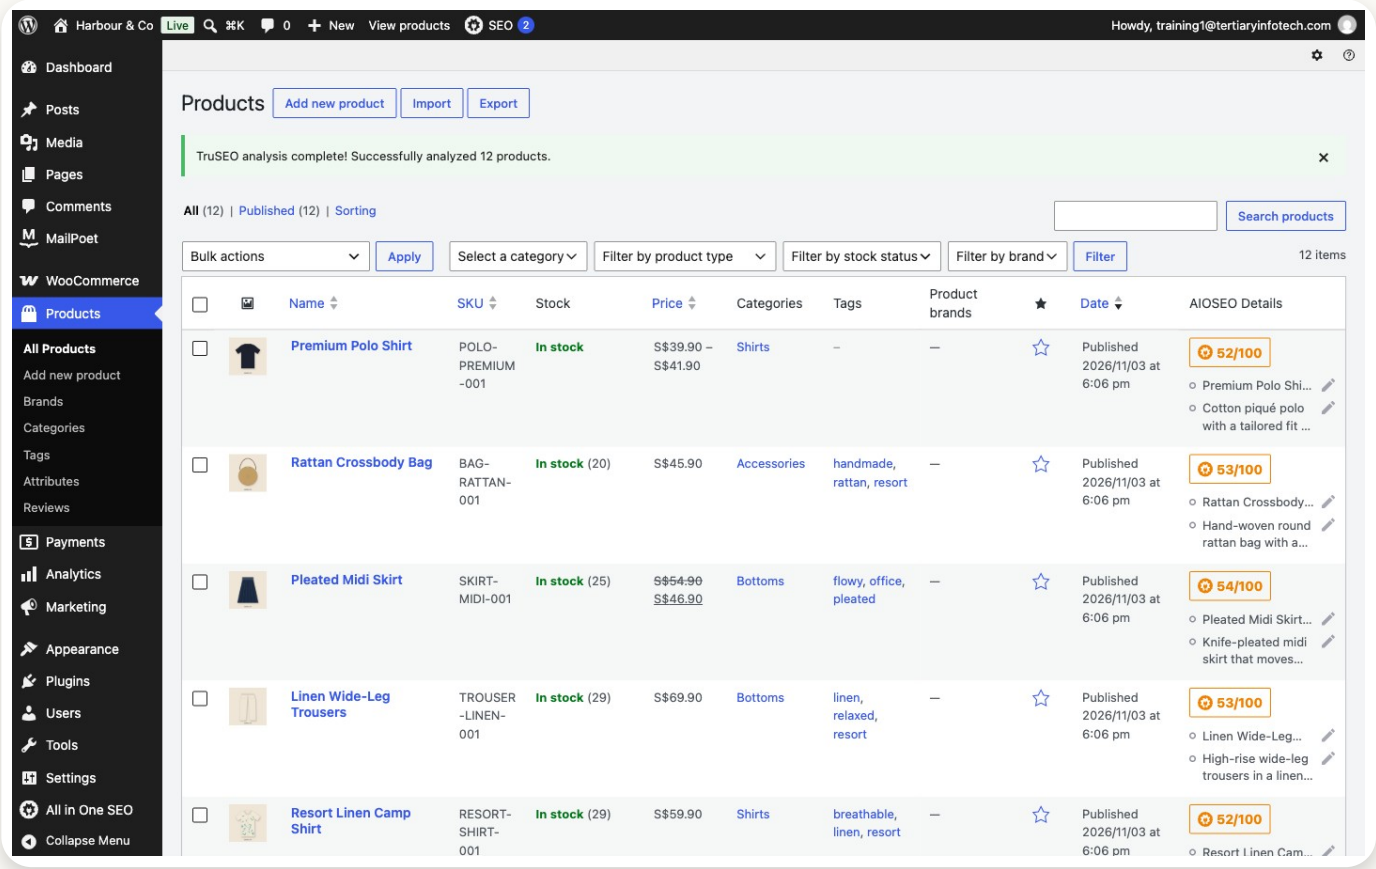

A short fix list — most rows will say 'no image' until you add the starter images.

You decide

You check SKUs, prices and stock against the notes before importing — the importer will not.

© Tertiary Infotech Academy Pte Ltd

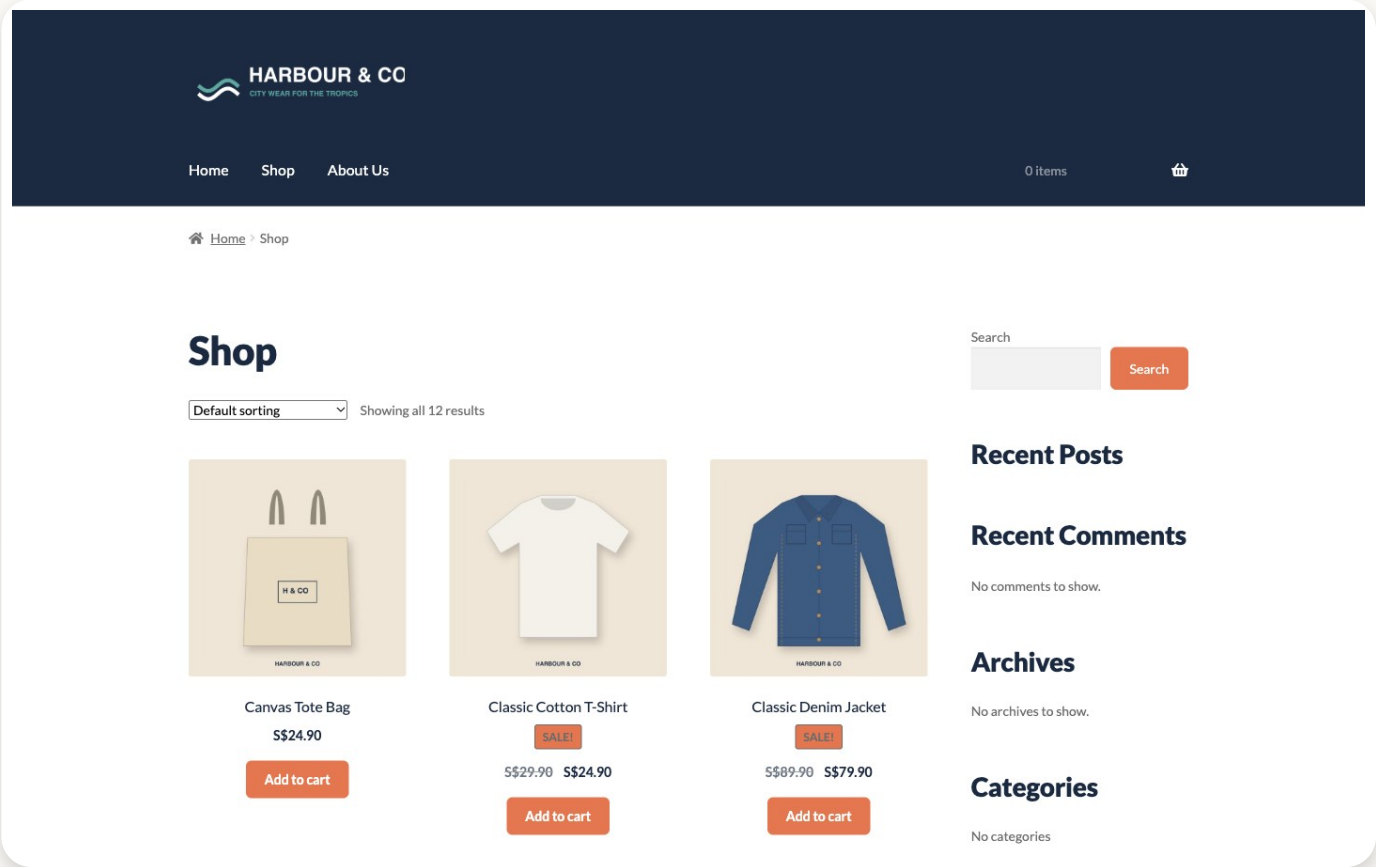

What Done Looks Like

- CSV-imported products, the polo's S$39.90 – S$41.90 range, and Apparel > Shirts / Bottoms / Outerwear.

© Tertiary Infotech Academy Pte Ltd

The Catalogue on the Storefront

- Twelve products with starter images — replace them with your AI photos.

© Tertiary Infotech Academy Pte Ltd

Lab 3 — Checkpoint

Verify

Nine CSV-imported products plus the T-shirt and polo appear in All Products

Verify

Categories: Apparel > Shirts, Apparel > Bottoms, Apparel > Outerwear and Accessories

Verify

The polo has six variations, each with SKU, price and stock

Stretch challenge

Add the starter images to the nine imported products and ask ChatGPT to write a 2-line category description for Apparel > Bottoms.

© Tertiary Infotech Academy Pte Ltd

TOPIC 4

Manage Payments and Shipping

1. Store policies
2. Payment methods
3. Gateways
4. Shipping zones
5. Flat rate, free & pickup

© Tertiary Infotech Academy Pte Ltd

Key Concepts in This Topic

Payment methods

Online gateways such as Stripe and PayPal, plus offline options like bank transfer, cheque and cash on delivery.

Choosing a gateway

Location, fees, supported currencies and whether the customer stays on your site all shape the decision.

Shipping zones

A zone is a geographic region; each zone carries its own shipping methods and rates.

Flat rate shipping

A standard cost per order, per item or per shipping class, defined inside a shipping zone.

Free shipping

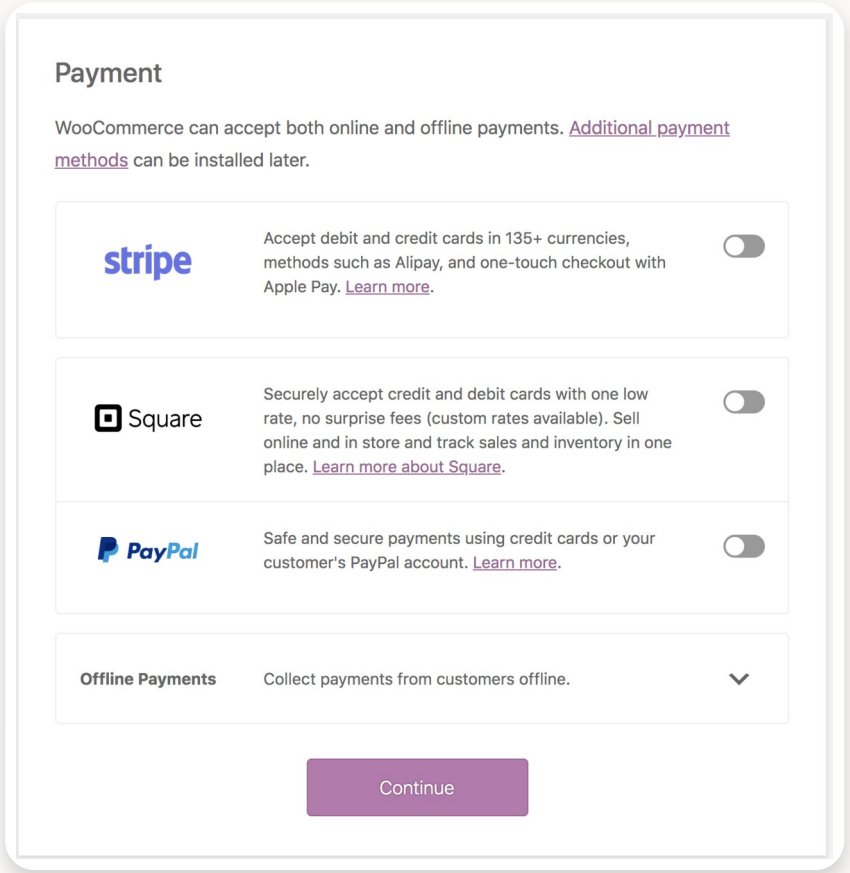

A powerful incentive — commonly gated behind a minimum order amount or a valid coupon.

Local pickup

Lets the customer collect the order themselves, with optional cost and tax status.

© Tertiary Infotech Academy Pte Ltd

Online Payment Methods

- Card and wallet gateways that take payment at checkout.

© Tertiary Infotech Academy Pte Ltd

Choosing a Payment Gateway

Stripe

Supports 25+ countries and recurring payments; the customer stays on your site.

PayPal

Active in 200+ countries, with PayPal Credit available for US stores.

Square

Suits merchants who also sell in person, in a physical store.

eWAY

Takes card payments directly on your store without redirecting the customer.

Klarna

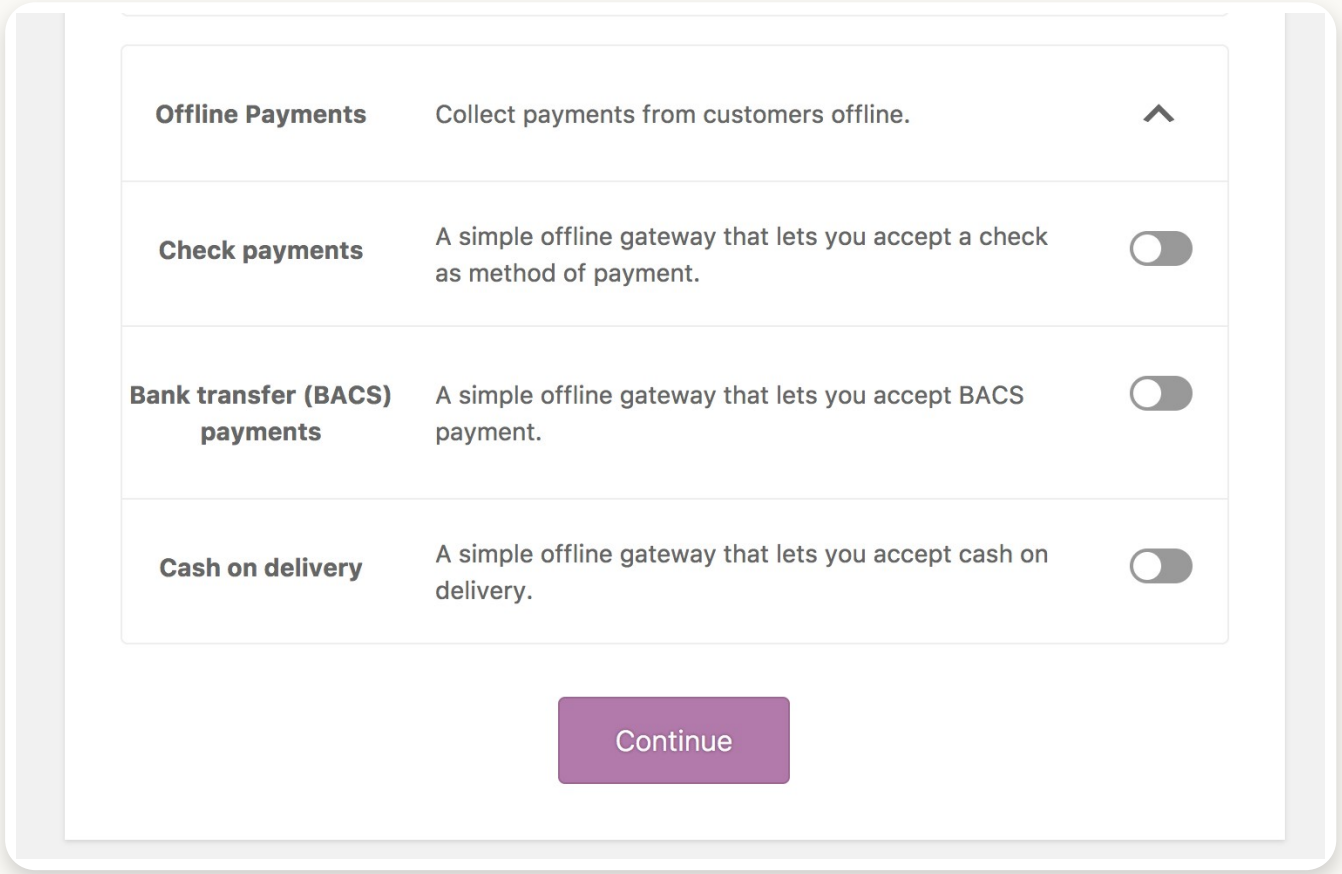

Buy-now-pay-later across Europe, the UK and the US.

Payfast

A popular South African gateway for card and EFT, with no monthly cost.

© Tertiary Infotech Academy Pte Ltd

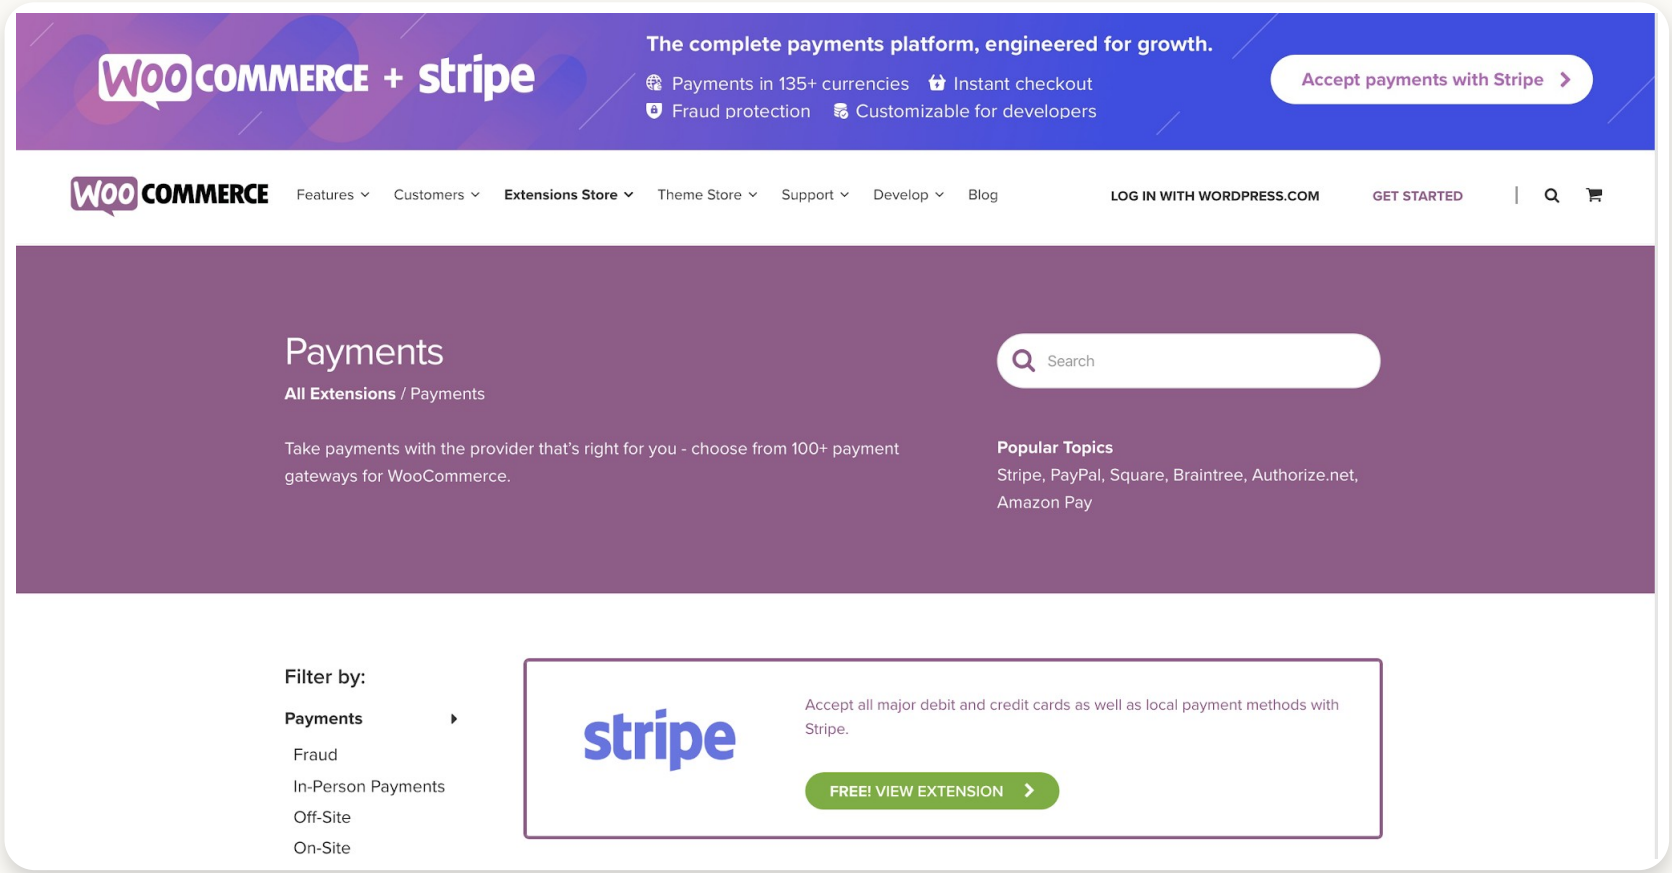

Offline Payment Methods

- Direct bank transfer, cheque and cash on delivery — the order is held until you confirm payment.

© Tertiary Infotech Academy Pte Ltd

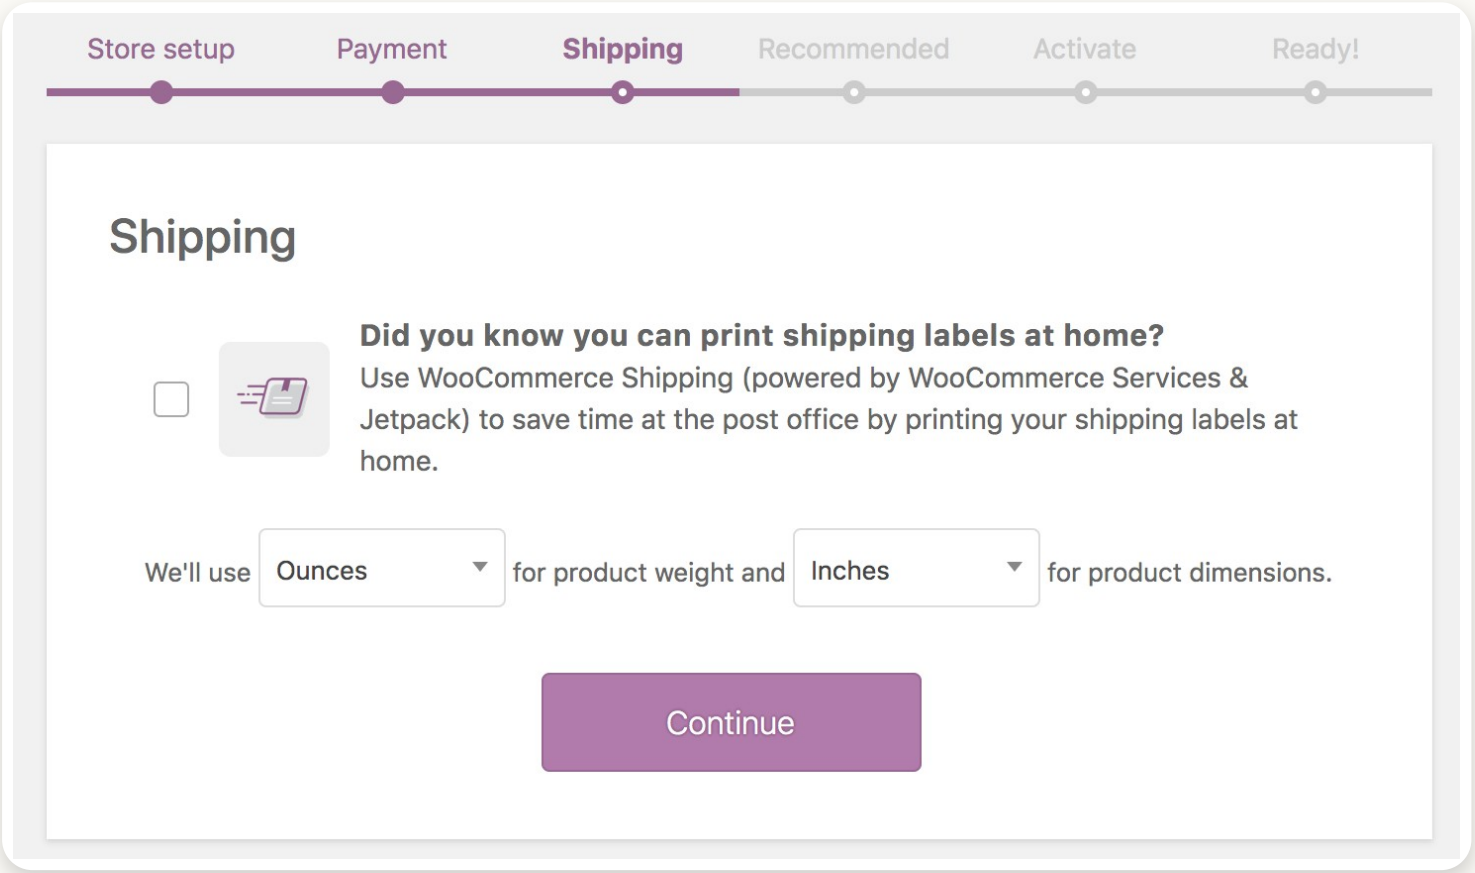

Additional Payment Gateways

- https://woocommerce.com/product-category/woocommerce-extensions/payment-gateways

© Tertiary Infotech Academy Pte Ltd

Shipping Options

- Set the unit of measurement for weight and dimensions before configuring rates.

© Tertiary Infotech Academy Pte Ltd

How Shipping Is Structured

SHIPPING ZONE

A geographic region

SHIPPING METHOD

Flat rate, free, pickup

METHOD SETTINGS

Title, tax status, cost

SHIPPING CLASS

Optional per-product rate

CHECKOUT

Customer picks an option

© Tertiary Infotech Academy Pte Ltd

Core Shipping Options

Flat rate

A standard cost per order, per item or per shipping class.

Free shipping

Optionally gated behind a minimum order amount or a valid coupon.

Local pickup

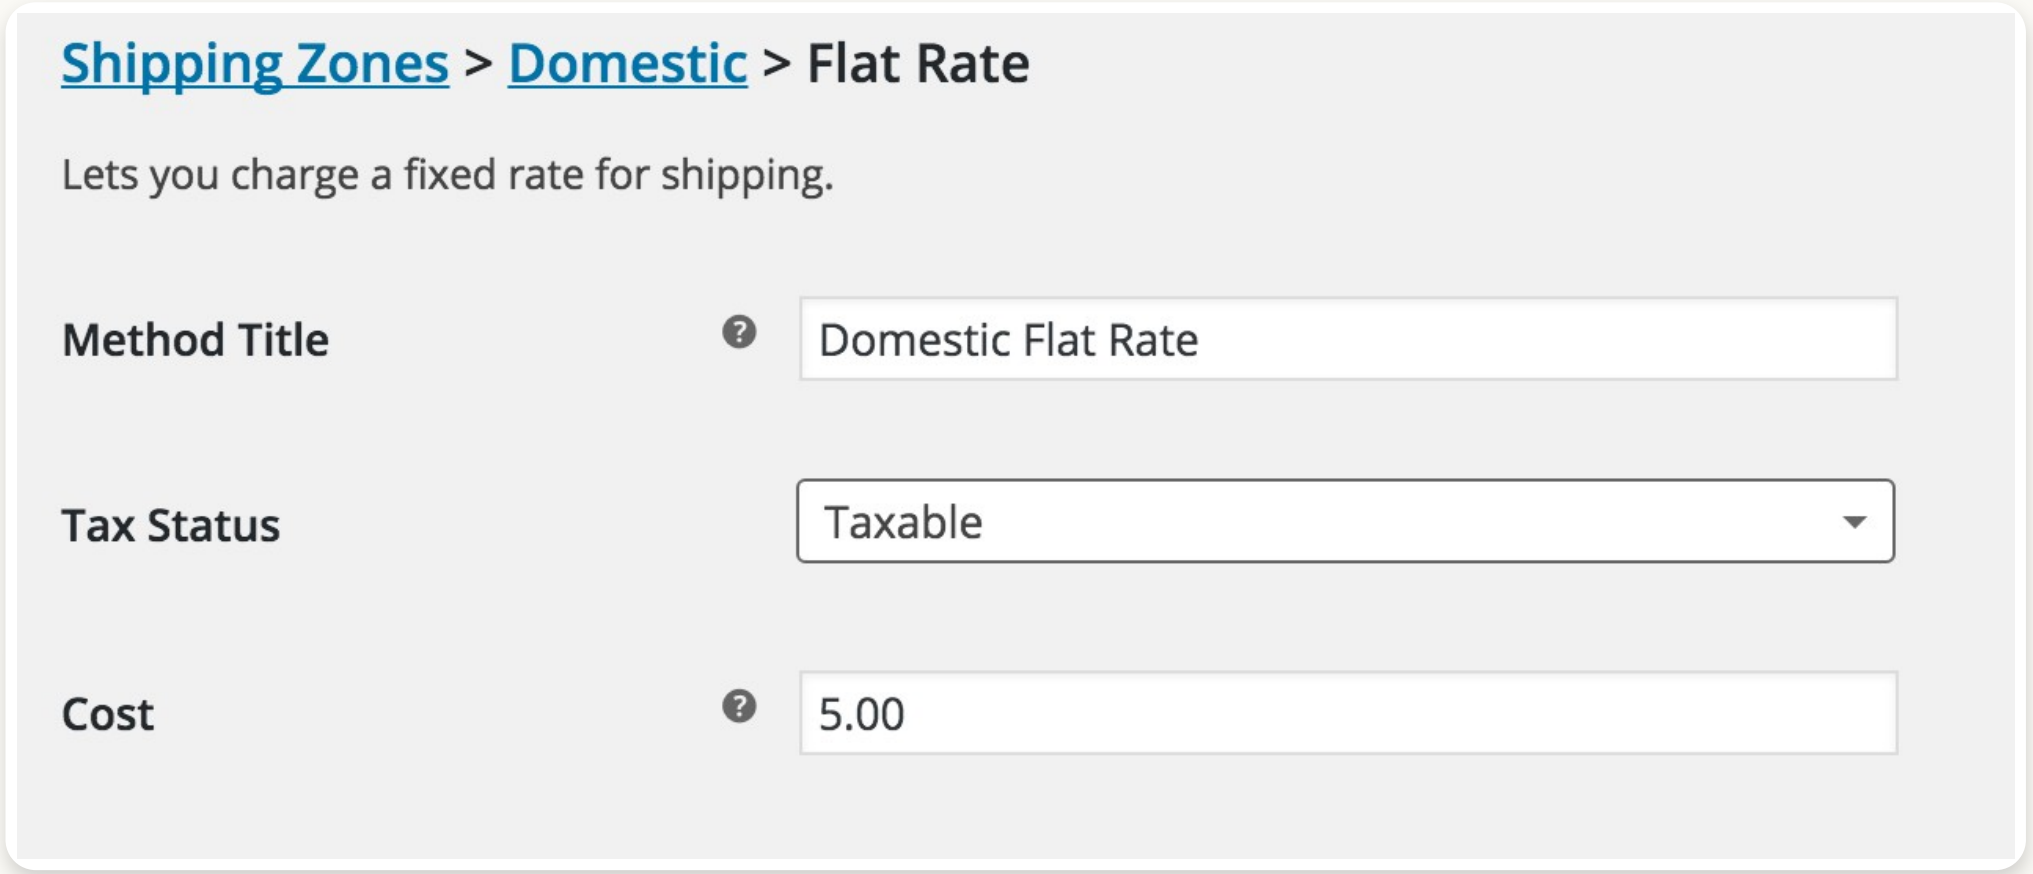

The customer collects the order themselves, with optional cost.

Shipping classes

Group products that cost more to ship — bulky, fragile or heavy items.

© Tertiary Infotech Academy Pte Ltd

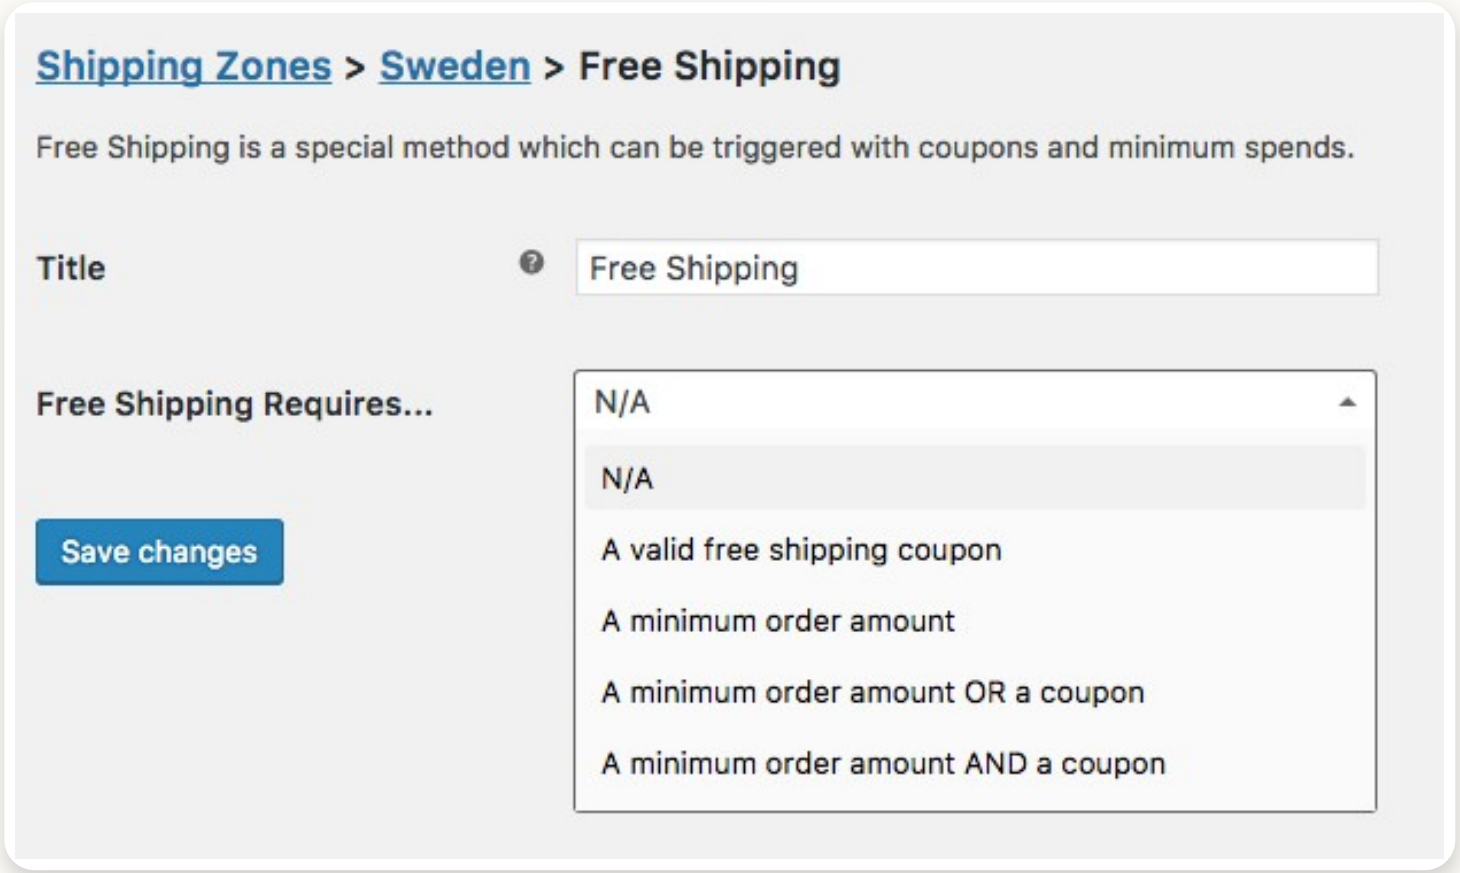

Flat Rate Shipping

- Added to a shipping zone, with a title, tax status and cost applied to the cart.

© Tertiary Infotech Academy Pte Ltd

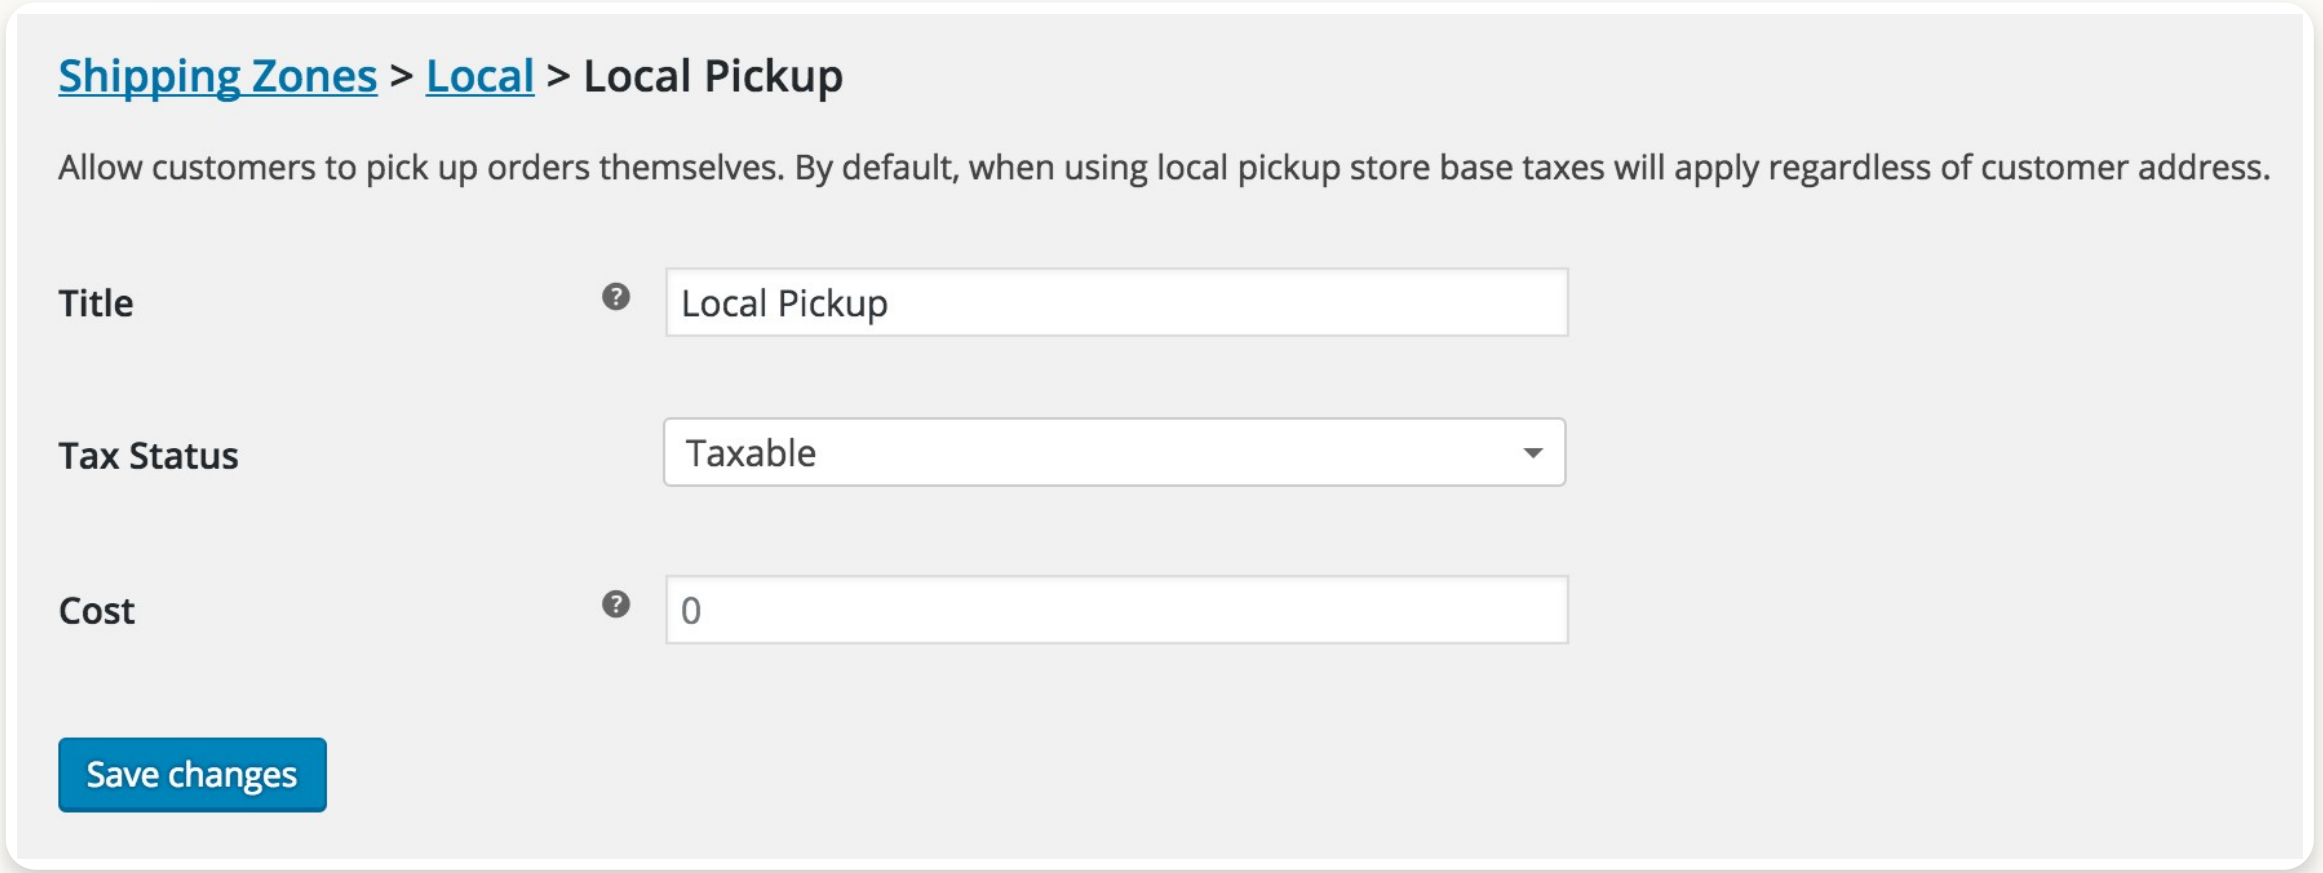

Free Shipping

- 'Free shipping requires…' — commonly a minimum order amount, to lift average order value.

© Tertiary Infotech Academy Pte Ltd

Local Pickup

- Let customers collect the order — some stores retitle this 'Collect in store'.

© Tertiary Infotech Academy Pte Ltd

Four Pages Customers Read Before They Pay

Privacy Policy

Singapore PDPA 2012: what you collect, why, who it goes to, retention, access & correction, DPO contact.

Returns & Refunds

Days, condition, sale items, faulty items, refund timing.

Shipping & Delivery

Where, cost, free threshold, days, pickup hours.

Payment Methods

PayNow / bank transfer, pay at pickup, cards — and what happens to unpaid orders.

TIP AI drafts are not legal advice. Every number must match the checkout, and the owner signs off.

© Tertiary Infotech Academy Pte Ltd

TOPIC 4 · LAB 4 · PHASE 1

Lab 4 — AI Drafts the Policies, You Switch On Payments and Shipping

ChatGPT drafts the privacy, returns, shipping and payment pages. You make the checkout keep every promise.

The business scenario

Customers will not pay a store that hides its rules. Harbour & Co needs four pages before launch — Privacy Policy (Singapore PDPA), Returns & Refunds, Shipping & Delivery and Payment Methods — and a checkout that matches them: PayNow or bank transfer, pay at pickup, S$5 delivery, free above S$100, free studio pickup.

You will deliver

✓ Four AI-drafted policy pages, checked against the brand promises and published
✓ Privacy and Terms pages linked in Settings so checkout shows them
✓ Payments: Direct bank transfer (PayNow) and Pay at pickup enabled
✓ Shipping zone Singapore: flat rate S$5, free shipping from S$100, local pickup
✓ A 'Customer care' footer menu linking the four policies

AI does ChatGPT drafts every policy page from the brand promises in the brief.

You decide You check every promise matches the settings you configure — and you flag the drafts for the owner's legal review.

Time 25 min · LO4

© Tertiary Infotech Academy Pte Ltd

Lab 4 — How it runs

Orange cards are you; dark cards are the AI. Nothing goes live without you.

YOU · STEP 1

Facts in

Attach brand brief + policy facts.

AI · STEP 2

AI drafts 4 policies

Privacy (PDPA), returns, shipping, payments.

YOU · STEP 3

You check promises

Fees, days and methods must match settings.

YOU · STEP 4

Payments

PayNow / bank transfer + pay at pickup.

YOU · STEP 5

Shipping zone

S$5 flat · free ≥ S$100 · pickup.

YOU · STEP 6

Test checkout

See every option and policy link.

Checkpoint Checkout shows three delivery options, two payment methods, and links to the Privacy Policy and Terms.

© Tertiary Infotech Academy Pte Ltd

Lab 4 — The Steps

#	Step	Where
1	Draft the four policy pages [AI prompt]	ChatGPT (chatgpt.com) — a new chat
2	Check every promise	You
3	Publish the four pages	Pages > Add Page
4	Link privacy and terms to checkout	Settings > Privacy · WooCommerce > Settings > Advanced
5	Switch on PayNow / bank transfer	WooCommerce > Settings > Payments > Take offline payments
6	Switch on pay at pickup	WooCommerce > Settings > Payments > Take offline payments
7	Build the Singapore shipping zone	WooCommerce > Settings > Shipping > Add zone
8	Add the Customer care footer menu	Appearance > Menus
9	Test the checkout as a customer	Private browser window

TIP Full instructions, values and the Prompt Playbook: labs/lab-04-ai-policies-payments-shipping/LAB-04-Instructions.pdf

© Tertiary Infotech Academy Pte Ltd

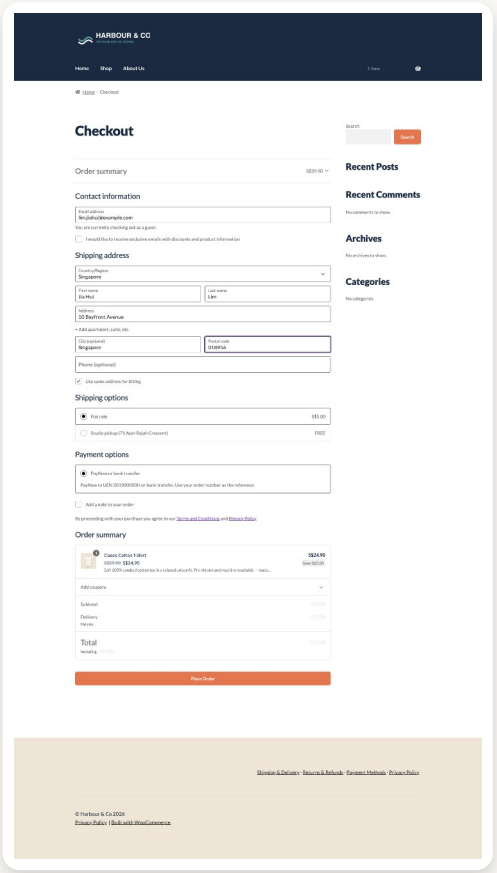

Step 1 · Draft the four policy pages

PROMPT · copy from labs/prompts/index.html or COPY-PROMPTS.txt

```
ROLE: You are an eCommerce operations writer for small Singapore retailers.
CONTEXT: Harbour & Co (brief attached). The attached policy facts are the ONLY source of fees, days and
contacts.
TASK: Draft four customer-facing pages: 1) Privacy Policy aligned to Singapore's Personal Data Protection
Act 2012 (PDPA) — what we collect at checkout, why, who we share it with (payment and delivery partners),
retention, the customer's access and correction rights, our Data Protection Officer contact; 2) Returns &
Refunds; 3) Shipping & Delivery; 4) Payment Methods.
CONSTRAINTS: Plain English, short headed sections, under 350 words per page. Use only the facts given — if
a fact is missing write [TO CONFIRM]. Use British spelling. Prices in S$ including 9% GST. Do not invent
facts, reviews, awards or sustainability claims.
FORMAT: Four Markdown sections, each starting with the page title as a # heading.
```

© Tertiary Infotech Academy Pte Ltd

What Done Looks Like

- Flat rate S$5.00, studio pickup, PayNow or bank transfer, and the Terms / Privacy notice at checkout.

© Tertiary Infotech Academy Pte Ltd

Lab 4 — Checkpoint

Verify

Four policy pages are published and in the Customer care footer menu

Verify

Privacy page is set in Settings > Privacy; a Terms page is set in WooCommerce > Advanced

Verify

Two payment methods are enabled with customer-friendly titles

Stretch challenge

Ask ChatGPT for Terms and Conditions using the same facts, publish it, and point WooCommerce > Advanced > Terms and conditions at it.

© Tertiary Infotech Academy Pte Ltd

TOPIC 4 · DISCUSSION · 15 MIN

Discussion — Recommend Payment and Shipping for Customer Experience

Working from the store you have built, recommend the payment and shipping mix that would give your customers the best experience — and justify the trade-offs.

Question 1

Which payment methods do your customers expect, and what does each one cost you?

Question 2

Does the customer stay on your site, or get redirected? Why does that matter for conversion?

Question 3

Would free shipping above a threshold raise your average order value or erode your margin?

Question 4

Which shipping zones do you actually serve, and what happens to orders outside them?

TIP Produce: A recommended payment and shipping configuration with the customer-experience reason for each choice.

© Tertiary Infotech Academy Pte Ltd

TOPIC 5

Manage Sales on WooCommerce Store

1. Orders & statuses
2. Editing orders
3. Refunds & restocking
4. Coupons
5. AI customer replies

© Tertiary Infotech Academy Pte Ltd

Key Concepts in This Topic

Orders and statuses

Pending, Processing, Completed, On-Hold, Cancelled, Refunded and Failed track an order's life.

Managing orders

View, filter and edit orders; change status, edit line items, add fees and apply coupons.

Adding orders manually

Phone and offline sales can be entered by hand and emailed to the customer for payment.

Refunds

Refund manually or through the gateway, with the option to restock the returned items.

Stock issues

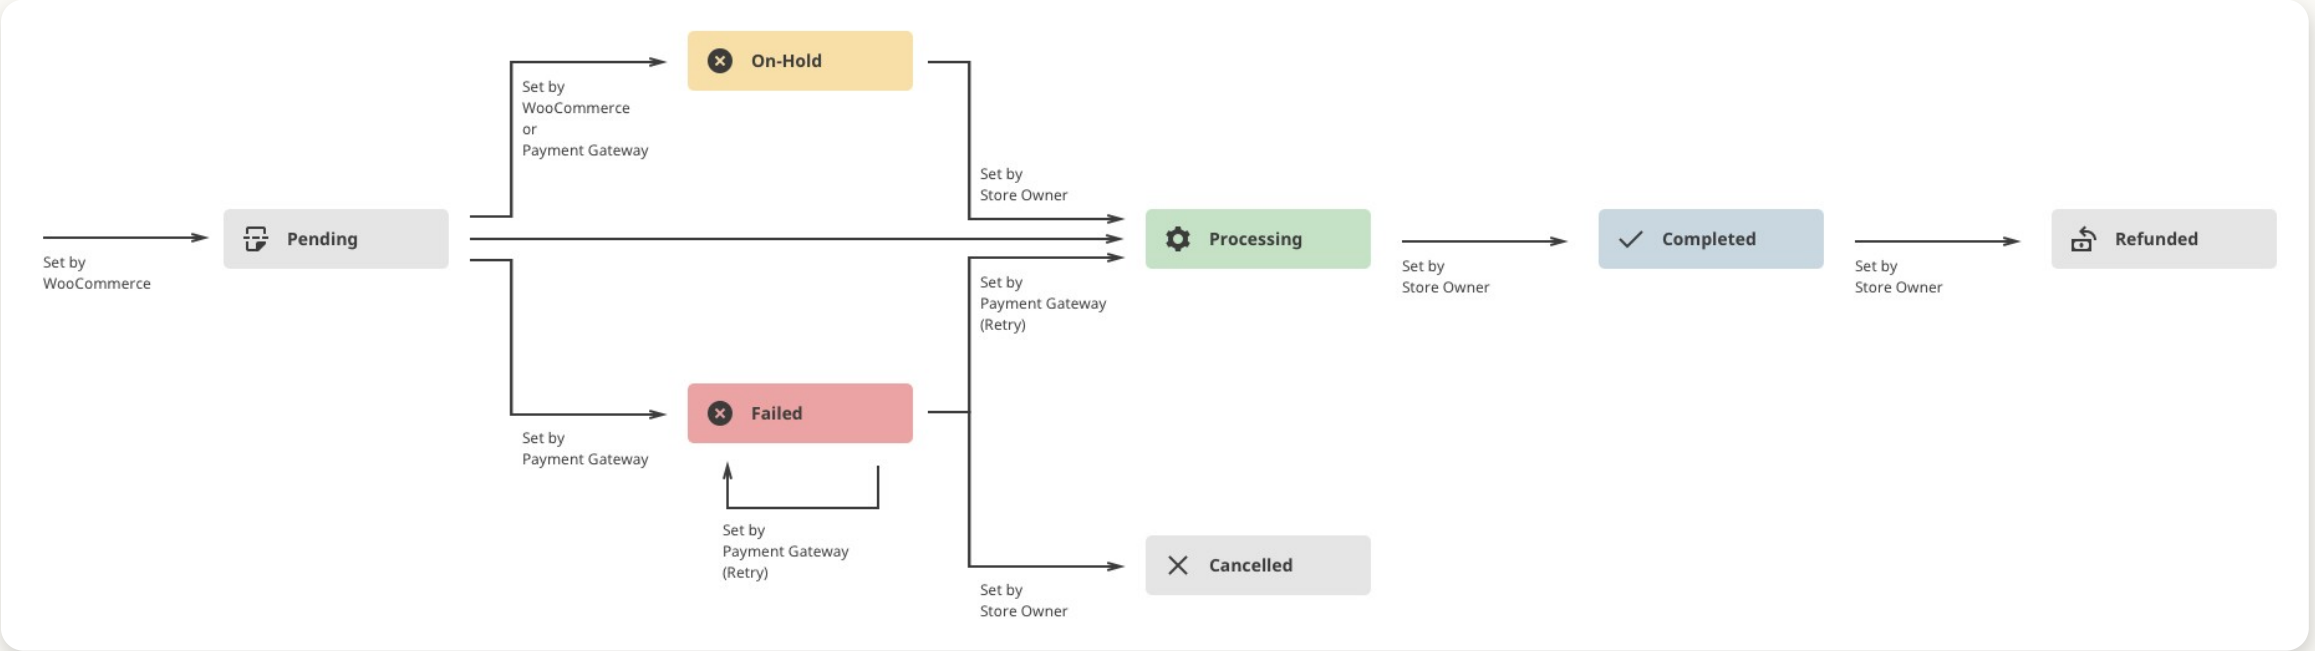

Stock management, low-stock thresholds and out-of-stock handling prevent overselling.

Coupons and promotions

Percentage, fixed cart and fixed product discounts, with usage limits and expiry dates.

© Tertiary Infotech Academy Pte Ltd

Managing Orders

- An order is created at checkout, gets a unique ID, and carries a status through its life.

© Tertiary Infotech Academy Pte Ltd

Order Statuses

Pending payment

Order received, no payment initiated — unpaid.

Processing

Payment received and stock reduced; awaiting fulfilment.

Completed

Order fulfilled — no further action required.

On hold

Stock is reduced, but you must confirm payment yourself.

Cancelled

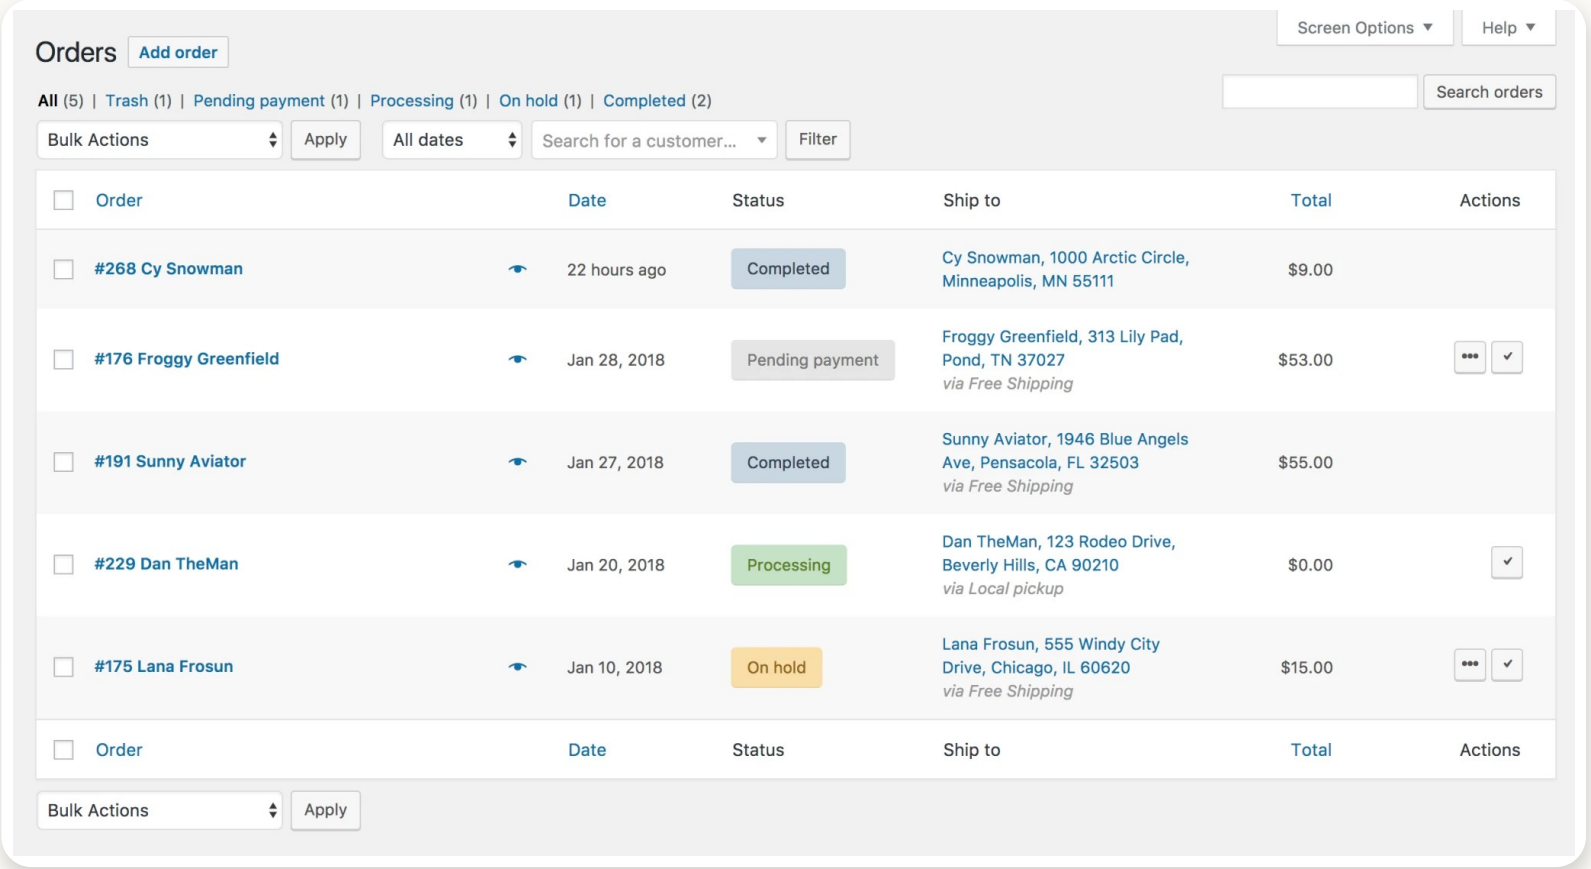

Cancelled by admin or customer — stock is increased back.

Refunded / Failed

Refunded by an admin, or payment declined or requiring authentication.

© Tertiary Infotech Academy Pte Ltd

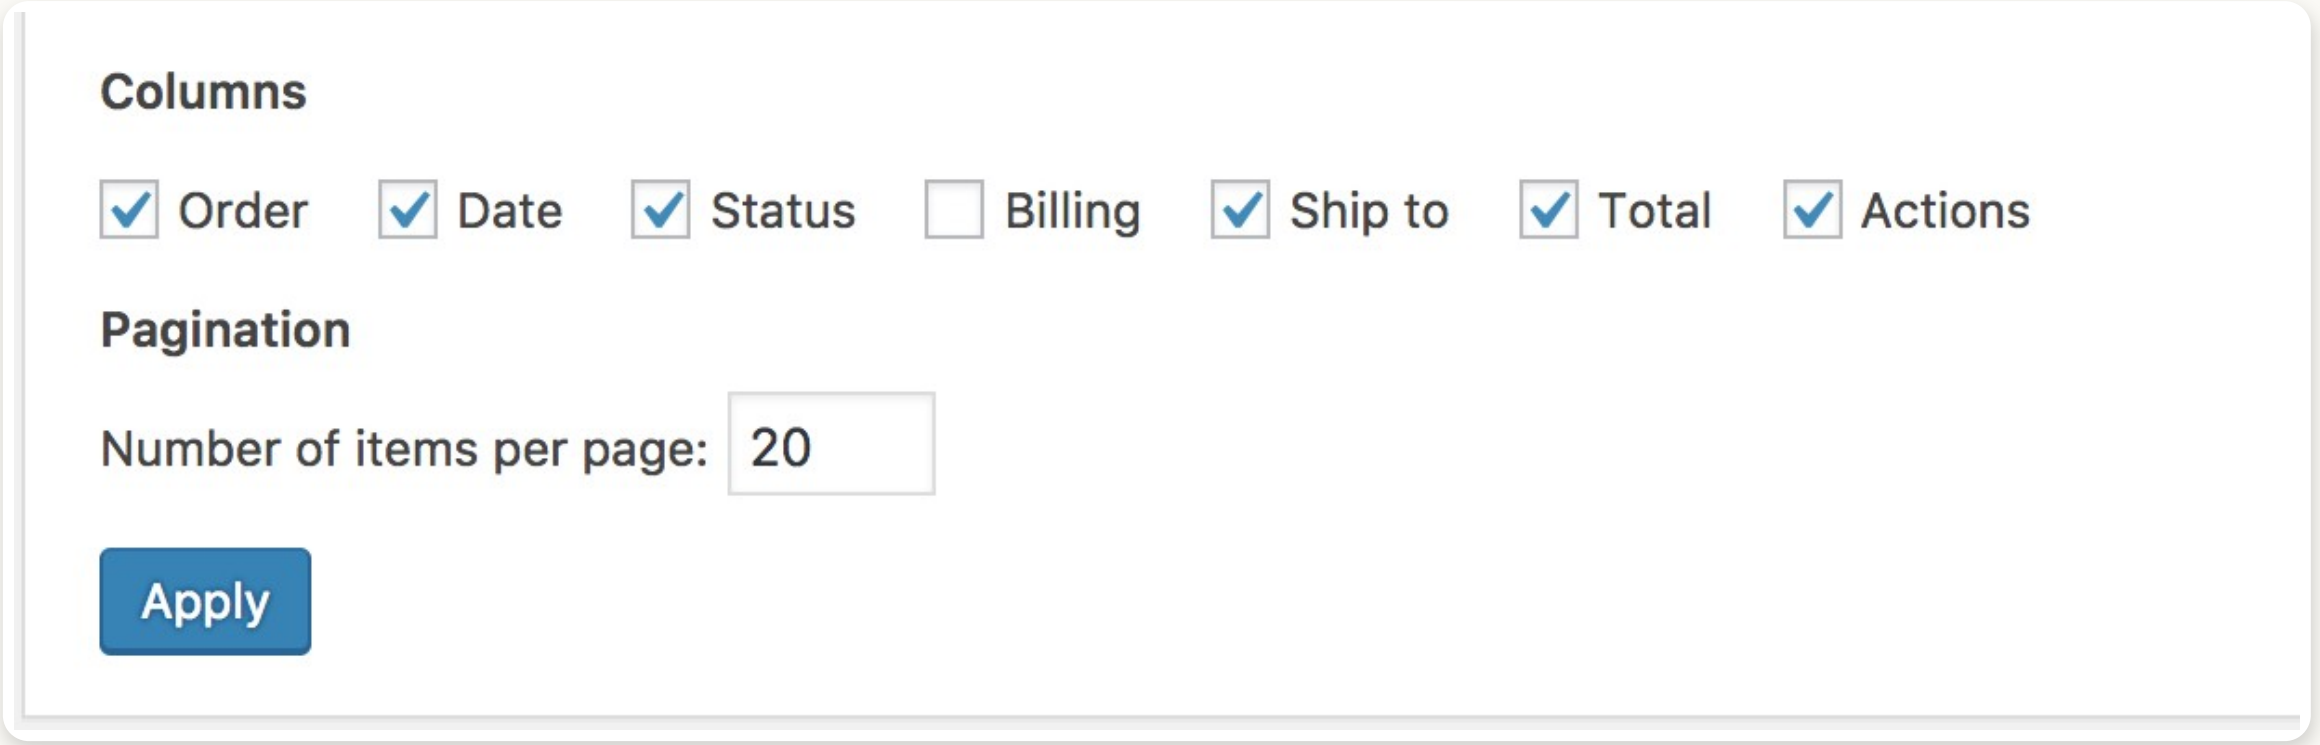

Viewing Orders

- WooCommerce > Orders — number, customer, date, status, address and total.

© Tertiary Infotech Academy Pte Ltd

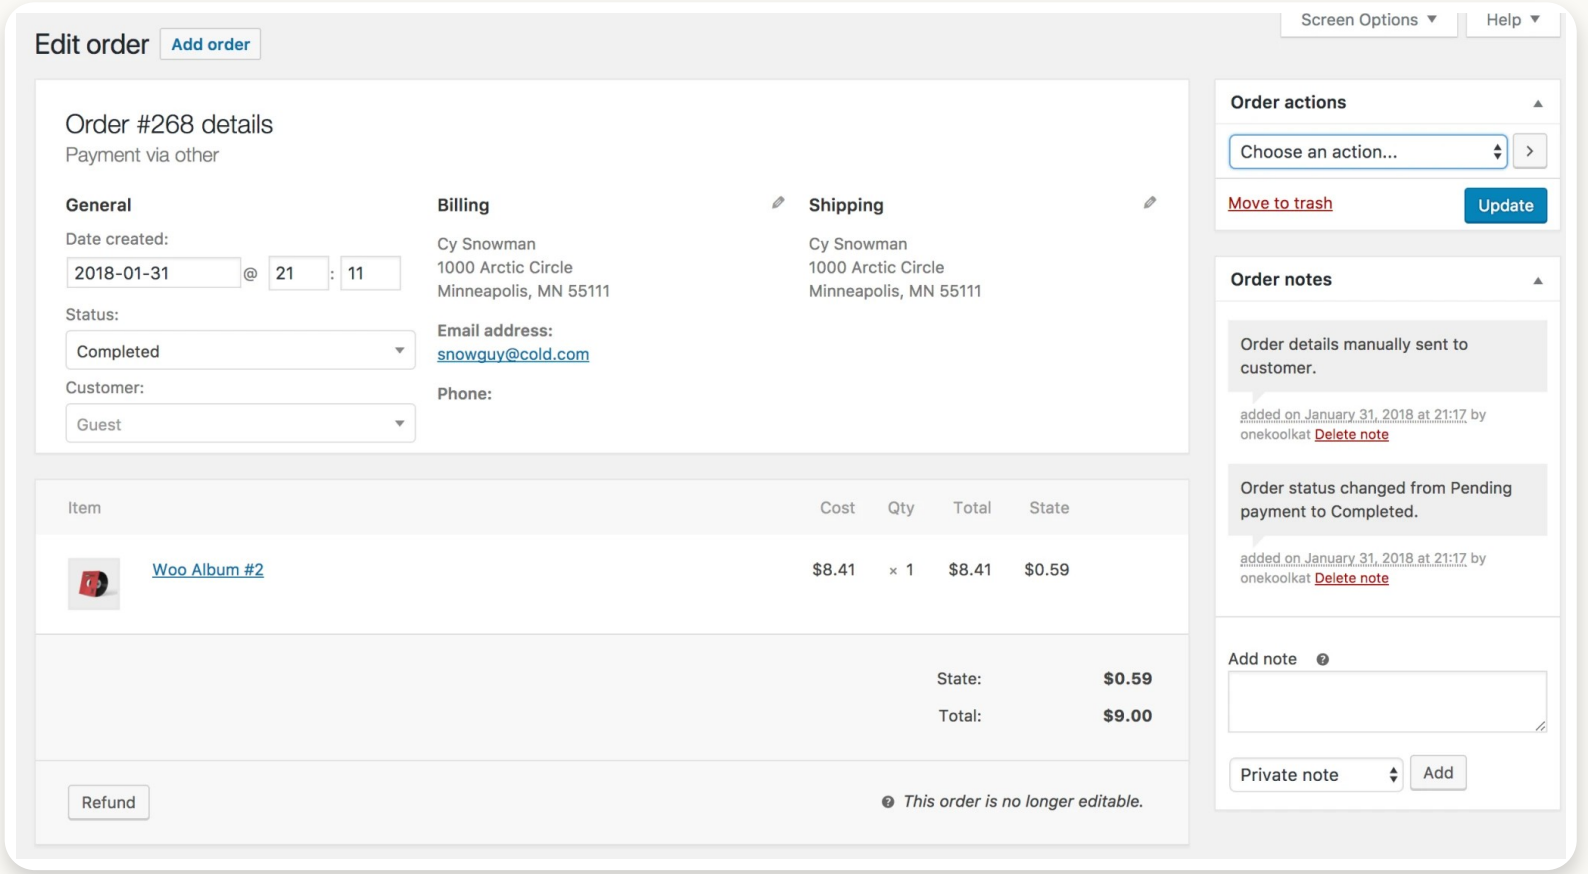

Screen Options and Filtering

- Choose columns and rows, filter by date, search customers, and preview with the 'eye'.

© Tertiary Infotech Academy Pte Ltd

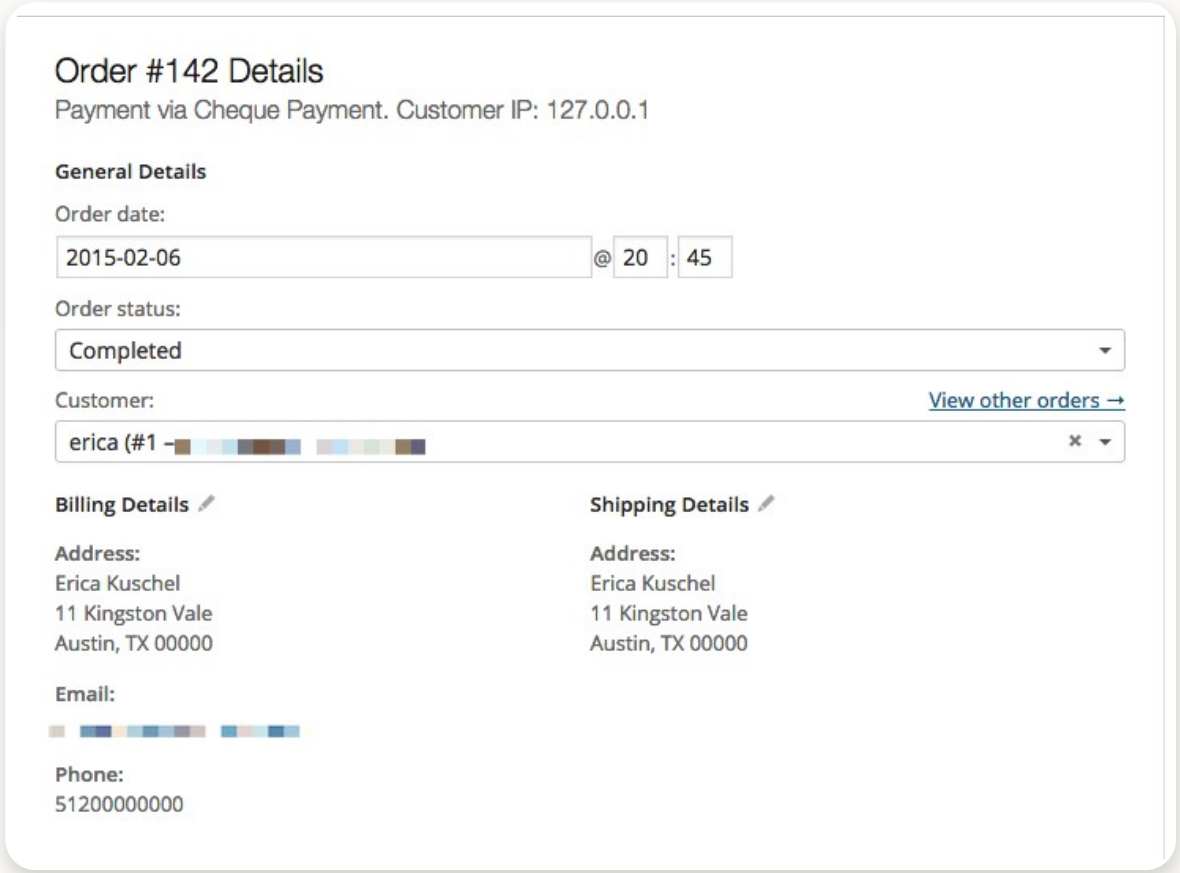

The Single Order Page

- View and edit everything — status, line items, taxes, coupons, fees and notes.

© Tertiary Infotech Academy Pte Ltd

Order Data Panel

- Modify the status, the customer note, and which user the order is assigned to.

© Tertiary Infotech Academy Pte Ltd

Editing a Single Order

Change status

Move the order through its lifecycle and trigger the customer emails.

Edit order items

Modify products, quantities, prices and taxes on an unpaid order.

Stock

Reduce or restore stock for the order directly from Order actions.

Apply coupons

Enter a known coupon code — the order must be unpaid for it to take effect.

Add a fee

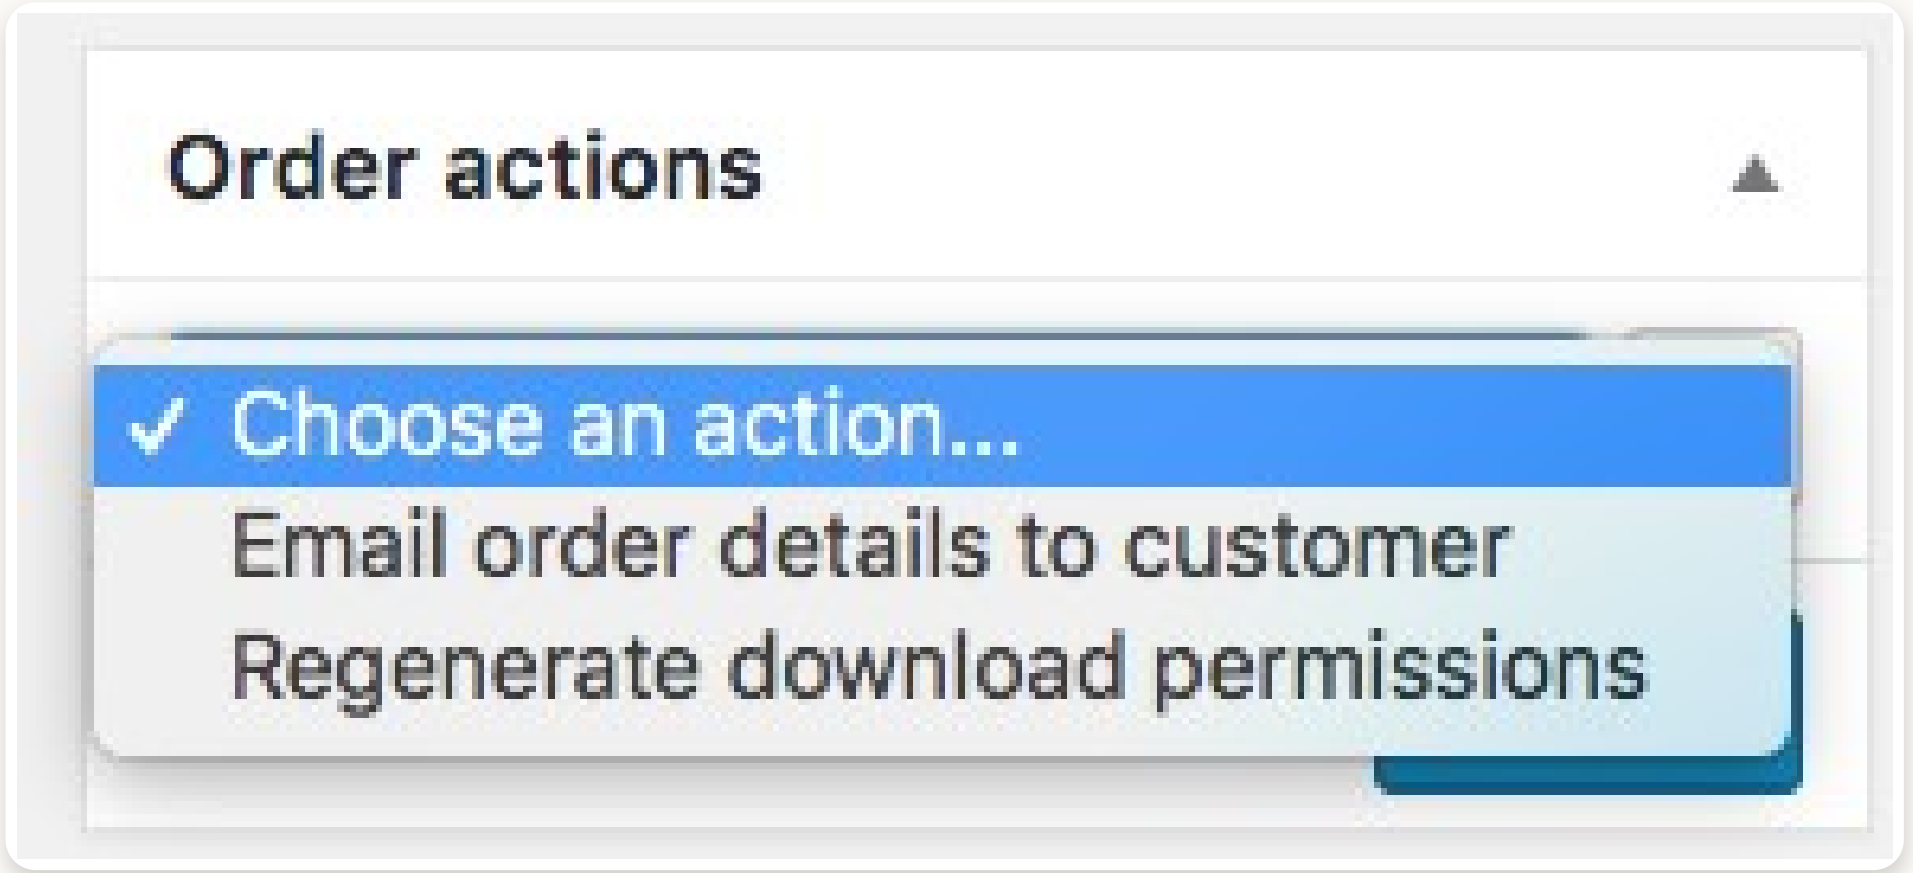

Enter an amount or a percentage; negative fees apportion tax across items.

Order actions

Email order details to the customer, or regenerate download permissions.

© Tertiary Infotech Academy Pte Ltd

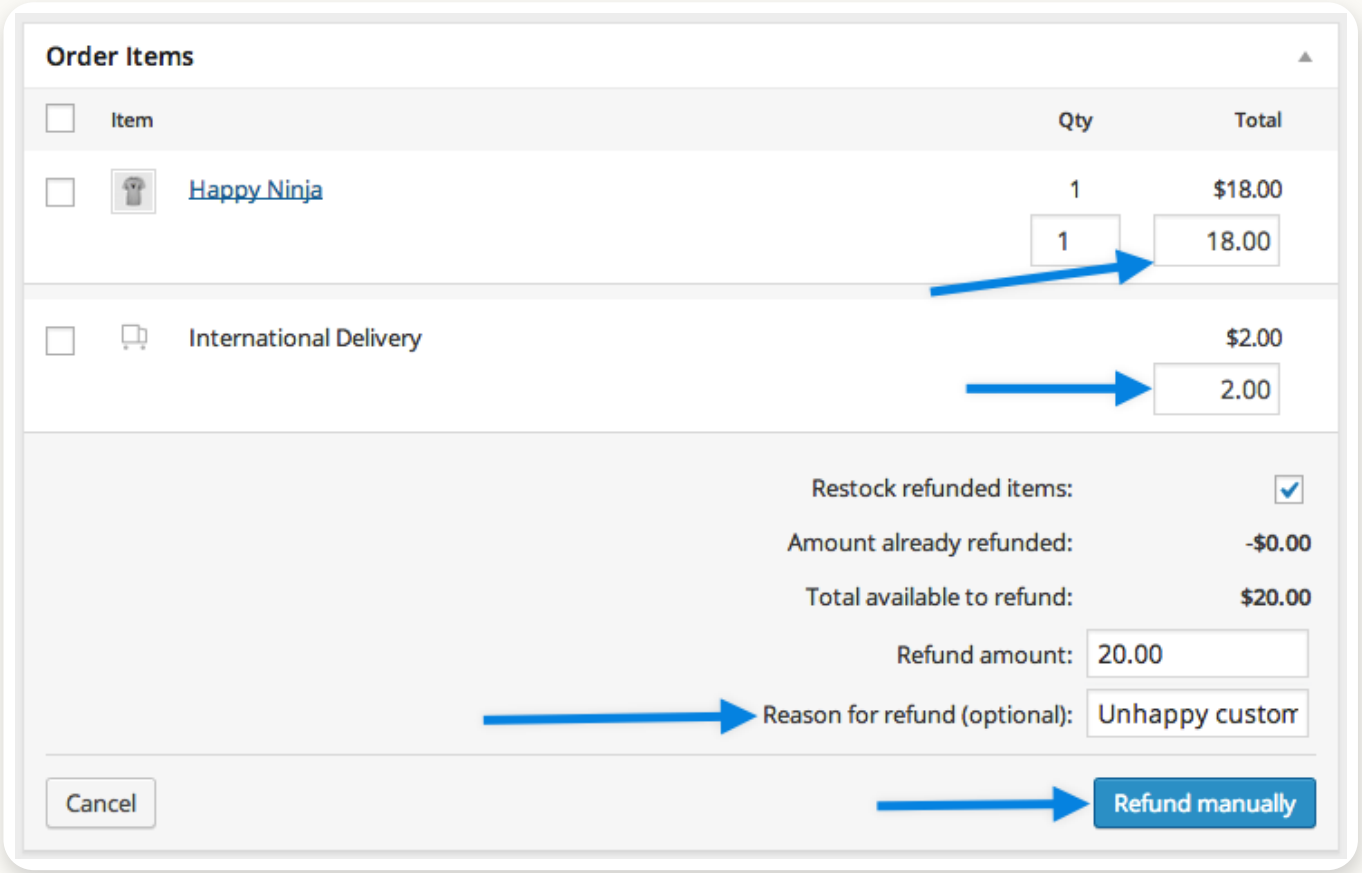

Adding an Order Manually

- WooCommerce > Orders > Add order — for phone and offline sales.

© Tertiary Infotech Academy Pte Ltd

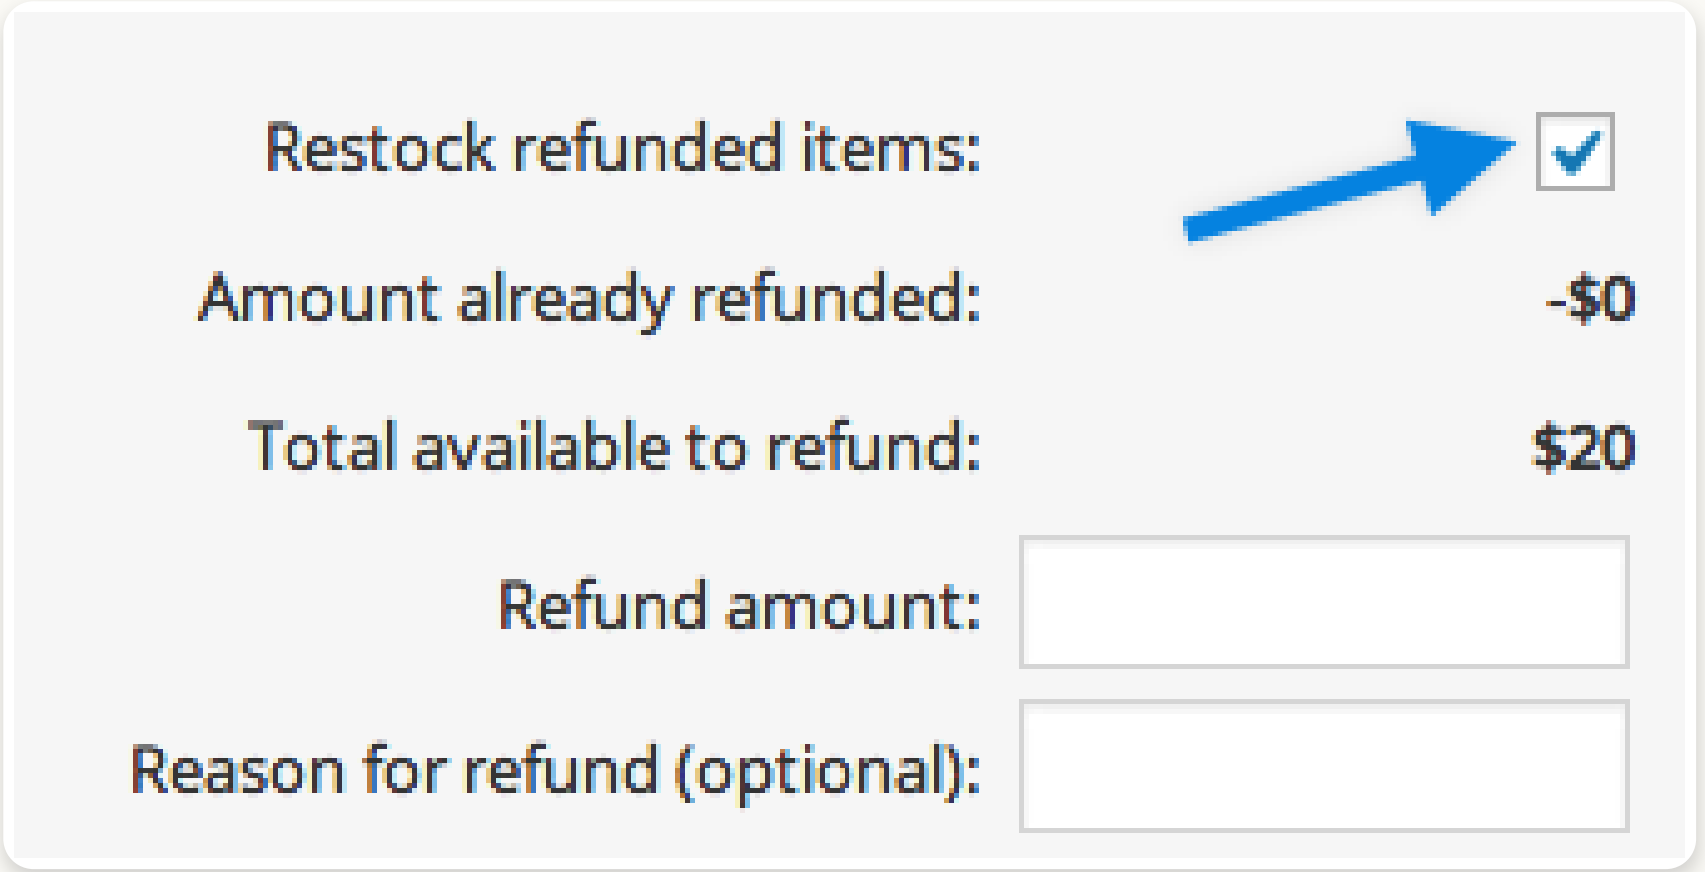

Refunding an Order

- Open the order, click Refund, enter the amount and a reason, then Refund manually.

© Tertiary Infotech Academy Pte Ltd

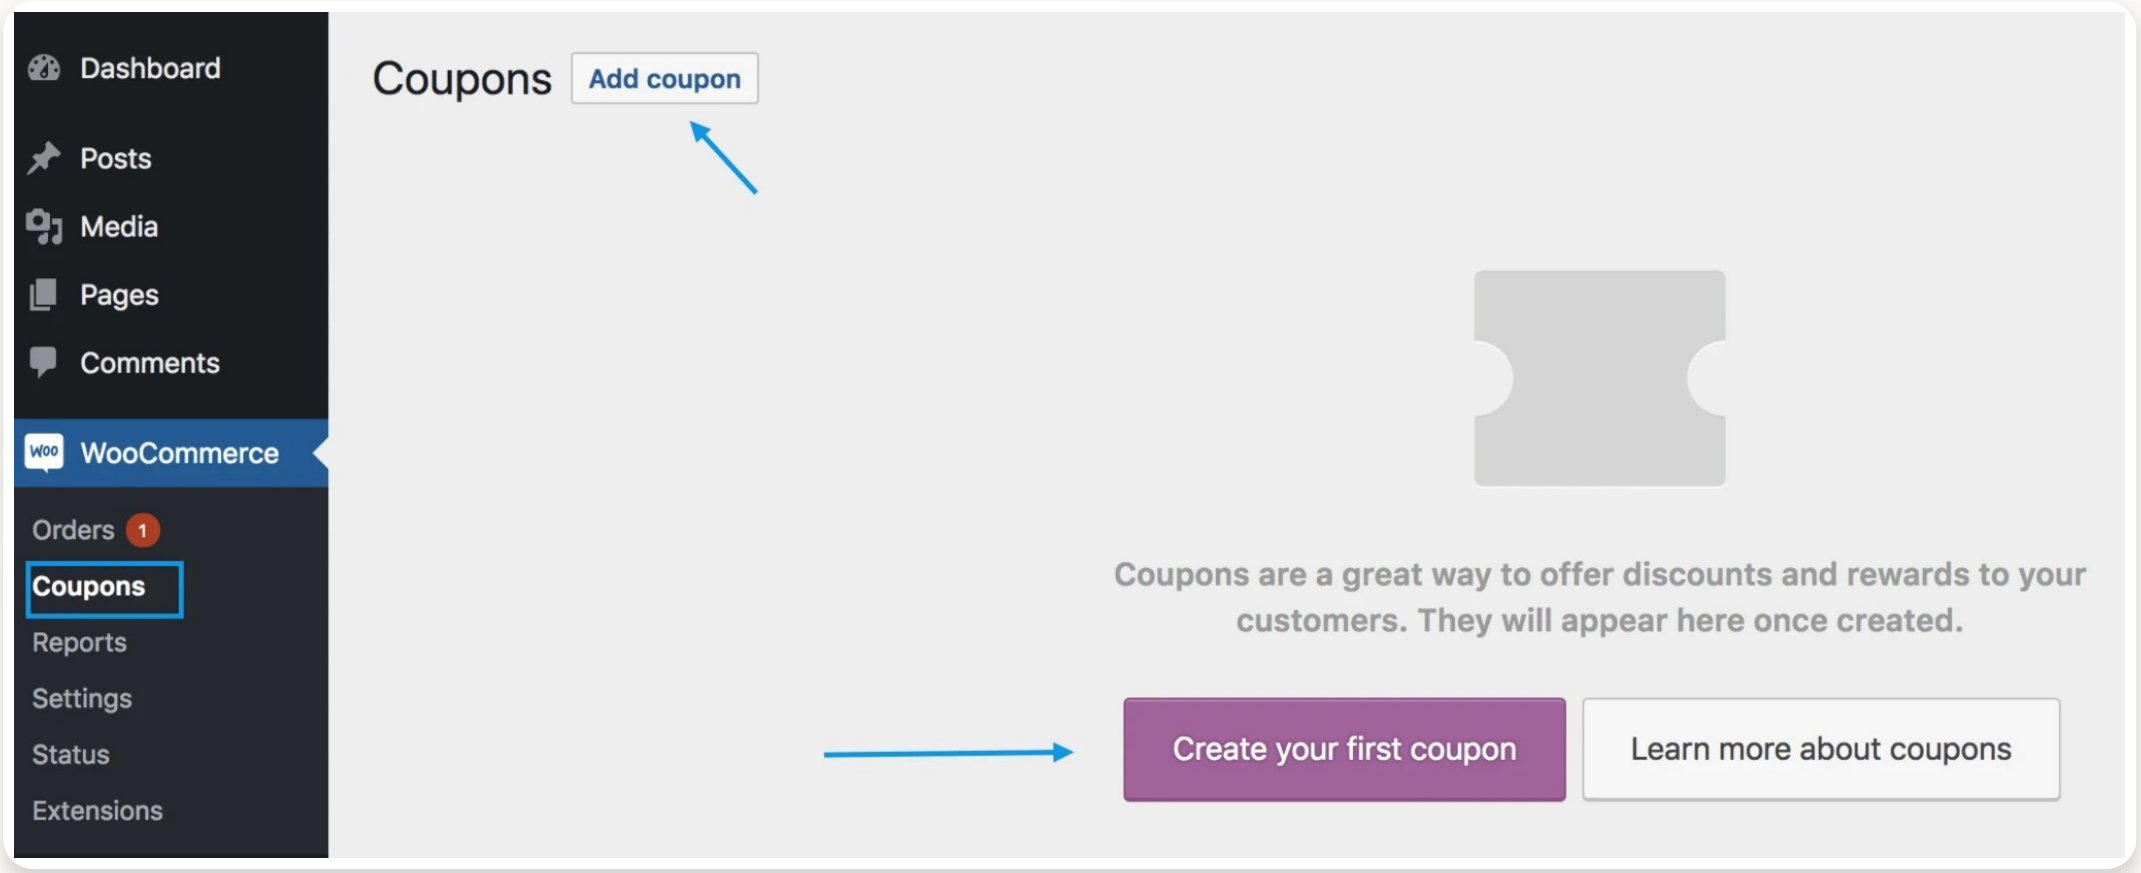

Restocking Refunded Items

- Tick 'Restock refunded items' so returned stock goes back into inventory.

© Tertiary Infotech Academy Pte Ltd

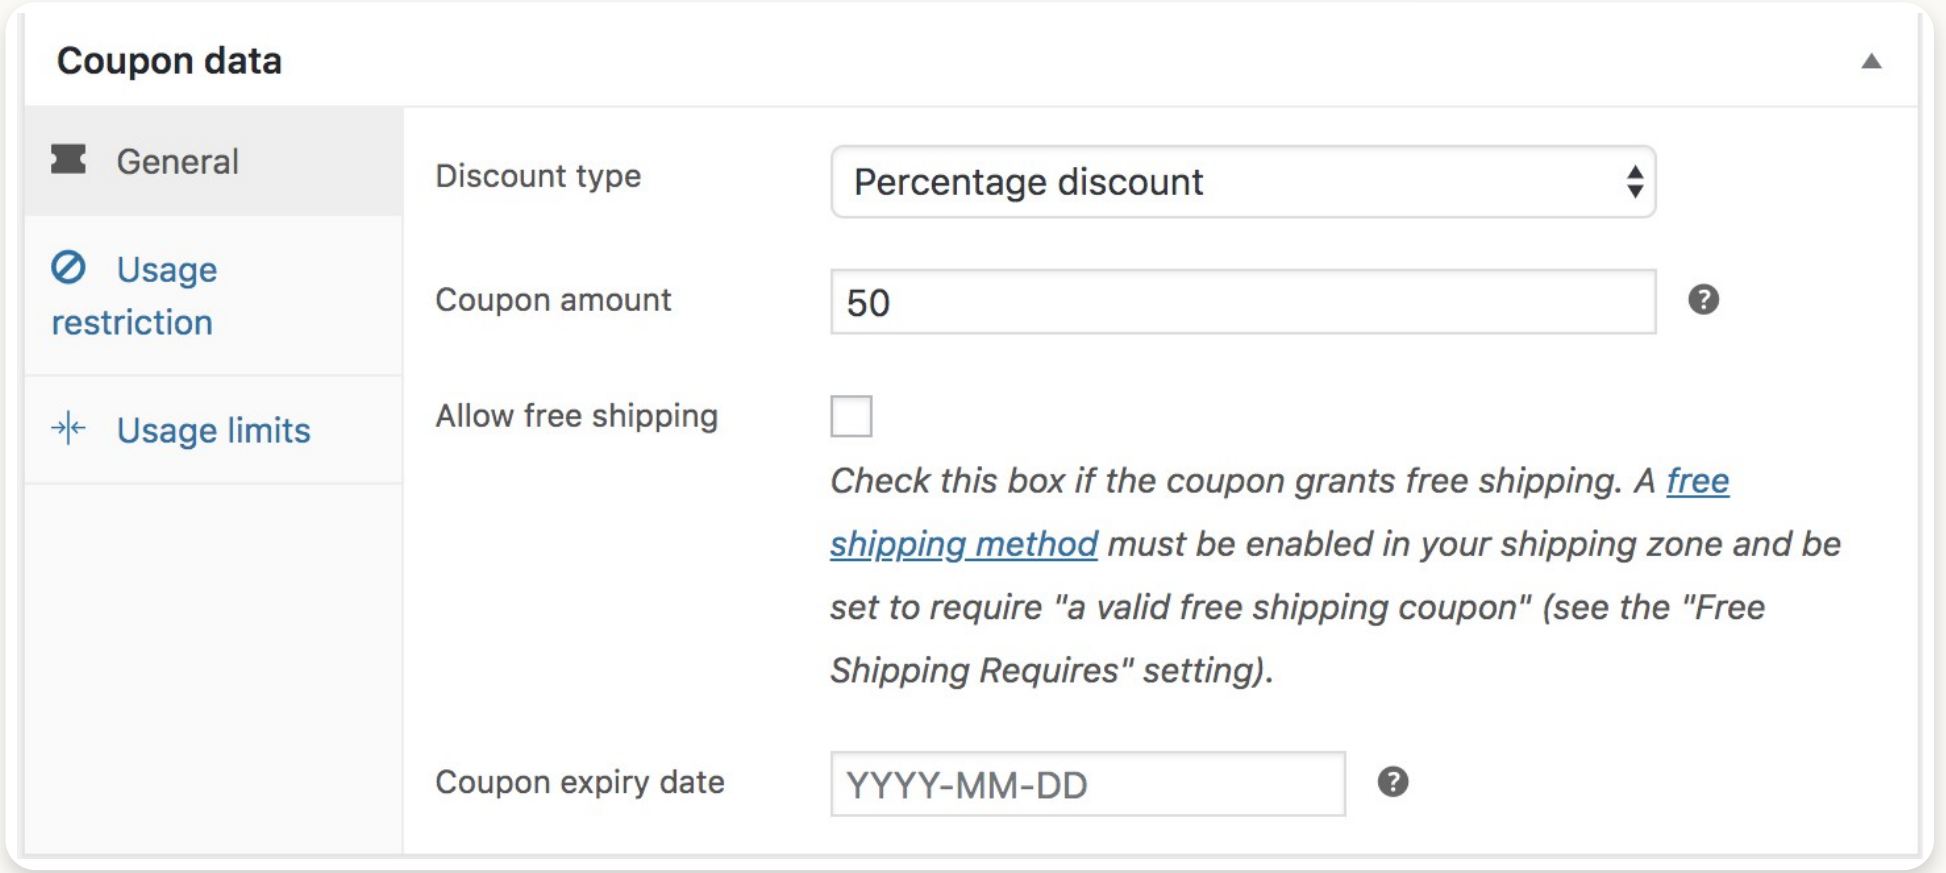

Adding a Coupon

- Marketing > Coupons > Add coupon — enter or generate a unique code.

© Tertiary Infotech Academy Pte Ltd

Coupon Discount Settings

- Discount type and amount, free shipping, and an expiry date.

© Tertiary Infotech Academy Pte Ltd

The Three Discount Types

Percentage discount

A share off the qualifying items. 3 shirts at $20 = $60; 10% off gives $6.

Fixed cart discount

A flat sum off the whole cart. 3 shirts at $20 = $60; $10 off gives $10.

Fixed product discount

A set amount off EACH qualifying item. 3 shirts, $10 off each, gives $30.

Restrictions & limits

Minimum spend, product and category limits, usage limit per coupon and per user.

© Tertiary Infotech Academy Pte Ltd

AI Drafts the Reply. You Check the Number and Press Send.

Give it the facts

The order, the complaint, the decision you have already made.

Constrain the tone

Apologise once, exact refund figure, timing, no bribes, under 120 words.

Check the maths

Tote S$24.90 less its share of WELCOME10 = S$22.41 — WooCommerce shows the same.

Send from the order

Order notes → Note to customer: emailed and kept on the record.

© Tertiary Infotech Academy Pte Ltd

TOPIC 5 · LAB 5 · PHASE 1

Lab 5 — Run a Day of Orders — Refund, Restock, Reply with AI

Take an order with WELCOME10, refund a damaged item with restocking, and send a reply ChatGPT drafted.

The business scenario

Launch morning. Tan Wei Ling orders a polo and a tote using the welcome coupon, then emails: the tote's strap stitching came loose. Daniel is off sick, so you run the shop: process the order, refund the tote and put it back in stock, and send her a reply that sounds like Harbour & Co — drafted by AI, approved by you.

You will deliver

✓ WELCOME10 coupon: 10% off, minimum spend S$50, one use per customer
✓ A test order placed at checkout with WELCOME10 and moved from Processing to Completed
✓ The tote refunded with 'Restock refunded items' ticked
✓ An AI-drafted, human-approved note to the customer on the order
✓ A manual phone order created for a walk-in customer

AI does ChatGPT drafts the customer reply and an out-of-stock message.

You decide You decide the refund, check the amount, edit the reply and press send.

Time 25 min · LO5

© Tertiary Infotech Academy Pte Ltd

Lab 5 — How it runs

Orange cards are you; dark cards are the AI. Nothing goes live without you.

YOU · STEP 1

Coupon

WELCOME10 with rules.

YOU · STEP 2

Test order

Checkout as Tan Wei Ling.

YOU · STEP 3

Issue arrives

Damaged tote strap.

YOU · STEP 4

Refund + restock

Refund the tote, stock goes back up.

AI · STEP 5

AI drafts the reply

Apology, refund amount, timing.

YOU · STEP 6

You approve & send

Order note → Note to customer.

Checkpoint The order shows WELCOME10, a refund for the tote, a stock-increase order note, and your note to the customer.

© Tertiary Infotech Academy Pte Ltd

Lab 5 — The Steps

#	Step	Where
1	Create the WELCOME10 coupon	Marketing > Coupons > Add coupon
2	Place the test order	Private browser window (as the customer)
3	Move the order through its statuses	WooCommerce > Orders > the order
4	Draft the reply with AI [AI prompt]	ChatGPT (chatgpt.com) — a new chat
5	Refund the tote and restock it	WooCommerce > Orders > the order > Refund
6	Send your approved reply	Order notes (right sidebar)
7	Enter a phone order by hand	WooCommerce > Orders > Add order
8	Triage the rest of the inbox with AI [AI prompt]	Same ChatGPT chat

TIP Full instructions, values and the Prompt Playbook: labs/lab-05-orders-refunds-ai-replies/LAB-05-Instructions.pdf

© Tertiary Infotech Academy Pte Ltd

Step 4 · Draft the reply with AI

PROMPT · copy from labs/prompts/index.html or COPY-PROMPTS.txt

```
ROLE: You are Harbour & Co's customer-care lead.
CONTEXT: Tan Wei Ling's email and order are attached. We will
refund the Canvas Tote Bag in full to her original payment method
within 5–7 working days and she does not need to post it back.
TASK: Draft a reply to her.
CONSTRAINTS: Under 120 words. Apologise once, state the refund
amount (S$24.90 less her share of the 10% coupon = S$22.41) and
timing, thank her for the photo, no discount bribes, sign off as
Harbour & Co Customer Care. Use British spelling. Prices in S$
including 9% GST. Do not invent facts, reviews, awards or
sustainability claims.
FORMAT: Plain text, ready to paste.
```

Paste into

ChatGPT — attach data/brand-brief.txt first

Expect

A short, warm reply with the exact refund figure. Edit anything that over-promises.

You decide

You decide the refund, check the amount, edit the reply and press send.

© Tertiary Infotech Academy Pte Ltd

Step 8 · Triage the rest of the inbox with AI

PROMPT · copy from labs/prompts/index.html or COPY-PROMPTS.txt

```
ROLE: You are a WooCommerce store manager.
CONTEXT: The attached CSV lists five customer issues.
TASK: For each, give the order status to set, the WooCommerce
action (refund, restock, edit order, coupon, note) and a one-line
customer reply.
FORMAT: A table: issue · status · action · reply.
```

Paste into

ChatGPT — attach data/brand-brief.txt first

Expect

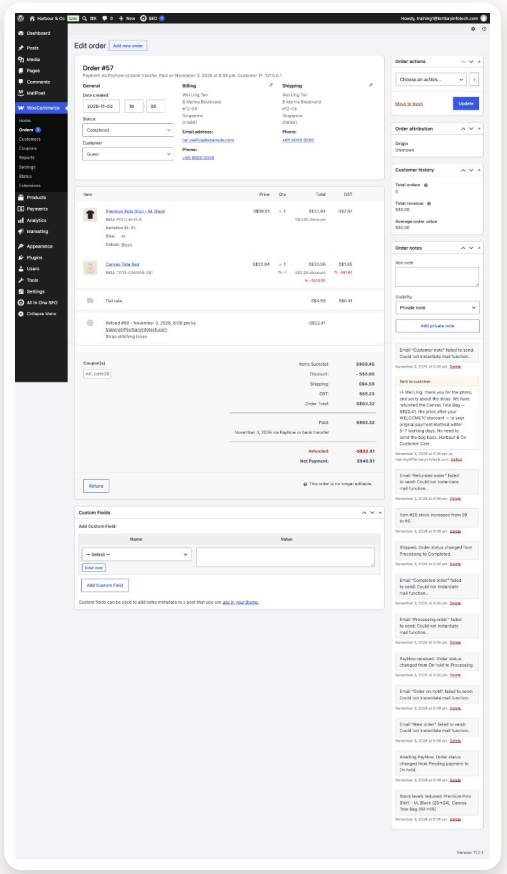

A triage table you can act on — check each action is possible in WooCommerce.

You decide

You decide the refund, check the amount, edit the reply and press send.

© Tertiary Infotech Academy Pte Ltd

What Done Looks Like

- WELCOME10 applied, the tote refunded with restock, and the note to the customer on the order.

© Tertiary Infotech Academy Pte Ltd

Lab 5 — Checkpoint

Verify

WELCOME10 exists with minimum spend S$50 and one use per customer

Verify

The test order used WELCOME10 and reached Completed

Verify

The tote is refunded and its stock went back up

Stretch challenge

Ask ChatGPT for a polite 'back in stock soon' message, then set the Classic Denim Jacket stock to 0 and check how the product page reports it.

© Tertiary Infotech Academy Pte Ltd

TOPIC 6

Manage WooCommerce Performance

1. Reports & Analytics
2. Customer & stock reports
3. Dashboard widgets
4. eCommerce metrics
5. Google Analytics

© Tertiary Infotech Academy Pte Ltd

Key Concepts in This Topic

WooCommerce Reports

Orders, Customers, Stock and Taxes — the built-in view of how the store is performing.

Sales reports

Gross and net sales by date, product and category, plus top sellers, top earners and coupon usage.

Customer and stock reports

Customers versus guests, and low-stock, out-of-stock and on-backorder items.

Dashboard widgets

At-a-glance store status on the WordPress dashboard, configurable through Screen Options.

eCommerce metrics

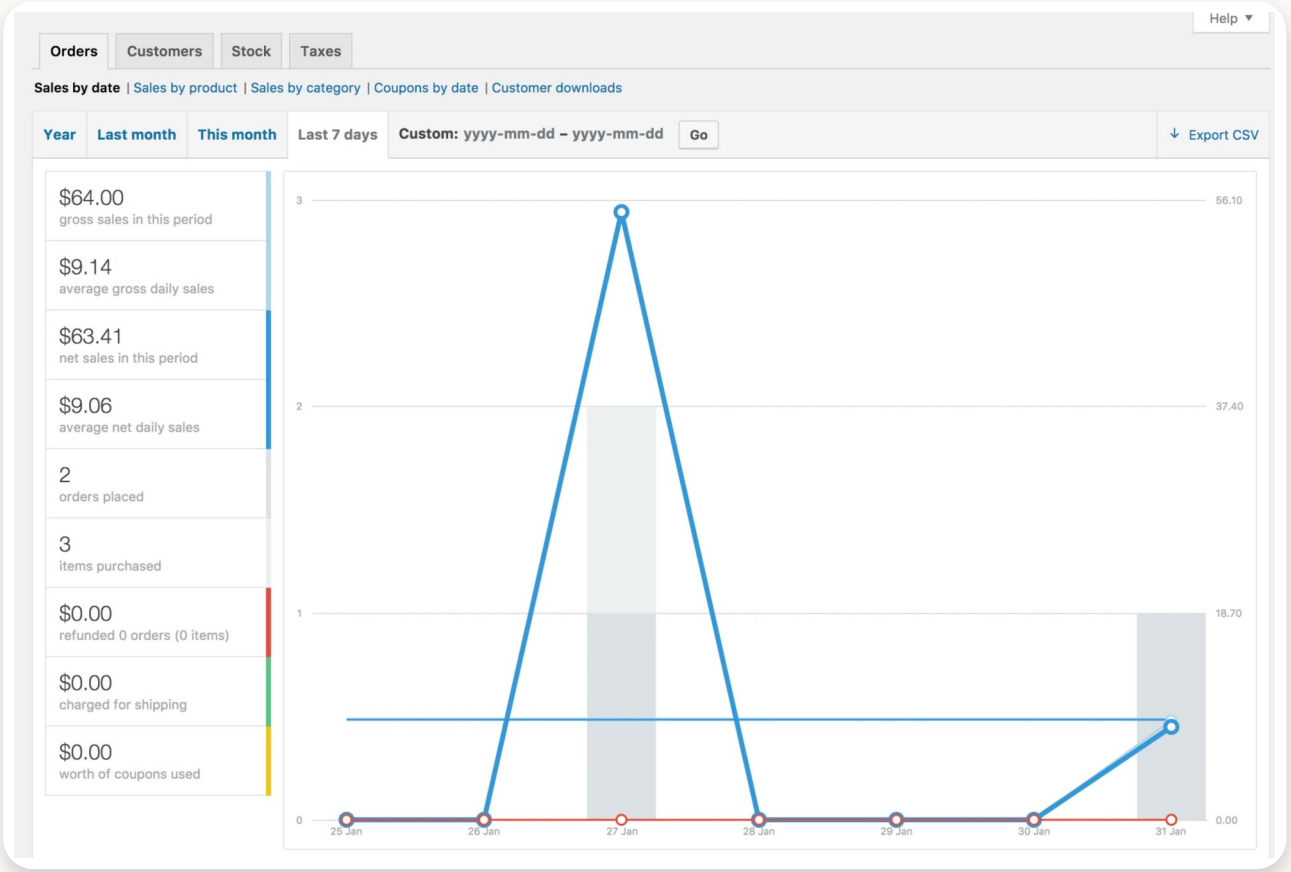

Conversion rate, traffic, revenue by source, retention, repeat purchase and refund rate.

Google Analytics

Integrating analytics attributes revenue to channels and shows where customers drop off.

© Tertiary Infotech Academy Pte Ltd

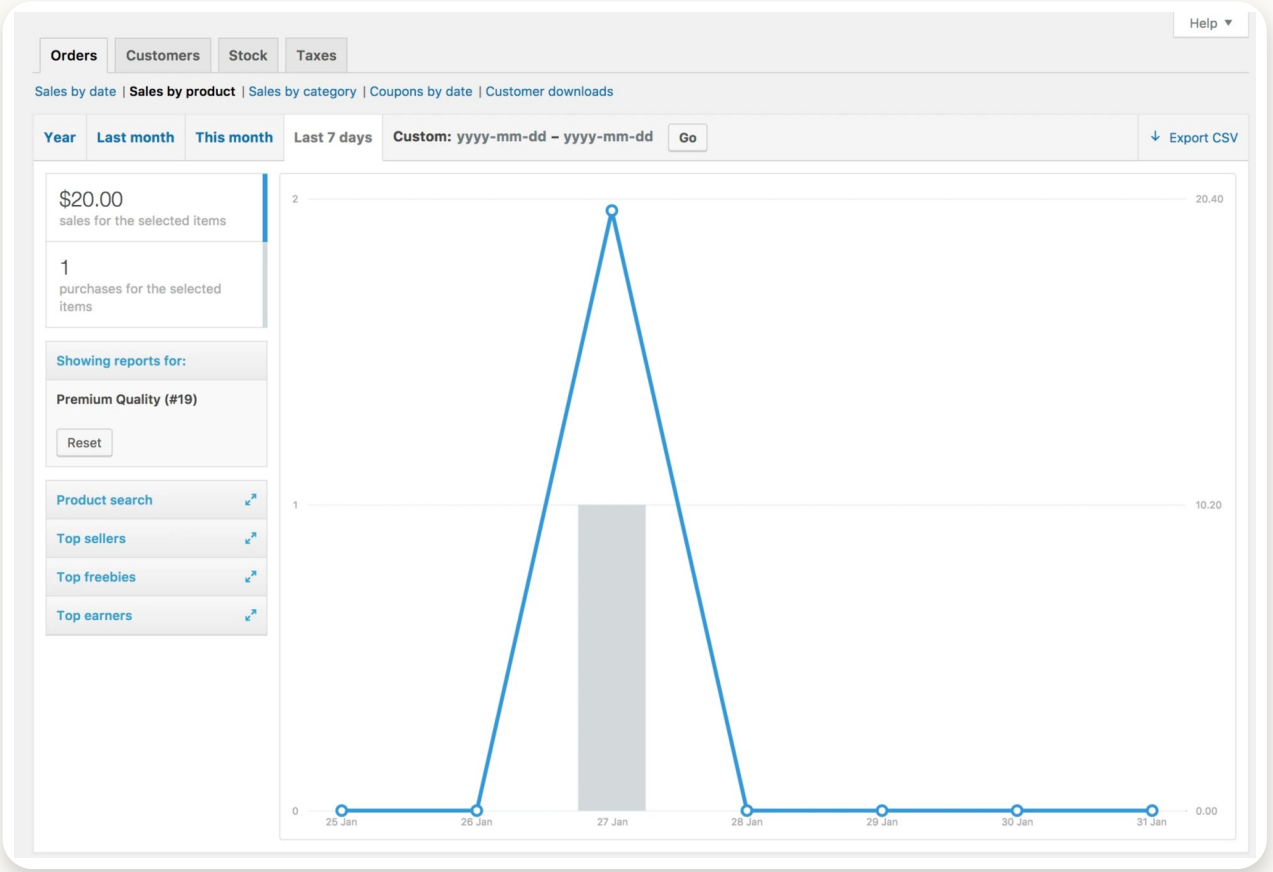

WooCommerce Reports

- WooCommerce > Reports — Orders, Customers, Stock and Taxes.

© Tertiary Infotech Academy Pte Ltd

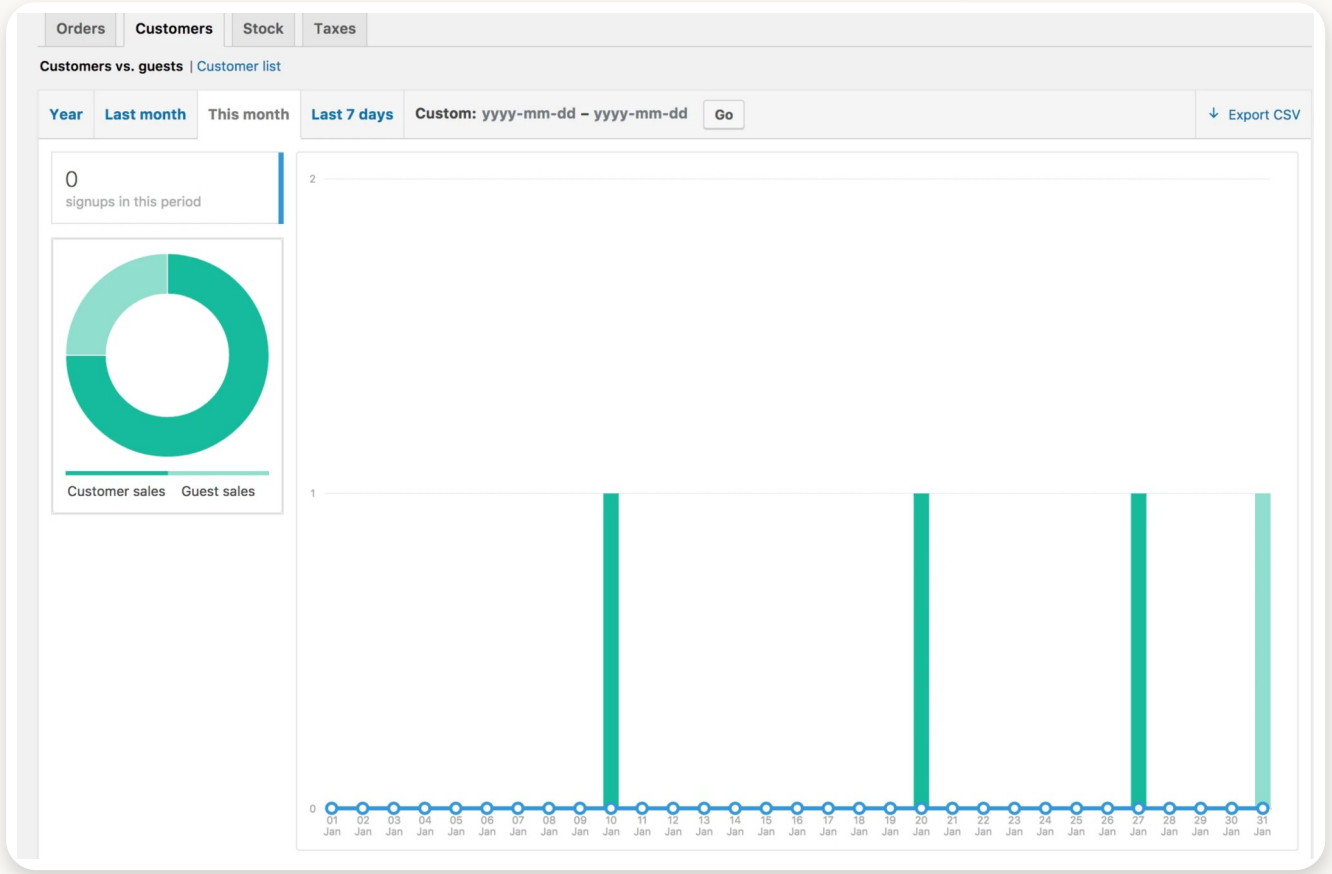

Order Reports

- Sales by date, by product, by category, coupons by date and customer downloads.

© Tertiary Infotech Academy Pte Ltd

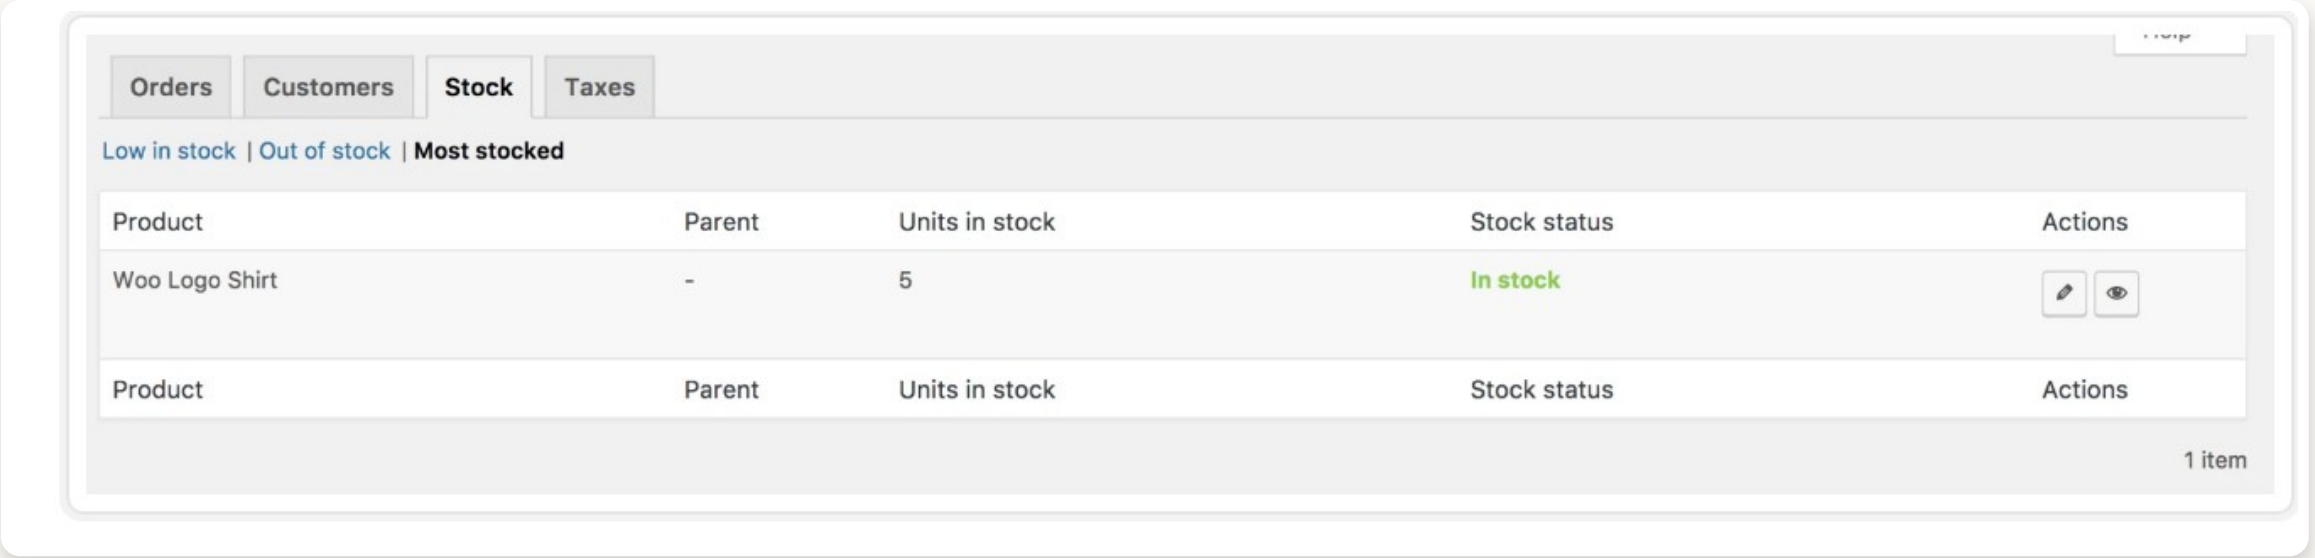

Customer Reports

- Customers vs. Guests, and the customer list — sortable across time periods.

© Tertiary Infotech Academy Pte Ltd

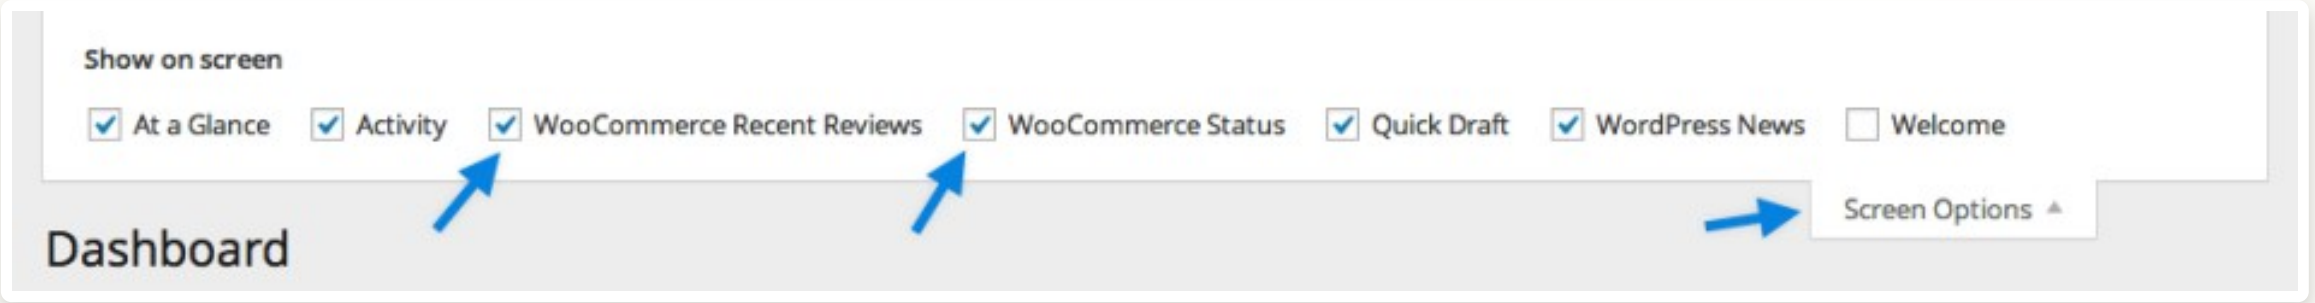

Stock Reports

- Low in stock, out of stock, and most stocked — lost revenue you can prevent.

© Tertiary Infotech Academy Pte Ltd

Dashboard Widgets

- WooCommerce adds status widgets to the WordPress dashboard; tune them via Screen Options.

© Tertiary Infotech Academy Pte Ltd

Metrics for a Successful Store

Sales & revenue

Gross and net sales, revenue by traffic source, and average order value.

Conversion

Sales conversion rate — the share of visitors who actually buy.

Traffic

Website traffic and organic acquisition traffic.

Engagement

Email click-through rate, email subscription rate and social media engagement.

Loyalty

Customer retention rate and repeat customer rate.

Problems

Refund and return rate, and customer enquiries.

© Tertiary Infotech Academy Pte Ltd

Criteria for Evaluating a Metric

Actionable

Does a change in this number tell somebody to do something differently?

Comparable

Can you track it consistently over time and against a target?

Attributable

Can you tell which channel, campaign or product caused the movement?

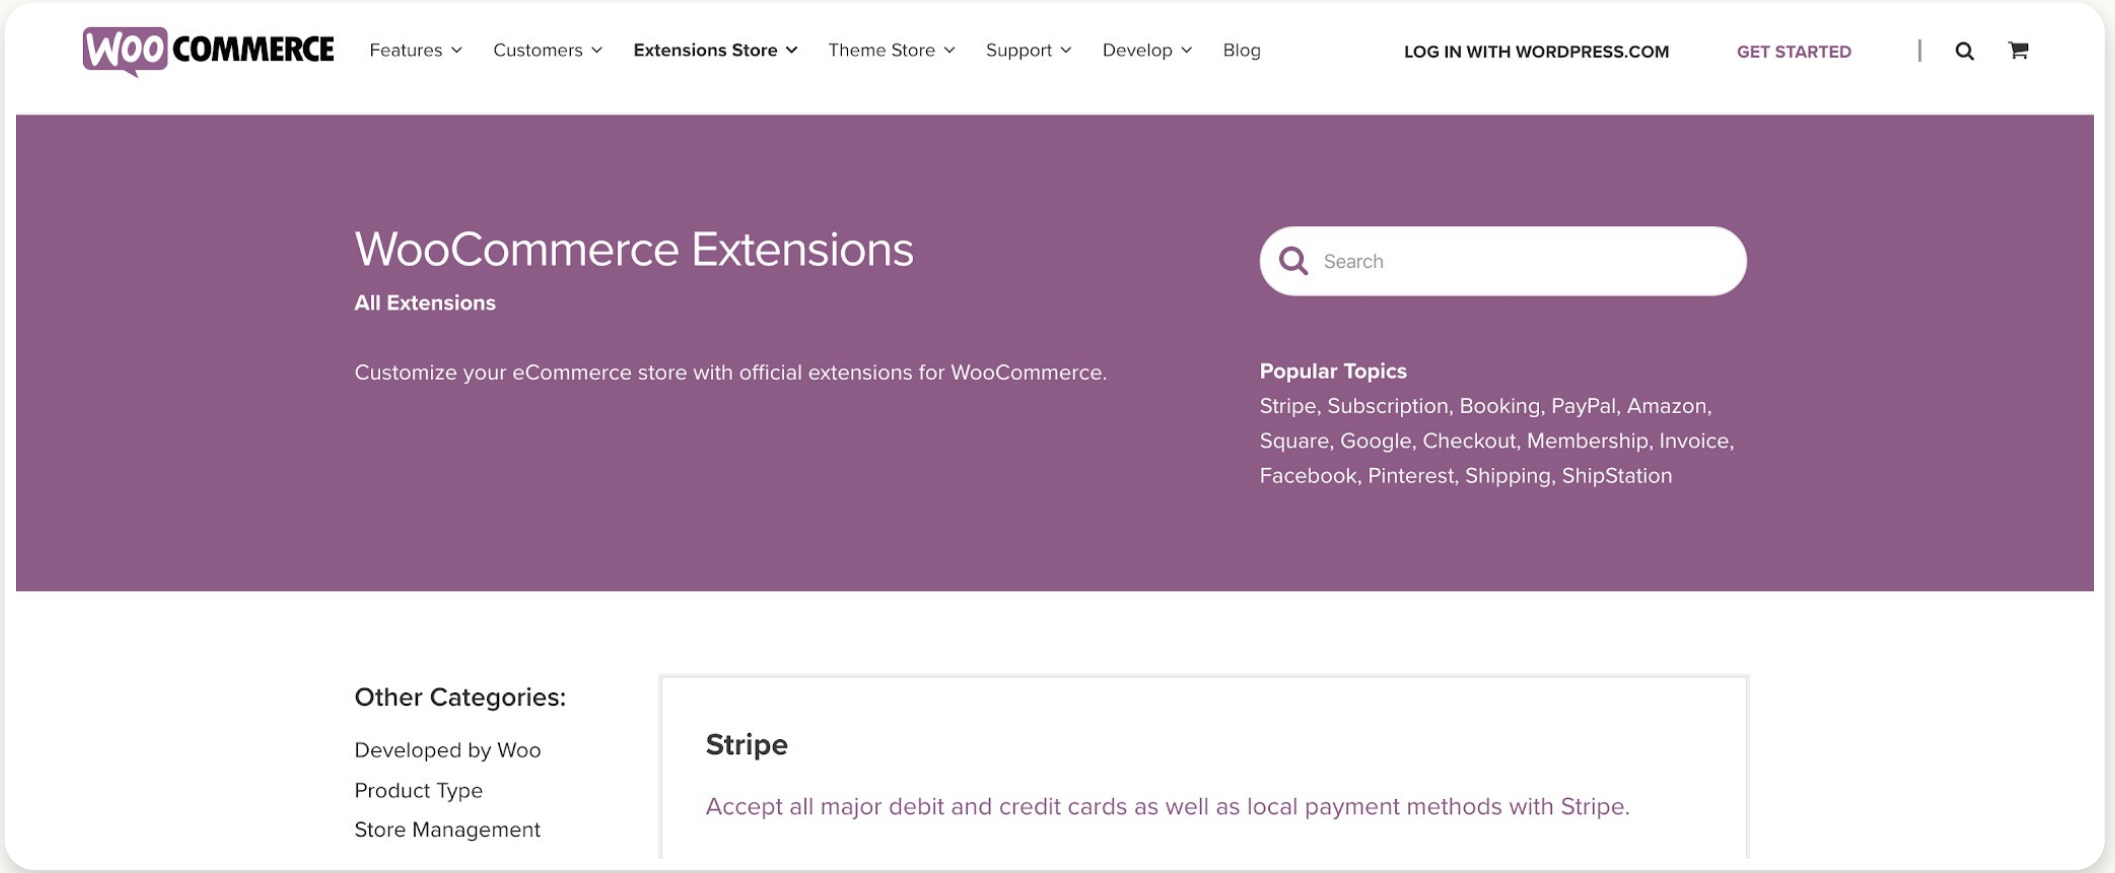

Owned

Is there a person responsible for it, and a threshold that triggers a response?

© Tertiary Infotech Academy Pte Ltd

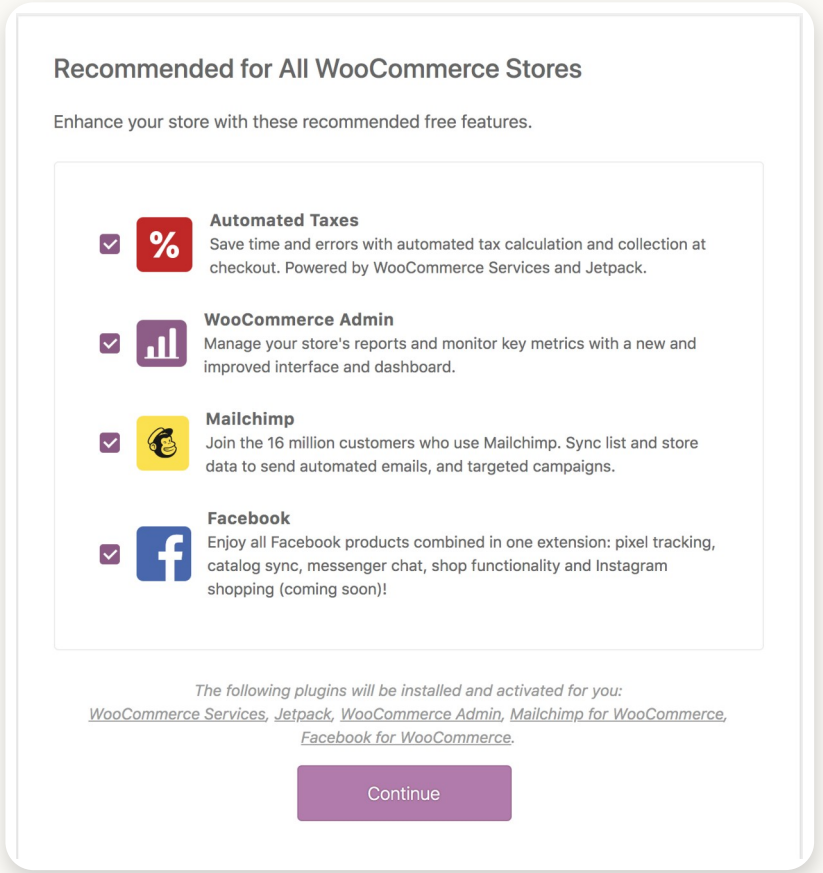

WooCommerce Extensions

- https://woocommerce.com/product-category/woocommerce-extensions/

© Tertiary Infotech Academy Pte Ltd

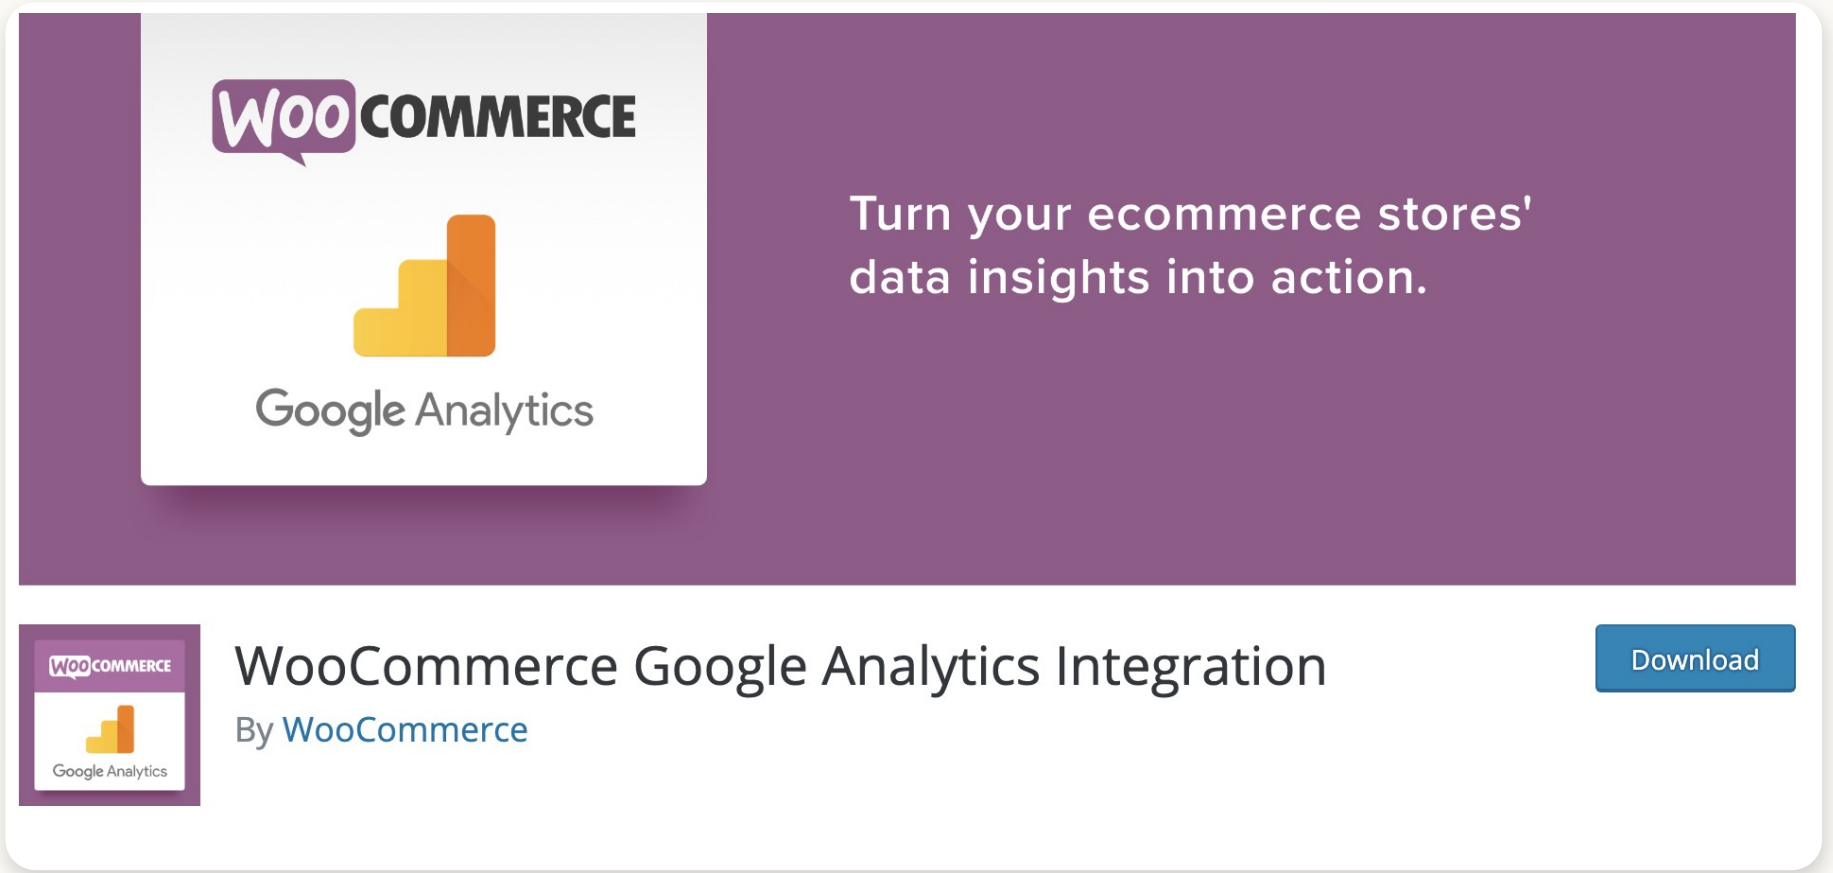

Recommended Free Plugins

- WooCommerce Admin, Mailchimp for WooCommerce, Facebook for WooCommerce and Automated Taxes.

© Tertiary Infotech Academy Pte Ltd

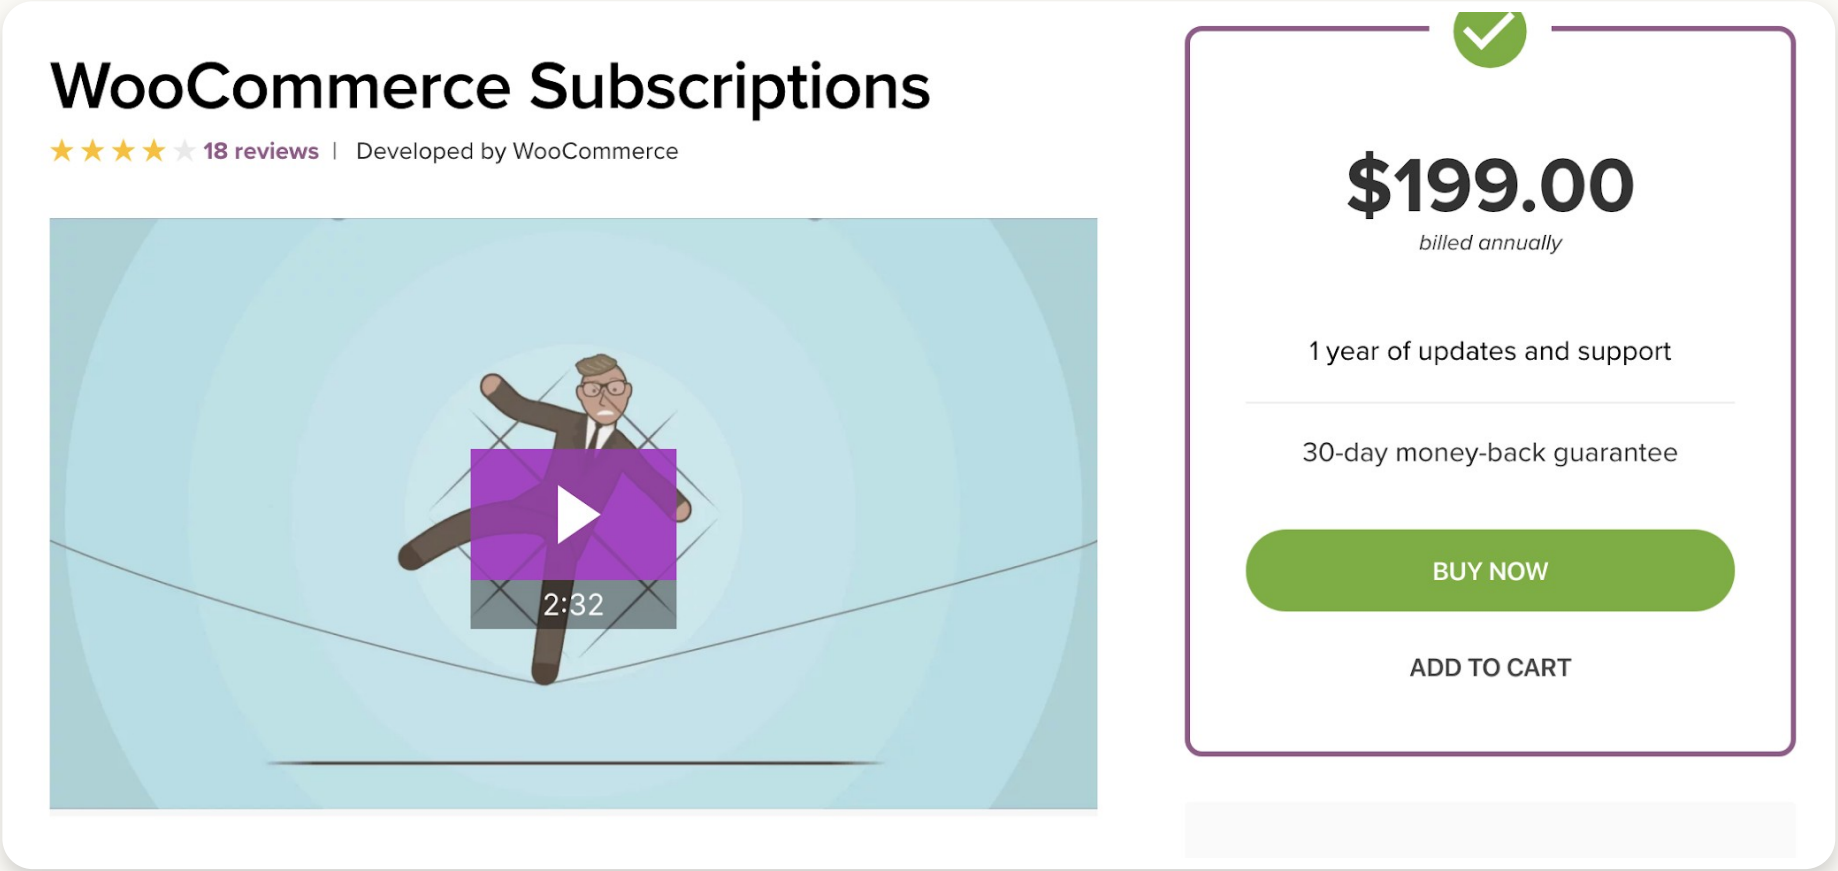

Google Analytics Integration

© Tertiary Infotech Academy Pte Ltd

Memberships

- Gate content and offers — https://woocommerce.com/products/woocommerce-memberships/

© Tertiary Infotech Academy Pte Ltd

TOPIC 6 · DISCUSSION · 15 MIN

Discussion — Metrics to Measure Store Performance

Decide which metrics you would use to judge whether the store is succeeding, and what criteria make a metric worth tracking at all.

Question 1

Which three metrics would you put in front of the business owner every week?

Question 2

What makes a metric useful — is it actionable, comparable, and tied to a decision?

Question 3

What does a rising refund rate or a falling repeat-customer rate actually tell you?

Question 4

Which report or tool produces each metric — WooCommerce Analytics or Google Analytics?

TIP Produce: A shortlist of performance metrics with the criteria used to select them and their data source.

© Tertiary Infotech Academy Pte Ltd

SECTION 3 · TOPIC 7

SEO in the Age of AI Search

Then the payoff: a campaign that measures itself.

1. How search works
2. SEO, AEO & GEO
3. E-E-A-T
4. AI for SEO
5. On-page SEO

© Tertiary Infotech Academy Pte Ltd · C6

Key Concepts in This Topic

How search works

Crawl, index, rank and serve — and what a modern results page looks like.

SEO, AEO and GEO

Rich snippets, featured snippets and AI Overviews, and how the three disciplines connect.

E-E-A-T

Experience, Expertise, Authoritativeness and Trustworthiness.

AI tools for SEO

Write prompts around objective, keywords, intent, structure and on-page needs.

Titles, descriptions and URLs

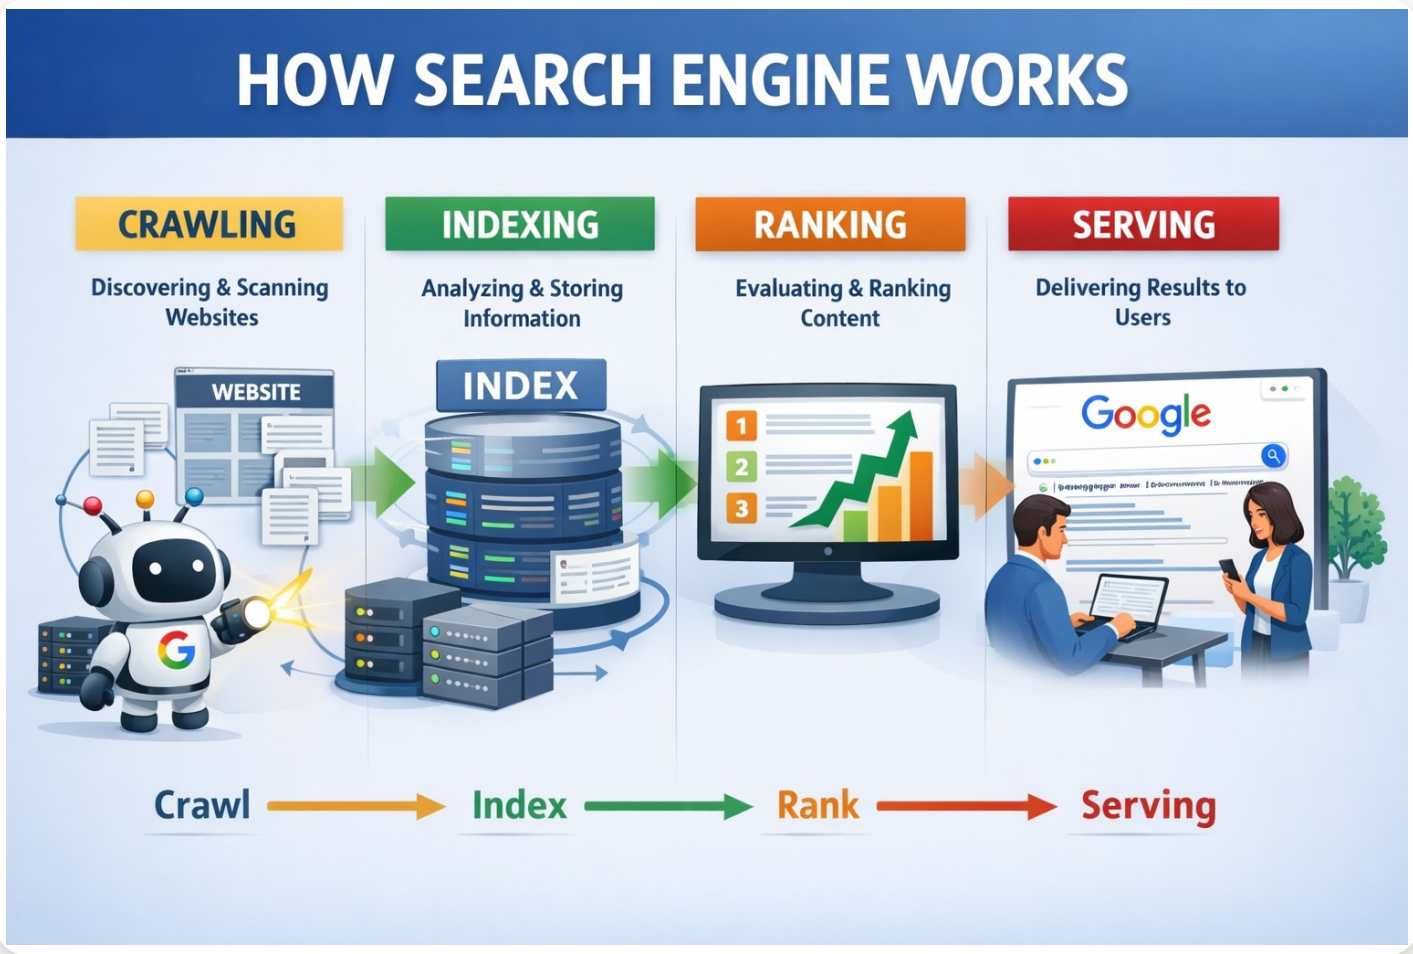

The on-page elements that shape how a page appears in search.

Sitemaps and images

Help crawlers find your pages, and optimise images with alt text.

© Tertiary Infotech Academy Pte Ltd

How a Search Engine Works

Crawling

Discovering and scanning websites

Indexing

Analysing and storing information

Ranking

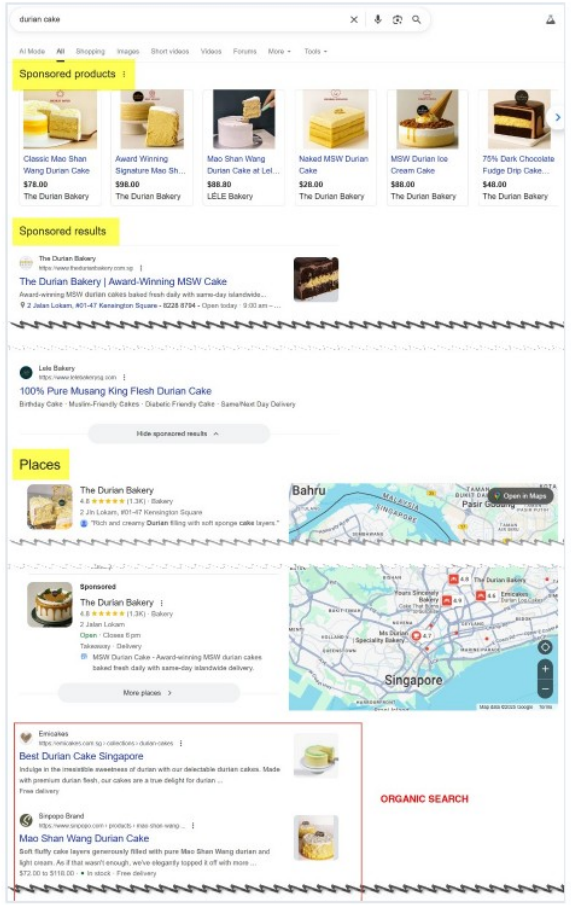

Evaluating and ranking content

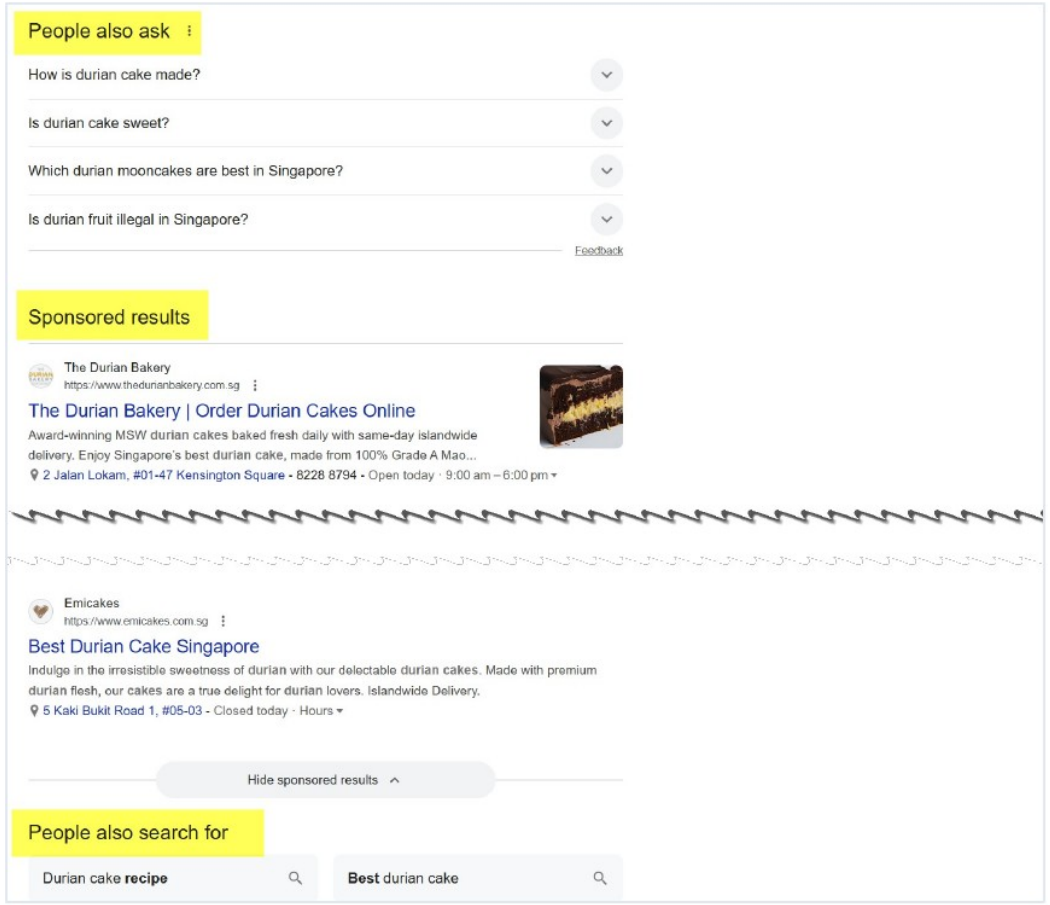

Serving

Delivering results to users

© Tertiary Infotech Academy Pte Ltd

Modern Search Engine Results Page

© Tertiary Infotech Academy Pte Ltd

AI Overview, AI Mode and Position Zero

AI Overview

An AI-composed answer at the top of results, citing only a handful of selected sources.

AI Mode

A fully conversational search experience that replaces the results list entirely.

Position Zero

Winning a citation inside AI Overviews is the new position zero — the highest-value placement on the page.

© Tertiary Infotech Academy Pte Ltd

What is Search Engine Optimization?

Rank higher

SEO uses technical and creative strategies to get your site to rank higher in search engines.

Be well indexed

Following SEO best practice keeps your website well indexed and high in the rankings.

Target the right words

By targeting certain words through search marketing techniques, site owners improve their chances of showing for a particular search.

Use white-hat tactics

When people look for information on a keyword, a variety of white-hat tactics help your site get returned in the results.

© Tertiary Infotech Academy Pte Ltd

How SEO, AEO and GEO Interact

The foundation discipline: it starts with SEO, and everything else builds on it.

SEO

Earns crawlability, indexation and authority: the raw material AI systems draw from.

AEO

Structures content so machines can efficiently extract and display direct answers.

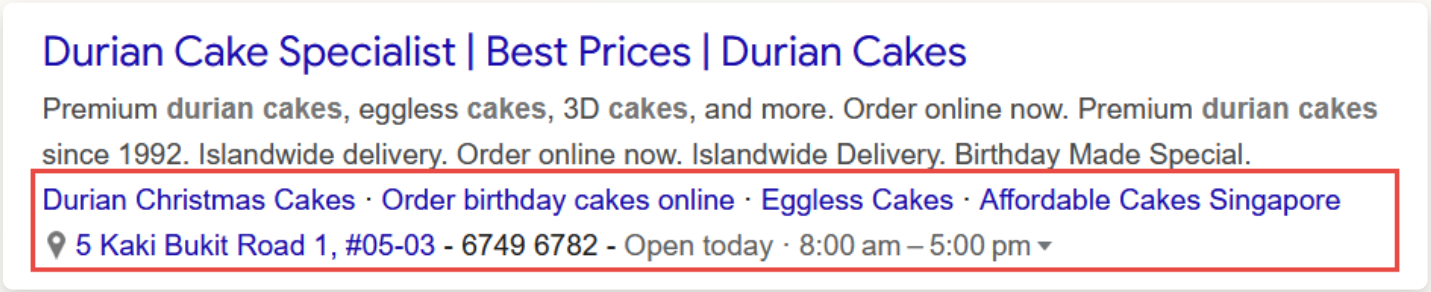

GEO

Builds the reputation signals that make AI recommend you by name.

TIP One integrated effort. Three visibility outcomes.

© Tertiary Infotech Academy Pte Ltd

Beyond the Results Page — Rich Snippets

They stand out

Some results look different and catch the eye more than the plain blue line.

More information

Rich snippets take more space and show extra helpful details.

Example

Extra links, address and opening hours.

© Tertiary Infotech Academy Pte Ltd

AEO — Answer Engine Optimization

New searches seek answers to problems — 'How to …?'

Benefits

- Massive visibility and more brand awareness
- Positions you as an authority on the subject
- Google shows the featured snippet above the #1 listing (Position #0)

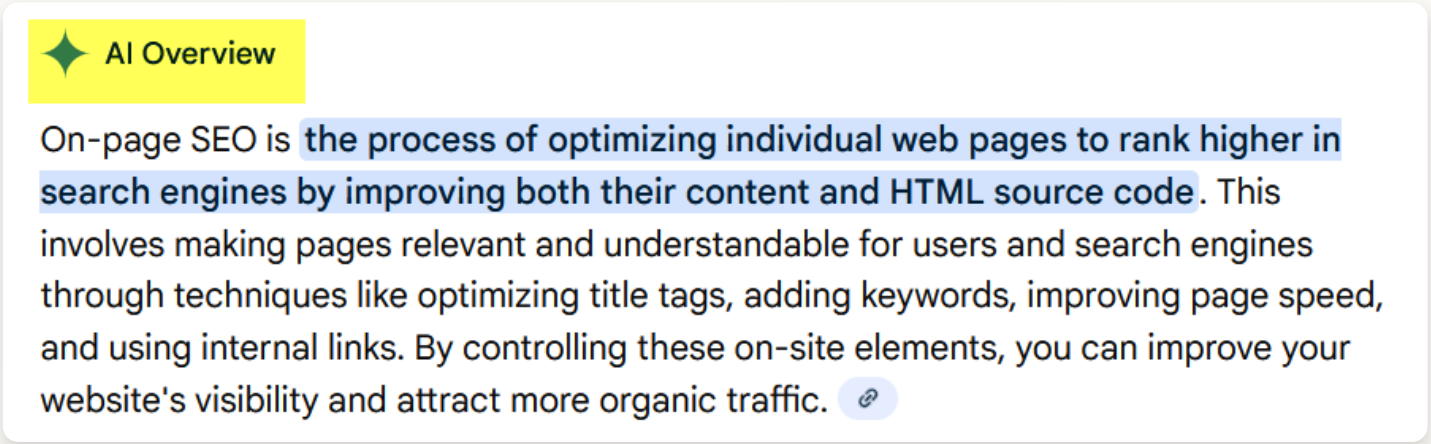

Disadvantage

- The question is answered directly on the results page
- No need to click the blue link — click-through falls
- Optimise anyway: answer clearly, in bullets, under clear headings, on content that already ranks

TIP This strategy is called AEO — Answer Engine Optimization.

© Tertiary Infotech Academy Pte Ltd

GEO — Generative Engine Optimization

AI Overview

Google's AI synthesises several web sources into one conversational answer at the top.

The impact

Fewer clicks for everyone not cited — being one of the cited sources is what counts.

© Tertiary Infotech Academy Pte Ltd

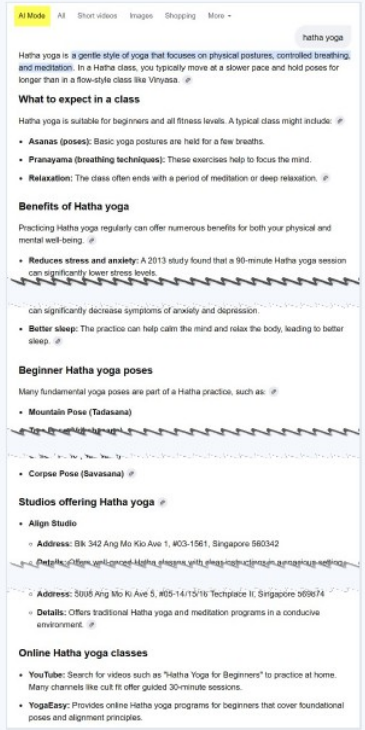

AI Overview vs AI Mode

AI Overview

AI Overview

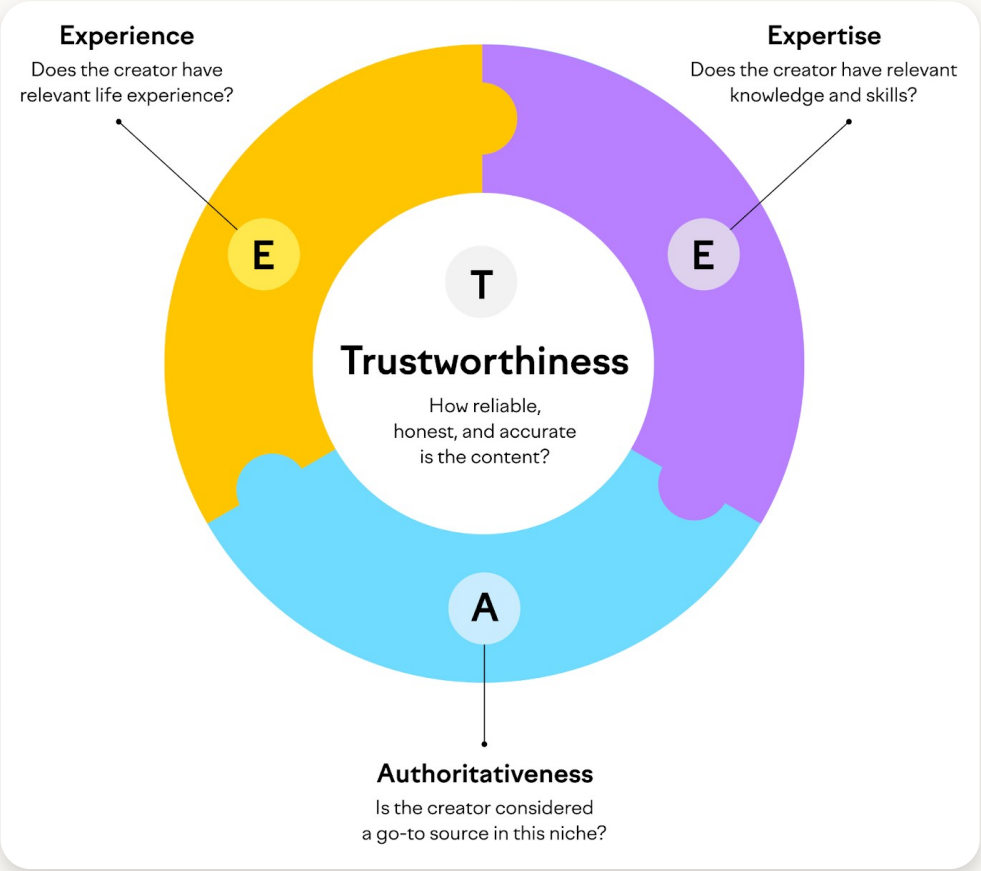

Hatha yoga is **a gentle style of yoga that combines physical postures (asanas), breathing techniques (pranayama), and meditation**. Its slow-paced nature and focus on holding poses make it ideal for beginners, as it helps build strength, flexibility, and balance while promoting a calm and focused mind. The term "Hatha" can also be interpreted as the "balance of sun (ha) and moon (tha)" energies within the body.

AI Mode

© Tertiary Infotech Academy Pte Ltd

GEO — Adapting to AI Search

In-depth, helpful content

Answer the whole question, not a keyword.

First-hand experience

Complex topics that need a unique perspective.

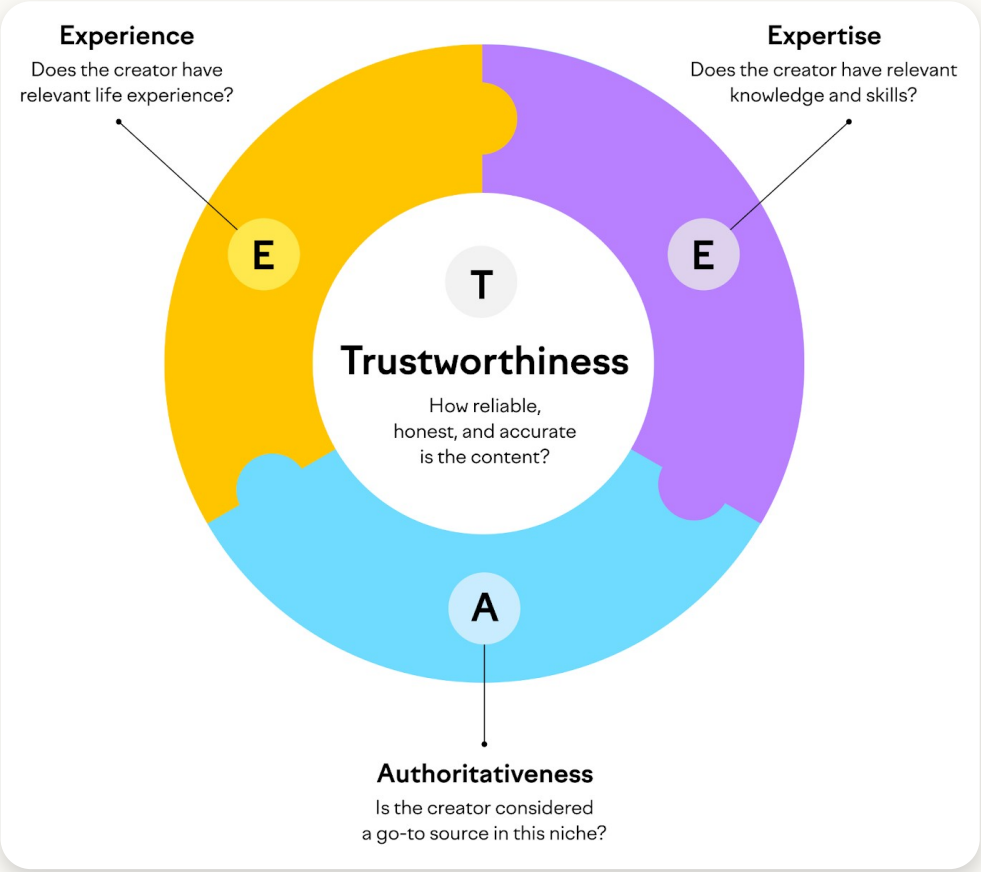

Strong E-E-A-T

Show who wrote it and why they know.

- Adapting means doubling down on SEO fundamentals — this is Generative Engine Optimization (GEO).

© Tertiary Infotech Academy Pte Ltd

Experience, Expertise, Authoritativeness, Trustworthiness

Feature real people

A visible author byline with a photo and a short bio on advice-driven content.

Show first-hand experience

Original images, case studies and testimonials — not generic stock content.

- E-E-A-T is the framework Google's human Search Quality Raters use to judge a site's quality and credibility.

© Tertiary Infotech Academy Pte Ltd

Building Authoritativeness and Trustworthiness

Authoritativeness

- Earn quality backlinks with unique, high-value content
- Highlight mentions: an 'As Seen On' section
- Consistent public profiles: LinkedIn, Google Business Profile, directories

Trustworthiness

- Secure the site with HTTPS
- Make About Us, Contact and Policies easy to find (Lab 4)
- Show genuine Google reviews and testimonials

© Tertiary Infotech Academy Pte Ltd

Using AI Tools for SEO — Part 1

Guide the model towards search intent, ranking factors and your business goals.

Define the OBJECTIVE

Informational (posts) · Transactional (products, services) · Navigational (brand, location).
Example: a landing page for linen shirts to rank for Harbour & Co in Singapore.

Specify TARGET KEYWORDS

Short-tail buying keywords · search volume · high relevance, low competition.

Identify INTENT and AUDIENCE

Consumers, B2B or SMEs — and the problem they are trying to solve.
Example: busy office workers who commute in the heat.

© Tertiary Infotech Academy Pte Ltd

Using AI Tools for SEO — Part 2

Define CONTENT TYPE and STRUCTURE

Search engines favour structure. Example: 1,000 words with H1, H2, H3 headings and an FAQ.

Optimise ON-PAGE requirements

Meta titles and descriptions, image alt text, URL and internal links.

Include E-E-A-T factors

Improves credibility and ranking potential.

© Tertiary Infotech Academy Pte Ltd

Using Gemini to Find Keywords

```
I am optimizing a yoga studio in Singapore. Give me a list of 8 buying keywords related to yoga studio that have a high informational search intent, low competition and high relevance. Format the output as a bulleted list.
```

Best beginner yoga classes Singapore reviews

High intent to join, seeking validation / social proof

Compare yoga studio membership prices Singapore

Actively comparing options and close to purchasing

What to look for in a hot yoga studio Singapore

Seeking detailed information to make a final decision

Trial class package [Your Neighbourhood] yoga

Very high intent, location-specific, low competition

Prenatal yoga classes Singapore cost and schedule

Specific need, looking for practical buying details

Which yoga style is best for stress relief Singapore

Informational research leading to class enrolment

Affordable private yoga lessons Singapore rates

A specific, high-value service with a cost query

How to choose a yoga studio for back pain Singapore

Problem-solving intent, looking for a specialised service

© Tertiary Infotech Academy Pte Ltd

Page Title / Meta Title

```
<html>
<head>
<title>Brandon's Baseball Cards - Buy Cards,
Baseball News, Card Prices</title>
<meta name="description=" content="Brandon's
Baseball Cards provides a large selection of
vintage and modern baseball cards for sale. We
also offer daily baseball news and events.">
</head>
<body>
```

The <title> tag

Tells users and search engines what the page is about; sits in the <head>.

The most important meta tag

It is your tagline on the results page — unique for every page.

Length

Roughly 50–60 characters — AIOSEO measures it in pixels (600).

© Tertiary Infotech Academy Pte Ltd

Meta Titles: Your First Impression Everywhere

Seen first

The clickable headline in search results is also the first label AI systems read.

Example

Linen Summer Shirt Singapore | Harbour & Co — keyword first, brand second, under 60 characters.

The rules

Lead with the primary keyword · ~60 characters · every page unique.

© Tertiary Infotech Academy Pte Ltd

Example: Asking AI for a Page Title

Element	Content	Character/Pixel Limit Goal
SEO Title (Title Tag)	Hatha Yoga Classes in Singapore: Beginner Friendly & All Levels	~60 characters (60)

Primary keyword

'Hatha Yoga Classes' is the core service searched; 'Singapore' is essential for local SEO.

User intent and appeal

'Beginner Friendly & All Levels' answers 'Is Hatha yoga good for beginners?'

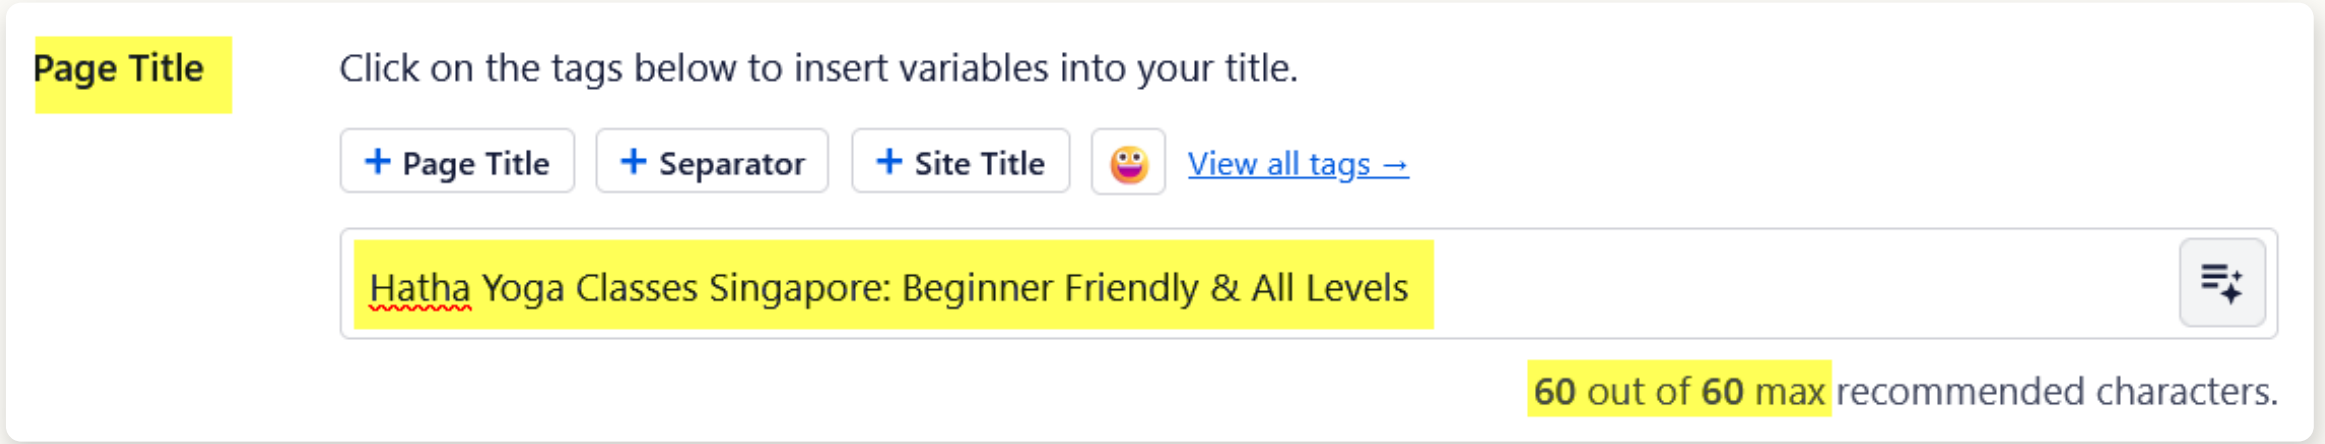

Length

Kept close to the 60-character limit.

▸ PROMPT Please provide a keyworded SEO title for a Hatha yoga class and justify the result

© Tertiary Infotech Academy Pte Ltd

Example: Page Title in All in One SEO

- Check the counter: keep titles at roughly 50–60 characters.

© Tertiary Infotech Academy Pte Ltd

Meta Description

A summary of the page

A sentence or two — Google may use it as the snippet.

Where it lives

Like <title>, inside the page's <head>.

Length

Roughly 155–160 characters.

© Tertiary Infotech Academy Pte Ltd

Meta Descriptions: The Pitch Below the Title

The format

~155 characters. State the value, include the keyword naturally, end with a reason to act.

Click-through, not ranking

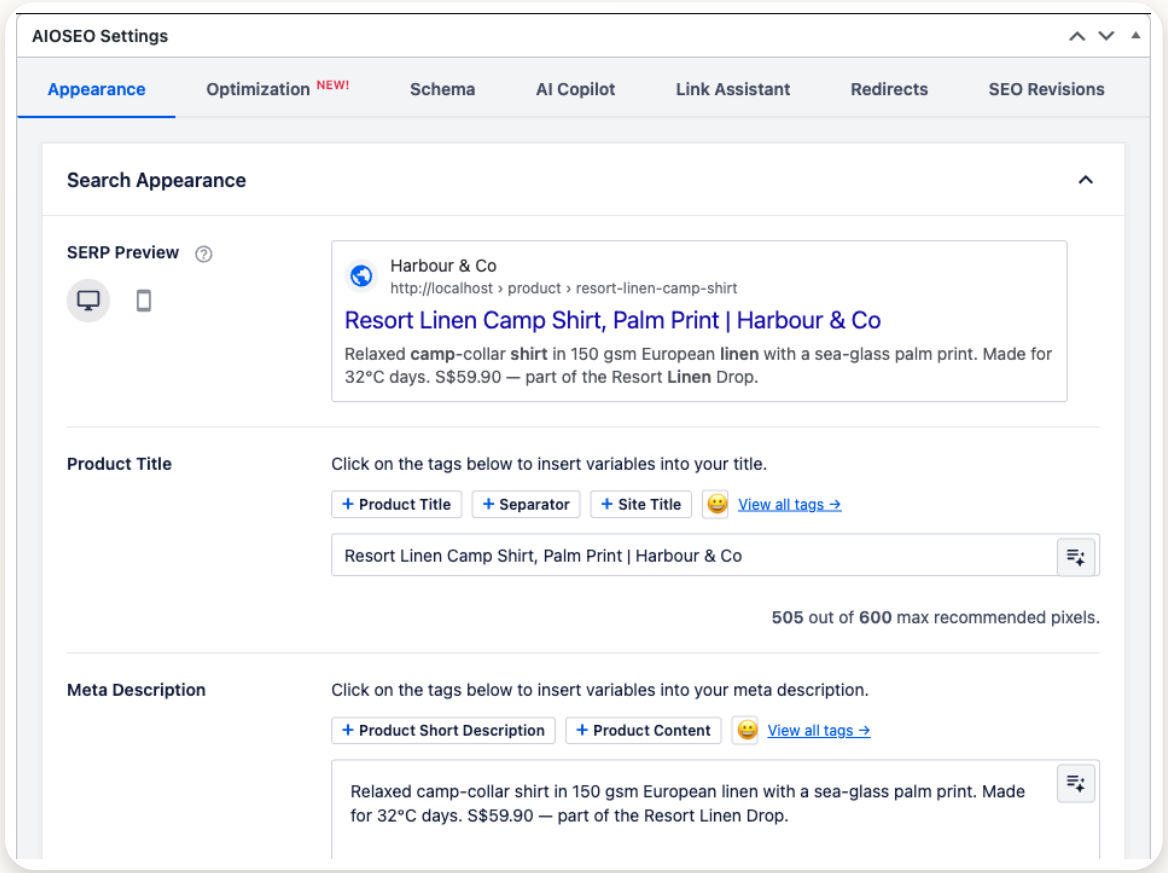

Not a ranking factor, but a click-through factor — it earns the click from a lower position.

AI reads it too

AI systems read descriptions when summarising what a page offers.

© Tertiary Infotech Academy Pte Ltd

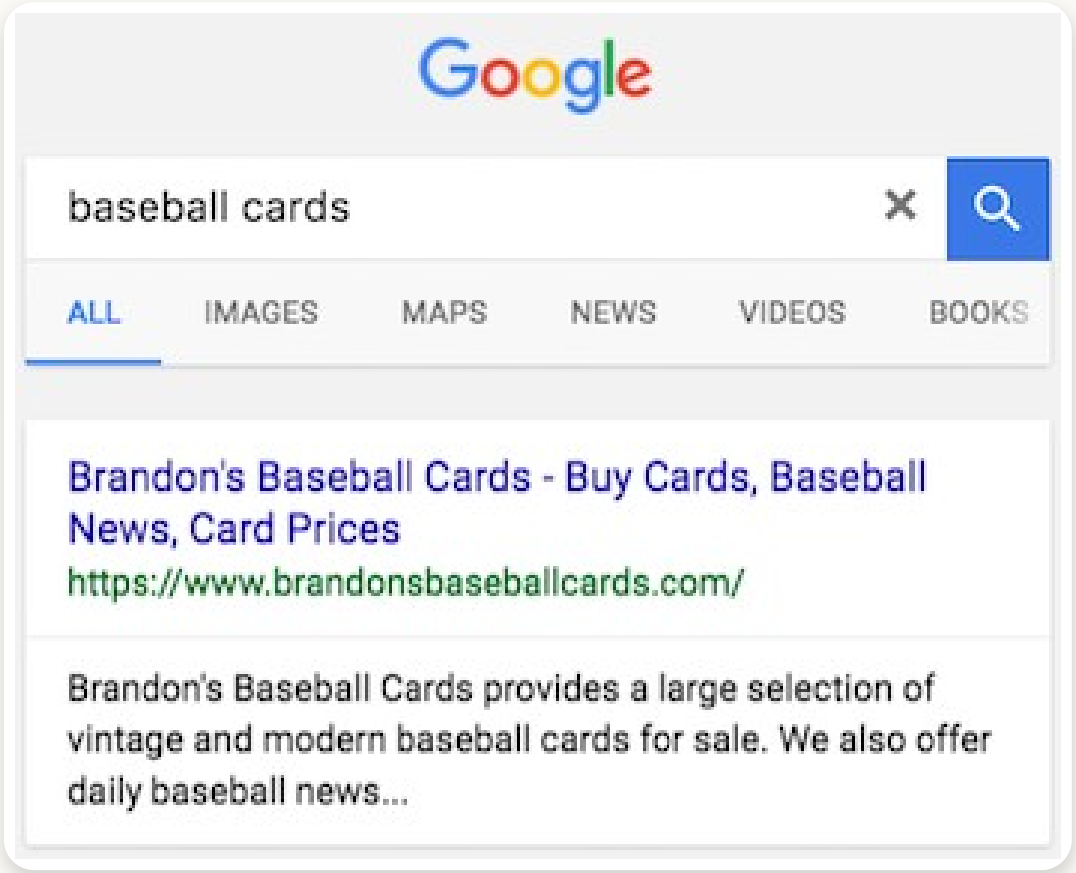

Example: Meta Description in All in One SEO

- AIOSEO 5.0.4 on the Harbour & Co test store: SERP Preview, Product Title (pixels) and Meta Description (characters).

© Tertiary Infotech Academy Pte Ltd

Page URL

- Each piece of content needs its own unique URL — the URL appears below the page title.

© Tertiary Infotech Academy Pte Ltd

Sitemap

What it is

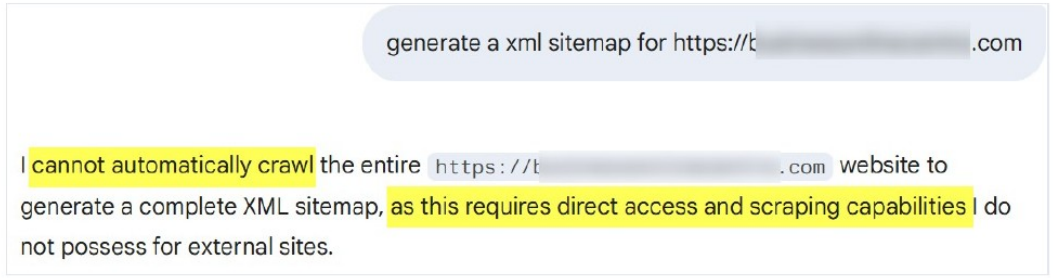

A sitemap is a file listing the web pages of your site, telling Google and other search engines about the organisation of your site content.

Why it helps

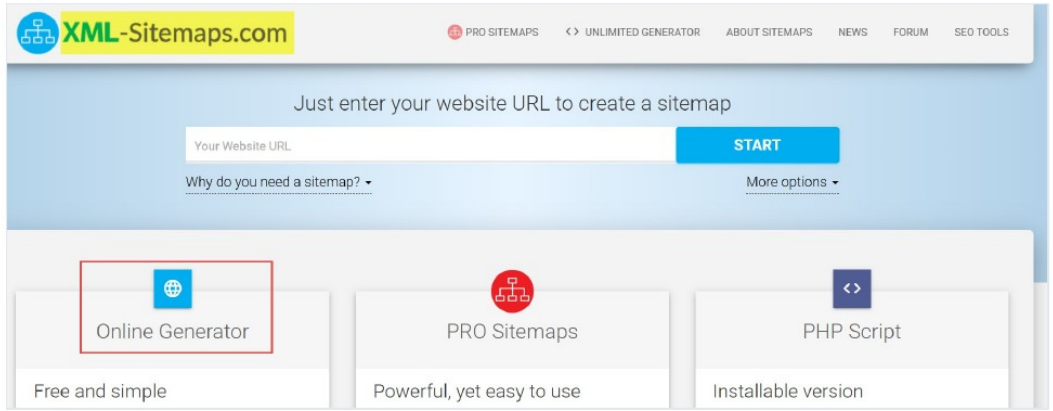

Search engine web crawlers like Googlebot read this file to crawl your site more intelligently.

© Tertiary Infotech Academy Pte Ltd

AI and XML Sitemap

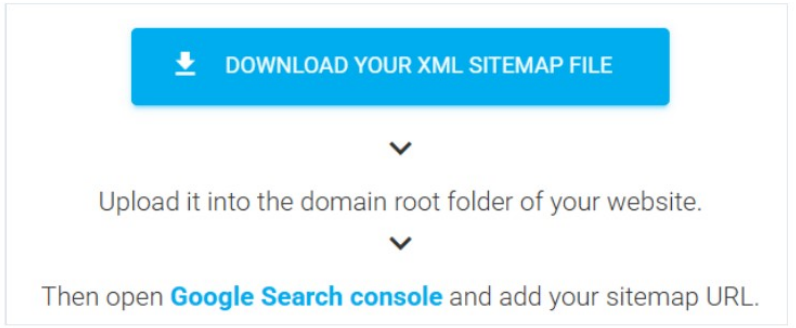

AI cannot crawl your site to generate a complete sitemap

WHY AI FALLS SHORT

- Building a sitemap needs direct access to, and scraping of, your site
- Use an online generator or your SEO plugin instead

Upload the file to the root folder, then add it in Search Console

- AI cannot crawl your site — use your SEO plugin's sitemap (AIOSEO: /sitemap.xml), then submit it in Search Console.

© Tertiary Infotech Academy Pte Ltd

Optimize Your Images

Use HTML image elements

Use the <img> or <picture> elements. Semantic markup helps crawlers find and process images. Avoid using CSS to display images that you want indexed.

Use the alt attribute

Provide a descriptive filename and alt text. The alt attribute gives alternative text for the image if it cannot be displayed.

Use supported file types

Most browsers support JPEG, GIF, PNG, BMP and WebP image formats.

© Tertiary Infotech Academy Pte Ltd

Optimize Your Images — Alt Text in WordPress

Alternative Text

Hatha yoga instructor demonstrating a pose inside a yoga studio in Singapore

Generate Alt

Learn how to describe the purpose of the image.
Leave empty if the image is purely decorative.

Title: hatha yoga

Caption

Description

© Tertiary Infotech Academy Pte Ltd

Keyword → Page → Meta → Alt Text

One keyword per page

Two pages chasing the same phrase compete with each other.

AI estimates, you decide

ChatGPT cannot see live search volumes — treat its numbers as guesses.

Apply in AIOSEO

Appearance tab: Product Title + Meta Description · Optimization tab: Focus Keyphrase.

Alt text everywhere

Describe colour, product and setting in ≤ 125 characters.

© Tertiary Infotech Academy Pte Ltd

Lab 6 — Get Found — AI Writes the SEO, You Approve It

Keywords from ChatGPT, meta titles under 60 characters, descriptions under 155, alt text on every image.

The business scenario

The store works, but nobody can find it. 'Linen shirt singapore' should land on Harbour & Co, not a marketplace. You ask ChatGPT for buyer keywords, map one keyword to each page, write meta titles and descriptions in All in One SEO, fill the alt text, and check the sitemap Google will crawl.

You will deliver

✓ A keyword map: one primary keyword per page, from AI research checked by you
✓ Meta title (≤ 60 characters) and meta description (≤ 155 characters) on the home page and three products
✓ Alt text on every product image
✓ The XML sitemap live at /sitemap.xml

AI does ChatGPT researches buyer keywords and writes titles, descriptions and alt text to the character limits.

You decide You choose the keyword for each page and approve the wording — AI cannot see your rankings.

Time 10 min · LO6

Check /sitemap.xml is live.

Checkpoint The AIOSEO snippet preview for the Resort Linen Camp Shirt shows a keyword-led title under 60 characters and a description under 155.

© Tertiary Infotech Academy Pte Ltd

Lab 6 — The Steps

#	Step	Where
1	Install All in One SEO	Plugins > Add Plugin
2	Research buyer keywords [AI prompt]	ChatGPT (chatgpt.com) — a new chat
3	Write the meta titles and descriptions [AI prompt]	Same ChatGPT chat
4	Apply them to the products	Products > edit product > AIOSEO Settings (below the editor)
5	Set the home page meta	All in One SEO > Search Appearance > Global Settings
6	Write alt text for every image [AI prompt]	Same ChatGPT chat, then Media > Library
7	Check the sitemap	All in One SEO > Sitemaps

TIP Full instructions, values and the Prompt Playbook: labs/lab-06-ai-seo/LAB-06-Instructions.pdf

© Tertiary Infotech Academy Pte Ltd

Step 2 · Research buyer keywords

PROMPT · copy from labs/prompts/index.html or COPY-PROMPTS.txt

```
ROLE: You are an SEO strategist for Singapore fashion retailers.
CONTEXT: Keyword seeds and the brand brief are attached. Pages to
rank: Home, Resort Linen Camp Shirt, Linen Wide-Leg Trousers,
Classic Cotton T-Shirt.
TASK: Suggest 12 buyer-intent keywords and assign ONE primary
keyword to each page so no two pages compete.
CONSTRAINTS: Singapore searchers, English. Prefer specific, high-
relevance, lower-competition phrases. Mark each as transactional
or commercial. Do not include competitor brand names. You cannot
see live search volumes — say so and rate volume as an estimate
only.
FORMAT: Table 1: keyword · intent · estimated volume
(low/med/high) · why. Table 2: page · primary keyword.
```

Paste into

ChatGPT — attach data/brand-brief.txt first

Expect

A keyword table and a page map. Copy the map into data/keyword-map-template.csv.

You decide

You choose the keyword for each page and approve the wording — AI cannot see your rankings.

© Tertiary Infotech Academy Pte Ltd

Step 3 · Write the meta titles and descriptions

PROMPT · copy from labs/prompts/index.html or COPY-PROMPTS.txt

```
TASK: For each page in your map, write a meta title and a meta
description.
CONSTRAINTS: Title ≤ 60 characters, primary keyword first, then
'| Harbour & Co'. Description ≤ 155 characters, includes the
keyword naturally, states one concrete fact (fabric, price or
delivery) and ends with a reason to click. Count the characters
and show the count. Use British spelling. Prices in S$ including
9% GST. Do not invent facts, reviews, awards or sustainability
claims.
FORMAT: Table: page · meta title · chars · meta description ·
chars.
```

Paste into

ChatGPT — attach data/brand-brief.txt first

Expect

Every title ≤ 60 and description ≤ 155 — check the counts yourself.

You decide

You choose the keyword for each page and approve the wording — AI cannot see your rankings.

© Tertiary Infotech Academy Pte Ltd

Step 6 · Write alt text for every image

PROMPT · copy from labs/prompts/index.html or COPY-PROMPTS.txt

```
TASK: Write alt text for each Harbour & Co product image: what
the image shows, colour, product name.
CONSTRAINTS: ≤ 125 characters, no 'image of', no keyword
stuffing.
FORMAT: Table: SKU · alt text.
```

Paste into

ChatGPT — attach data/brand-brief.txt first

Expect

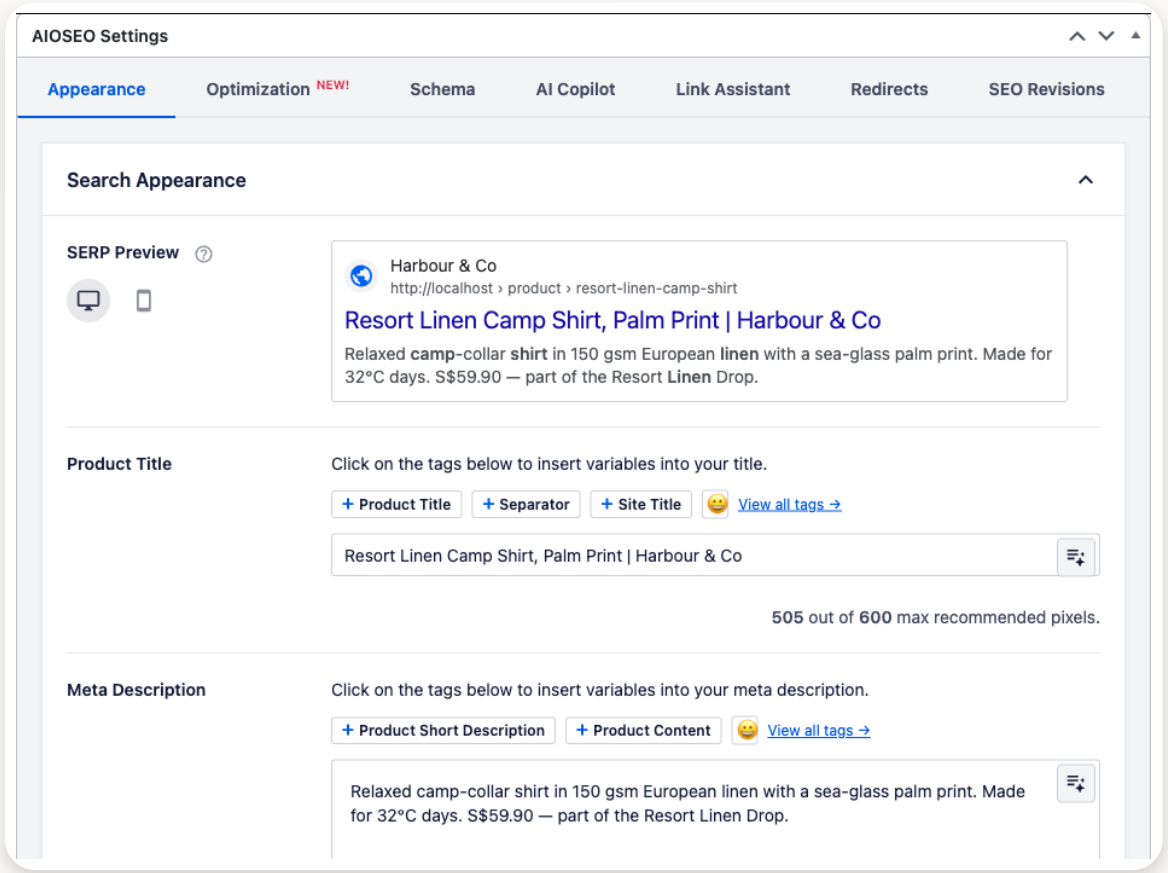

Every product image has alt text.

You decide

You choose the keyword for each page and approve the wording — AI cannot see your rankings.

© Tertiary Infotech Academy Pte Ltd

What Done Looks Like

- A keyword-led title and description in the SERP Preview, inside the length guides.

© Tertiary Infotech Academy Pte Ltd

Lab 6 — Checkpoint

Verify

AIOSEO is active

Verify

Home page and three products carry keyword-led titles ≤ 60 characters and descriptions ≤ 155

Verify

Each of the four pages targets a different primary keyword

Stretch challenge

Ask ChatGPT for an FAQ block for the Resort Linen Camp Shirt (AEO) and add it to the long description.

© Tertiary Infotech Academy Pte Ltd

PHASE 3 · DIGITAL MARKETING

One Campaign, Three Channels, Measured

The Resort Linen Drop: AI writes, you approve, the numbers decide.

1. Social posts
2. Newsletter
3. Campaign coupon
4. UTM links
5. Analytics

© Tertiary Infotech Academy Pte Ltd

What Each Channel Needs from the AI

Instagram

Product first, ≤ 150 words, 5 hashtags incl. #HarbourResortLinen, a 1080 × 1080 image with clear space.

Facebook

≤ 90 words, the offer once, the tracked link.

Newsletter (MailPoet)

Subject ≤ 45 characters, preheader ≤ 90, four products, one button.

No tricks

No fake scarcity, no invented reviews, no claims the brief cannot prove.

© Tertiary Infotech Academy Pte Ltd

UTM Tags + a Coupon = Proof of What Sold

Piece	Value	Shows up in
utm_source	instagram · facebook · newsletter	Order > Order attribution: Source
utm_medium	social · email	Order attribution: medium
utm_campaign	resort-linen	Order attribution: campaign
Coupon	RESORT15 — 15% off four pieces, 14 days, one per customer	Analytics > Coupons
Test order	Open the tagged link in a NEW private window, then buy	Analytics > Orders, the order screen

TIP Verified on WooCommerce 11: an order placed via the tagged link stored utm_source = instagram.

© Tertiary Infotech Academy Pte Ltd

TOPIC 7 · LAB 7 · PHASE 3

Lab 7 — Launch the Resort Linen Drop — Social, Newsletter, Results

AI writes the posts and the newsletter; RESORT15 and UTM tags prove which one sold.

The business scenario

The Resort Linen Drop goes live today. Rachel wants an Instagram post, a Facebook post and a newsletter — and proof of what worked. You create the RESORT15 coupon, ask ChatGPT for the posts, the post image and the newsletter, tag every link, place a test order through the Instagram link, and read the results.

You will deliver

✓ RESORT15: 15% off the four Resort Linen pieces, 14 days, one use per customer
✓ An Instagram post and a Facebook post (caption, hashtags, image) drafted by AI and approved by you
✓ A MailPoet newsletter with UTM-tagged links
✓ A test order through the Instagram link showing its source in the order
✓ A one-page results review: three metrics, what they mean, what to change

AI does ChatGPT writes the captions, generates the post image, drafts the newsletter and analyses week-1 results.

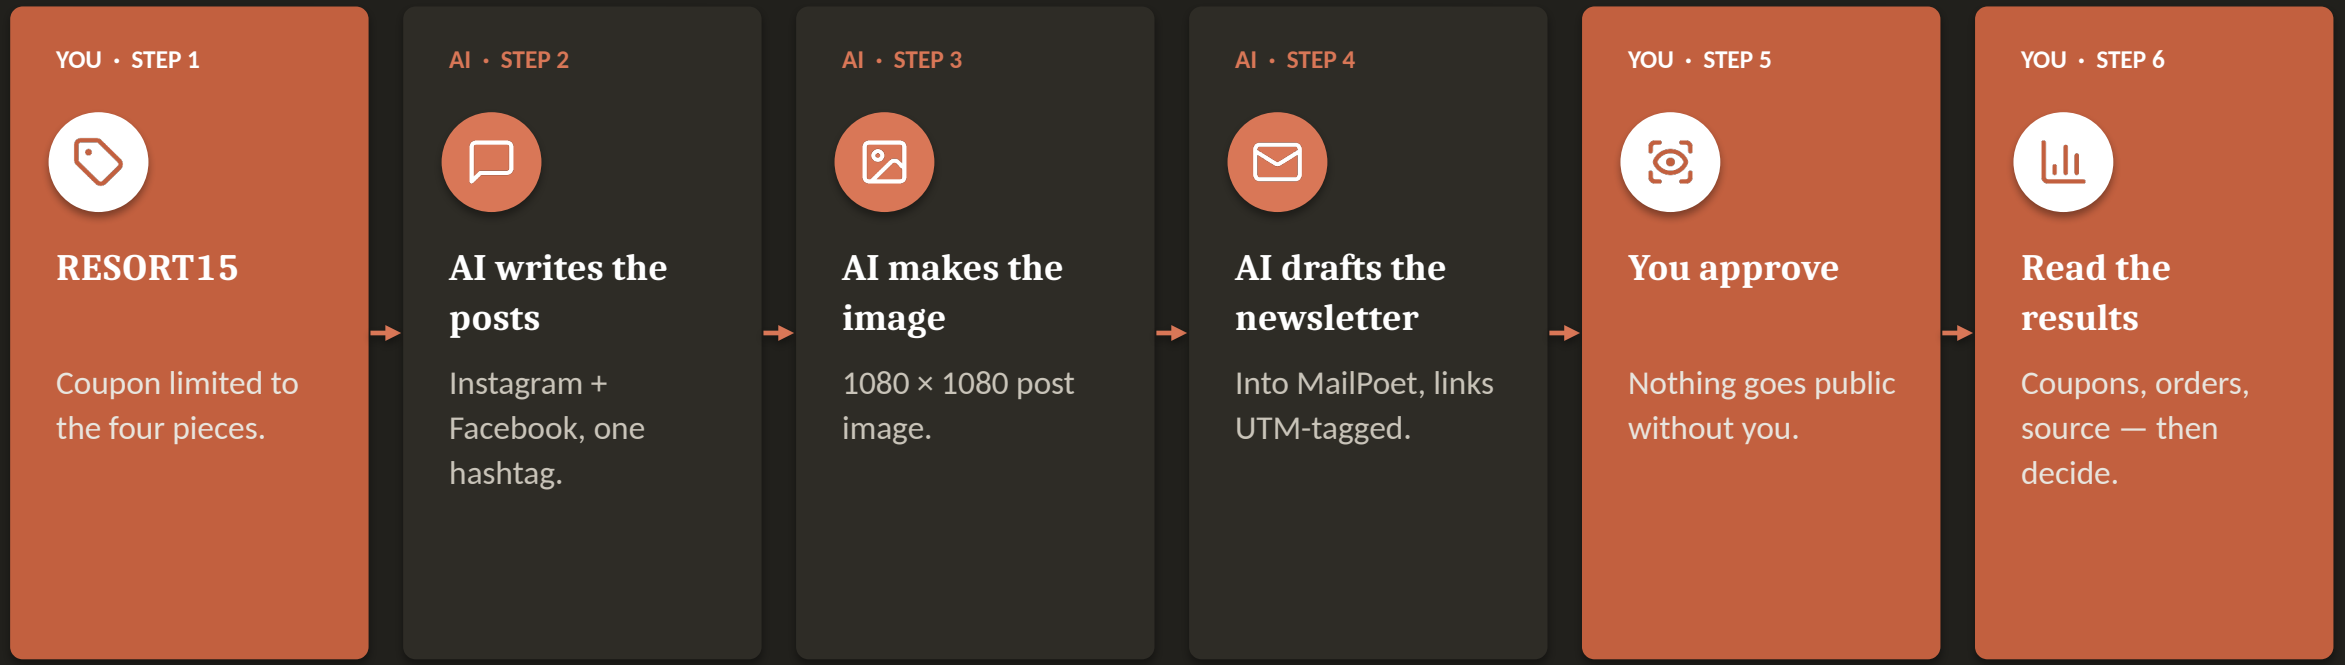

You decide You approve every word before it is public and decide what to change from the numbers.

Lab 7 — How it runs

Orange cards are you; dark cards are the AI. Nothing goes live without you.

Checkpoint Analytics > Coupons shows RESORT15 with your test order, and that order's Order attribution says Source: instagram.

© Tertiary Infotech Academy Pte Ltd

Lab 7 — The Steps

#	Step	Where
1	Create the RESORT15 coupon	Marketing > Coupons > Add coupon
2	Write the social posts [AI prompt]	ChatGPT (chatgpt.com) — a new chat
3	Generate the post image [AI prompt]	Same ChatGPT chat
4	Mock up the post for approval	templates/social-post-mockup.html (browser)
5	Draft the newsletter in MailPoet [AI prompt]	MailPoet > Emails > Create > Newsletter
6	Place a test order through the Instagram link	Private browser window
7	Read the campaign numbers	Analytics > Coupons · Analytics > Orders
8	Ask AI to evaluate week 1 [AI prompt]	Same ChatGPT chat

© Tertiary Infotech Academy Pte Ltd

Step 2 · Write the social posts

PROMPT · copy from labs/prompts/index.html or COPY-PROMPTS.txt

```
ROLE: You are Harbour & Co's social media lead.
CONTEXT: Brand brief and campaign brief attached.
TASK: Write (1) an Instagram feed caption, (2) a 3-frame
Instagram story script, and (3) a Facebook page post for the
Resort Linen Drop.
CONSTRAINTS: Lead with the product, not the discount. Mention
RESORT15 and the 14-day window once. Instagram ≤ 150 words with 5
hashtags including #HarbourResortLinen; Facebook ≤ 90 words with
the tracked link from the brief. Use British spelling. Prices in
S$ including 9% GST. Do not invent facts, reviews, awards or
sustainability claims. No urgency tricks such as 'only 2 left'.
FORMAT: Three headed sections.
```

Paste into

ChatGPT — attach data/brand-brief.txt first

Expect

Three on-brand drafts. Compare with templates/social-posts-reference.txt.

You decide

You approve every word before it is public and decide what to change from the numbers.

© Tertiary Infotech Academy Pte Ltd

Step 3 · Generate the post image

PROMPT · copy from labs/prompts/index.html or COPY-PROMPTS.txt

```
TASK: Create a square 1080 × 1080 Instagram image for the Resort
Linen Drop.
CONSTRAINTS: Flat lay on sand linen: a sand linen camp-collar
shirt with a sea-glass palm print, wide-leg linen trousers and a
round rattan bag. Soft daylight. Leave the top third empty for
text. Add the words 'Resort Linen' in a clean sans-serif, Harbour
Navy #1B2A41. No other text, no people, no logos.
```

Paste into

ChatGPT — attach data/brand-brief.txt first

Expect

A square image with clear space. If slow, use assets/images/social-resort-linen-1080.jpg.

You decide

You approve every word before it is public and decide what to change from the numbers.

© Tertiary Infotech Academy Pte Ltd

Step 5 · Draft the newsletter in MailPoet

PROMPT · copy from labs/prompts/index.html or COPY-PROMPTS.txt

```
TASK: Write a launch newsletter for the Resort Linen Drop:
subject line (≤ 45 characters), preheader (≤ 90), a 3-sentence
opening, the four products with one line each, the RESORT15 offer
and a button 'Shop Resort Linen'.
CONSTRAINTS: Use British spelling. Prices in S$ including 9% GST.
Do not invent facts, reviews, awards or sustainability claims.
FORMAT: Subject, preheader, then the body as plain text with
[BUTTON] markers.
```

Paste into

ChatGPT — attach data/brand-brief.txt first

Expect

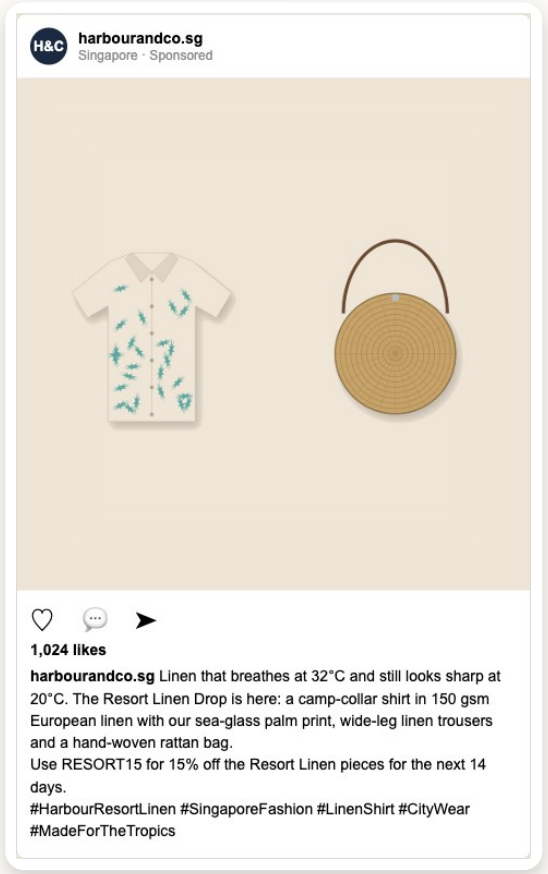

An answer you can check against the brief.

You decide

You approve every word before it is public and decide what to change from the numbers.

Lab 7 — Checkpoint

Verify

RESORT15 applies to the four Resort Linen pieces only

Verify

Social posts and newsletter were drafted by AI and approved by you

Verify

Every campaign link carries utm_source, utm_medium and utm_campaign

Stretch challenge

Ask ChatGPT to turn the week-1 review into a 5-slide summary for Rachel, with one chart idea per slide.

LEARNING OUTCOMES

What You Achieved

LO1 · Set up and monitor

Installed WooCommerce, set S$ and GST, applied a theme and an AI homepage, set roles.

LO2 · Edit and curate

Published a product with an AI photo and fact-checked AI copy.

LO3 · Maintain content

Imported an AI-built CSV, built variations and linked products.

LO4 · Payments & shipping

Published AI-drafted policies and a checkout that keeps them.

LO5 · Manage issues

Ran orders, a restocked refund and an AI-drafted customer reply.

LO6 · Manage performance

Wrote the SEO, launched a tracked campaign and read the numbers.

Summary & Q&A

The platform

WooCommerce turns WordPress into a complete, customisable store.

The co-worker

AI drafts photos, copy, CSVs, policies, SEO and campaigns.

The editor

You check every fact and approve anything public.

The commerce

Payments and shipping are customer-experience decisions.

The evidence

Coupons, UTM tags and Analytics show what actually sold.
