Lab 4 — AI Drafts the Policies, You Switch On Payments and Shipping

Build a Professional eCommerce Store with Generative AI · LO4

> ChatGPT drafts the privacy, returns, shipping and payment pages. You make the checkout keep every promise.

The business scenario

Customers will not pay a store that hides its rules. Harbour & Co needs four pages before launch — Privacy Policy (Singapore PDPA), Returns & Refunds, Shipping & Delivery and Payment Methods — and a checkout that matches them: PayNow or bank transfer, pay at pickup, S$5 delivery, free above S$100, free studio pickup.

You will deliver

- Four AI-drafted policy pages, checked against the brand promises and published
- Privacy and Terms pages linked in Settings so checkout shows them
- Payments: Direct bank transfer (PayNow) and Pay at pickup enabled
- Shipping zone Singapore: flat rate S$5, free shipping from S$100, local pickup
- A 'Customer care' footer menu linking the four policies

Who does what

AI does — ChatGPT drafts every policy page from the brand promises in the brief.

You decide — You check every promise matches the settings you configure — and you flag the drafts for the owner's legal review.

OBJECTIVE

Recommend and configure payment and shipping methods that improve customer experience.

Before you start

- Your demo WordPress site — log in at **/wp-admin** with **trainingN@tertiaryinfotech.com, where N is your site number (wp3 → training3@tertiaryinfotech.com)** and password **given by your trainer**.
- ChatGPT (https://chatgpt.com) — a free account works; image generation may be slower on the free tier.
- The Harbour & Co store from Labs 1–3 on your demo site.

Site	Login page	Username	Password
wp1	`https://wp1.tertiarytraining.com/wp-admin`	`training1@tertiaryinfotech.com`	`given by your trainer`
wp2	`https://wp2.tertiarytraining.com/wp-admin`	`training2@tertiaryinfotech.com`	`given by your trainer`
wp3	`https://wp3.tertiarytraining.com/wp-admin`	`training3@tertiaryinfotech.com`	`given by your trainer`

wp4	https://wp4.tertiarytraining.com/wp-admin	training4@tertiaryinfotech.com	given by your trainer
wp5	https://wp5.tertiarytraining.com/wp-admin	training5@tertiaryinfotech.com	given by your trainer

WordPress plugins and themes used

Plugin / theme	Where to get it
WooCommerce (from Lab 1)	Offline payment methods are built in

In this folder

File	What it is
data/brand-brief.txt	Brand promises: delivery, returns, payment
data/policy-facts.txt	The facts every policy must state: fees, days, contact, PDPA officer
templates/privacy-policy.html	Reference draft — Privacy Policy (PDPA)
templates/returns-and-refunds.html	Reference draft — Returns & Refunds
templates/shipping-and-delivery.html	Reference draft — Shipping & Delivery
templates/payment-methods.html	Reference draft — Payment Methods
templates/terms-and-conditions.html	Reference draft — Terms and Conditions

Step by step

1. Draft the four policy pages

ChatGPT (chatgpt.com) — a new chat

Attach data/brand-brief.txt and data/policy-facts.txt, then paste the prompt.

PROMPT — PASTE INTO CHATGPT

```
ROLE: You are an eCommerce operations writer for small Singapore retailers.
CONTEXT: Harbour & Co (brief attached). The attached policy facts are the ONLY source of fees, days and contacts.
TASK: Draft four customer-facing pages: 1) Privacy Policy aligned to Singapore's Personal Data Protection Act 2012 (PDPA) — what we collect at checkout, why, who we share it with (payment and delivery partners), retention, the customer's access and correction rights, our Data Protection Officer contact; 2) Returns & Refunds; 3) Shipping & Delivery; 4) Payment Methods.
CONSTRAINTS: Plain English, short headed sections, under 350 words per page. Use only the facts given — if a fact is missing write [TO CONFIRM]. Use British spelling. Prices in S$ including 9% GST. Do not invent facts, reviews, awards or sustainability claims.
FORMAT: Four Markdown sections, each starting with the page title as a # heading.
```

✓ Four pages. Any [TO CONFIRM] marks a fact Rachel must supply.

2. Check every promise

You

Tick each number against policy-facts.txt. The page and the checkout must say the same thing.

```
Delivery S$5 islandwide · free from S$100 · 2–4 working days
Returns 14 days · unworn with tags · refund in 5–7 working days
Pickup free at 71 Ayer Rajah Crescent, Tue–Sun 11am–7pm
```

3. Publish the four pages

Pages > Add Page

Create Privacy Policy, Returns & Refunds, Shipping & Delivery and Payment Methods. Paste the Markdown — the block editor turns # headings and lists into blocks. Publish each.

```
WordPress already has a draft 'Privacy Policy' page — open it from Pages and replace its content.
```

4. Link privacy and terms to checkout

Settings > Privacy · WooCommerce > Settings > Advanced

In Settings > Privacy select your Privacy Policy page. In WooCommerce > Settings > Advanced > Page setup set Terms and conditions to Returns & Refunds (or a Terms page from the challenge). Save.

✓ Checkout now shows the privacy notice and a terms checkbox.

5. Switch on PayNow / bank transfer

WooCommerce > Settings > Payments > Take offline payments

Enable Direct bank transfer, then Manage it and rename it so customers recognise it. Add the account details.

```
Title: PayNow or bank transfer
Instructions: PayNow to UEN 201900000H (Harbour & Co Pte Ltd). Use your order number as the
reference.
Account: Harbour & Co Pte Ltd · DBS · 000-000000-0 (training data)
```

6. Switch on pay at pickup

WooCommerce > Settings > Payments > Take offline payments

Enable Cash on delivery, rename it, and limit it to local pickup so nobody expects a courier to collect cash.

```
Title: Pay at pickup (cash or card)   ·   Enable for shipping methods: Local pickup
```

7. Build the Singapore shipping zone

WooCommerce > Settings > Shipping > Add zone

Name the zone, choose the region, then add three shipping methods and set each one.

```
Zone name: Singapore · Zone regions: Singapore
1) Flat rate — Tax status: Taxable · Cost 4.59  (shipping costs are entered EXCLUDING GST: 4.59
+ 9% = S$5.00)
2) Free shipping — Free shipping requires: A minimum order amount · 100.00
3) Local pickup — Name: Studio pickup (71 Ayer Rajah Crescent) · Cost: blank (free)
```

8. Add the Customer care footer menu

Appearance > Menus

Create a menu called Customer care with the four policy pages. Then Appearance > Widgets > Footer Column 2 > + > Navigation Menu > Customer care. Update.

```
Menu: Customer care → Shipping & Delivery · Returns & Refunds · Payment Methods · Privacy
Policy
```

9. Test the checkout as a customer

Private browser window

Add the T-shirt to the cart, go to Checkout, enter a Singapore address (fill City: Singapore — checkout rejects a blank city) and look — do not place the order yet.

✓ Flat rate S$5.00, Local pickup, and (once the cart passes S$100) Free shipping; PayNow or bank transfer; Pay at pickup; policy links.

Prompt Playbook — Step → Prompt → Step → Prompt

The whole lab on one page. YOU steps happen in WordPress; AI steps are prompts you paste into ChatGPT (copy them from `COPY-PROMPTS.txt` or the Lab Prompts page). Attach `data/brand-brief.txt` before the first prompt.

AI · STEP 1 **Draft the four policy pages**

```
ROLE: You are an eCommerce operations writer for small Singapore retailers.
CONTEXT: Harbour & Co (brief attached). The attached policy facts are the ONLY source of fees, days and contacts.
TASK: Draft four customer-facing pages: 1) Privacy Policy aligned to Singapore's Personal Data Protection Act 2012 (PDPA) — what we collect at checkout, why, who we share it with (payment and delivery partners), retention, the customer's access and correction rights, our Data Protection Officer contact; 2) Returns & Refunds; 3) Shipping & Delivery; 4) Payment Methods.
CONSTRAINTS: Plain English, short headed sections, under 350 words per page. Use only the facts given — if a fact is missing write [TO CONFIRM]. Use British spelling. Prices in S$ including 9% GST. Do not invent facts, reviews, awards or sustainability claims.
FORMAT: Four Markdown sections, each starting with the page title as a # heading.
```

✓ **Four pages. Any [TO CONFIRM] marks a fact Rachel must supply.**

YOU · STEP 2 **Check every promise** — You

YOU · STEP 3 **Publish the four pages** — Pages > Add Page

YOU · STEP 4 **Link privacy and terms to checkout** — Settings > Privacy · WooCommerce > Settings > Advanced

YOU · STEP 5 **Switch on PayNow / bank transfer** — WooCommerce > Settings > Payments > Take offline payments

YOU · STEP 6 **Switch on pay at pickup** — WooCommerce > Settings > Payments > Take offline payments

YOU · STEP 7 **Build the Singapore shipping zone** — WooCommerce > Settings > Shipping > Add zone

YOU · STEP 8 **Add the Customer care footer menu** — Appearance > Menus

YOU · STEP 9 **Test the checkout as a customer** — Private browser window

Checkpoint

Checkout shows three delivery options, two payment methods, and links to the Privacy Policy and Terms.

- □ Four policy pages are published and in the Customer care footer menu
- □ Privacy page is set in Settings > Privacy; a Terms page is set in WooCommerce > Advanced
- □ Two payment methods are enabled with customer-friendly titles
- □ The Singapore zone has flat rate S$5, free shipping from S$100 and local pickup
- □ The checkout options match what the policy pages promise

Troubleshooting

Symptom	Fix
No shipping options at checkout	The address must be in Singapore (inside the zone) and each method must be enabled in the zone.
Free shipping never appears	The cart total must reach S$100 after any coupon; check 'Requires: A minimum order amount'.
Pay at pickup shows for delivery orders	Set 'Enable for shipping methods' to Local pickup only.

Flat rate shows S$5.45, not S$5.00	Shipping costs are entered excluding tax. Enter 4.59 with Tax status Taxable, or 5.00 with Tax status None.

Stretch challenge

Ask ChatGPT for Terms and Conditions using the same facts, publish it, and point WooCommerce > Advanced > Terms and conditions at it.

Keep your demo site as it is at the end of the lab — the next lab builds on this work.
