About the Trainer

Dr. Alfred Ang

Principal Trainer
Tertiary Infotech Academy Pte Ltd

ROLE
Principal Trainer, Tertiary Infotech Academy Pte Ltd

EXPERTISE
eCommerce, WordPress and WooCommerce content management systems.

DELIVERS
Courses on eCommerce, web development, digital marketing and data analytics.

FOUNDER
Founder and lead instructor at Tertiary Infotech / Tertiary Courses.

© 2026 Tertiary Infotech Academy Pte Ltd

ICE-BREAKER

Let's Know Each Other

1

Who you are

Your name, your organisation and the role you play there.

2

What you've used

Your experience with WordPress, eCommerce or running an online store.

3

What you'll sell

One product or business you would like to sell online by the end of today.

© 2026 Tertiary Infotech Academy Pte Ltd

HOUSEKEEPING

Ground Rules

1. Set your mobile phone to silent mode.
2. Participate actively — no question is too small.
3. Mutual respect: agree to disagree.
4. One conversation at a time.
5. Be punctual; return from breaks on time.
6. Full attendance — attend the whole day to get the most from the course.

© 2026 Tertiary Infotech Academy Pte Ltd

BEFORE WE START

Prerequisite

1

Basic WordPress

Basic WordPress operation is assumed in this course.

2

Comfortable with a browser

You can navigate a WordPress admin dashboard and upload an image.

3

A store to build

Bring a product idea — you will build a real catalogue around it today.

4

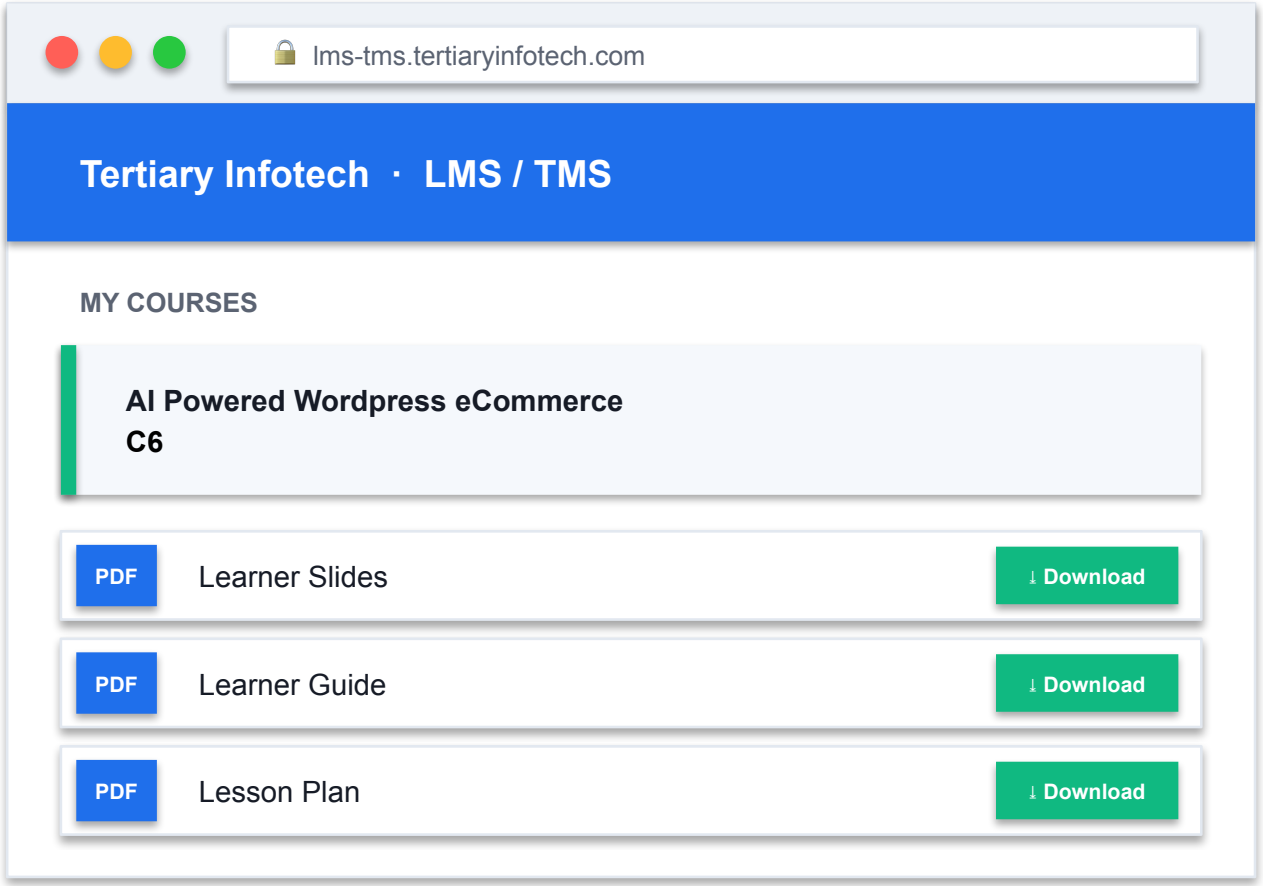

No coding required

Everything in this course is done through the WooCommerce interface.

© 2026 Tertiary Infotech Academy Pte Ltd

COURSE PORTAL

Download Your Course Material

1. **Go to lms-tms.tertiaryinfotech.com**
   Open the portal in any browser.
2. **Log in with your registered email**
   The same address used to enrol.
3. **Open this course**
   AI Powered Wordpress eCommerce.
4. **Download the material**
   Slides, Learner Guide and Lesson Plan.
5. **Keep them open in class**

© 2026 Tertiary Infotech Academy Pte Ltd

SCHEDULE · DAY 1 · 9:30am – 5:30pm

Lesson Plan — Day 1

Morning · 9:30am – 12:00pm

- Introductions · ground rules
- Learning outcomes & course outline
- Topic 1: Overview of WooCommerce CMS (LO1)
- Lab 1: Set Up Your WooCommerce Store
- Topic 2: Manage Products (LO2, LO3)
- Lunch Break — 30 min

Afternoon · 12:30pm – 5:30pm

- Topic 2 (cont.) · Lab 2: Simple Product
- Lab 3: Variable Product · Lab 4: Curate Catalogue
- Topic 3: Payments & Shipping (LO4) · Lab 5
- Topic 4: Manage Sales (LO5) · Lab 6
- Topic 5: Manage Performance (LO6) · Lab 7
- Course summary, Q&A & course feedback

© 2026 Tertiary Infotech Academy Pte Ltd

FIVE TOPICS · ONE DAY · SEVEN HANDS-ON LABS

Course Outline

1

Topic 1 — Overview of WooCommerce CMS

Setup, themes, widgets, shortcodes, settings, currency and tax.

2

Topic 2 — Manage Products

Product types, images, variations, categories, attributes, up-sells and CSV import.

3

Topic 3 — Payments & Shipping

Payment gateways, shipping zones, flat rate, free shipping and local pickup.

4

Topic 4 — Manage Sales

Orders, statuses, refunds, restocking, coupons and promotions.

5

Topic 5 — Manage Performance

Sales, customer and stock reports, dashboard widgets and Google Analytics.

© 2026 Tertiary Infotech Academy Pte Ltd

WHAT YOU'LL BUILD · https://woocommerce.com

Hands-On Labs on WooCommerce

Morning · Labs 1–2

- Set up your WooCommerce store
- Configure currency and tax
- Create your first product

Afternoon · Labs 3–5

- Build a variable product
- Curate the catalogue & CSV import
- Payments and shipping zones

Afternoon · Labs 6–7

- Orders, refunds and coupons
- Reports and dashboard widgets
- Google Analytics integration

© 2026 Tertiary Infotech Academy Pte Ltd

Lab Environment — Demo WordPress Sites

1

Your demo site

Each learner is assigned ONE demo site by the trainer: wp1.tertiarytraining.com – wp5.tertiarytraining.com.

2

Log in

Open your site's /wp-admin page — Username: admin · Password: admin12345. For example https://wp1.tertiarytraining.com/wp-admin.

3

The demo store

All seven labs build Harbour & Co — a small Singapore apparel and accessories retailer going online.

4

Reset each class

The sites are wiped and re-imaged before every class — experiment freely; nothing you do can break anything that matters.

© 2026 Tertiary Infotech Academy Pte Ltd

1

DAY 1

Building, Running and Measuring a WooCommerce Store

Topics 1–5 · Seven hands-on labs

© 2026 Tertiary Infotech Academy Pte Ltd

01

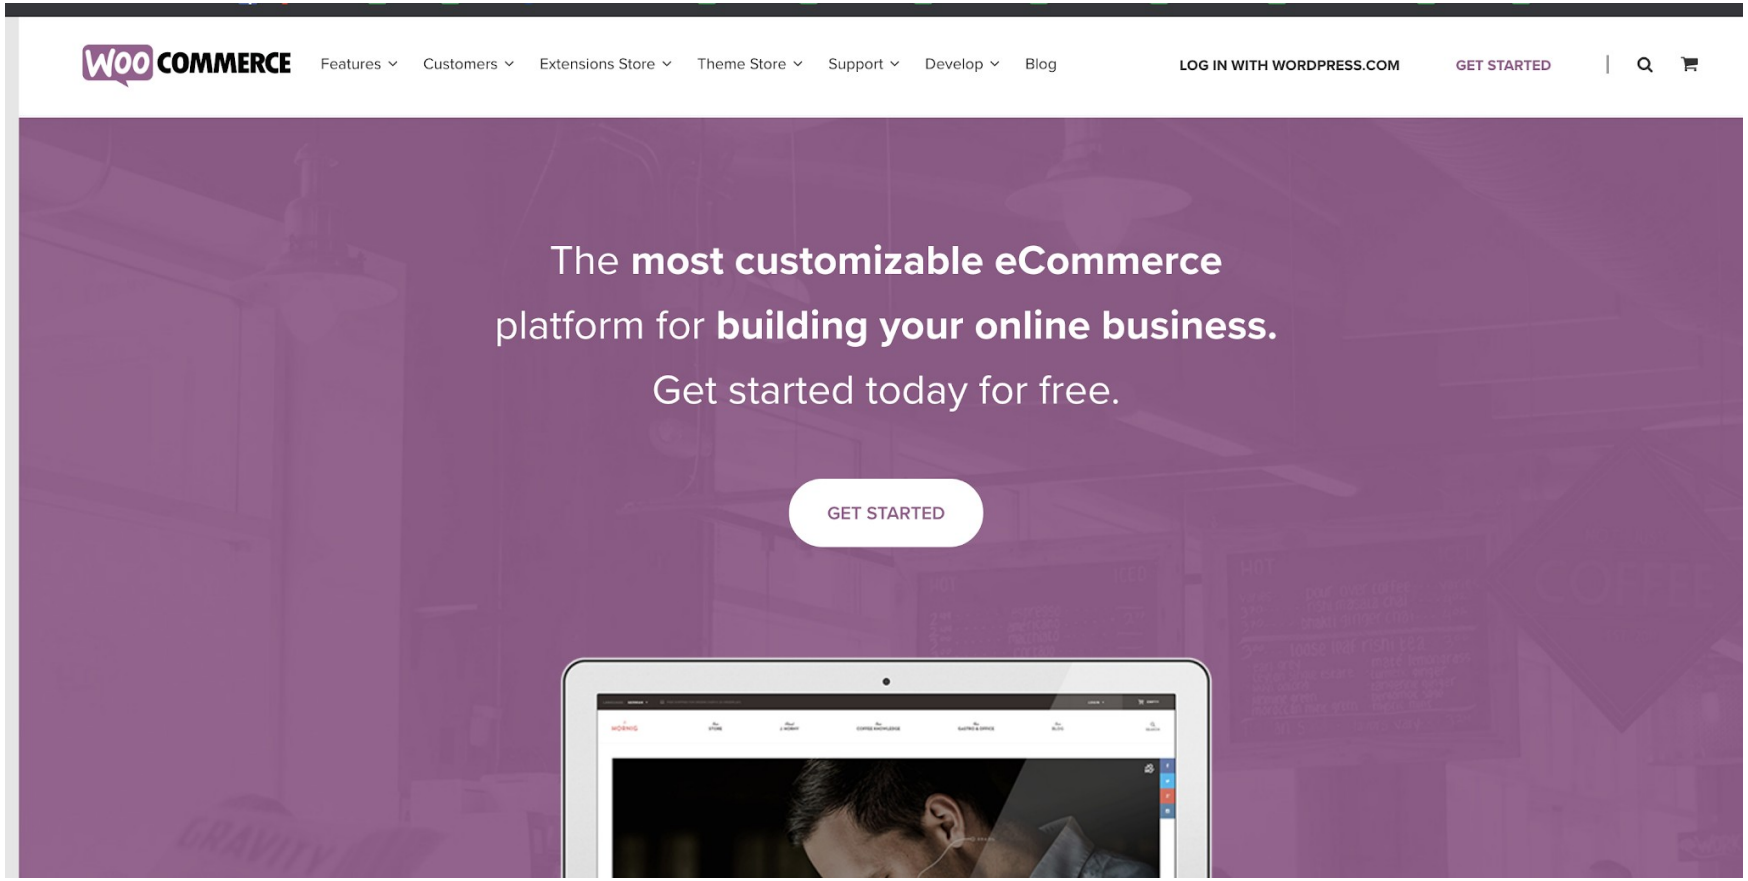

TOPIC 1

Overview of WooCommerce CMS

What WooCommerce is · Setup wizard · Themes · Widgets & shortcodes · Settings, currency & tax

© 2026 Tertiary Infotech Academy Pte Ltd

What is WooCommerce

WooCommerce is an open-source, fully customisable eCommerce platform built on WordPress.

© 2026 Tertiary Infotech Academy Pte Ltd

THE OPPORTUNITY

Why WooCommerce

1

Open source

Free to use, fully customisable, and owned by you — not rented from a hosted platform.

2

Built on WordPress

Runs on the world's most widely used CMS, so your shop and your content live together.

3

Every product type

Physical, digital, virtual, variable, subscription and bookable products.

4

Endlessly extensible

Hundreds of themes, payment gateways and extensions, plus a full developer API.

© 2026 Tertiary Infotech Academy Pte Ltd

Key Concepts in This Topic

1

What WooCommerce is

An open-source, fully customisable eCommerce platform built on WordPress, powering a large share of the world's online stores.

2

Six steps to a store

Choose hosting, install WordPress, pick a theme, activate WooCommerce, run the setup wizard, then extend with plugins.

3

System requirements

PHP 7.2+, MySQL 5.6+ or MariaDB 10.0+, a 128 MB WordPress memory limit, and HTTPS support.

4

Taxonomies and post types

WooCommerce adds its own post types and taxonomies to WordPress to group and structure products.

5

Themes and widgets

The theme sets the storefront's look; widgets surface products, filters and categories in widgetised areas.

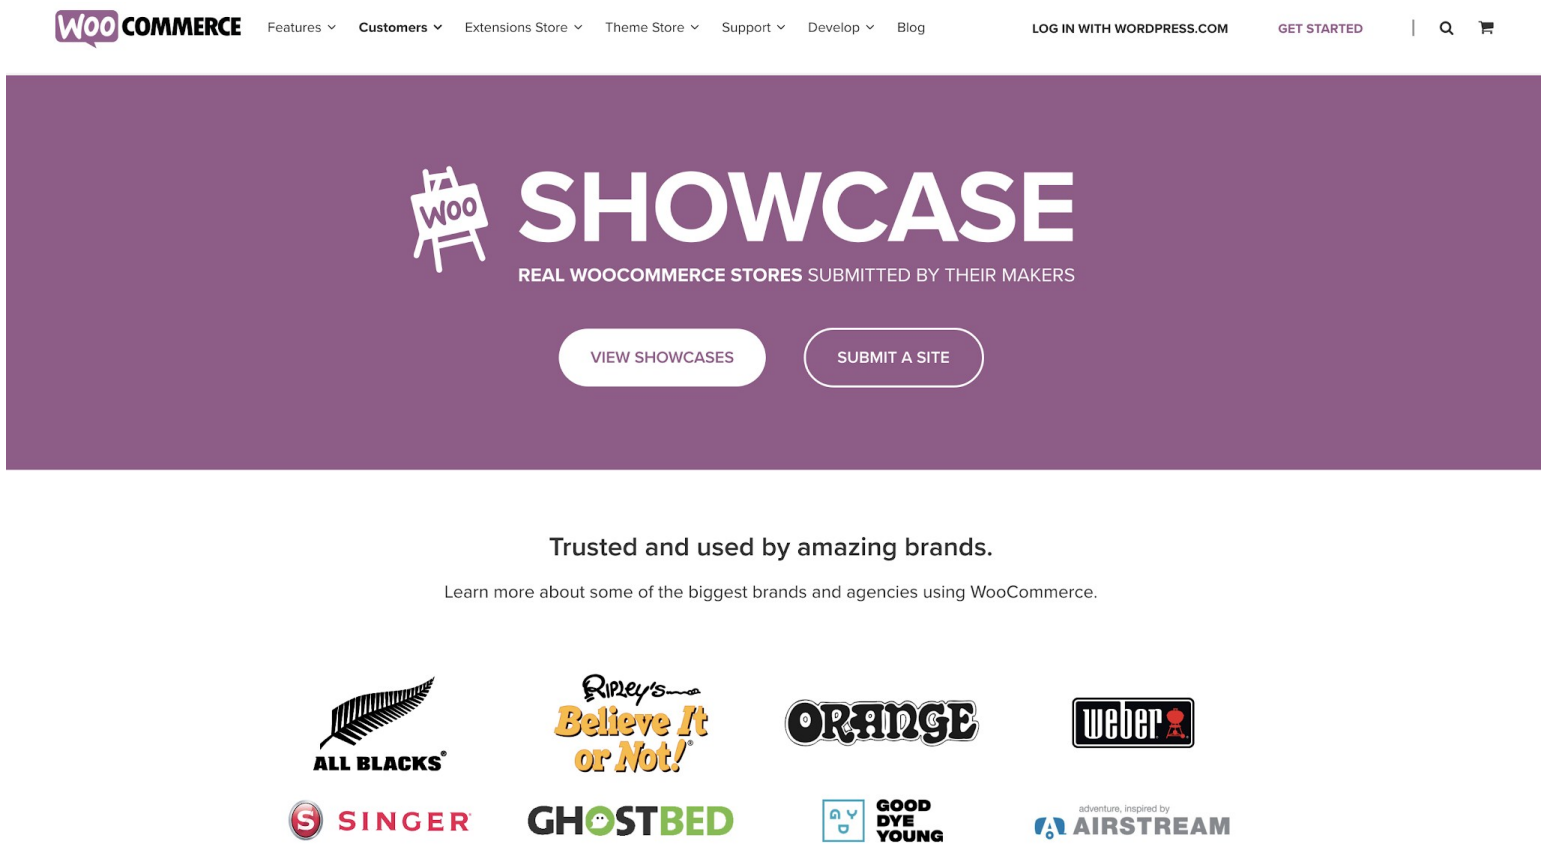

6

Settings, currency and tax

General, Products, Tax, Shipping, Payments and Privacy settings define how the store behaves and prices goods.

© 2026 Tertiary Infotech Academy Pte Ltd

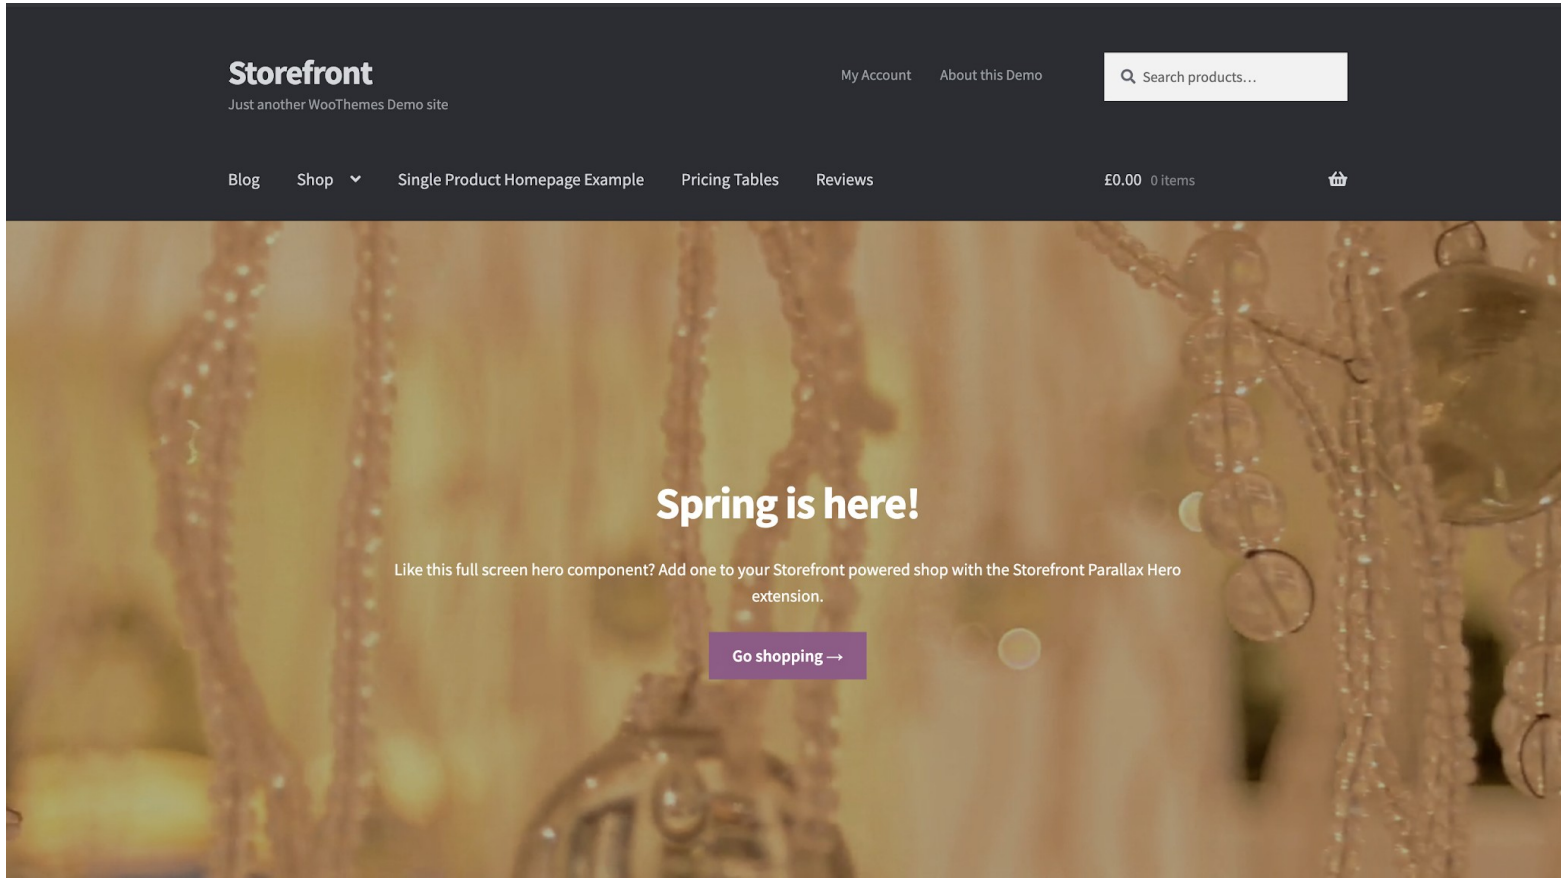

WooCommerce Store Showcases

Real stores built on WooCommerce — https://woocommerce.com/showcase/

© 2026 Tertiary Infotech Academy Pte Ltd

WooCommerce Demo Store

The Storefront demo — https://themes.woocommerce.com/storefront/

© 2026 Tertiary Infotech Academy Pte Ltd

Start with WooCommerce in 6 Steps

1. HOSTING
   Meet the requirements
2. INSTALL WP
   Set up WordPress
3. THEME
   Pick Storefront
4. ACTIVATE
   Install the plugin
5. SET UP
   Run the wizard
6. EXTEND
   Add plugins

© 2026 Tertiary Infotech Academy Pte Ltd

System Requirements

1

PHP 7.2 or greater

The server-side language WordPress and WooCommerce run on.

2

MySQL 5.6+ / MariaDB 10.0+

The database that stores products, orders and customers.

3

Memory limit 128 MB+

WordPress needs headroom to process a catalogue and orders.

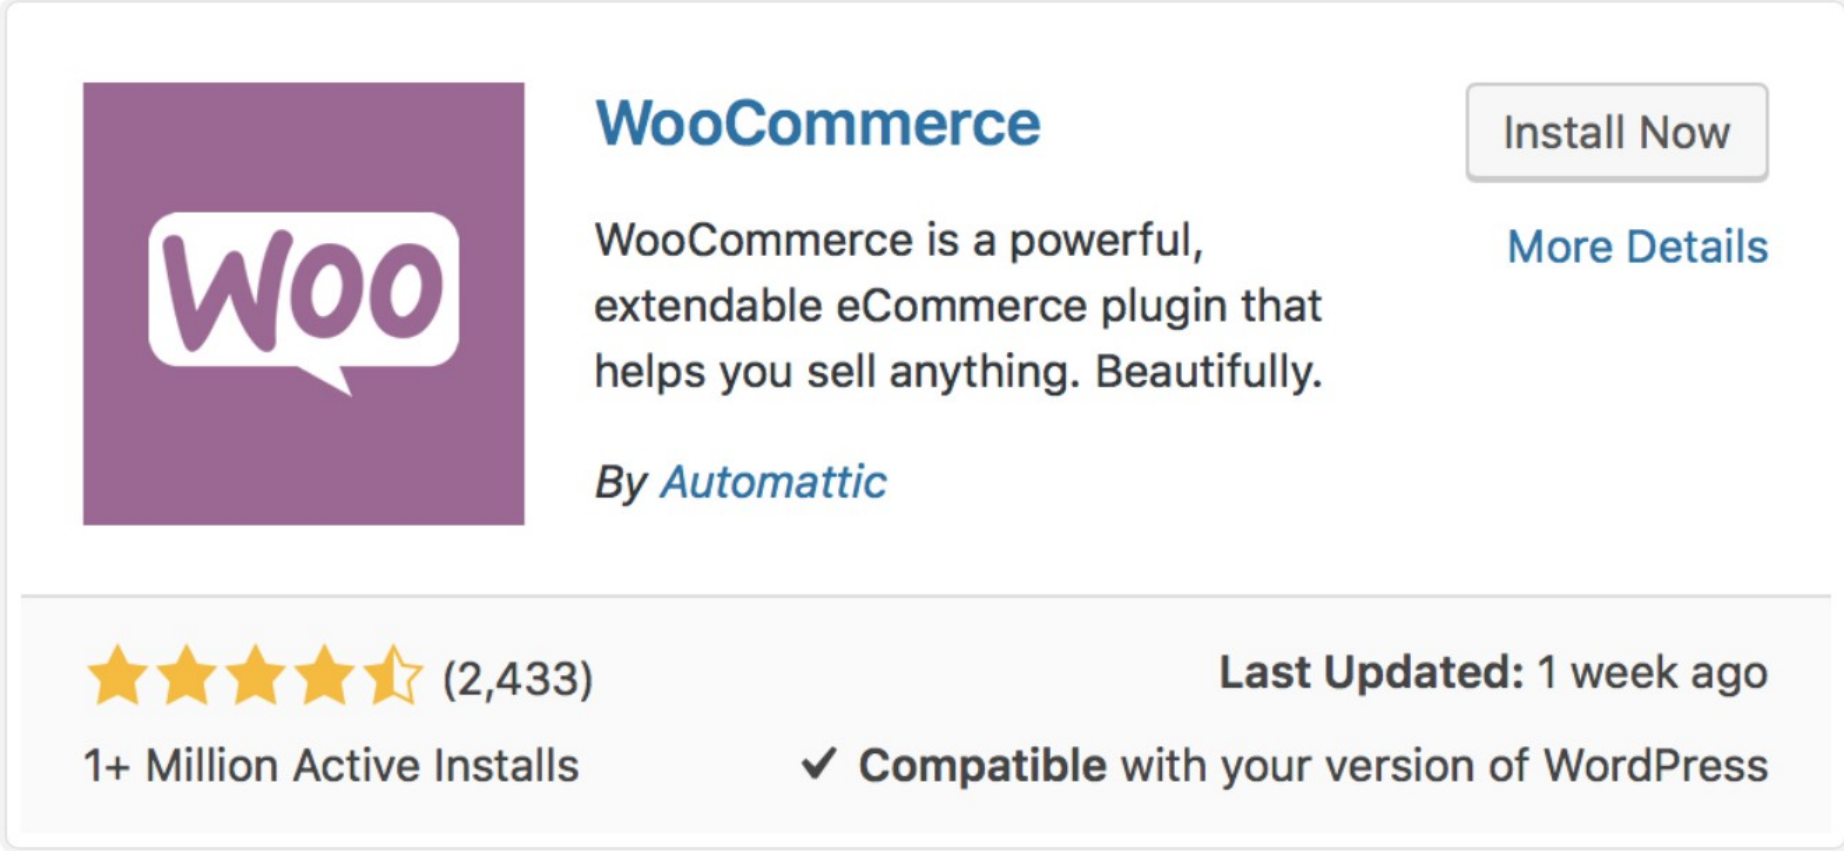

4

HTTPS support

Essential — you are handling payment and customer data.

© 2026 Tertiary Infotech Academy Pte Ltd

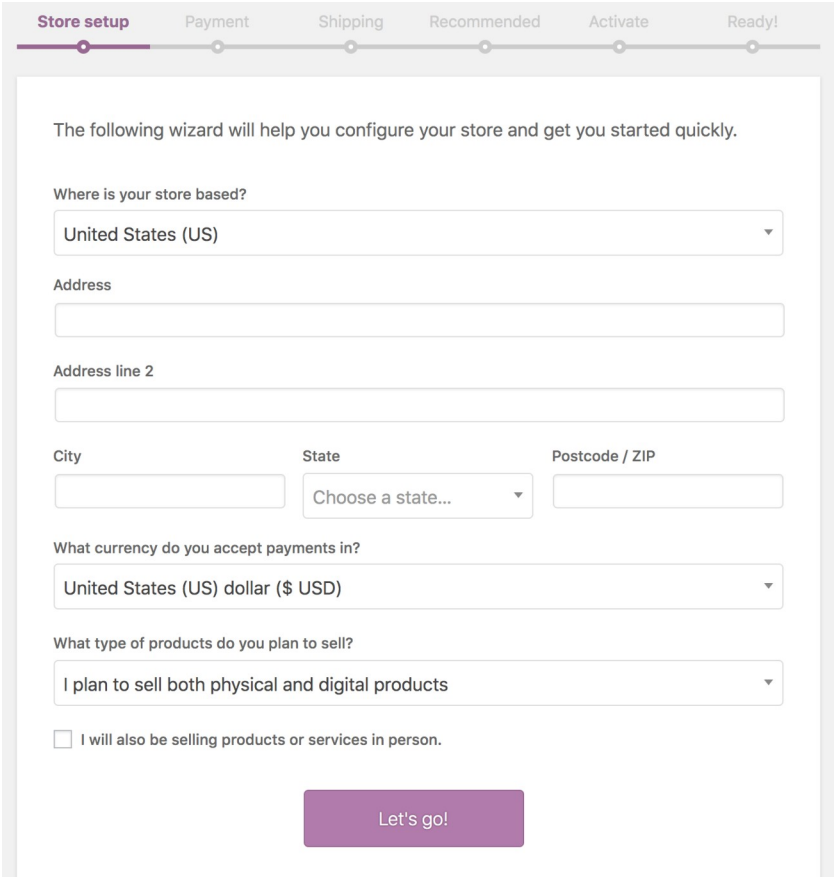

Install WooCommerce

Plugins > Add New > search 'WooCommerce' by Automattic > Install Now > Activate.

© 2026 Tertiary Infotech Academy Pte Ltd

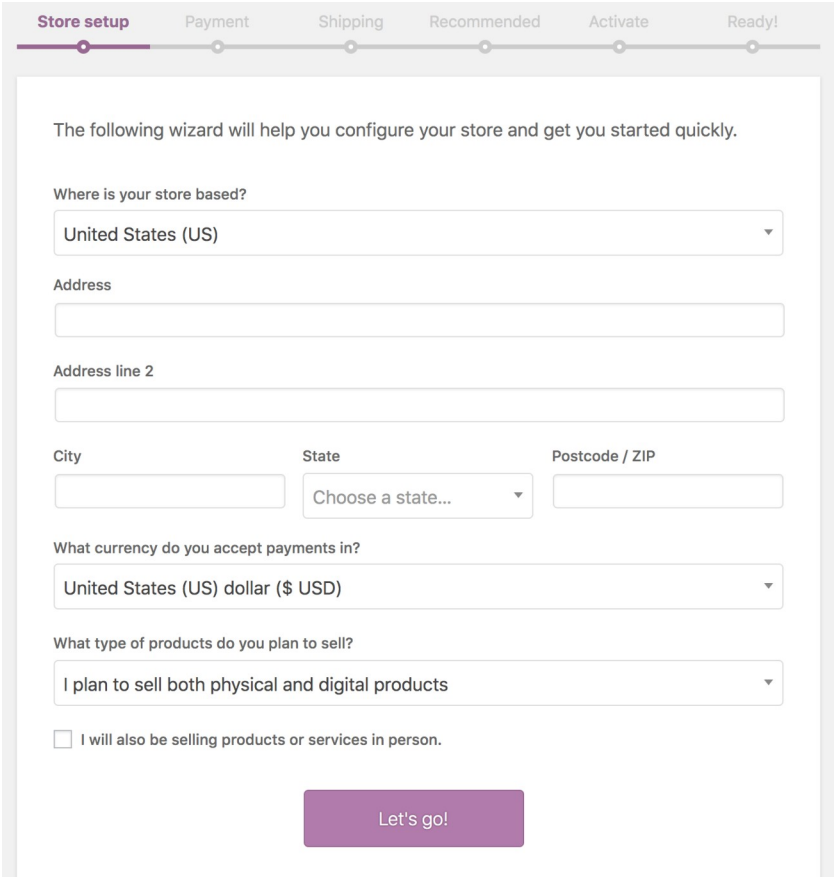

The WooCommerce Setup Wizard

On first activation the Setup Wizard configures the store for you.

© 2026 Tertiary Infotech Academy Pte Ltd

Store Setup

Location and currency, the type of goods you sell, and whether you sell in person.

© 2026 Tertiary Infotech Academy Pte Ltd

Taxonomies and Post Types

1

Post types

WordPress separates content into types — posts, pages, attachments. WooCommerce adds 'product'.

2

Taxonomies

A grouping of post types — categories and tags. WooCommerce adds product categories, tags and attributes.

3

Why it matters

This structure is what lets you filter, browse and curate a catalogue rather than a pile of pages.

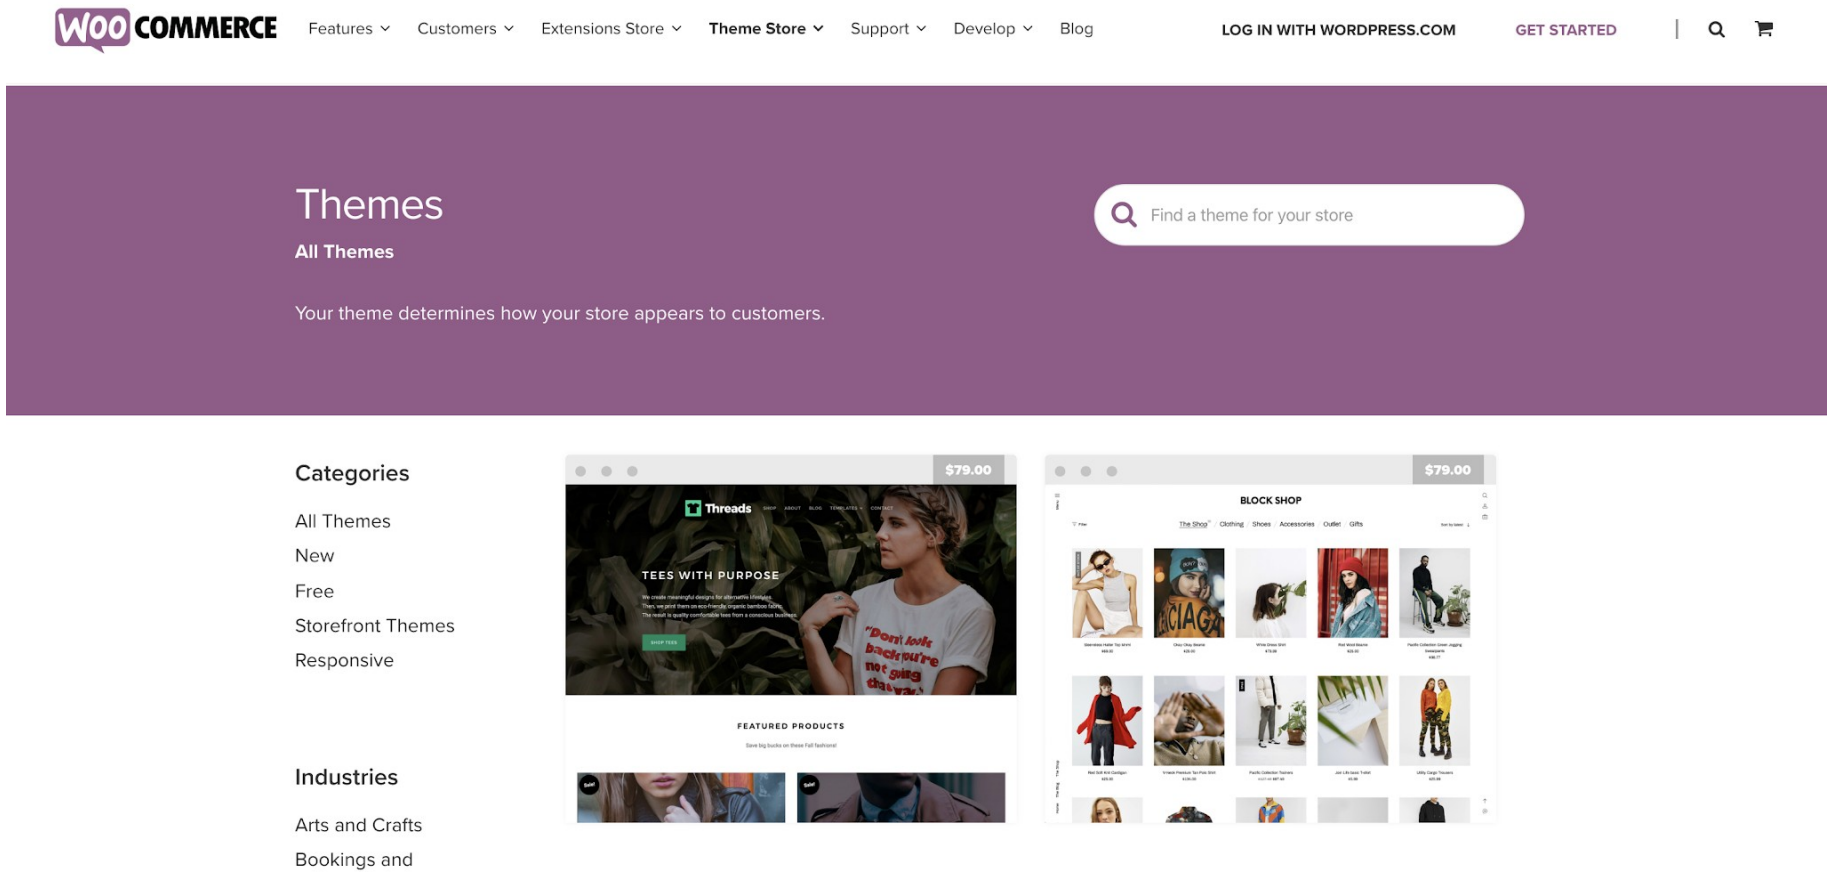

4

Created for you

The setup wizard registers these automatically when WooCommerce is activated.

© 2026 Tertiary Infotech Academy Pte Ltd

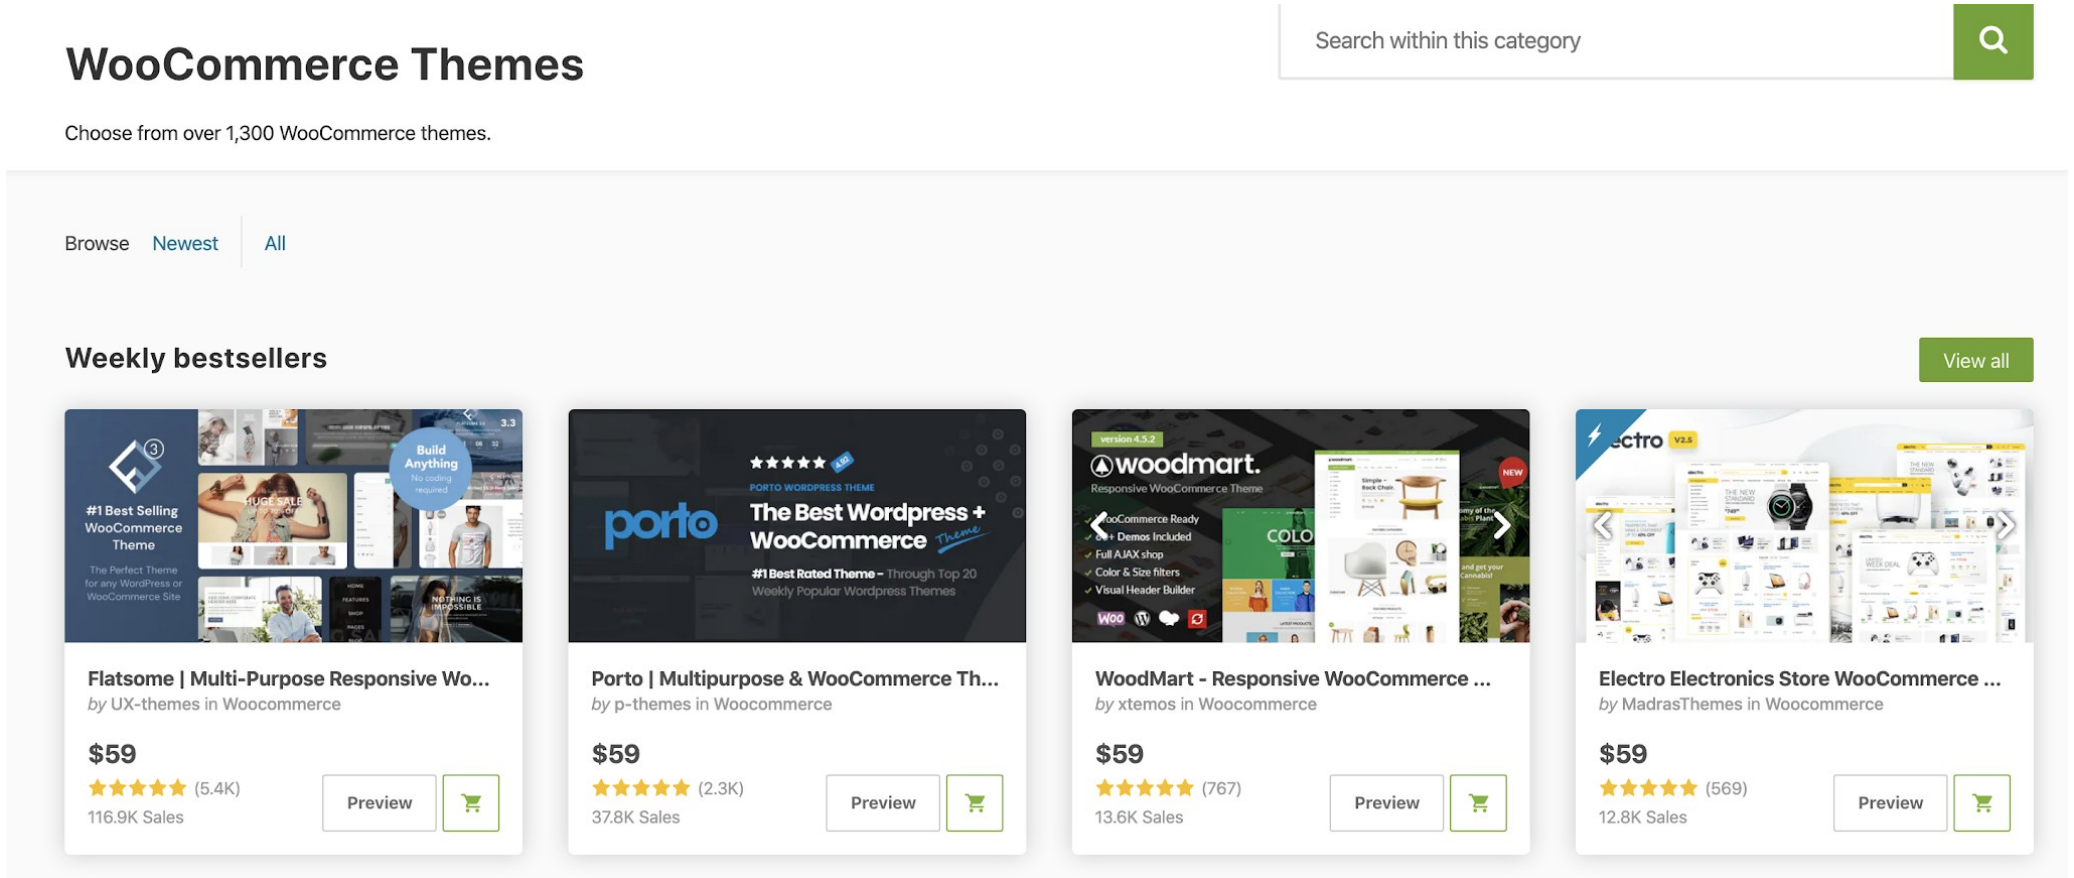

Professional WooCommerce Themes

Official themes — https://woocommerce.com/product-category/themes

© 2026 Tertiary Infotech Academy Pte Ltd

Third-Party WooCommerce Themes

ThemeForest — https://themeforest.net/category/wordpress/ecommerce/woocommerce

© 2026 Tertiary Infotech Academy Pte Ltd

Choosing the Right Theme

1. **Aesthetic**
   Does it suit your brand and the products you sell?

2. **Release frequency**
   An actively maintained theme keeps pace with WooCommerce updates.

3. **Support**
   Is there documentation and a responsive support channel?

4. **Custom functionality**
   What does it add beyond styling — and will that lock you in?

5. **Responsive**
   It must work on a phone; most storefront traffic is mobile.

6. **Compatibility**
   Confirm it declares WooCommerce support explicitly.

© 2026 Tertiary Infotech Academy Pte Ltd

WooCommerce Widgets

1

Product widgets

Products, Products by Rating, Recent Product Reviews, Recently Viewed Products.

2

Filter widgets

Filter by Attribute, Filter by Price, Filter by Rating, plus Active Product Filters.

3

Navigation widgets

Product Categories as a list or dropdown, and a Product Tag Cloud.

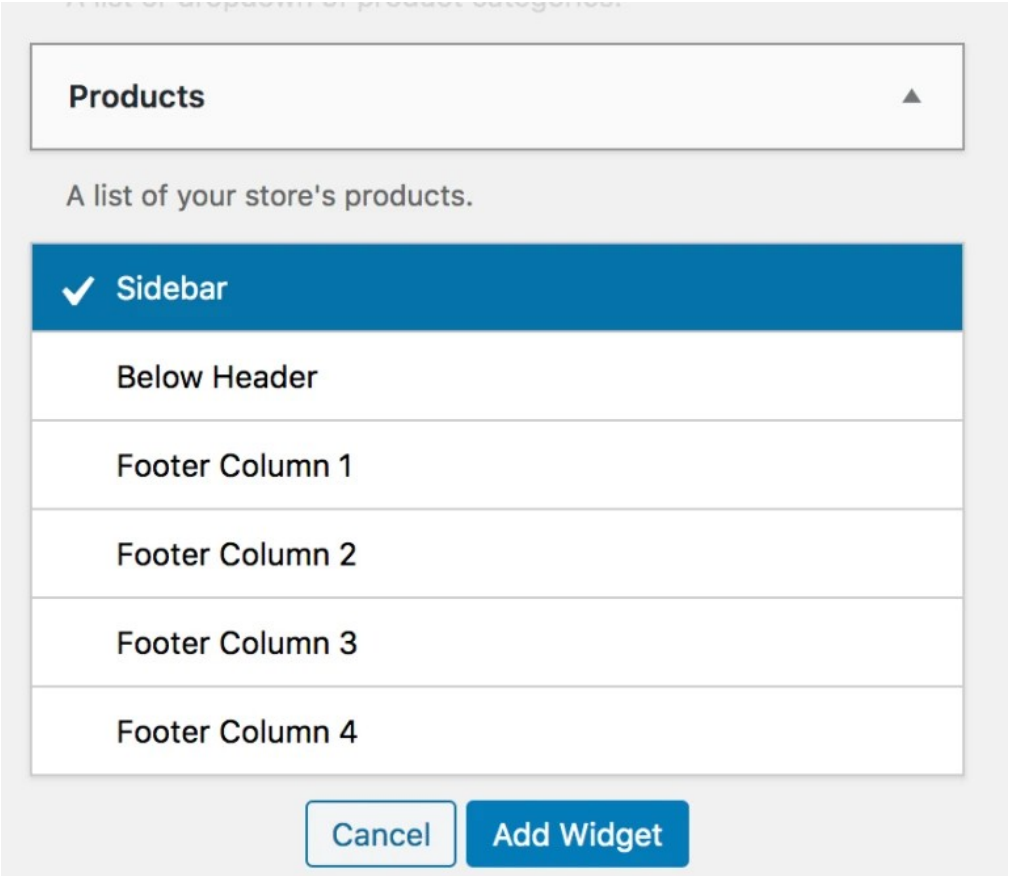

4

Utility widgets

Cart and Product Search, so customers can buy and find from any page.

© 2026 Tertiary Infotech Academy Pte Ltd

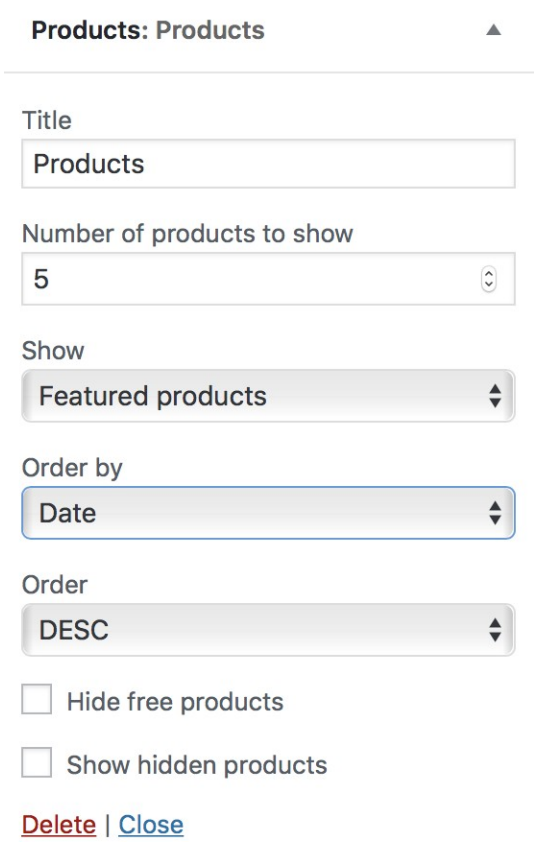

Adding a Widget

Appearance > Widgets — choose a widget area, then Add Widget.

© 2026 Tertiary Infotech Academy Pte Ltd

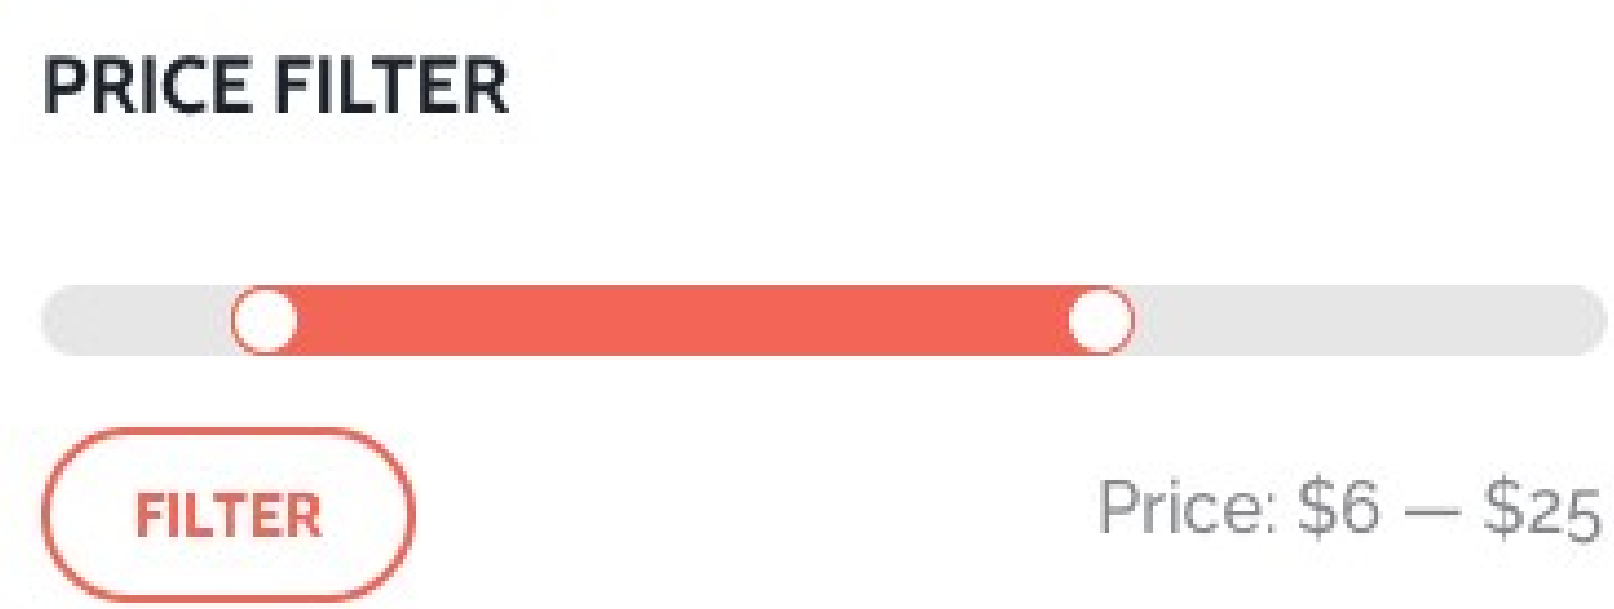

The Products Widget

Show products by date, price, sales or randomly — all, featured only, or on sale.

© 2026 Tertiary Infotech Academy Pte Ltd

Filter Products by Price

A slider that auto-detects the minimum and maximum prices on the page.

© 2026 Tertiary Infotech Academy Pte Ltd

Filter Products by Attribute

Layered navigation — AND returns products matching both terms, OR matches either.

© 2026 Tertiary Infotech Academy Pte Ltd

Shortcodes Included with WooCommerce

1

[woocommerce_cart]
Renders the cart page.

2

[woocommerce_checkout]
Renders the checkout page.

3

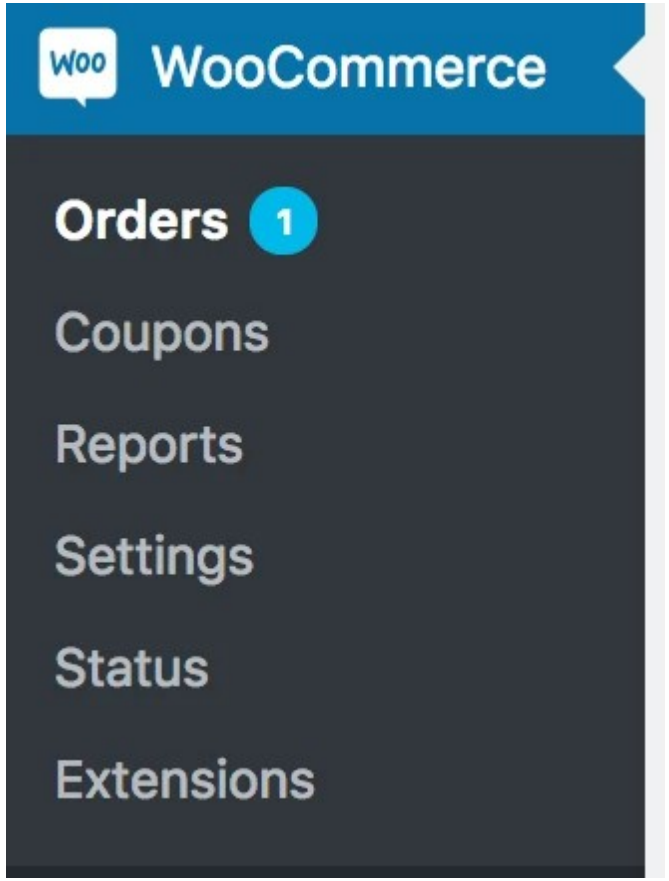

[woocommerce_my_account]
Renders the customer account page.

4

[woocommerce_order_tracking]
Renders the order tracking form.

© 2026 Tertiary Infotech Academy Pte Ltd

WooCommerce Menu Items

Orders, Coupons, Reports and Settings — the four places you work every day.

© 2026 Tertiary Infotech Academy Pte Ltd

Configuring WooCommerce Settings

1

General

Store address, selling and shipping locations, taxes and currency options.

2

Products

Shop pages, measurements, reviews, inventory and downloadable products.

3

Tax

Prices entered with tax, tax rates, and how tax is calculated and displayed.

4

Shipping

Shipping zones, methods, classes and shipping options.

5

Payments

Which gateways are enabled and the order they appear at checkout.

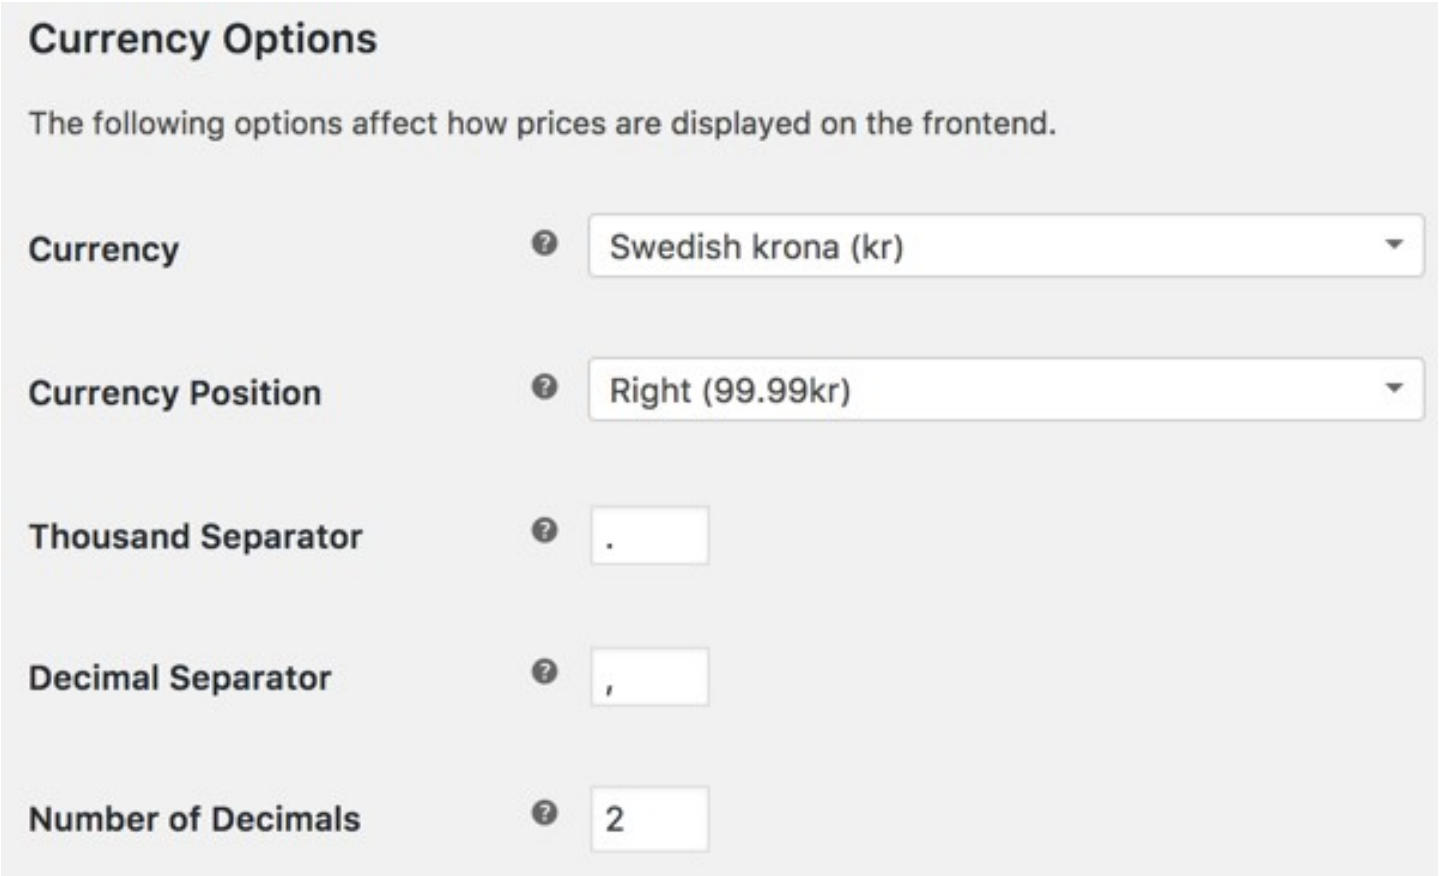

6

Accounts & Privacy

Guest checkout, account creation, and data retention policy.

© 2026 Tertiary Infotech Academy Pte Ltd

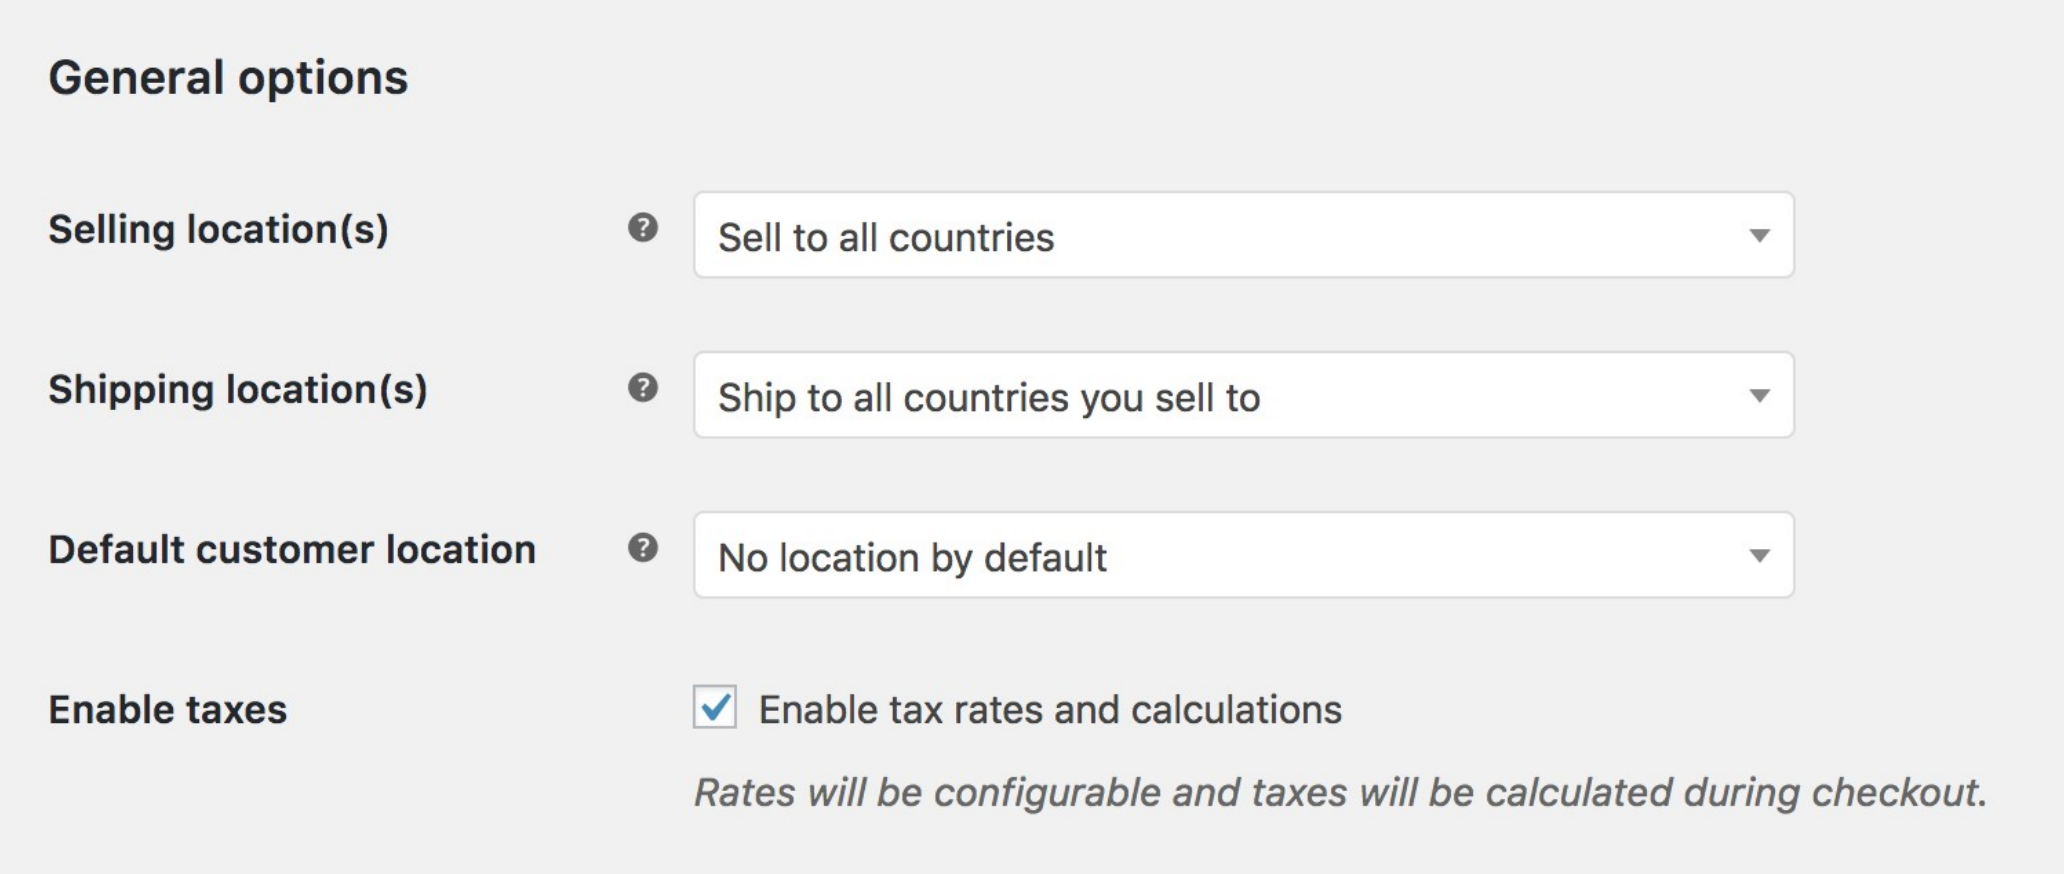

Shop Currency

WooCommerce > Settings > General > Currency options.

© 2026 Tertiary Infotech Academy Pte Ltd

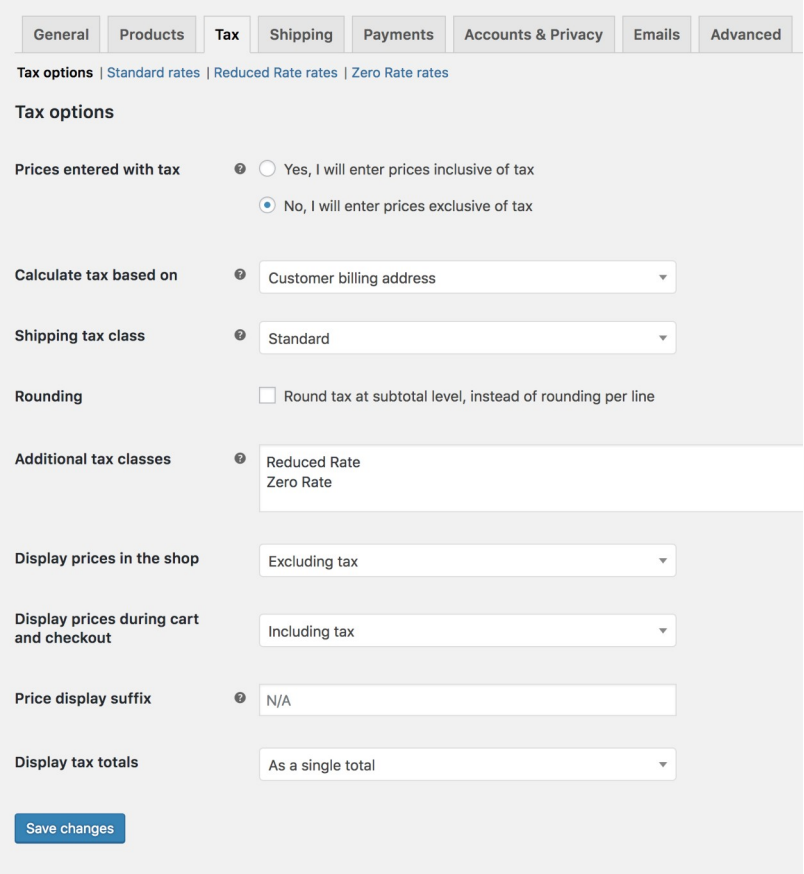

Enabling Taxes

Tick 'Enable taxes and tax calculations' — the Tax tab then appears.

© 2026 Tertiary Infotech Academy Pte Ltd

Configuring Tax Options

WooCommerce > Settings > Tax — visible only once taxes are enabled.

© 2026 Tertiary Infotech Academy Pte Ltd

Prices Entered With Tax

1

Inclusive

'Yes, I will enter prices inclusive of tax' — catalogue prices already contain the base tax rate.

2

Exclusive

'No, I will enter prices exclusive of tax' — tax is added on top at checkout.

3

Inclusive formula

tax_amount = price − (price / ((tax_rate% / 100) + 1))

4

Exclusive formula

tax_amount = price × (tax_rate% / 100)

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 01 · HANDS-ON LAB

Set Up Your WooCommerce Store

LAB 1

Set up and monitor a WooCommerce CMS so it adheres to store guidelines and policies.

Install the WooCommerce plugin on a WordPress site, work through the setup wizard to define the store's location, currency and industry, then apply the Storefront theme and confirm the shop, cart, checkout and My Account pages have been created. You finish by setting the currency and tax options that every price in the store will follow.

YOU'LL BUILD

A working WooCommerce store with its currency, tax and core pages configured

WHY THE BUSINESS CARES

The setup wizard is where store-wide policy is set. Currency, tax treatment and page structure decide how every product is priced and presented — getting them right first avoids re-pricing an entire catalogue later.

TOOLS Plugins > Add New · WooCommerce Setup Wizard · Appearance > Themes · WooCommerce > Settings

© 2026 Tertiary Infotech Academy Pte Ltd

Discussion — Content Management Policies for Your Store

DISCUSSION · 15 MIN

In pairs, consider a store you would run. Decide what content management policies, guidelines and user permissions it needs, and how you would monitor that people actually follow them.

1. Who should be able to publish a product, and who should only be able to draft one?
2. Which WordPress/WooCommerce roles map to those responsibilities?
3. What product-content guidelines would you set — image size, description length, mandatory fields?
4. How would you detect that a policy is not being followed?

YOUR OUTPUT A short policy statement: the roles, the content guidelines, and how adherence is monitored.

© 2026 Tertiary Infotech Academy Pte Ltd

02

TOPIC 2

Manage Products on WooCommerce Store

Product types · Images & galleries · Variations · Categories, tags & attributes · Up-sells · CSV import

© 2026 Tertiary Infotech Academy Pte Ltd

Key Concepts in This Topic

1

Product types

Simple, Grouped, Virtual, Downloadable, External/Affiliate and Variable each model a different kind of offer.

2

The Product Data panel

General, Inventory, Shipping, Linked Products and Attributes — where the substance of a product is defined.

3

Images and galleries

A featured image plus a gallery, with catalogue visibility controlling where the product appears.

4

Categories, tags, attributes

Categories are hierarchical, tags are flat, and attributes drive filtering and product variations.

5

Up-sells and cross-sells

Up-sells appear on the product page; cross-sells appear in the cart; related products are automatic.

6

CSV import and export

Create or update hundreds of products in one pass, including variations, from a single CSV file.

© 2026 Tertiary Infotech Academy Pte Ltd

Product Types

1

Simple

The majority of products — shipped, with no options. For example, a book.

2

Grouped

A collection of related simple products bought individually, e.g. a set of six glasses.

3

Virtual

Needs no shipping — a service. Disables all shipping fields and the cart calculator.

4

Downloadable

The customer receives a file after purchase — an album, PDF or photo.

5

External / Affiliate

Listed and described on your site, but sold elsewhere.

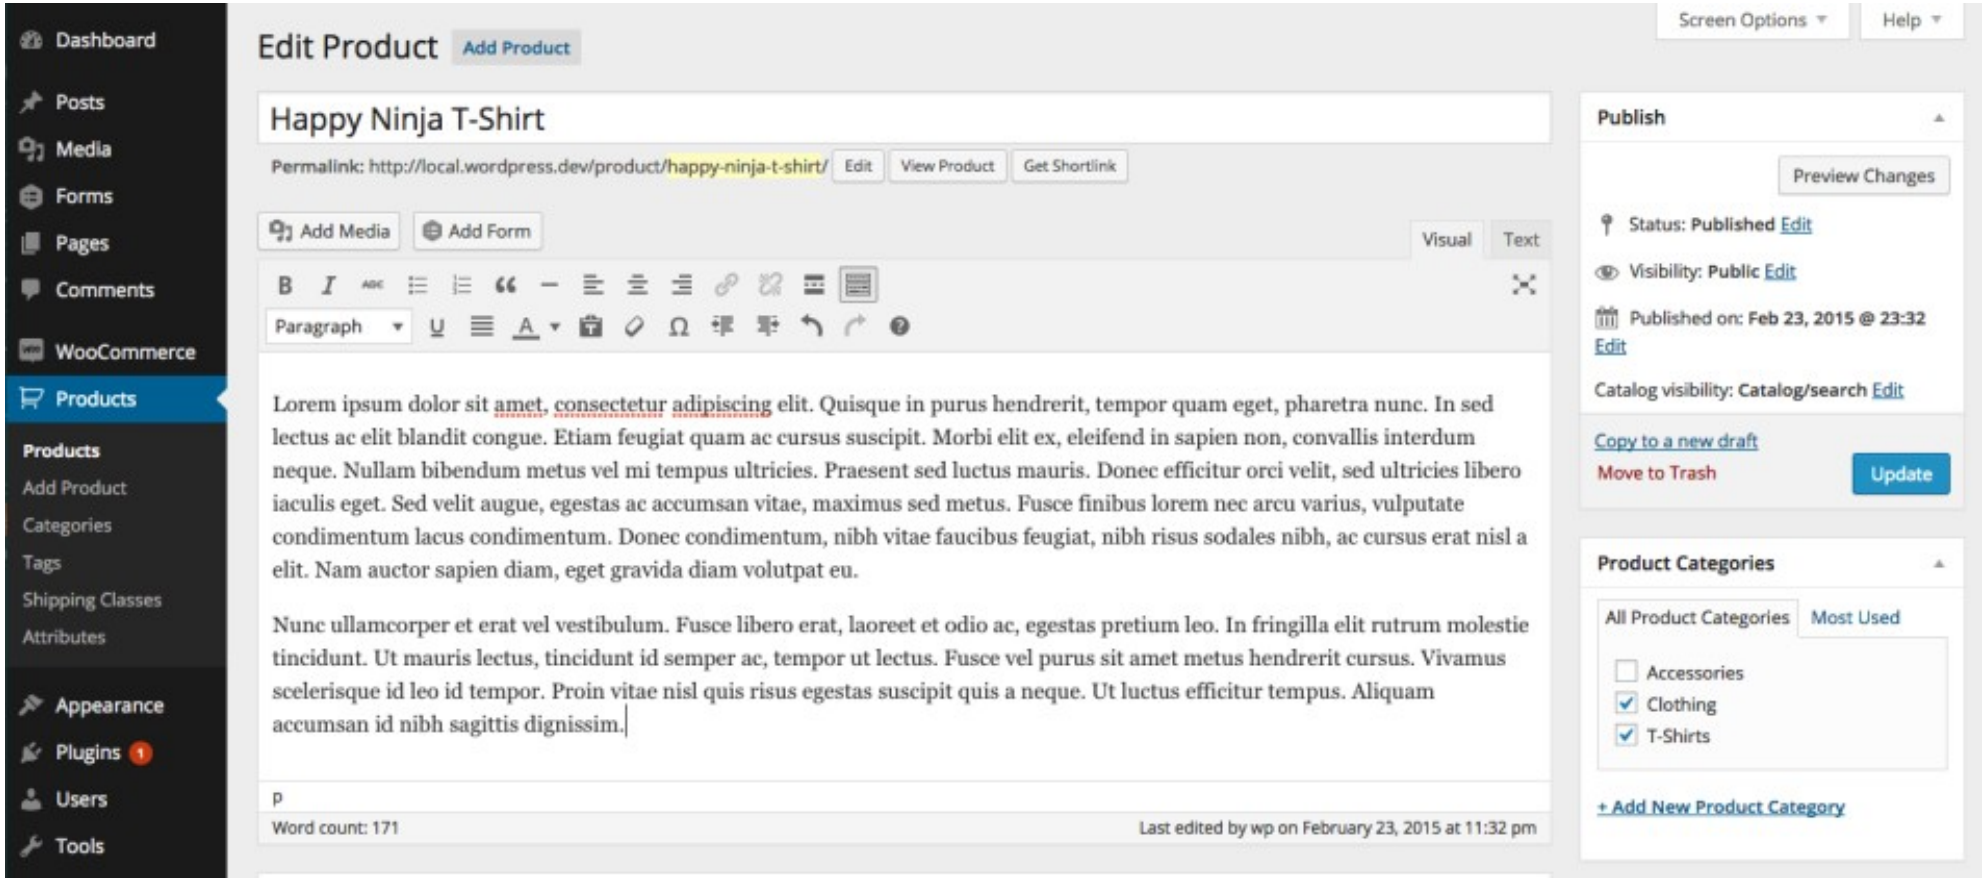

6

Variable

Variations with their own SKU, price and stock — e.g. a t-shirt in sizes and colours.

© 2026 Tertiary Infotech Academy Pte Ltd

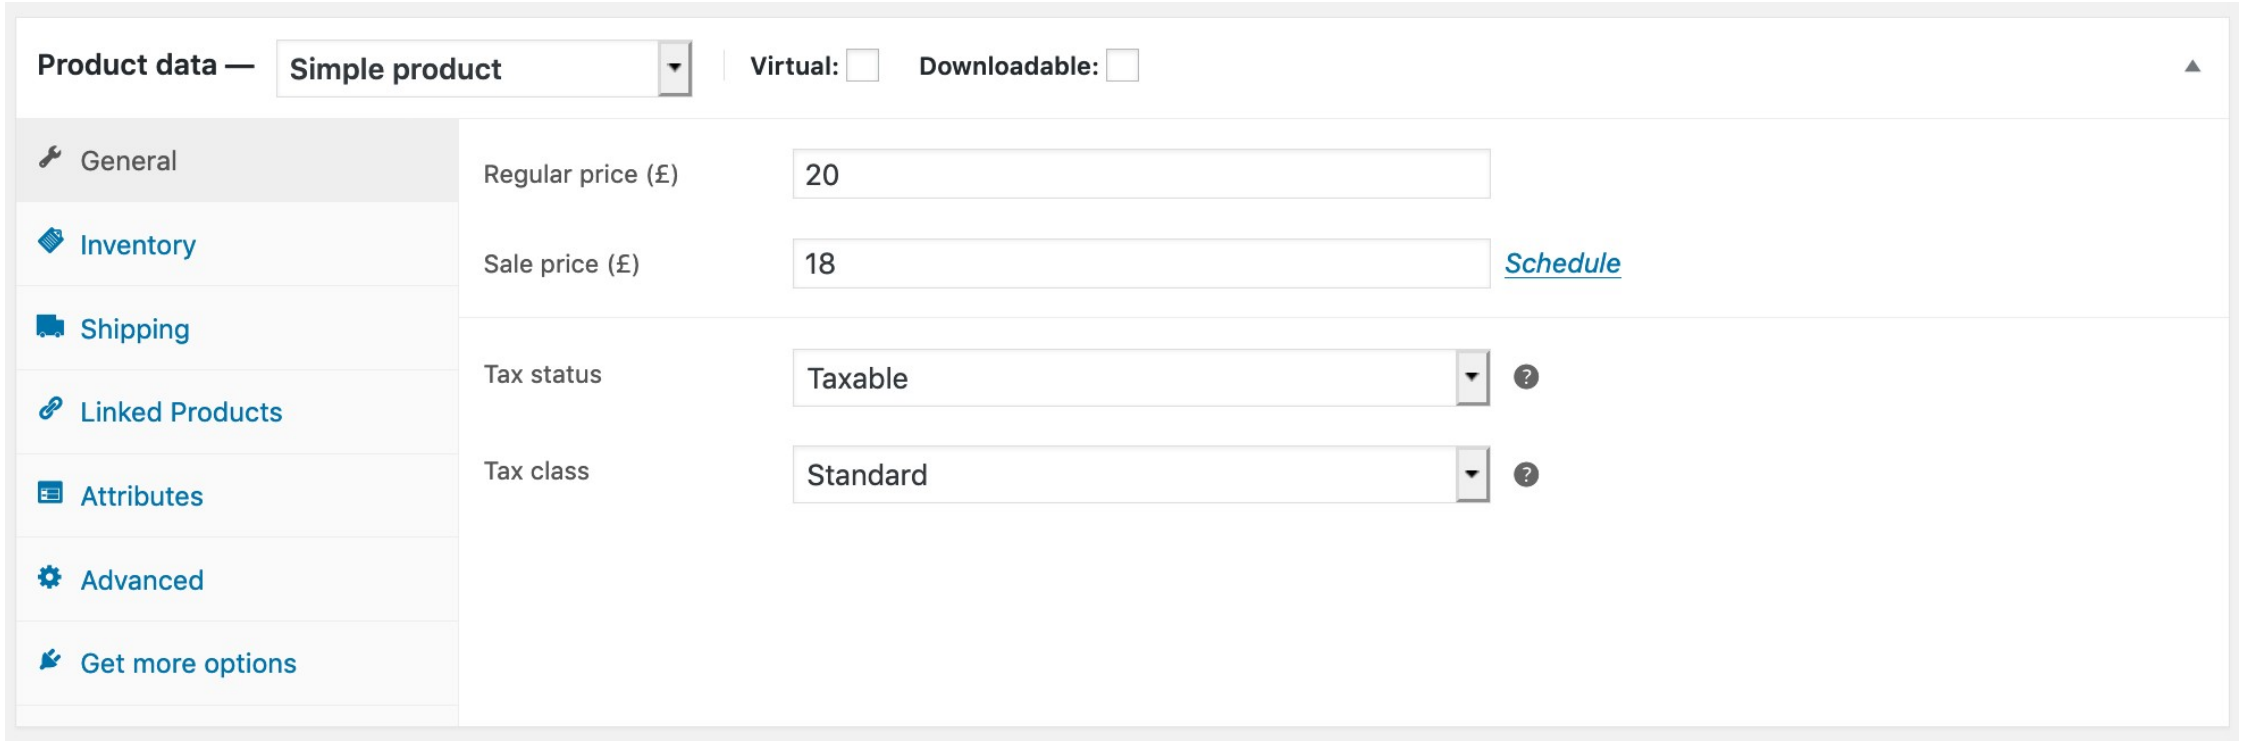

Adding a Simple Product

Products > Add New — a familiar WordPress editing interface.

© 2026 Tertiary Infotech Academy Pte Ltd

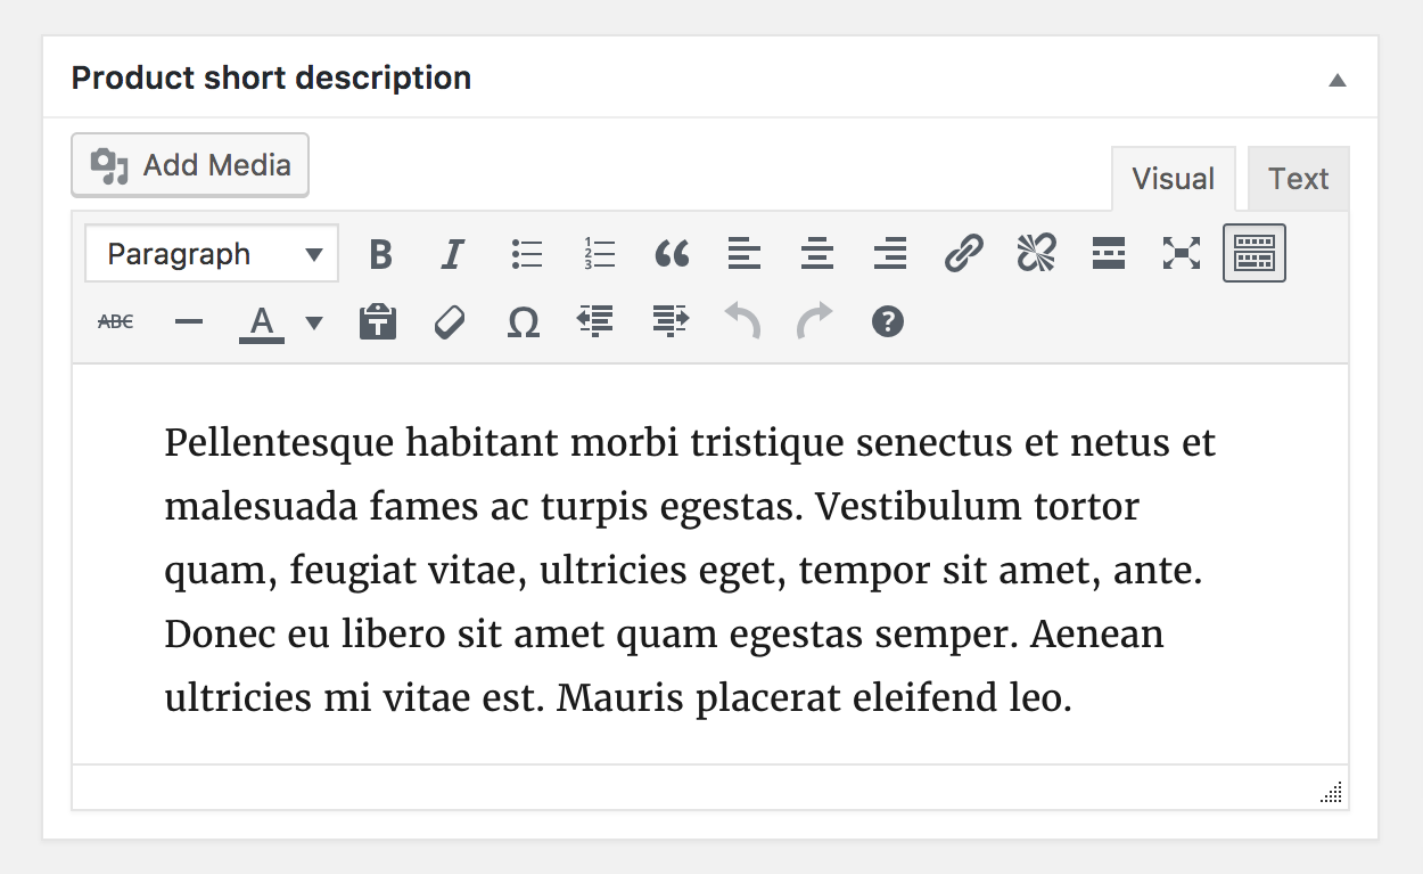

The Product Data Panel

General, Inventory, Shipping, Linked Products, Attributes and Advanced.

© 2026 Tertiary Infotech Academy Pte Ltd

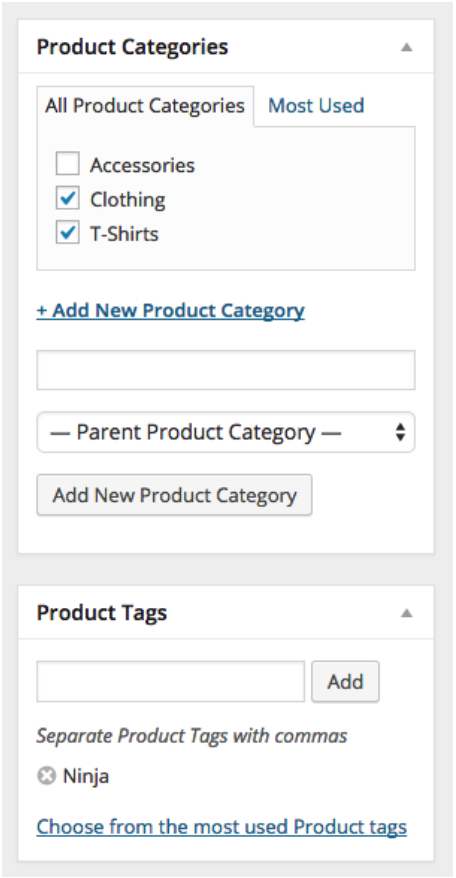

Product Short Description

The excerpt beside the product image; the long description fills the Description tab.

© 2026 Tertiary Infotech Academy Pte Ltd

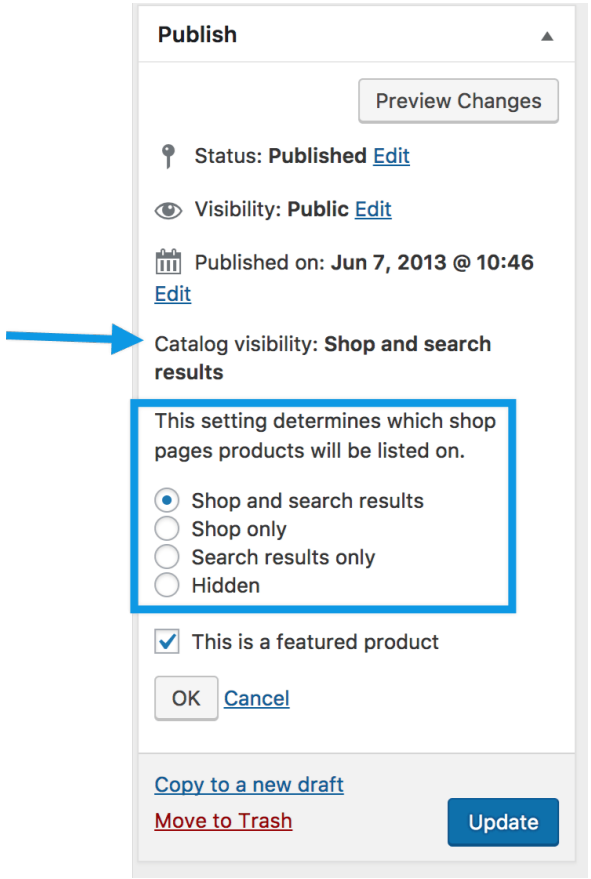

Product Categories and Tags

Assigned from the right-hand column, exactly like a WordPress post.

© 2026 Tertiary Infotech Academy Pte Ltd

Product Images and Galleries

A featured image plus a gallery — and catalogue visibility controls where it appears.

© 2026 Tertiary Infotech Academy Pte Ltd

Catalog Visibility Options

1

Shop and search

Visible everywhere — shop pages, category pages and search results.

2

Shop only

Visible in shop and category pages, but not in search results.

3

Search only

Visible in search results, but not in the shop or category pages.

4

Hidden

Only reachable on its own product page — useful for unlisted or bundled items.

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 02 · HANDS-ON LAB

Create and Curate a Simple Product

LAB 2

Edit and curate product web content on the WooCommerce CMS.

Build your first catalogue entry. You add a simple product with a title, long and short description, price and SKU, upload a featured image and a gallery, then file it under a category and tag so customers can find it. This is the core content-curation task the CMS exists to support.

YOU'LL BUILD

A published simple product, complete with images, price, SKU, category and tag

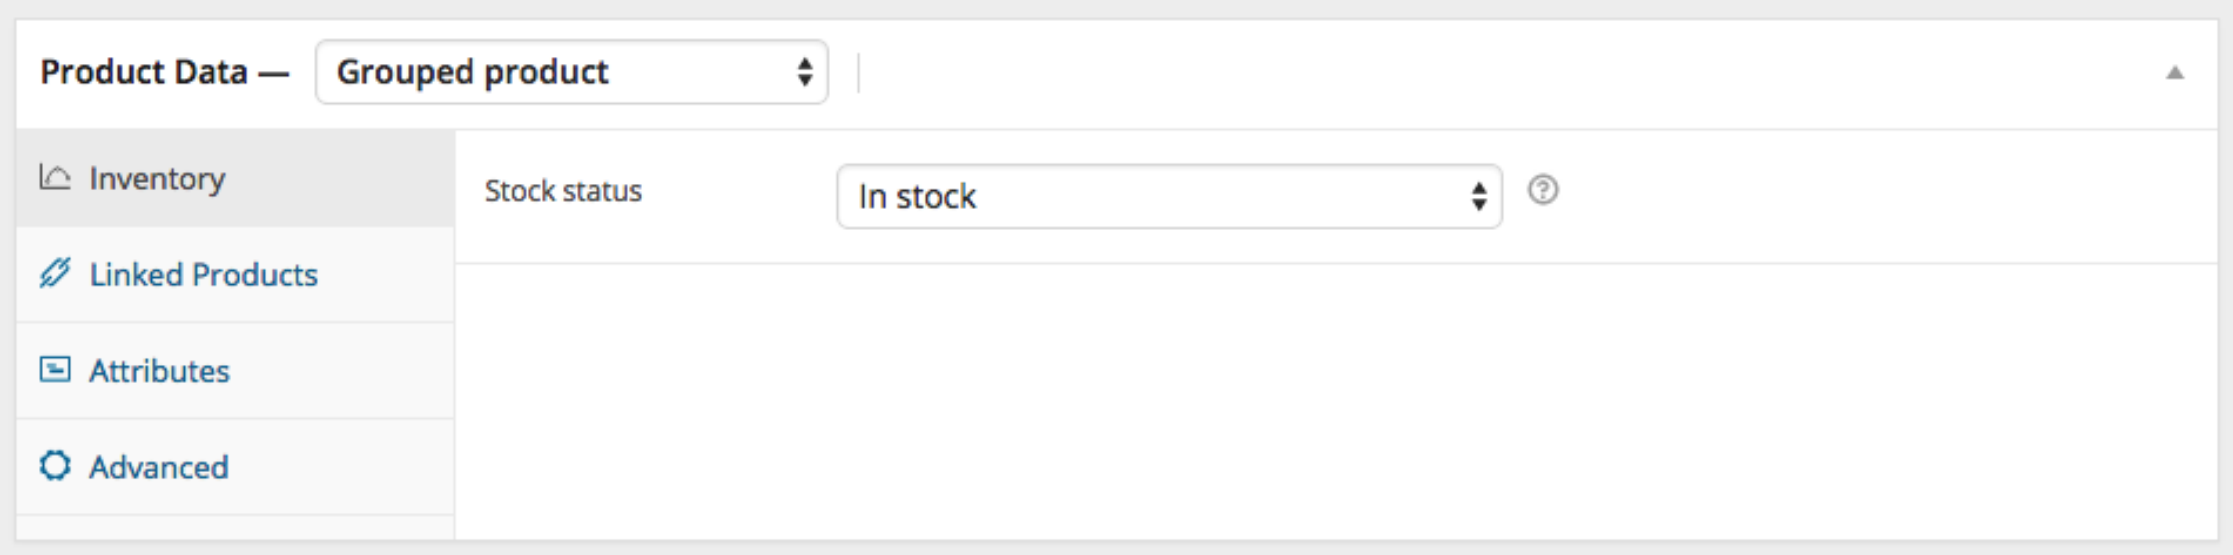

WHY THE BUSINESS CARES

Product content is the storefront's sales copy. Consistent titles, descriptions and imagery are exactly the content guidelines a CMS policy governs — and the reason curation matters.

TOOLS Products > Add New · Product Data panel · Product image & gallery · Categories · Tags

© 2026 Tertiary Infotech Academy Pte Ltd

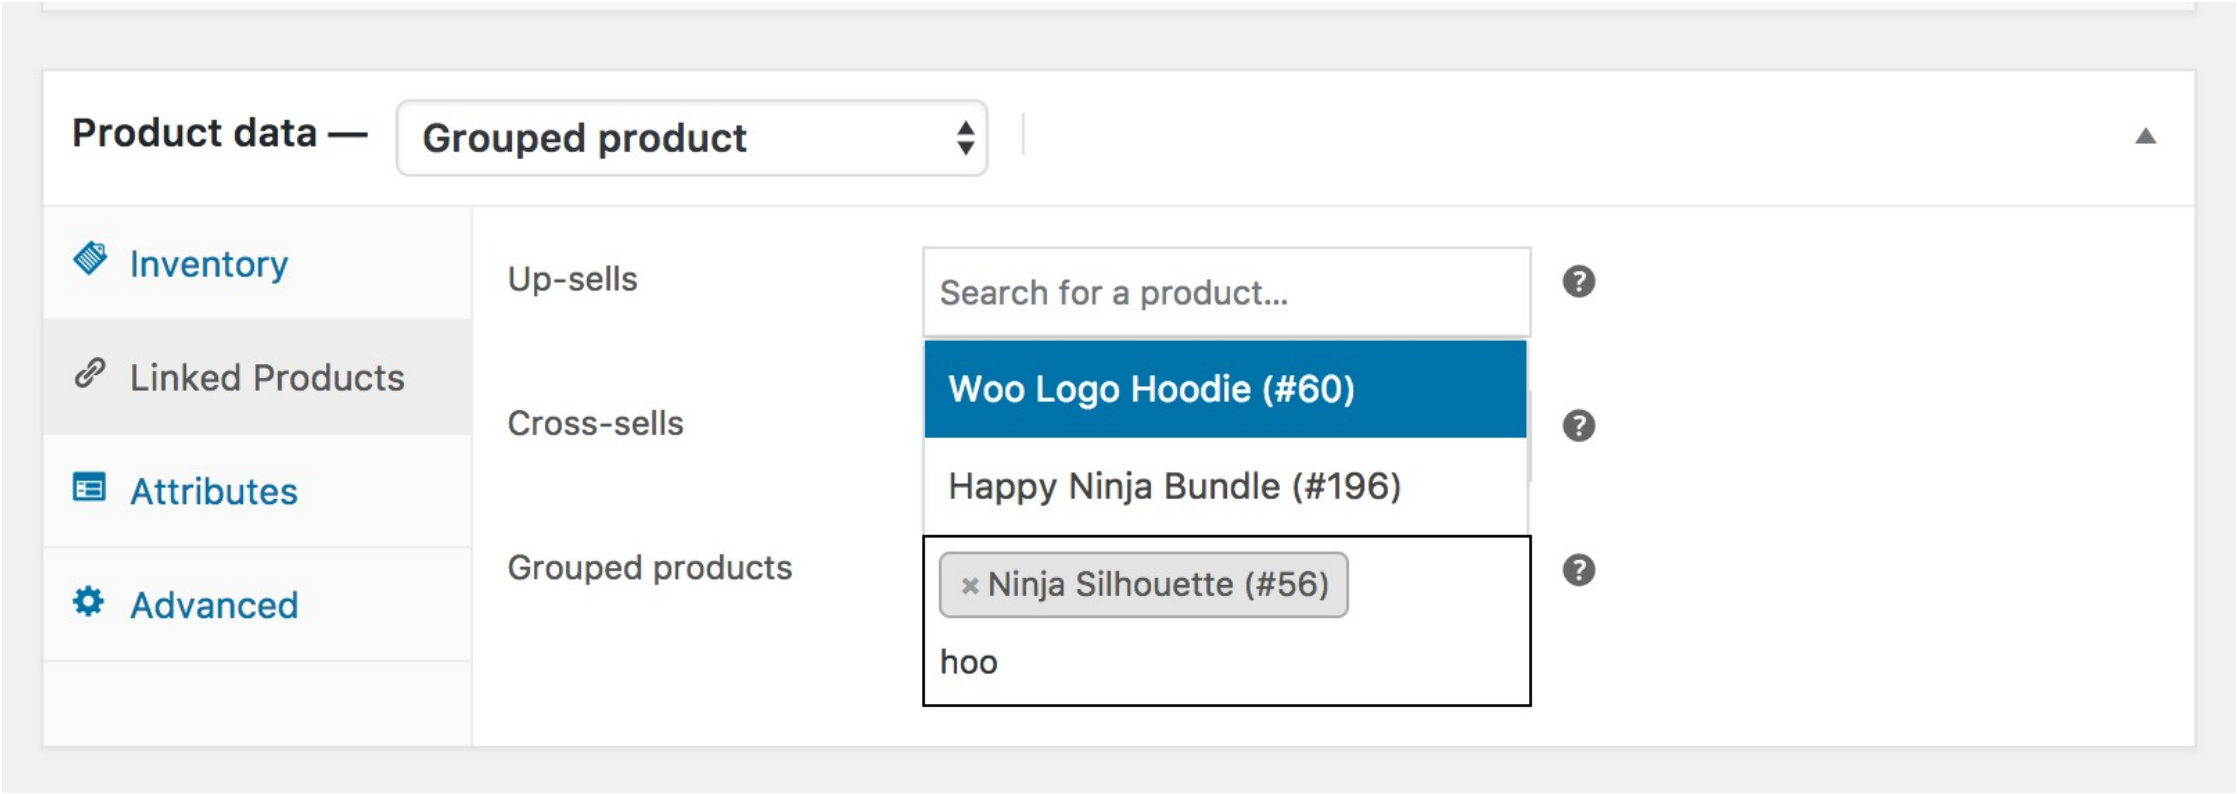

Adding a Grouped Product

Select Grouped from the Product data dropdown — price fields disappear.

© 2026 Tertiary Infotech Academy Pte Ltd

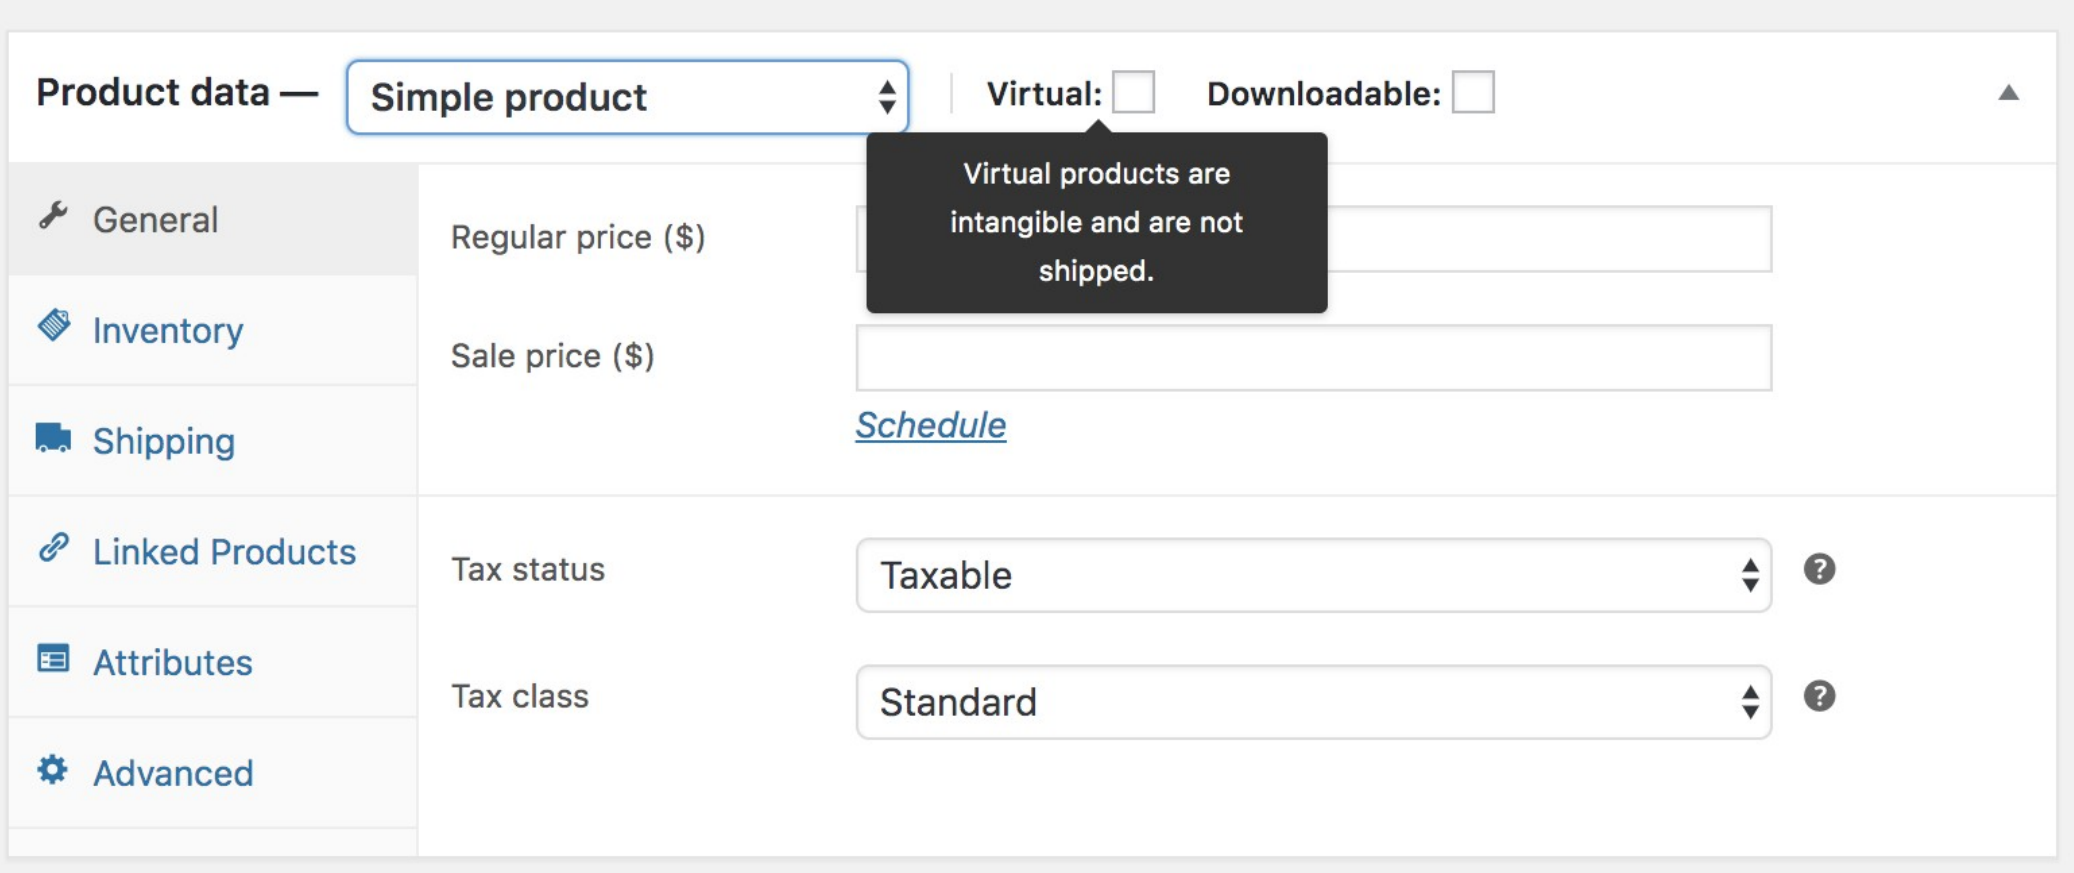

Populating a Grouped Product

Add child products from Linked Products > Grouped products, then reorder by dragging.

© 2026 Tertiary Infotech Academy Pte Ltd

Virtual and Downloadable Products

Tick Virtual to remove shipping; tick Downloadable to add a file path and download limit.

© 2026 Tertiary Infotech Academy Pte Ltd

Creating a Variable Product

1. ADD ATTRIBUTE
   e.g. Size, Colour
2. ENTER VALUES
   Small | Medium | Large
3. USE FOR VARIATIONS
   Tick the box, save
4. GENERATE VARIATIONS
   All combinations at once
5. SET PRICE & STOCK
   Per variation

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 02 · HANDS-ON LAB

Create a Variable Product with Attributes and Variations

LAB 3

Maintain product web content that carries options, pricing and stock per variation.

Most real products come in options. You define a custom attribute such as Size or Colour, generate the variations from it, then give each variation its own SKU, price, stock level and image — and verify the dropdowns work on the storefront.

YOU'LL BUILD

A published variable product whose variations each carry their own price, SKU and stock

WHY THE BUSINESS CARES

Variations keep one product page instead of five near-duplicates. That is cleaner content, better SEO, and far less maintenance when a price or description changes.

TOOLS Product data > Variable product · Attributes tab · Variations tab · Used for variations

© 2026 Tertiary Infotech Academy Pte Ltd

Categories, Tags and Attributes

1

Product categories

Hierarchical — parents and subcategories, with a slug, description, display type and image.

2

Product tags

Flat, with no hierarchy. Use them for cross-cutting themes such as 'cat print' or 'summer'.

3

Product attributes

Per-product or global. Global attributes power layered navigation and variations.

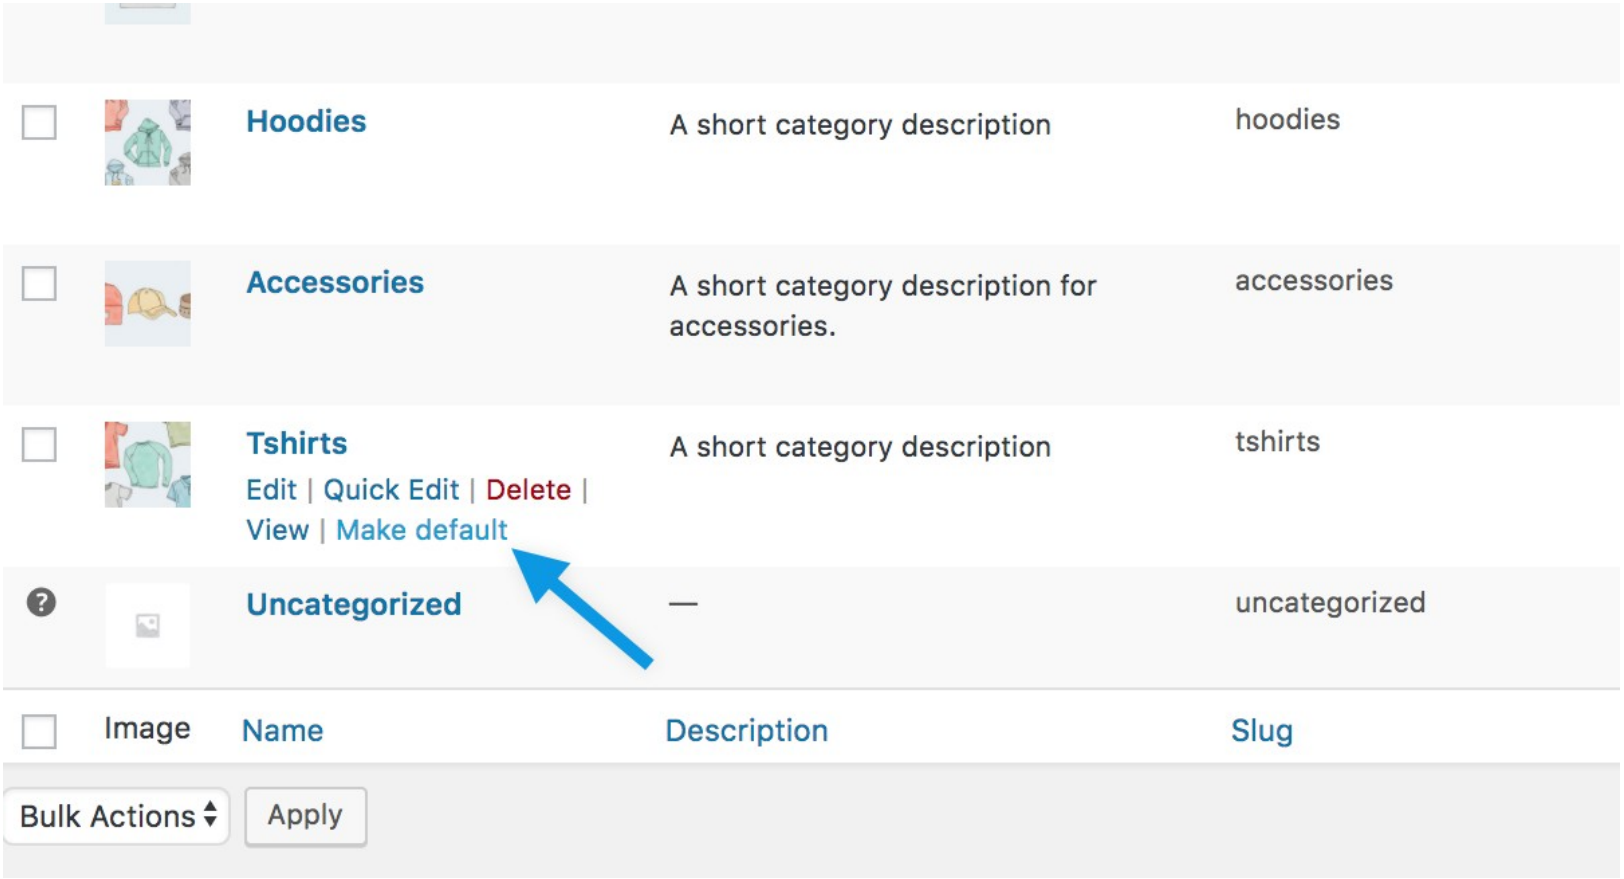

4

The default category

Every product must have a category; unassigned products fall into 'Uncategorized'.

© 2026 Tertiary Infotech Academy Pte Ltd

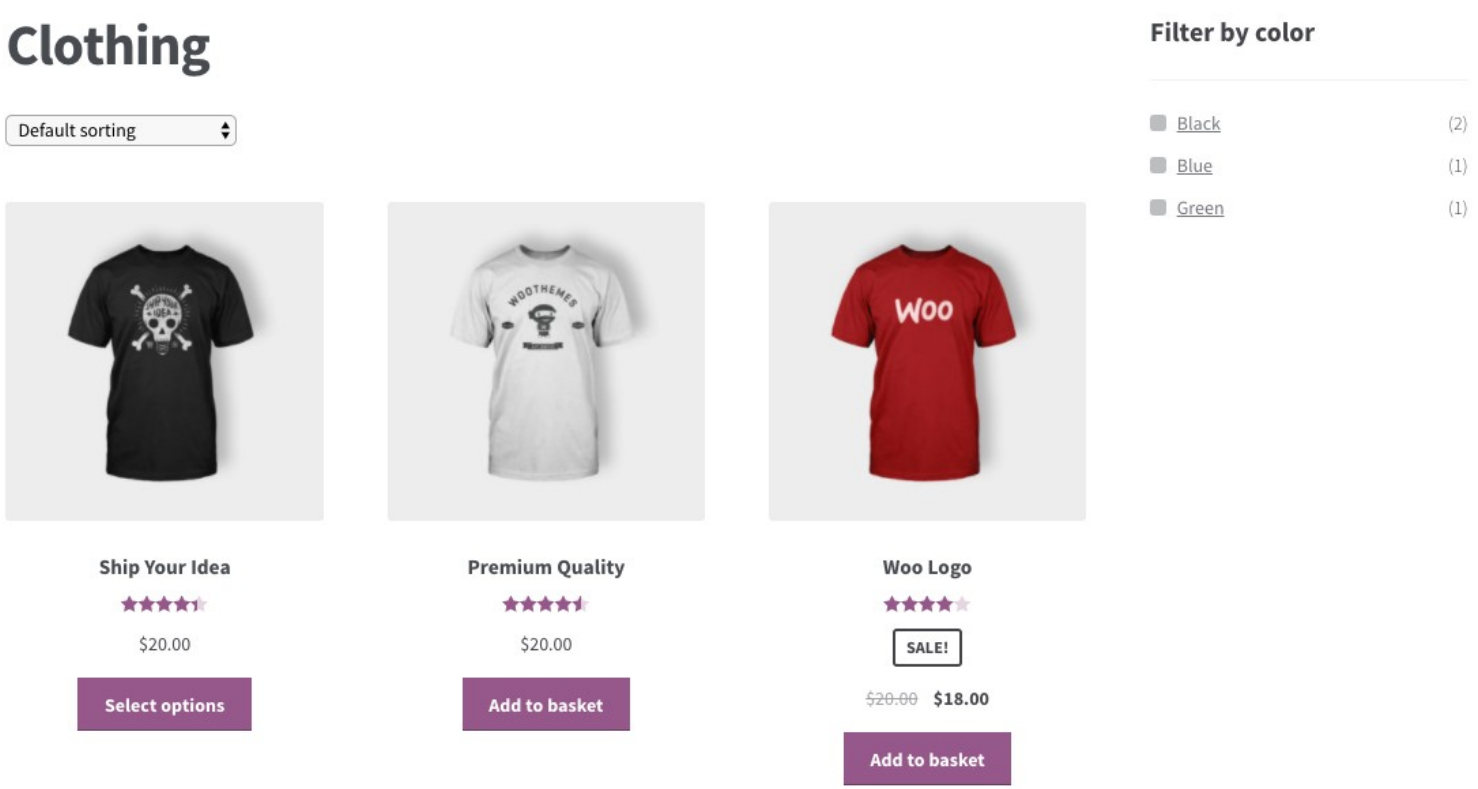

The Default Category

'Uncategorized' cannot be deleted while it is the default — but it can be renamed or switched.

© 2026 Tertiary Infotech Academy Pte Ltd

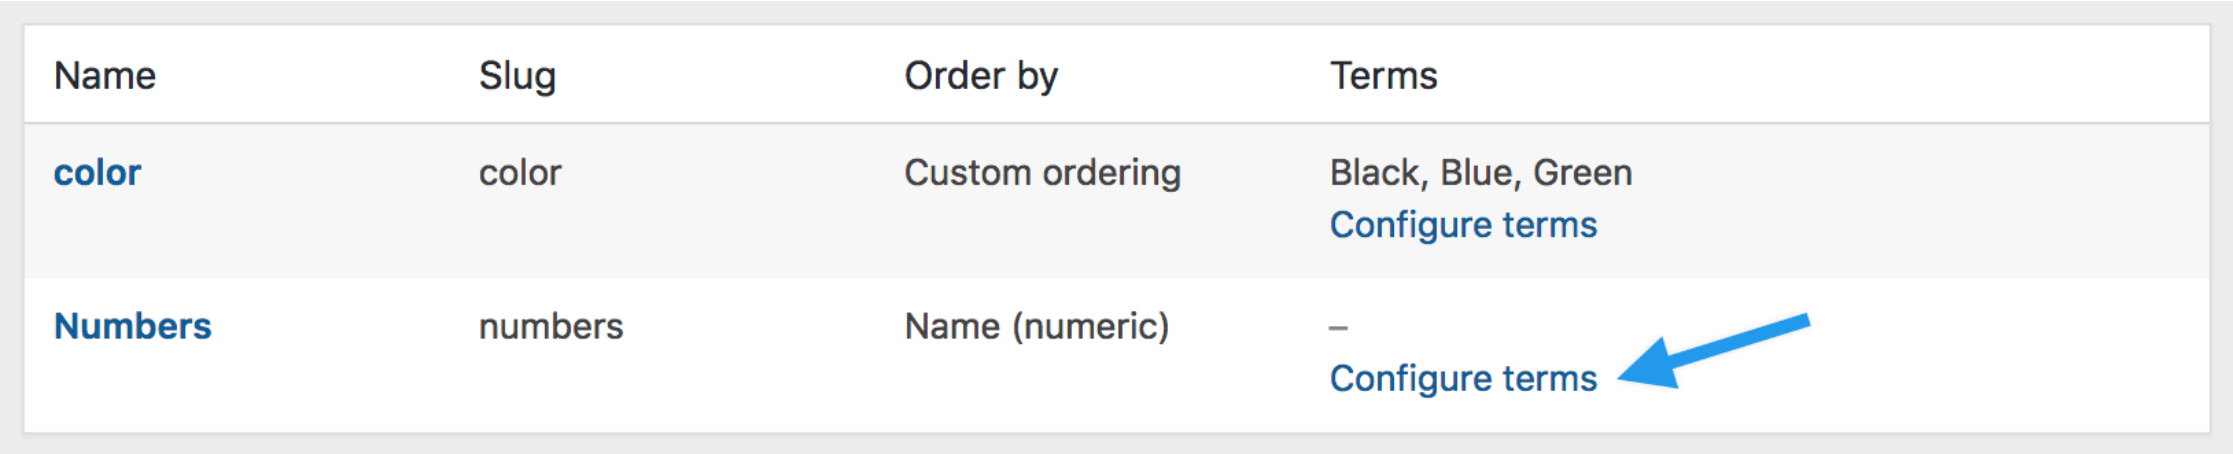

Product Attributes

Attributes drive the Filter by Attribute widget and are required for variations.

© 2026 Tertiary Infotech Academy Pte Ltd

Managing Global Attributes

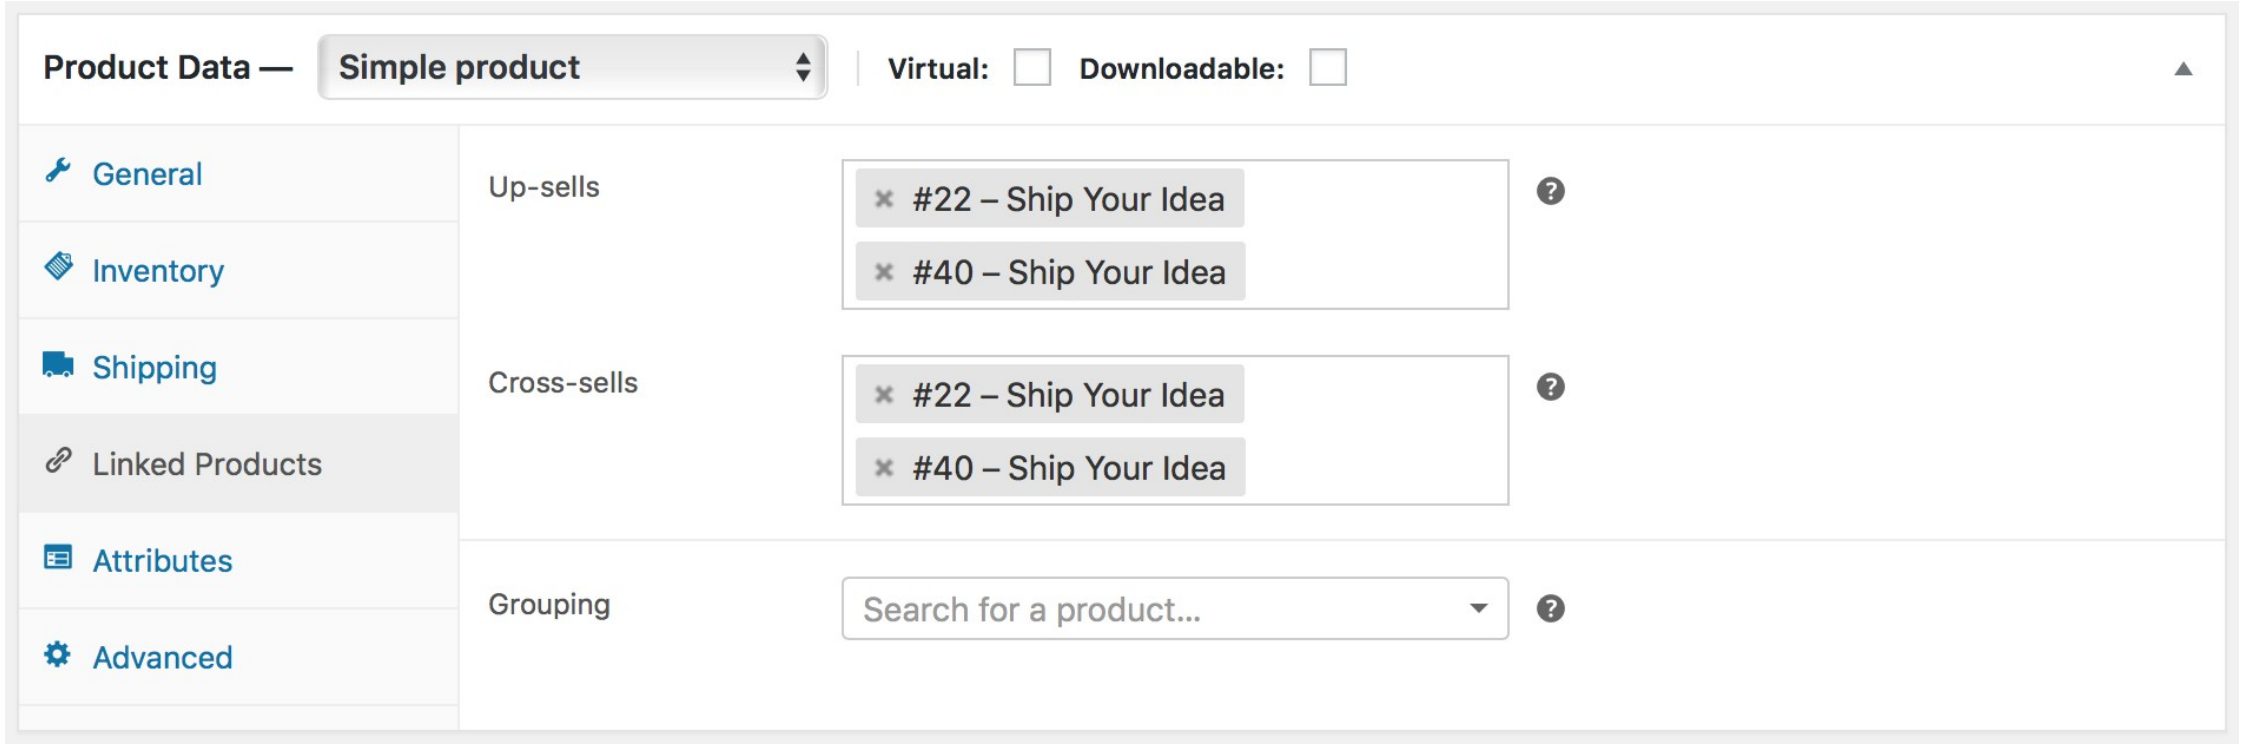

Name	Slug	Order by	Terms
color	color	Custom ordering	Black, Blue, Green Configure terms
Numbers	numbers	Name (numeric)	– Configure terms

Products > Attributes — add a name, slug, archives option and default sort order.

© 2026 Tertiary Infotech Academy Pte Ltd

Linked Products

Product data > Linked Products — search for the product you want to link.

© 2026 Tertiary Infotech Academy Pte Ltd

Up-Sells, Cross-Sells and Related Products

Up-sells

- Shown on the PRODUCT page
- Recommended INSTEAD of this item
- Typically higher value or quality
- You choose them

Cross-sells

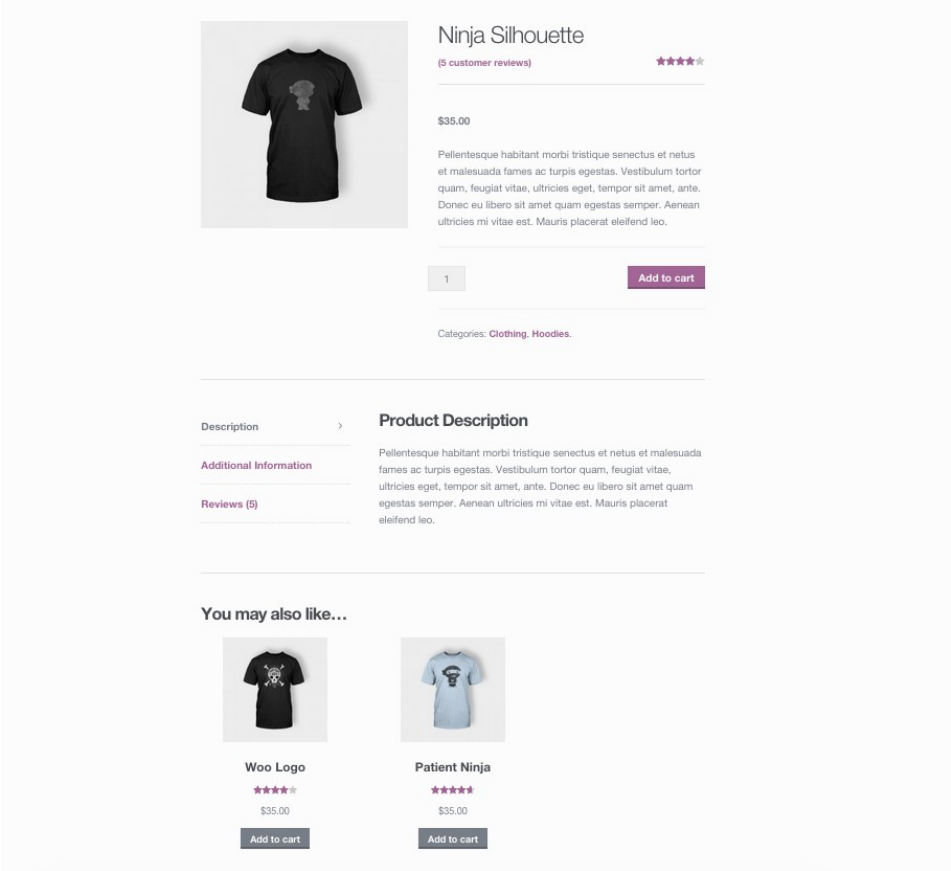

- Shown in the CART
- Complementary to what's being bought
- e.g. a case with a laptop
- You choose them

Related products

- Shown on the PRODUCT page
- Chosen AUTOMATICALLY
- Shares categories or tags
- Influenced by how you categorise

© 2026 Tertiary Infotech Academy Pte Ltd

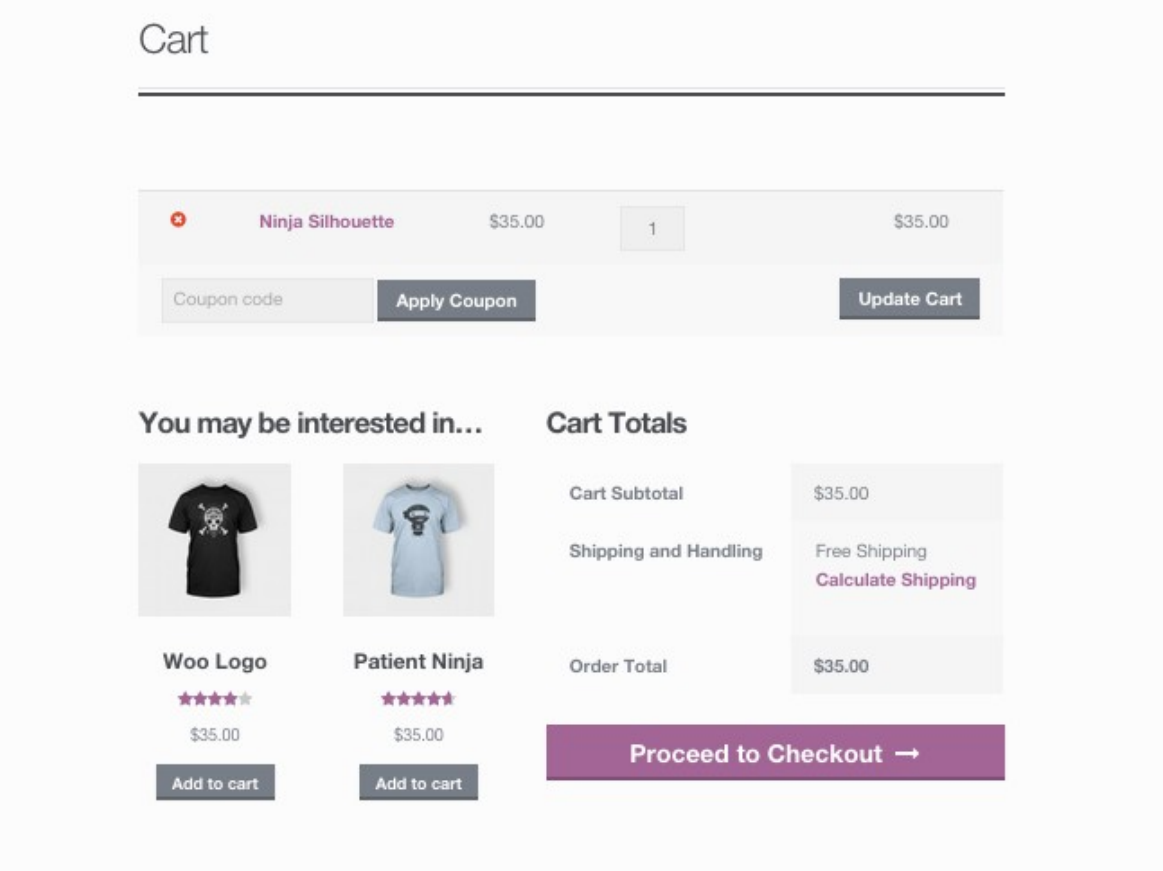

Up-Sells on the Product Page

Up-sells display beneath the product description.

© 2026 Tertiary Infotech Academy Pte Ltd

Cross-Sells in the Cart

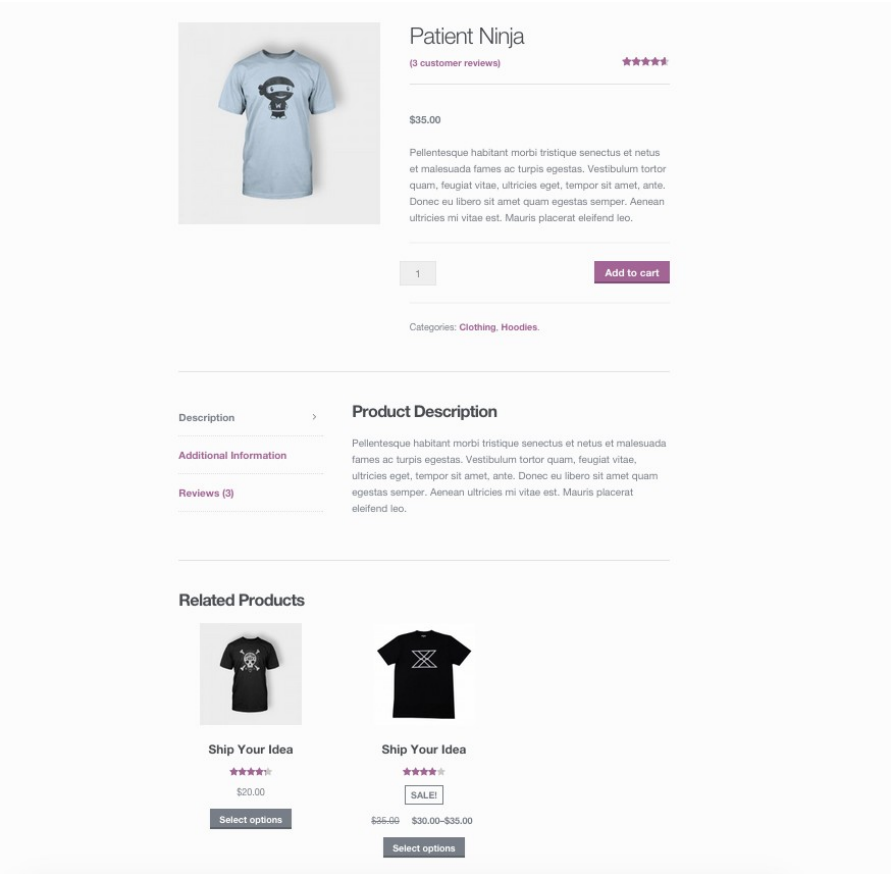

Cross-sells are promoted on the cart page, based on what is already in it.

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 02 · RELATED

Related Products

Automatic — pulled from products sharing the same categories or tags.

© 2026 Tertiary Infotech Academy Pte Ltd

Product CSV Importer and Exporter

1

Built in

Included since WooCommerce 3.1 — no plugin required.

2

Every product type

Supports simple, grouped, external and variable products, including variations.

3

For new stores

Export a template, fill it in, and launch a whole catalogue in one pass.

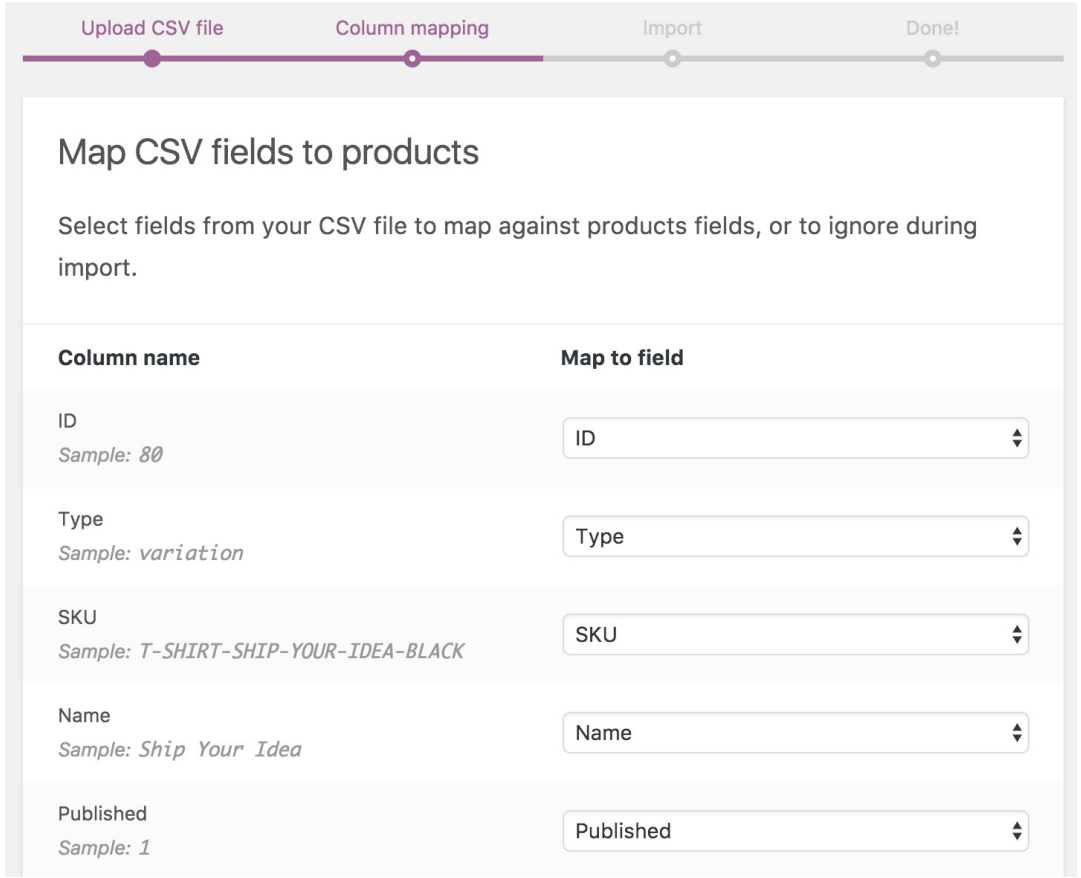

4

For existing stores

Update hundreds of products, run a sale, or sync multiple storefronts.

© 2026 Tertiary Infotech Academy Pte Ltd

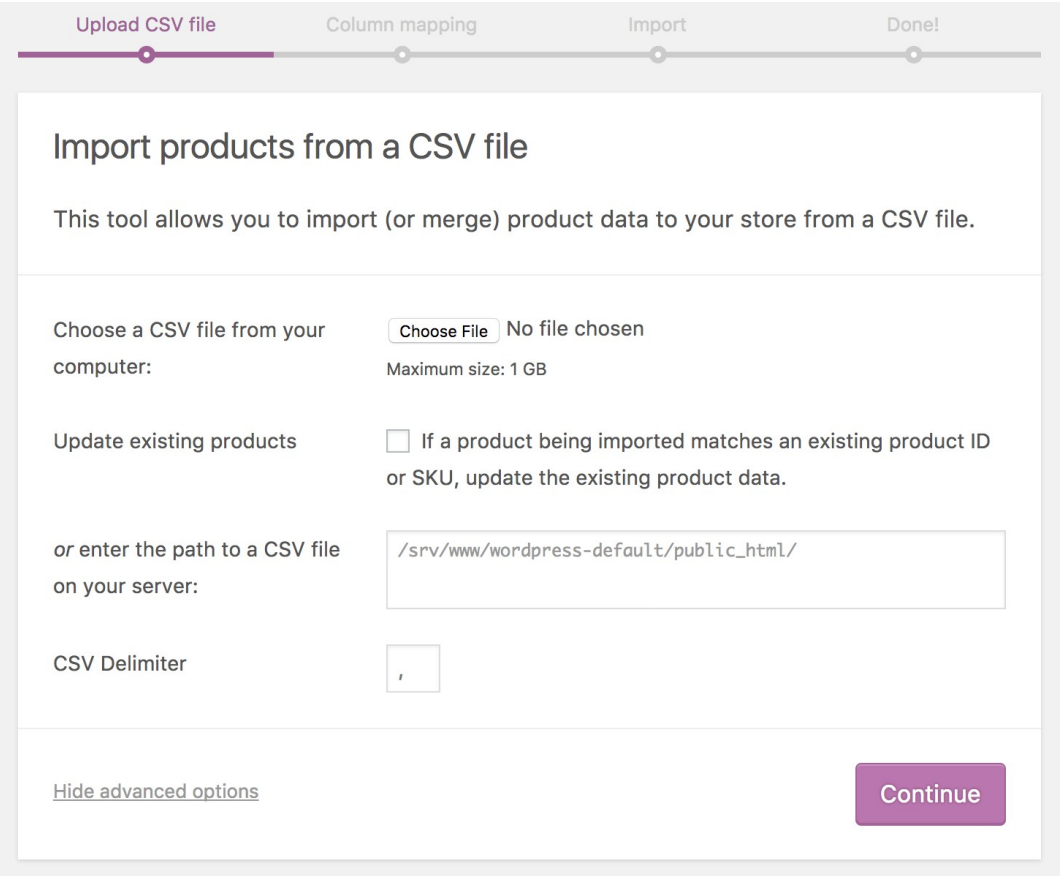

Importing Products

Products > Import > choose your CSV > Continue > map columns > Run the importer.

© 2026 Tertiary Infotech Academy Pte Ltd

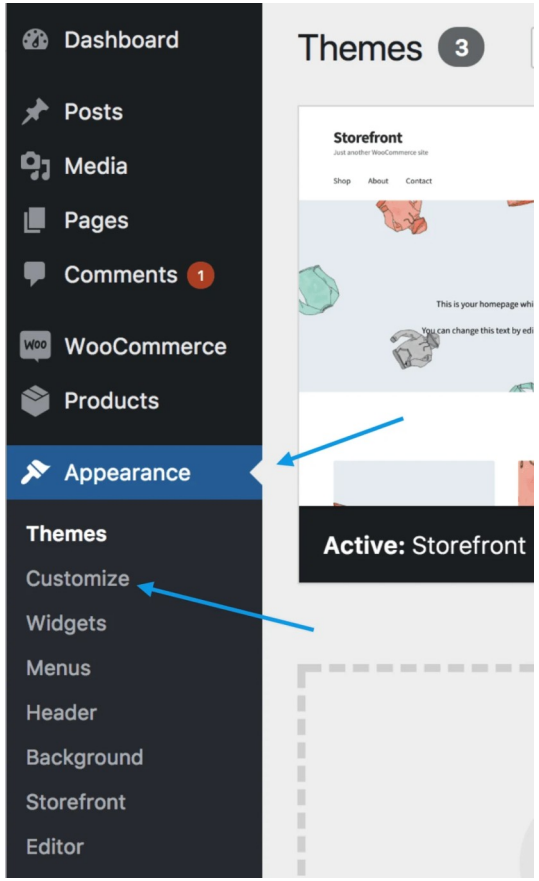

Mapping CSV Columns

WooCommerce proposes a column mapping — review it before running the importer.

© 2026 Tertiary Infotech Academy Pte Ltd

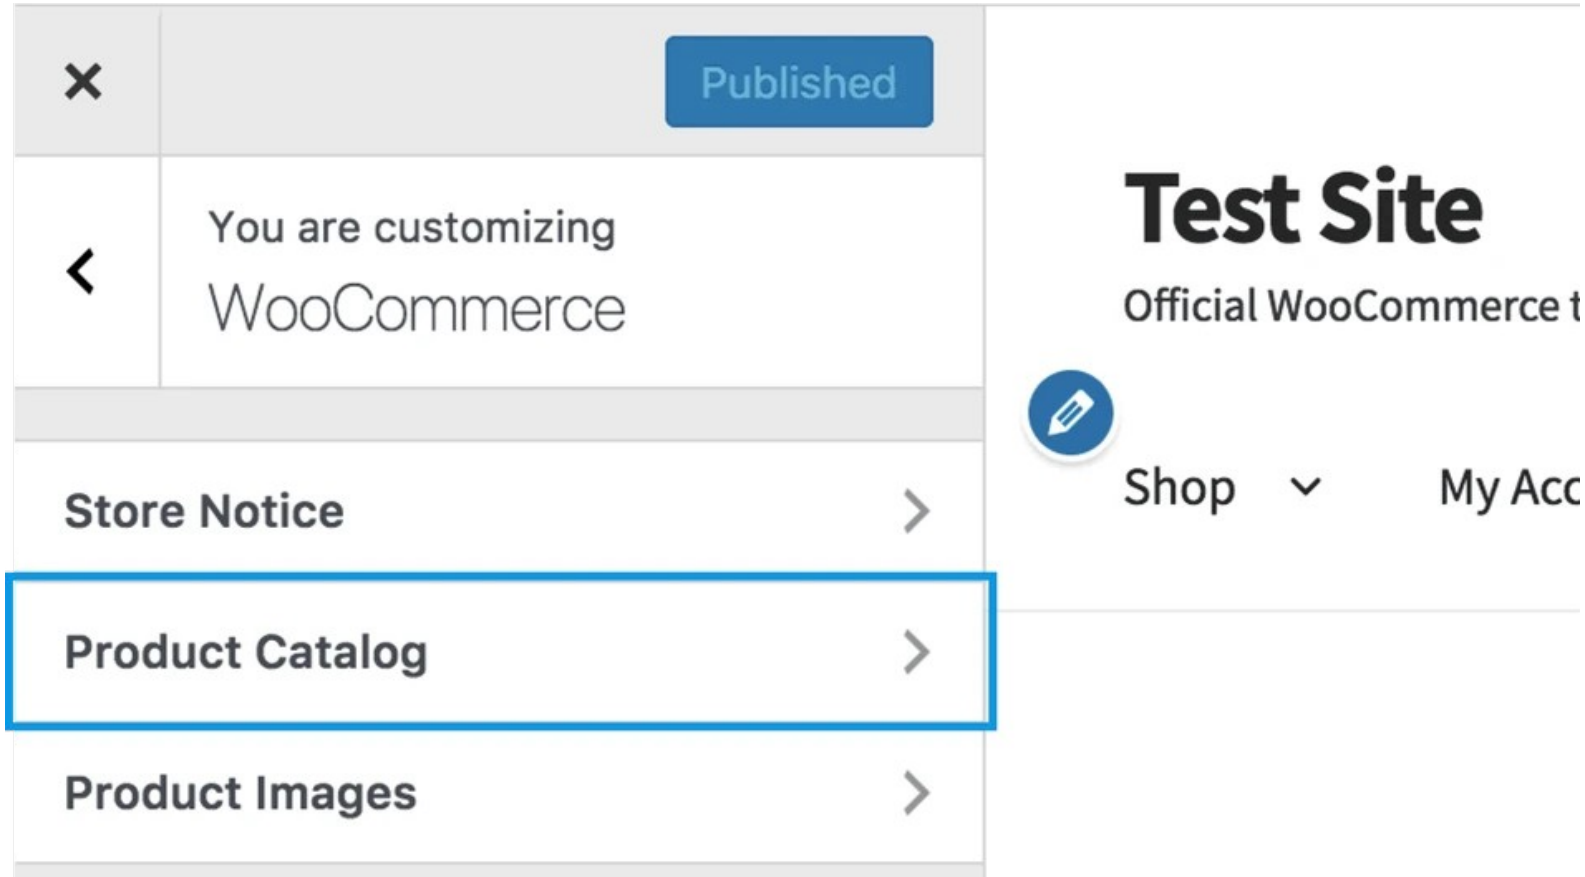

The WooCommerce Customizer

Appearance > Customize > WooCommerce — Store Notice, Product Catalog and Product Images.

© 2026 Tertiary Infotech Academy Pte Ltd

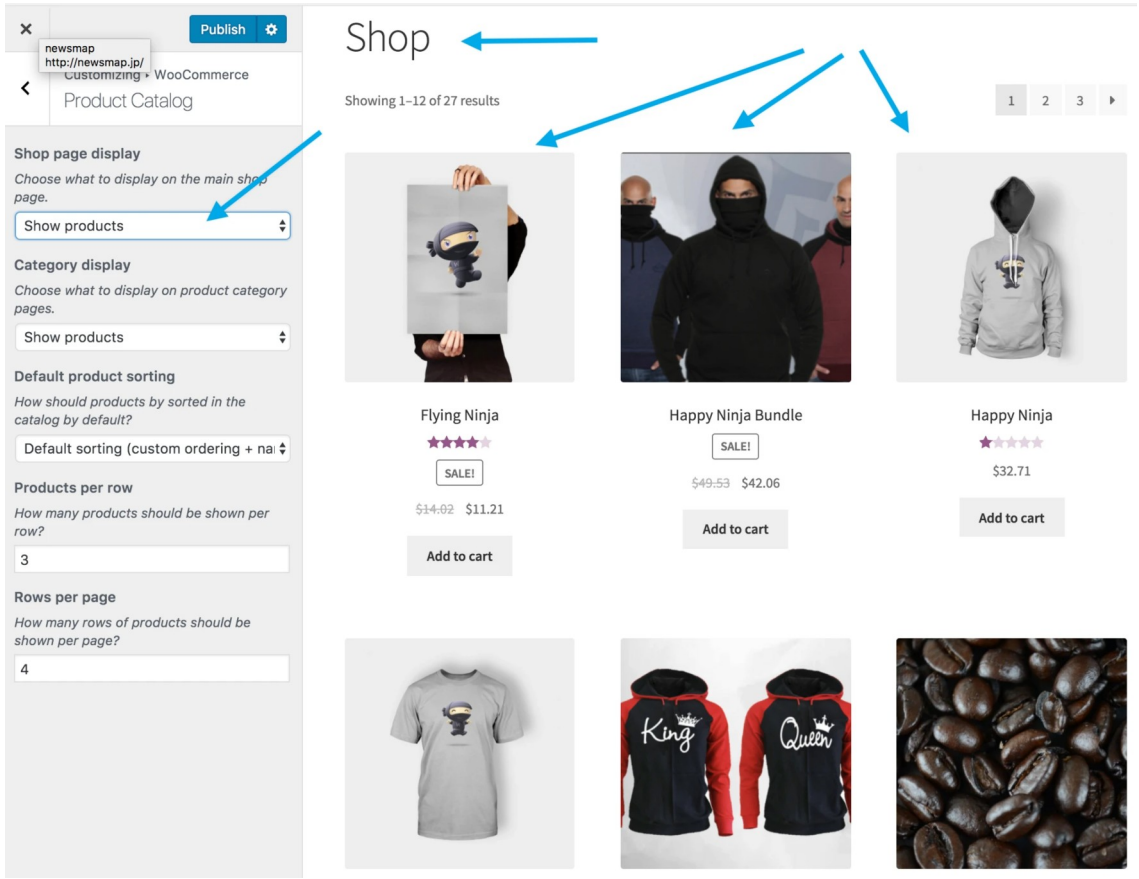

Product Catalog Options

Appearance > Customize > WooCommerce > Product Catalog.

© 2026 Tertiary Infotech Academy Pte Ltd

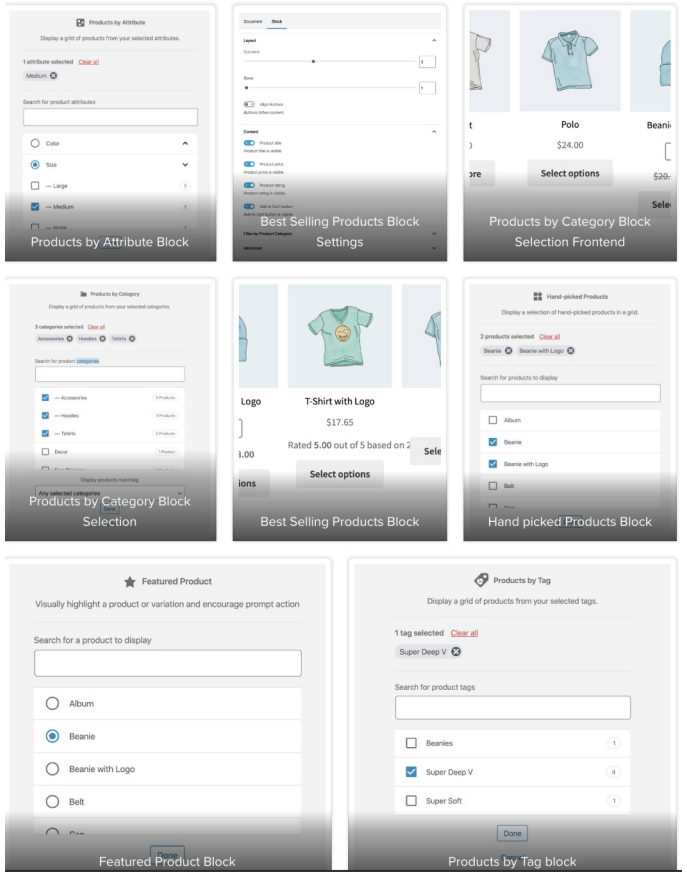

The Shop Page

Display Products, Categories, or both — one choice gives the cleanest look.

© 2026 Tertiary Infotech Academy Pte Ltd

WooCommerce Blocks

Product blocks for any post or page — by tag, category, attribute, best selling, on sale and more.

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 02 · HANDS-ON LAB

Curate the Catalogue — Linked Products and CSV Import

LAB 4

Ensure smooth maintenance and consistent bulk updates of the product catalogue.

Grow and maintain the catalogue efficiently. You organise categories and global attributes, link products together as up-sells and cross-sells to raise order value, then import a batch of products from a CSV file and export the catalogue for bulk editing.

YOU'LL BUILD

A curated catalogue with categories, attributes, up-sells, cross-sells and CSV-imported products

WHY THE BUSINESS CARES

Editing products one at a time does not scale. Bulk import and export is how a real store launches a catalogue, runs a seasonal price change, or syncs with a supplier feed.

TOOLS Products > Categories · Products > Attributes · Linked Products tab · Product CSV Importer/Exporter

© 2026 Tertiary Infotech Academy Pte Ltd

03

TOPIC 3

Manage Payments and Shipping

Online & offline payment methods · Gateways · Shipping zones · Flat rate, free shipping & local pickup

© 2026 Tertiary Infotech Academy Pte Ltd

Key Concepts in This Topic

1

Payment methods

Online gateways such as Stripe and PayPal, plus offline options like bank transfer, cheque and cash on delivery.

2

Choosing a gateway

Location, fees, supported currencies and whether the customer stays on your site all shape the decision.

3

Shipping zones

A zone is a geographic region; each zone carries its own shipping methods and rates.

4

Flat rate shipping

A standard cost per order, per item or per shipping class, defined inside a shipping zone.

5

Free shipping

A powerful incentive — commonly gated behind a minimum order amount or a valid coupon.

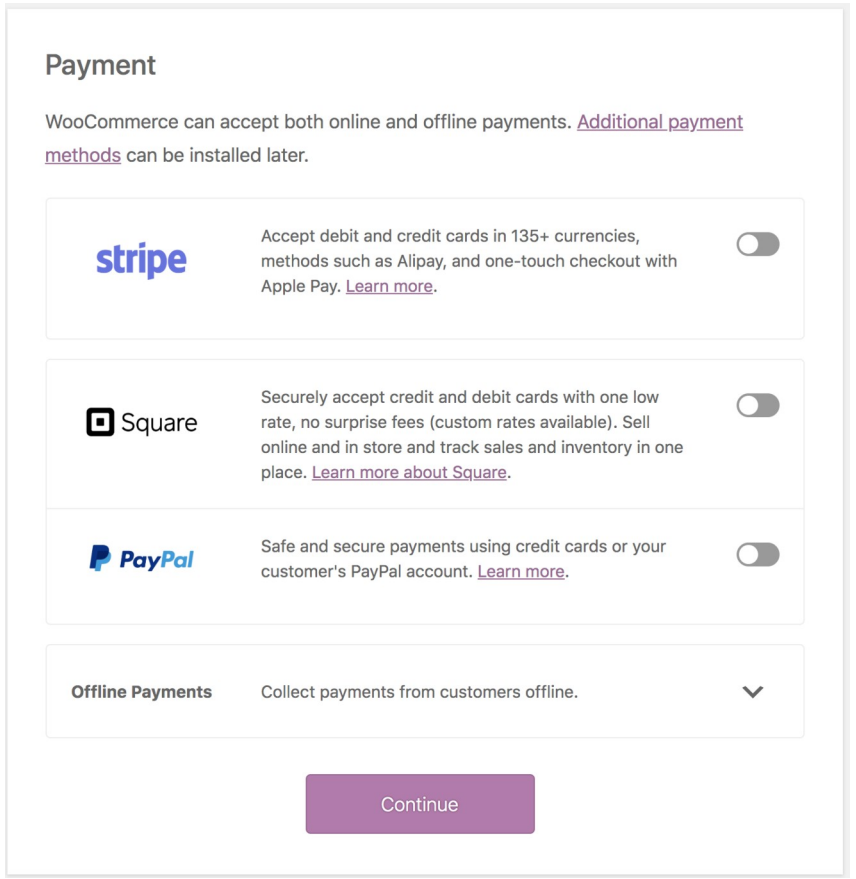

6

Local pickup

Lets the customer collect the order themselves, with optional cost and tax status.

© 2026 Tertiary Infotech Academy Pte Ltd

Online Payment Methods

Card and wallet gateways that take payment at checkout.

© 2026 Tertiary Infotech Academy Pte Ltd

Choosing a Payment Gateway

1

Stripe

Supports 25+ countries and recurring payments; the customer stays on your site.

2

PayPal

Active in 200+ countries, with PayPal Credit available for US stores.

3

Square

Suits merchants who also sell in person, in a physical store.

4

eWAY

Takes card payments directly on your store without redirecting the customer.

5

Klarna

Buy-now-pay-later across Europe, the UK and the US.

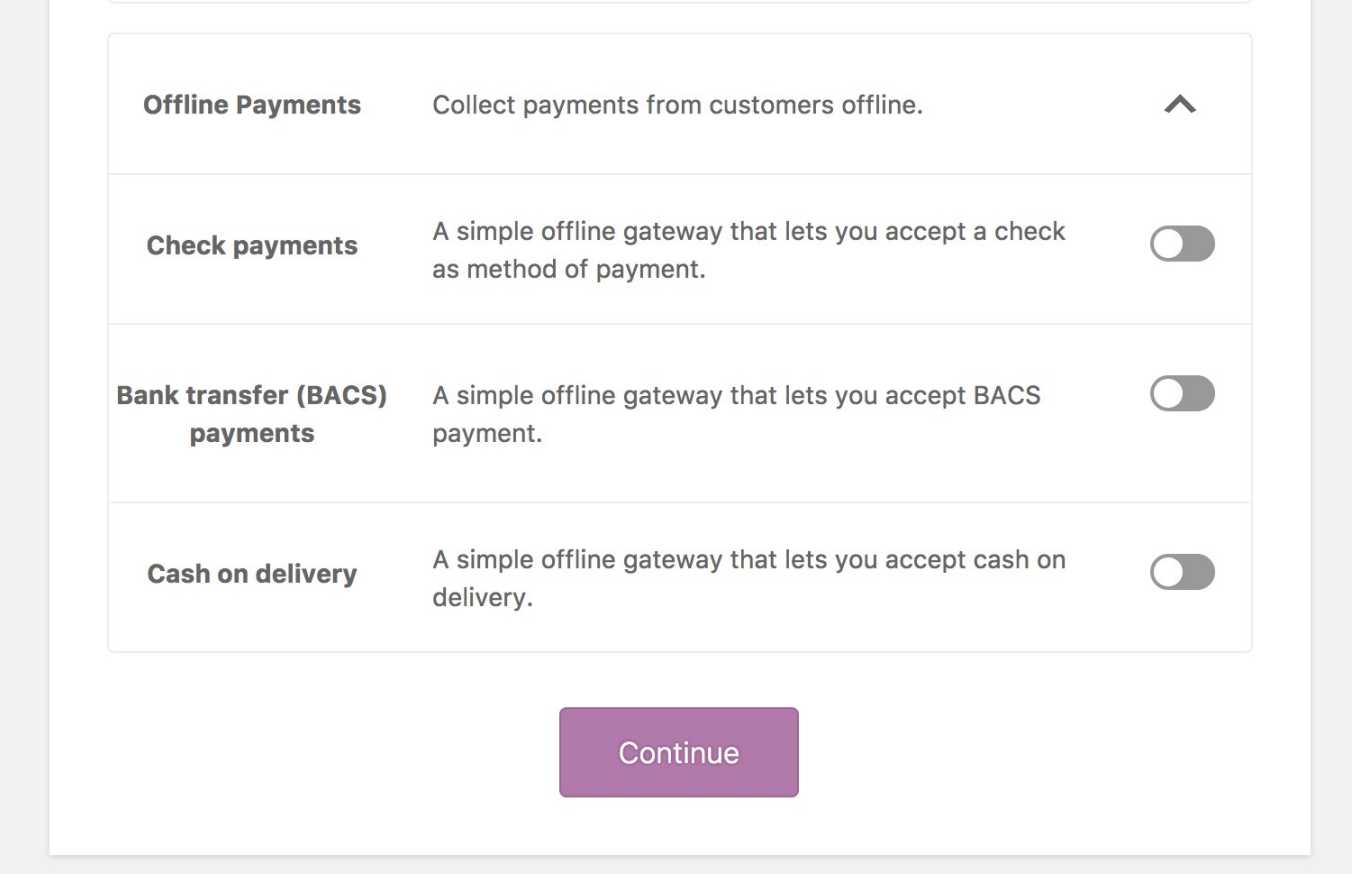

6

Payfast

A popular South African gateway for card and EFT, with no monthly cost.

© 2026 Tertiary Infotech Academy Pte Ltd

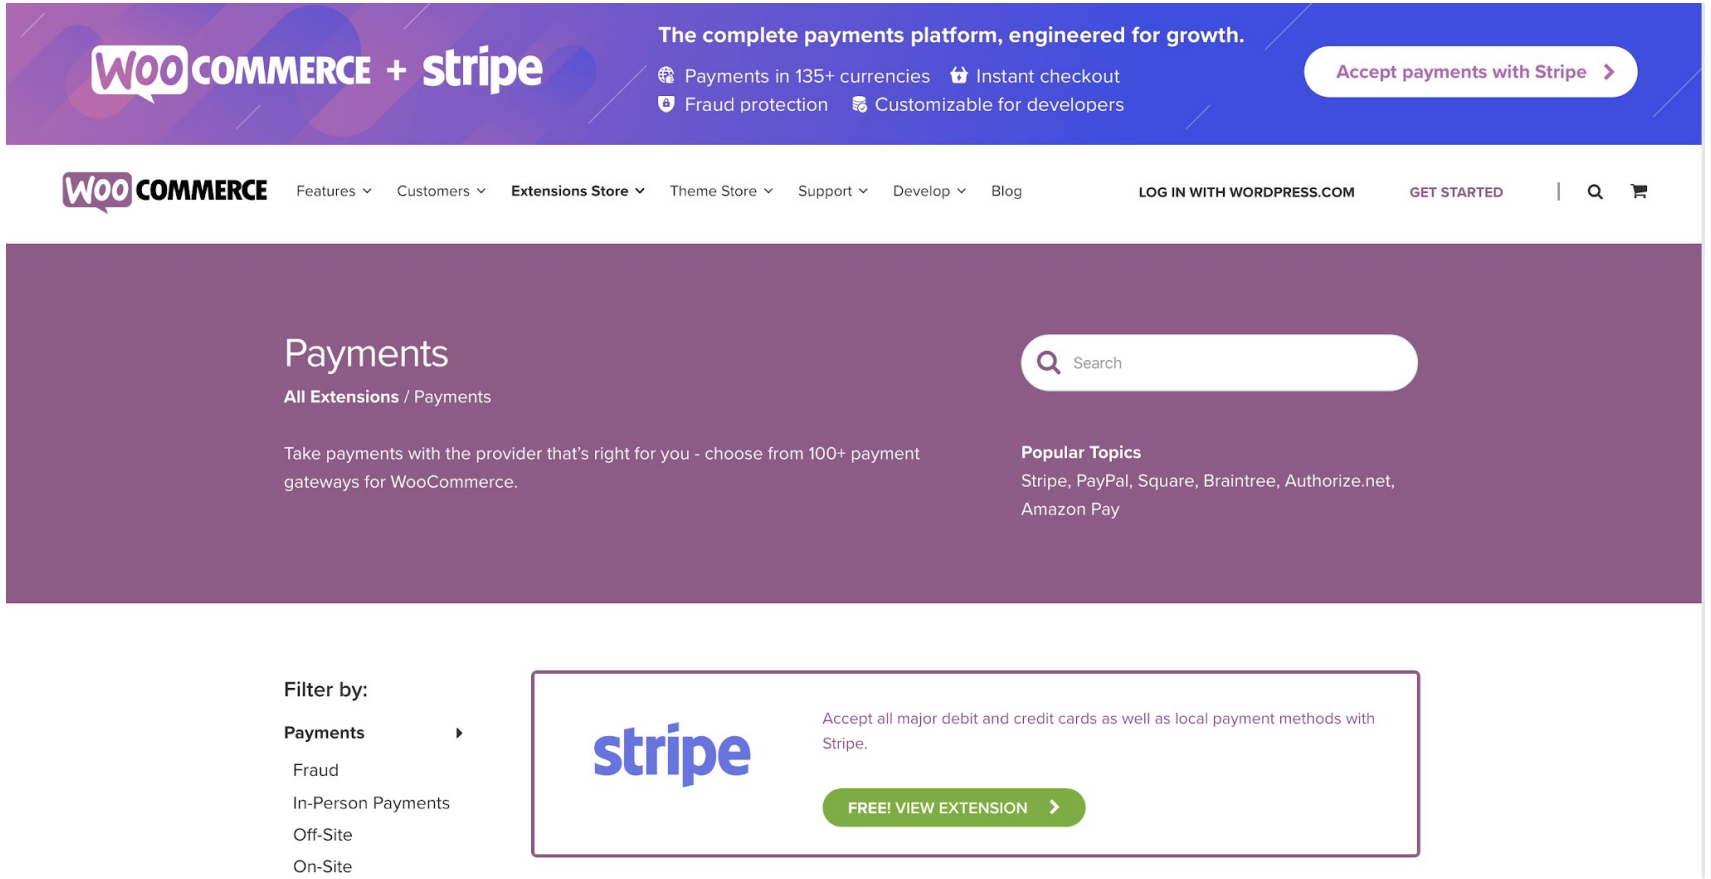

Offline Payment Methods

Direct bank transfer, cheque and cash on delivery — the order is held until you confirm payment.

© 2026 Tertiary Infotech Academy Pte Ltd

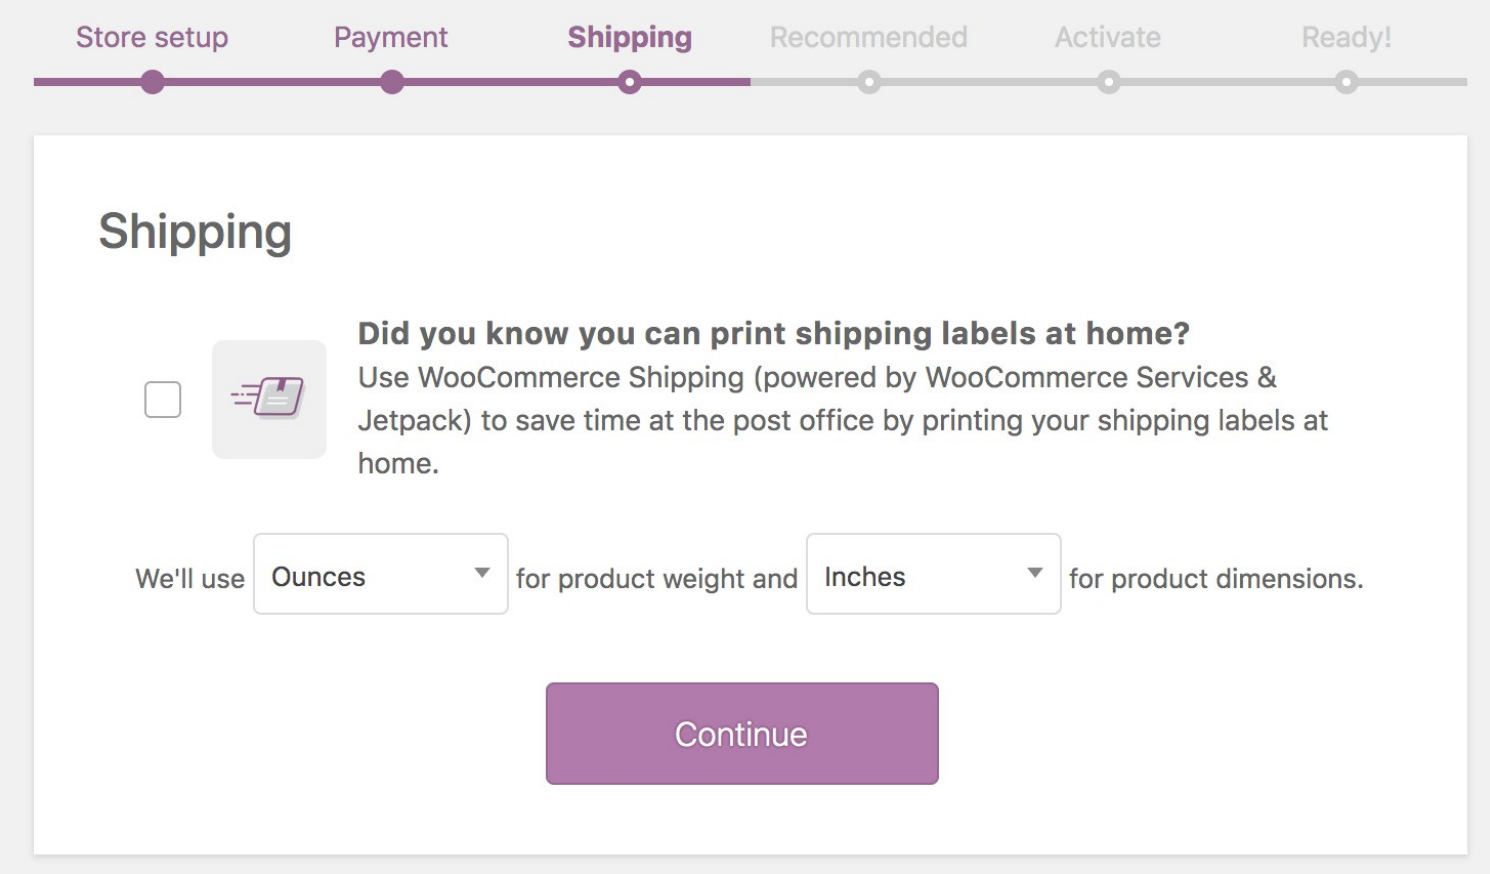

Additional Payment Gateways

https://woocommerce.com/product-category/woocommerce-extensions/payment-gateways

© 2026 Tertiary Infotech Academy Pte Ltd

Shipping Options

Set the unit of measurement for weight and dimensions before configuring rates.

© 2026 Tertiary Infotech Academy Pte Ltd

How Shipping Is Structured

1

SHIPPING ZONE
A geographic region

2

SHIPPING METHOD
Flat rate, free, pickup

3

METHOD SETTINGS
Title, tax status, cost

4

SHIPPING CLASS
Optional per-product rate

5

CHECKOUT
Customer picks an option

© 2026 Tertiary Infotech Academy Pte Ltd

Core Shipping Options

1

Flat rate

A standard cost per order, per item or per shipping class.

2

Free shipping

Optionally gated behind a minimum order amount or a valid coupon.

3

Local pickup

The customer collects the order themselves, with optional cost.

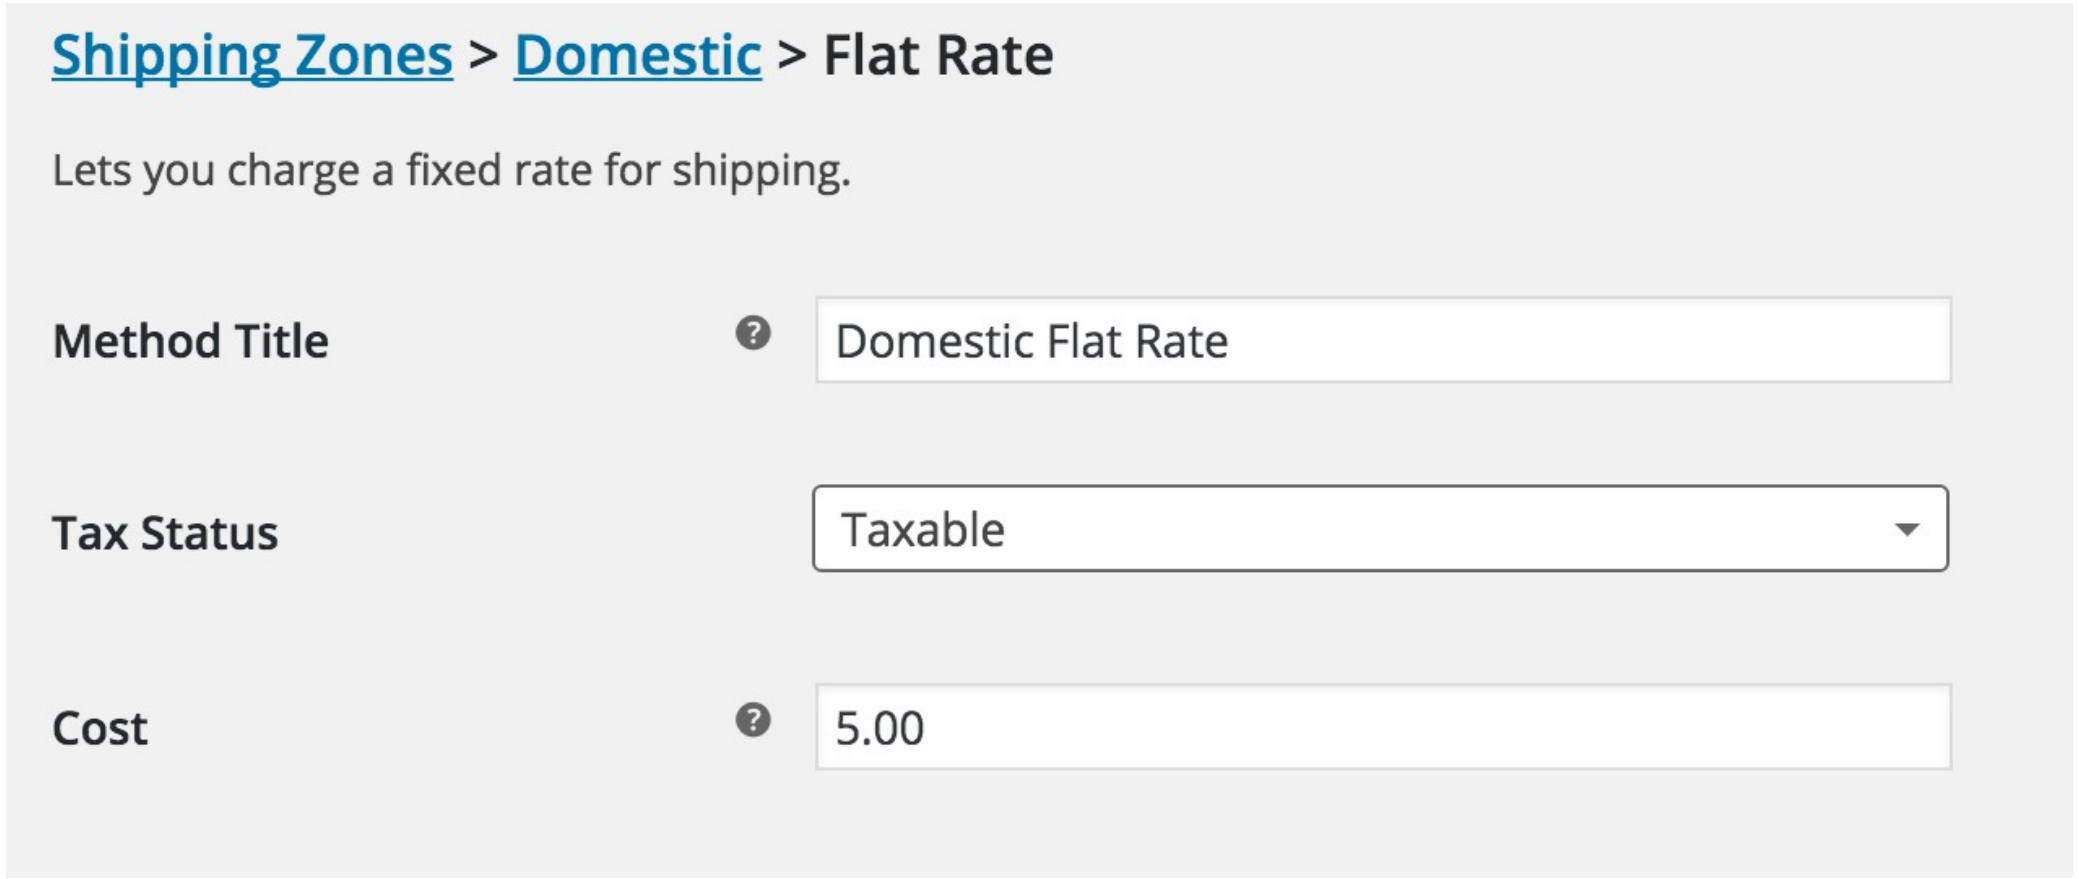

4

Shipping classes

Group products that cost more to ship — bulky, fragile or heavy items.

© 2026 Tertiary Infotech Academy Pte Ltd

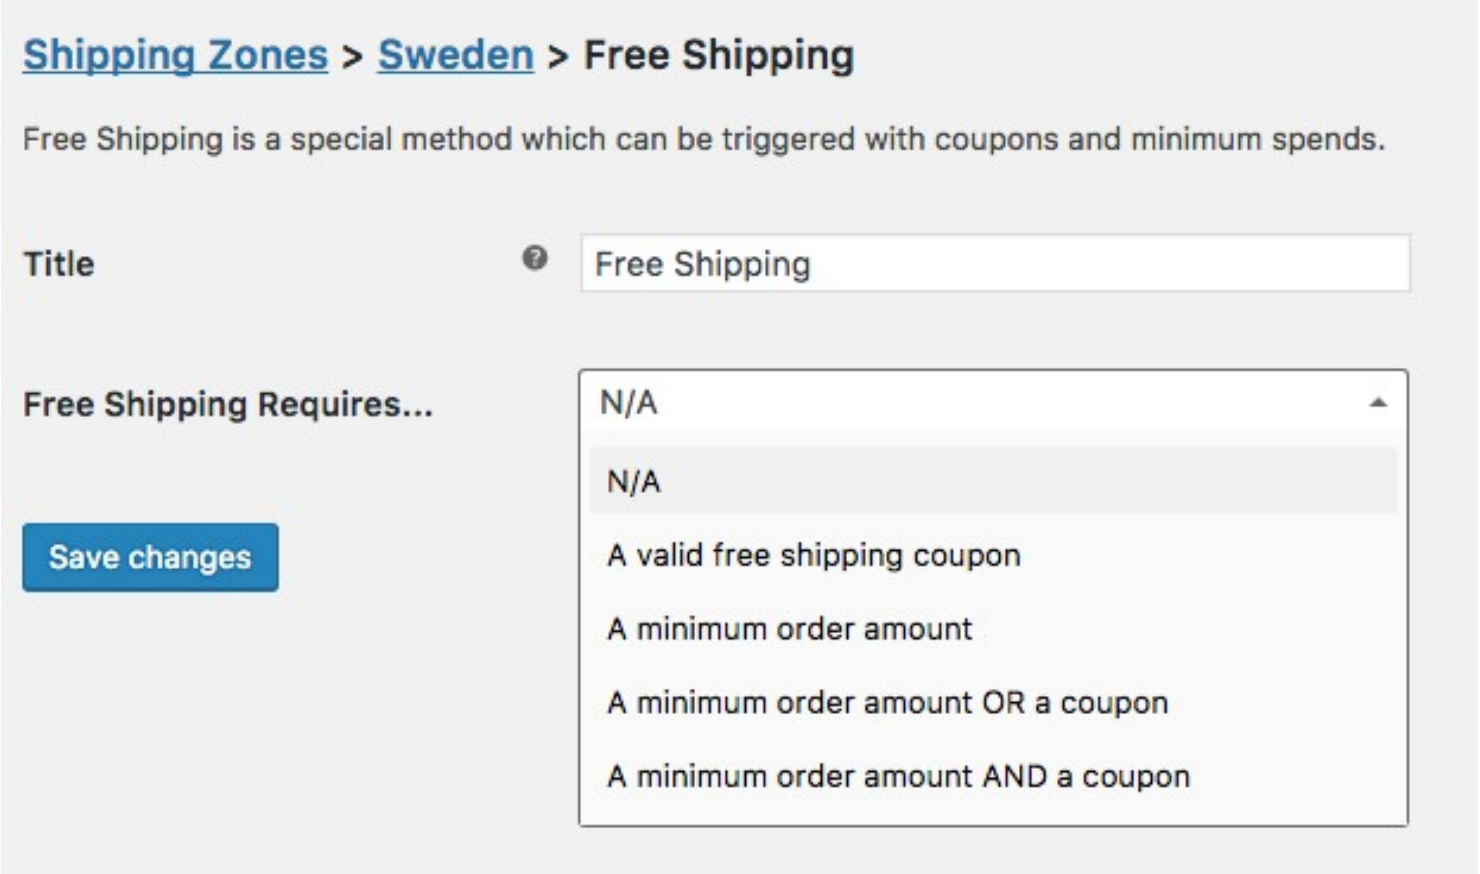

Flat Rate Shipping

Added to a shipping zone, with a title, tax status and cost applied to the cart.

© 2026 Tertiary Infotech Academy Pte Ltd

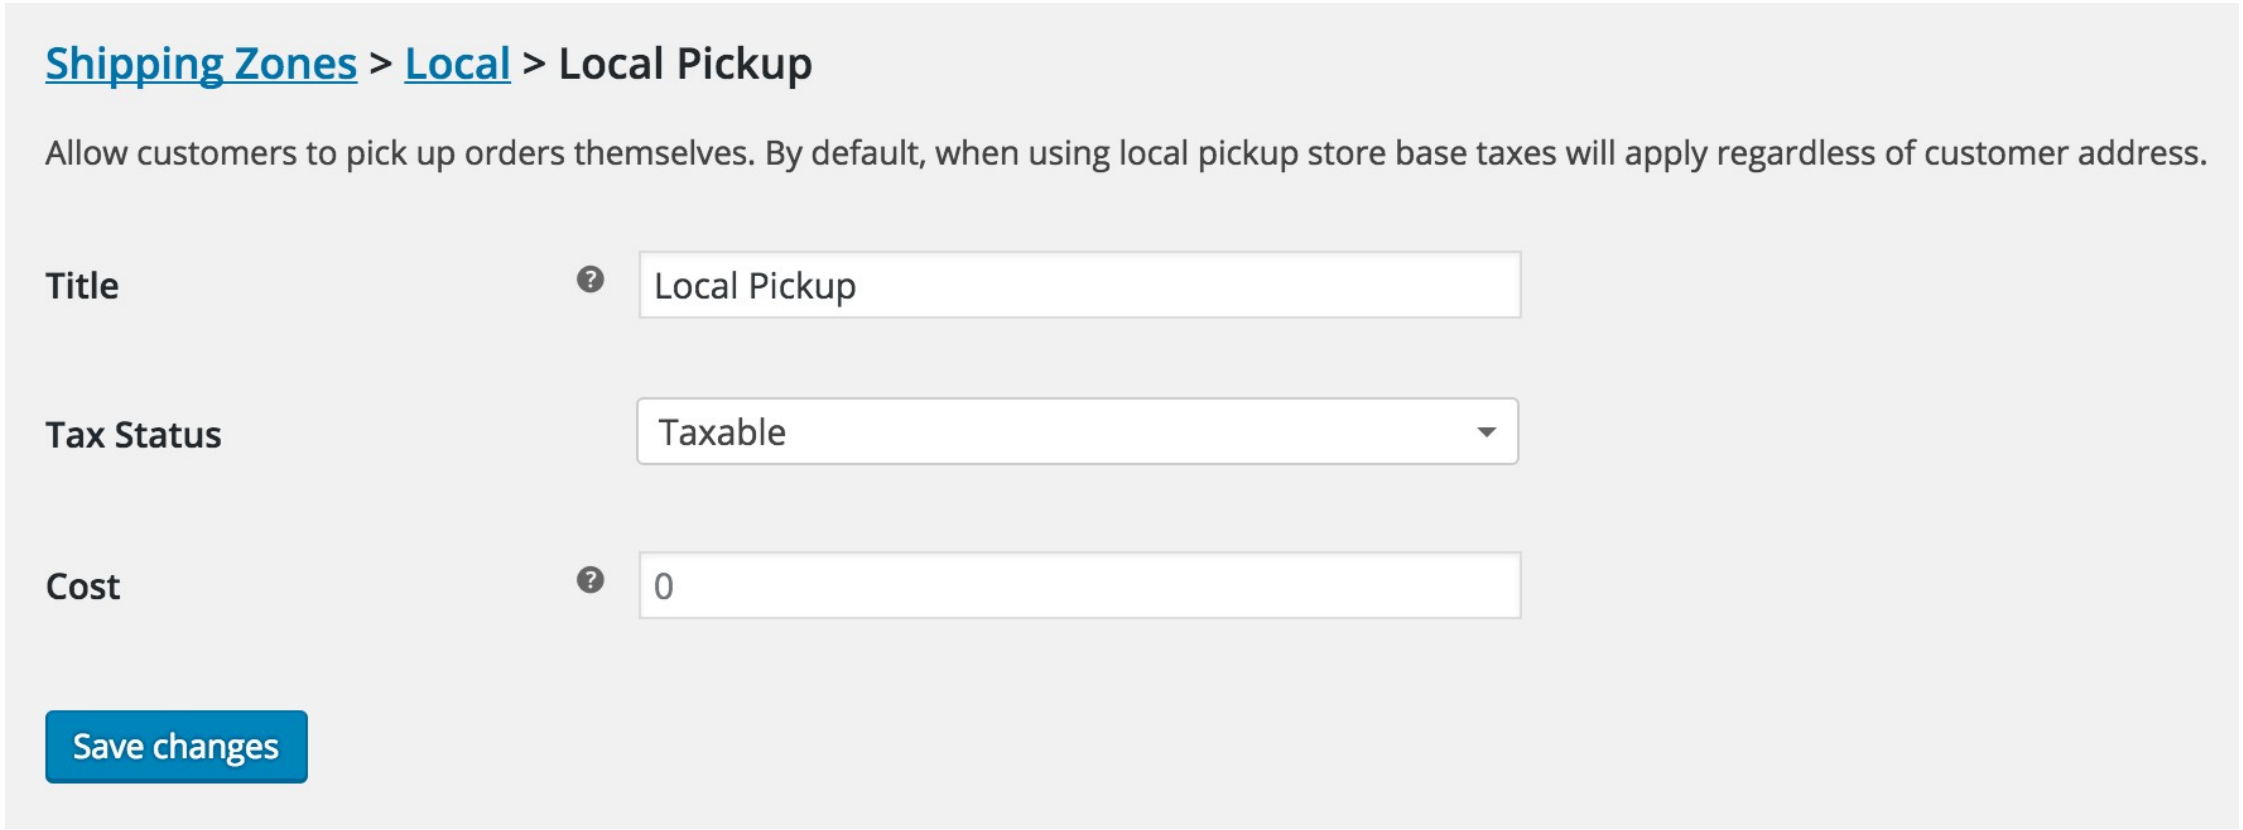

Free Shipping

'Free shipping requires…' — commonly a minimum order amount, to lift average order value.

© 2026 Tertiary Infotech Academy Pte Ltd

Local Pickup

Let customers collect the order — some stores retitle this 'Collect in store'.

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 03 · HANDS-ON LAB

Configure Payment Methods and Shipping Zones

LAB 5

Recommend and configure payment and shipping methods that improve customer experience.

Make the store able to take money and deliver goods. You enable offline and online payment methods, then build a shipping zone for your country and add flat rate, free shipping and local pickup to it — finishing with a test checkout that proves the whole path works.

YOU'LL BUILD

A store that accepts payment and offers three shipping options, verified by a test checkout

WHY THE BUSINESS CARES

Payment and shipping are where carts are abandoned. Every method you offer, and every rate you set, is a direct customer-experience decision with a measurable effect on conversion.

TOOLS WooCommerce > Settings > Payments · Settings > Shipping · Shipping zones · Shipping classes

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 03 · DISCUSSION

Discussion — Recommend Payment and Shipping for Customer Experience

DISCUSSION · 15 MIN

Working from the store you have built, recommend the payment and shipping mix that would give your customers the best experience — and justify the trade-offs.

1. Which payment methods do your customers expect, and what does each one cost you?
2. Does the customer stay on your site, or get redirected? Why does that matter for conversion?
3. Would free shipping above a threshold raise your average order value or erode your margin?
4. Which shipping zones do you actually serve, and what happens to orders outside them?

YOUR OUTPUT A recommended payment and shipping configuration with the customer-experience reason for each choice.

© 2026 Tertiary Infotech Academy Pte Ltd

04

TOPIC 4

Manage Sales on WooCommerce Store

Orders & order statuses · Editing single orders · Refunds & restocking · Coupons and promotions

© 2026 Tertiary Infotech Academy Pte Ltd

Key Concepts in This Topic

1

Orders and statuses

Pending, Processing, Completed, On-Hold, Cancelled, Refunded and Failed track an order's life.

2

Managing orders

View, filter and edit orders; change status, edit line items, add fees and apply coupons.

3

Adding orders manually

Phone and offline sales can be entered by hand and emailed to the customer for payment.

4

Refunds

Refund manually or through the gateway, with the option to restock the returned items.

5

Stock issues

Stock management, low-stock thresholds and out-of-stock handling prevent overselling.

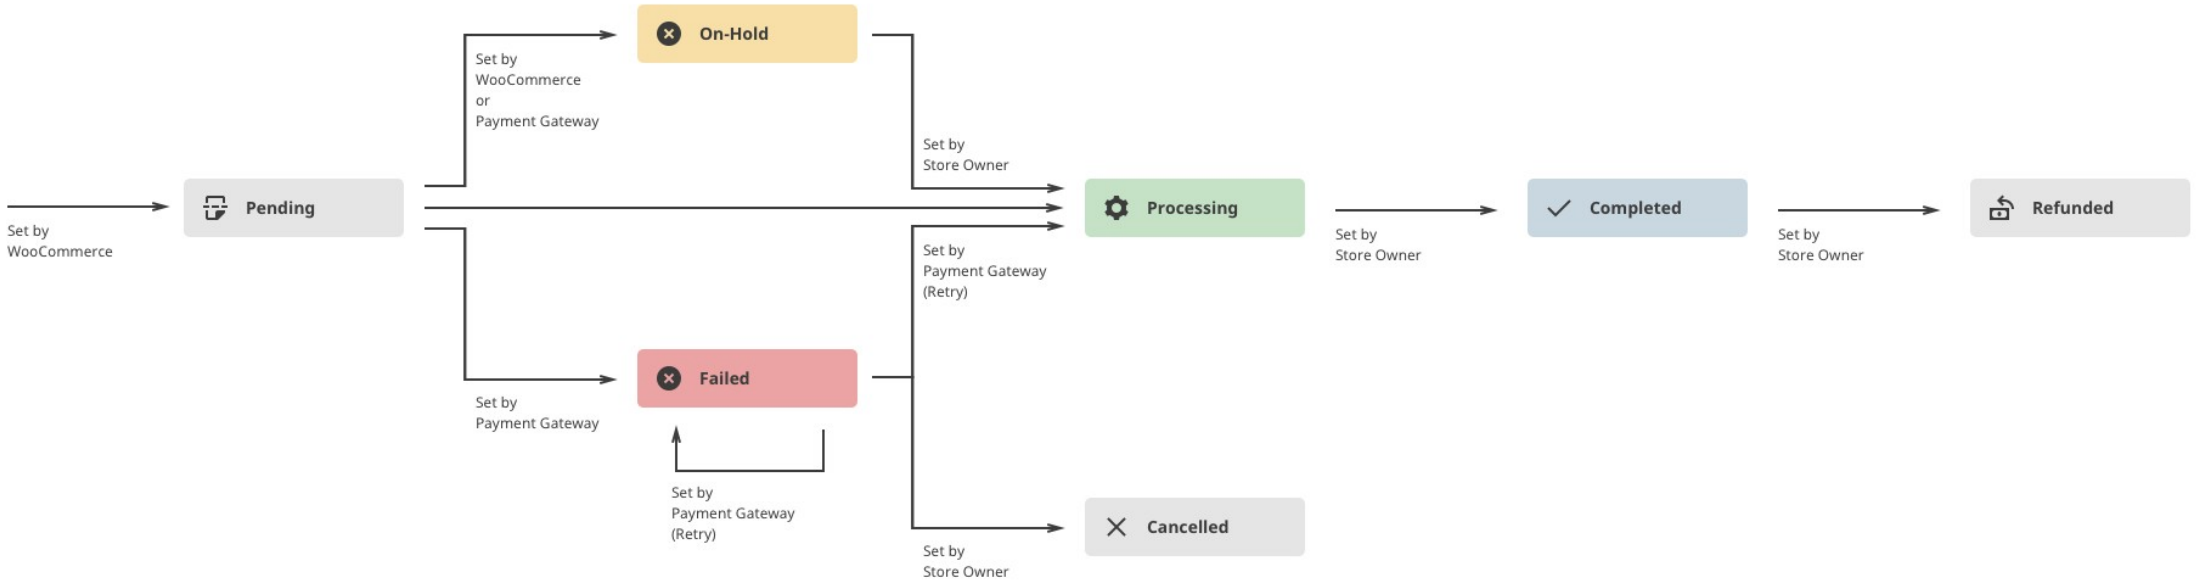

6

Coupons and promotions

Percentage, fixed cart and fixed product discounts, with usage limits and expiry dates.

© 2026 Tertiary Infotech Academy Pte Ltd

Managing Orders

An order is created at checkout, gets a unique ID, and carries a status through its life.

© 2026 Tertiary Infotech Academy Pte Ltd

Order Statuses

1. **Pending payment**
   Order received, no payment initiated — unpaid.

2. **Processing**
   Payment received and stock reduced; awaiting fulfilment.

3. **Completed**
   Order fulfilled — no further action required.

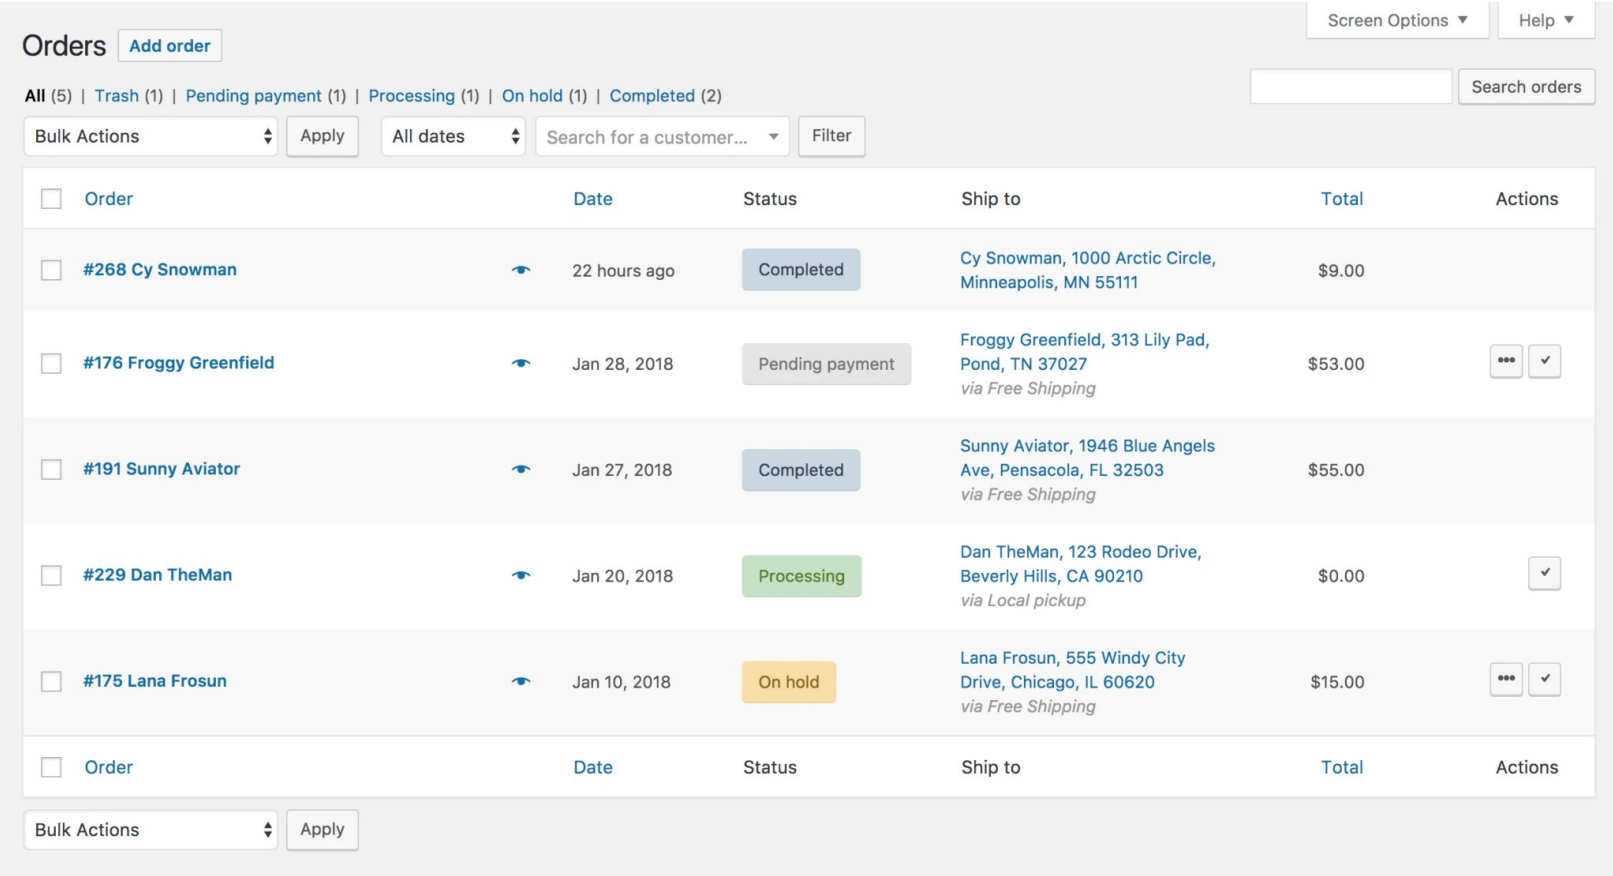

4. **On hold**
   Stock is reduced, but you must confirm payment yourself.

5. **Cancelled**
   Cancelled by admin or customer — stock is increased back.

6. **Refunded / Failed**
   Refunded by an admin, or payment declined or requiring authentication.

© 2026 Tertiary Infotech Academy Pte Ltd

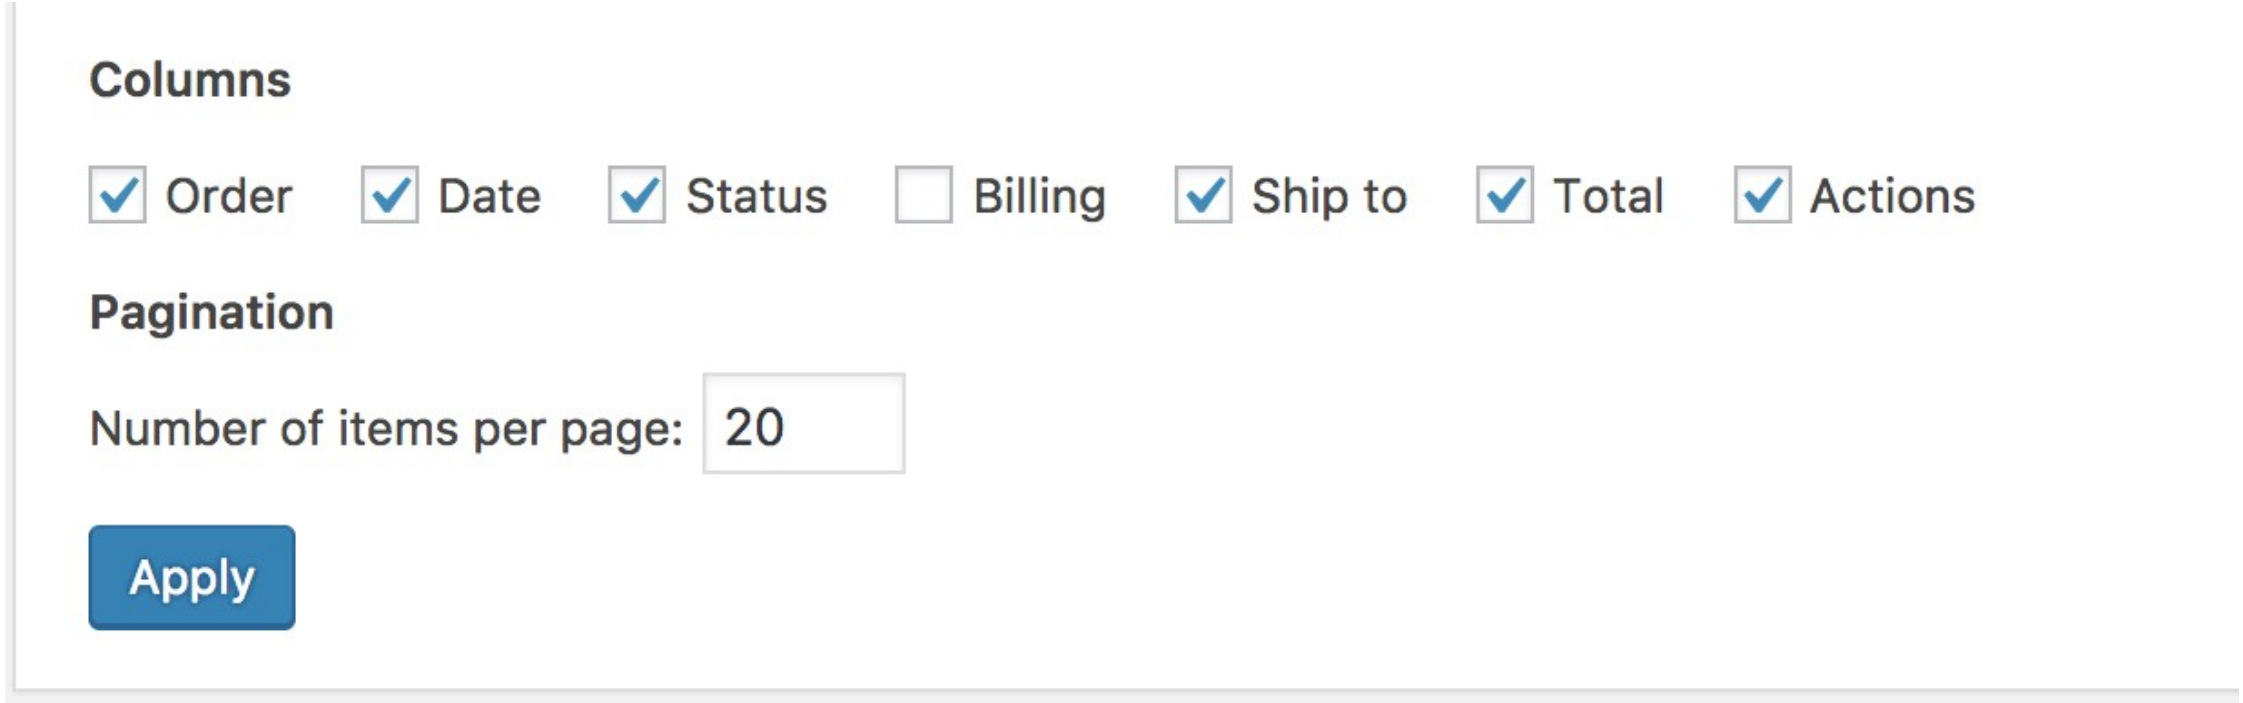

Viewing Orders

WooCommerce > Orders — number, customer, date, status, address and total.

© 2026 Tertiary Infotech Academy Pte Ltd

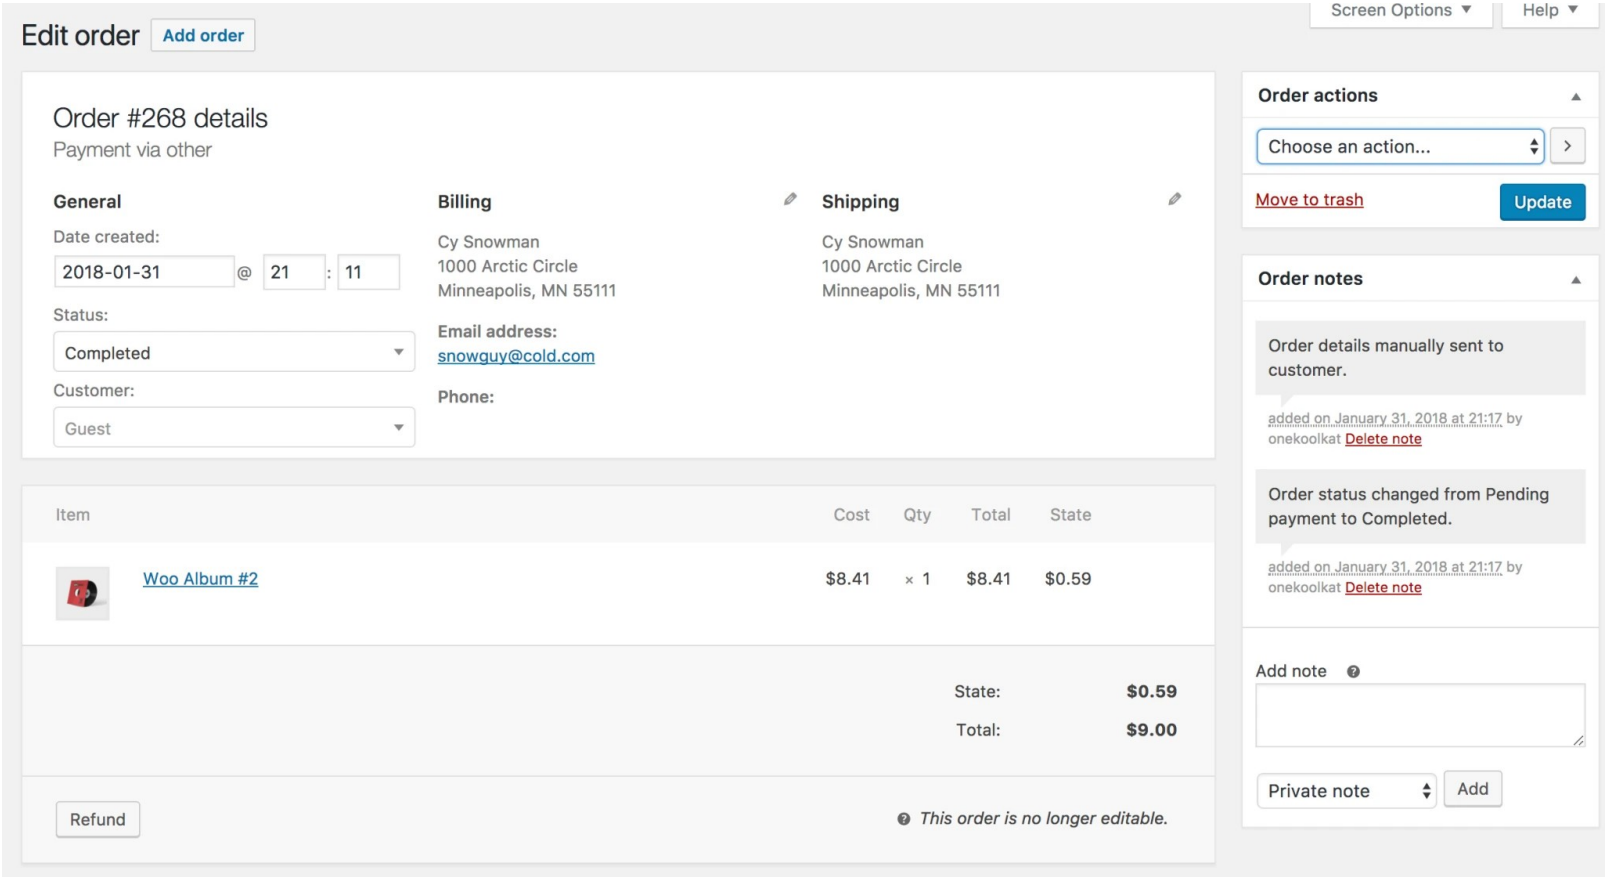

Screen Options and Filtering

Choose columns and rows, filter by date, search customers, and preview with the 'eye'.

© 2026 Tertiary Infotech Academy Pte Ltd

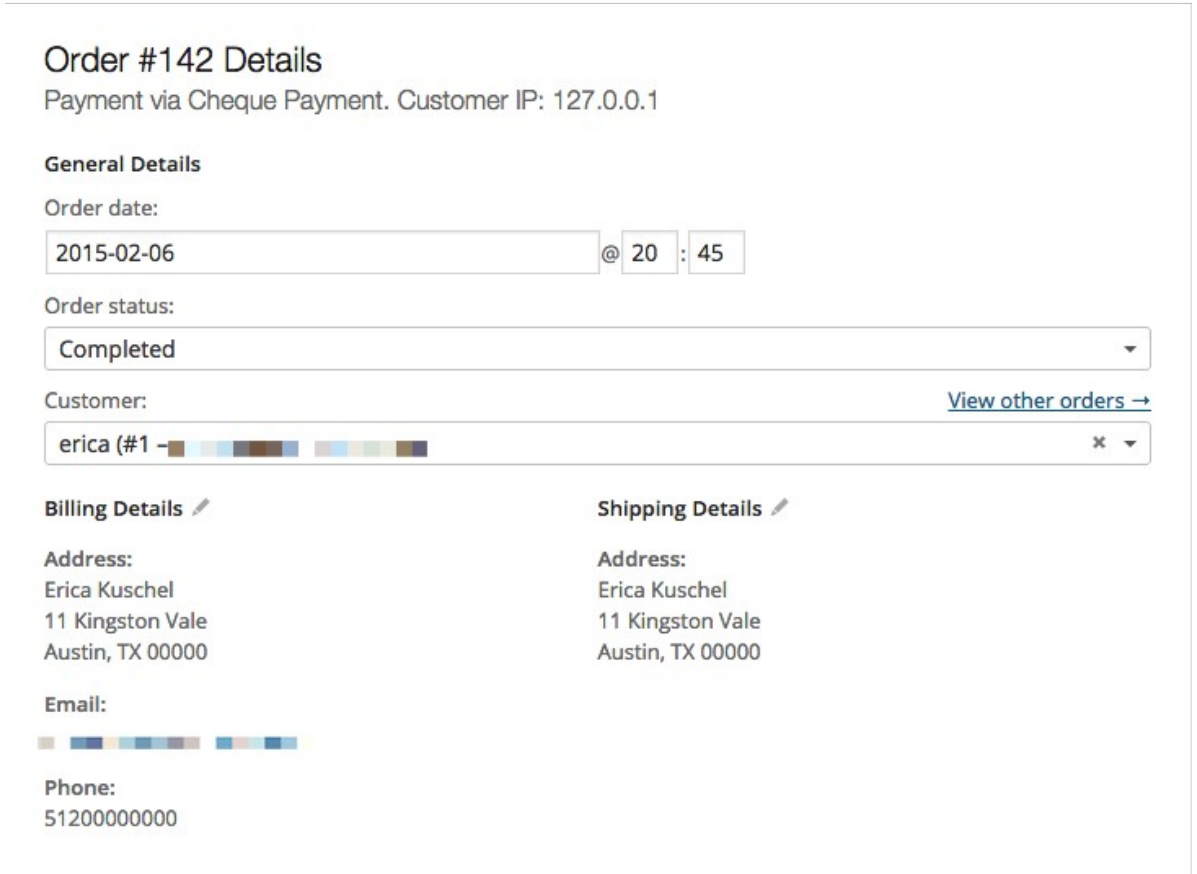

The Single Order Page

View and edit everything — status, line items, taxes, coupons, fees and notes.

© 2026 Tertiary Infotech Academy Pte Ltd

Order Data Panel

Modify the status, the customer note, and which user the order is assigned to.

© 2026 Tertiary Infotech Academy Pte Ltd

Editing a Single Order

1

Change status

Move the order through its lifecycle and trigger the customer emails.

2

Edit order items

Modify products, quantities, prices and taxes on an unpaid order.

3

Stock

Reduce or restore stock for the order directly from Order actions.

4

Apply coupons

Enter a known coupon code — the order must be unpaid for it to take effect.

5

Add a fee

Enter an amount or a percentage; negative fees apportion tax across items.

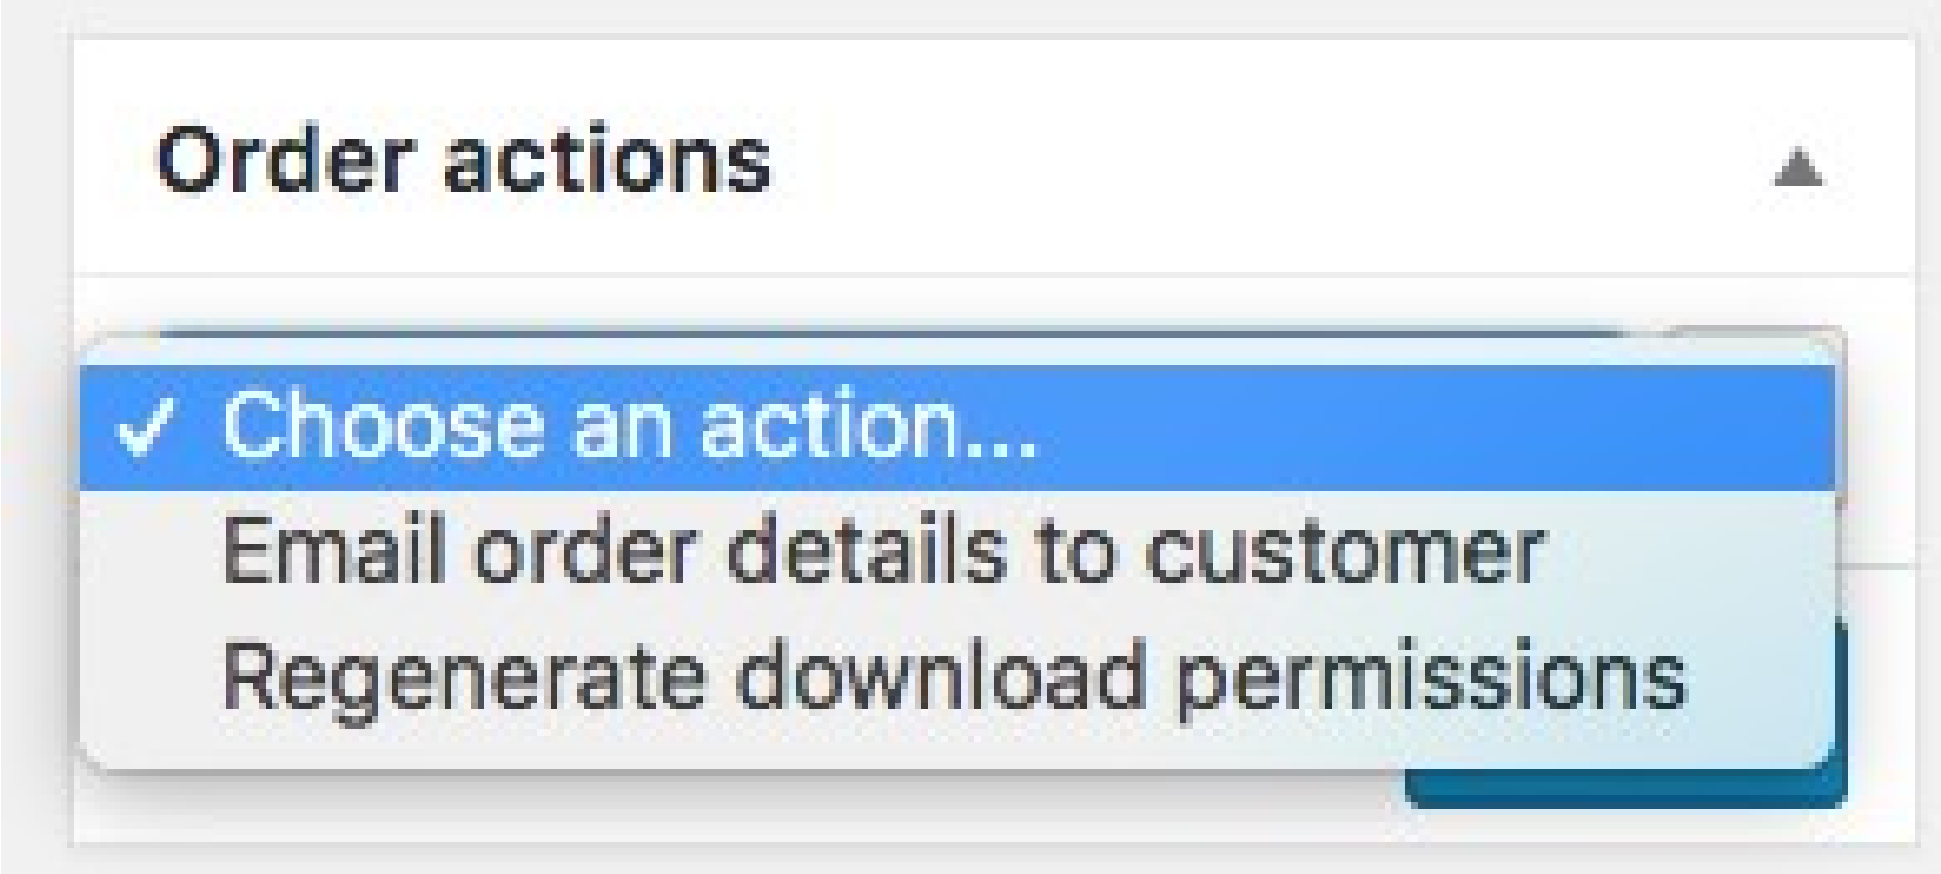

6

Order actions

Email order details to the customer, or regenerate download permissions.

© 2026 Tertiary Infotech Academy Pte Ltd

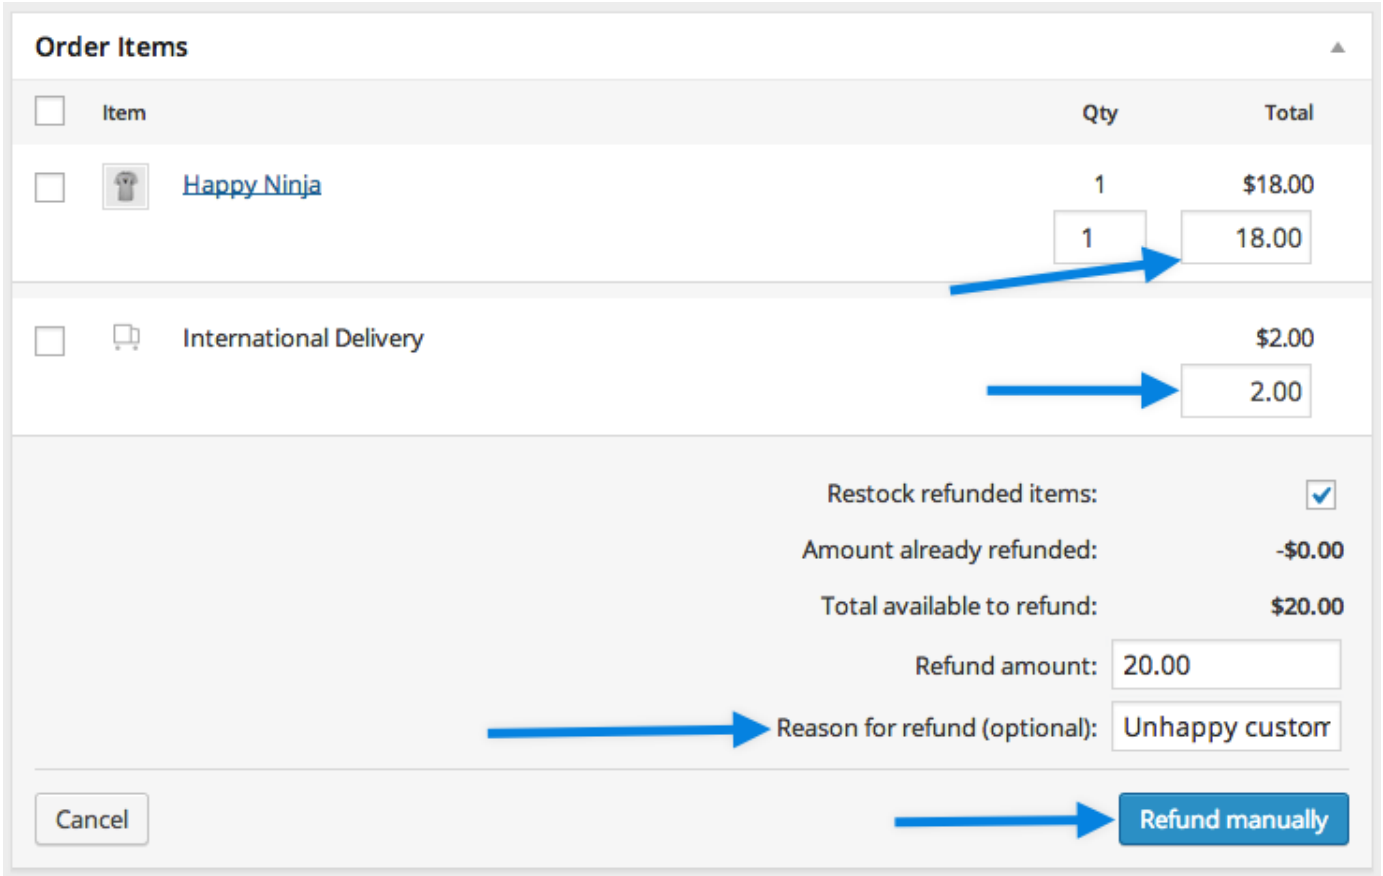

Adding an Order Manually

WooCommerce > Orders > Add order — for phone and offline sales.

© 2026 Tertiary Infotech Academy Pte Ltd

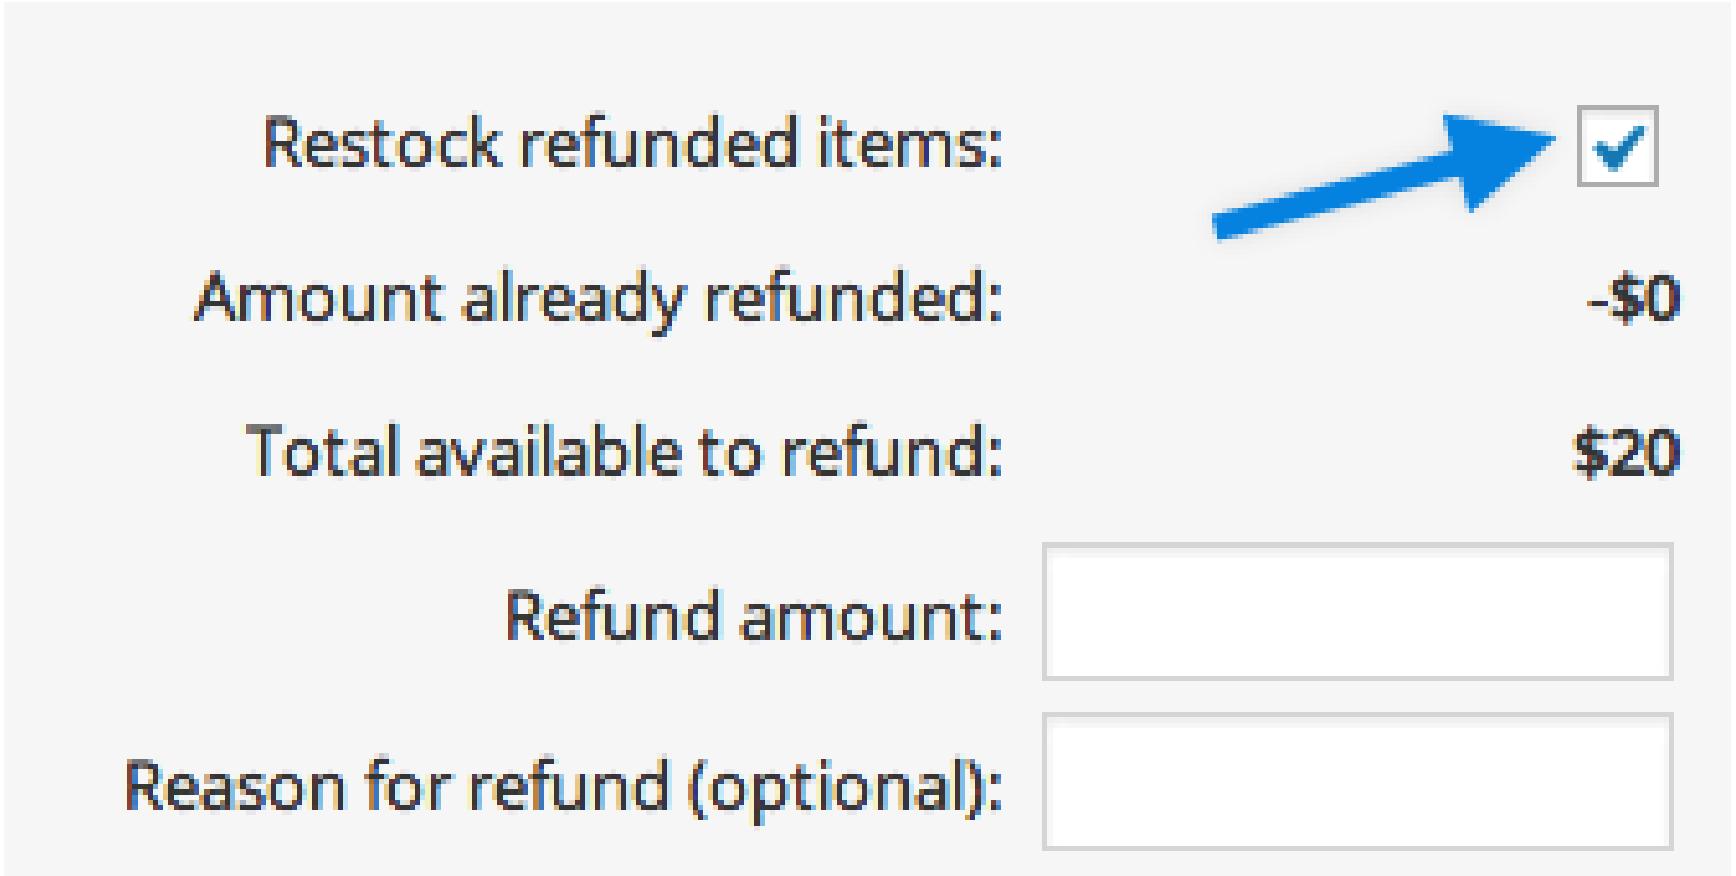

Refunding an Order

Open the order, click Refund, enter the amount and a reason, then Refund manually.

© 2026 Tertiary Infotech Academy Pte Ltd

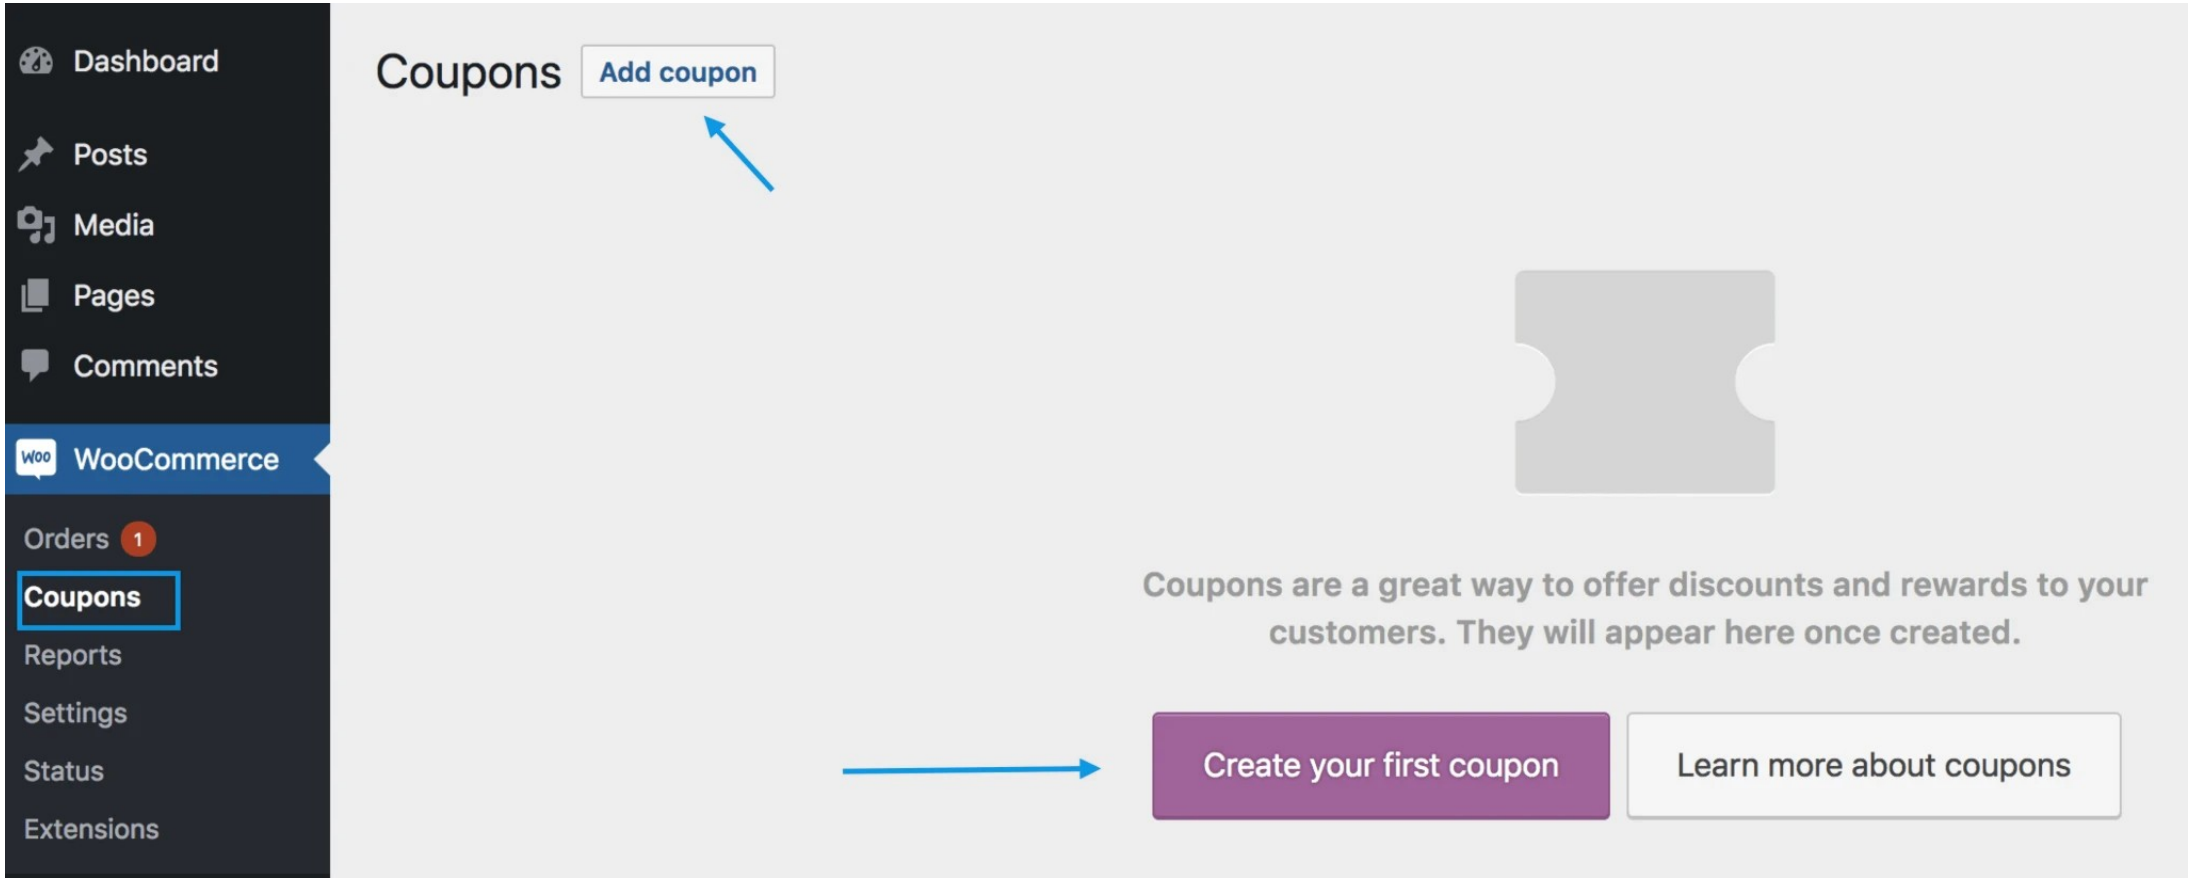

Restocking Refunded Items

Tick 'Restock refunded items' so returned stock goes back into inventory.

© 2026 Tertiary Infotech Academy Pte Ltd

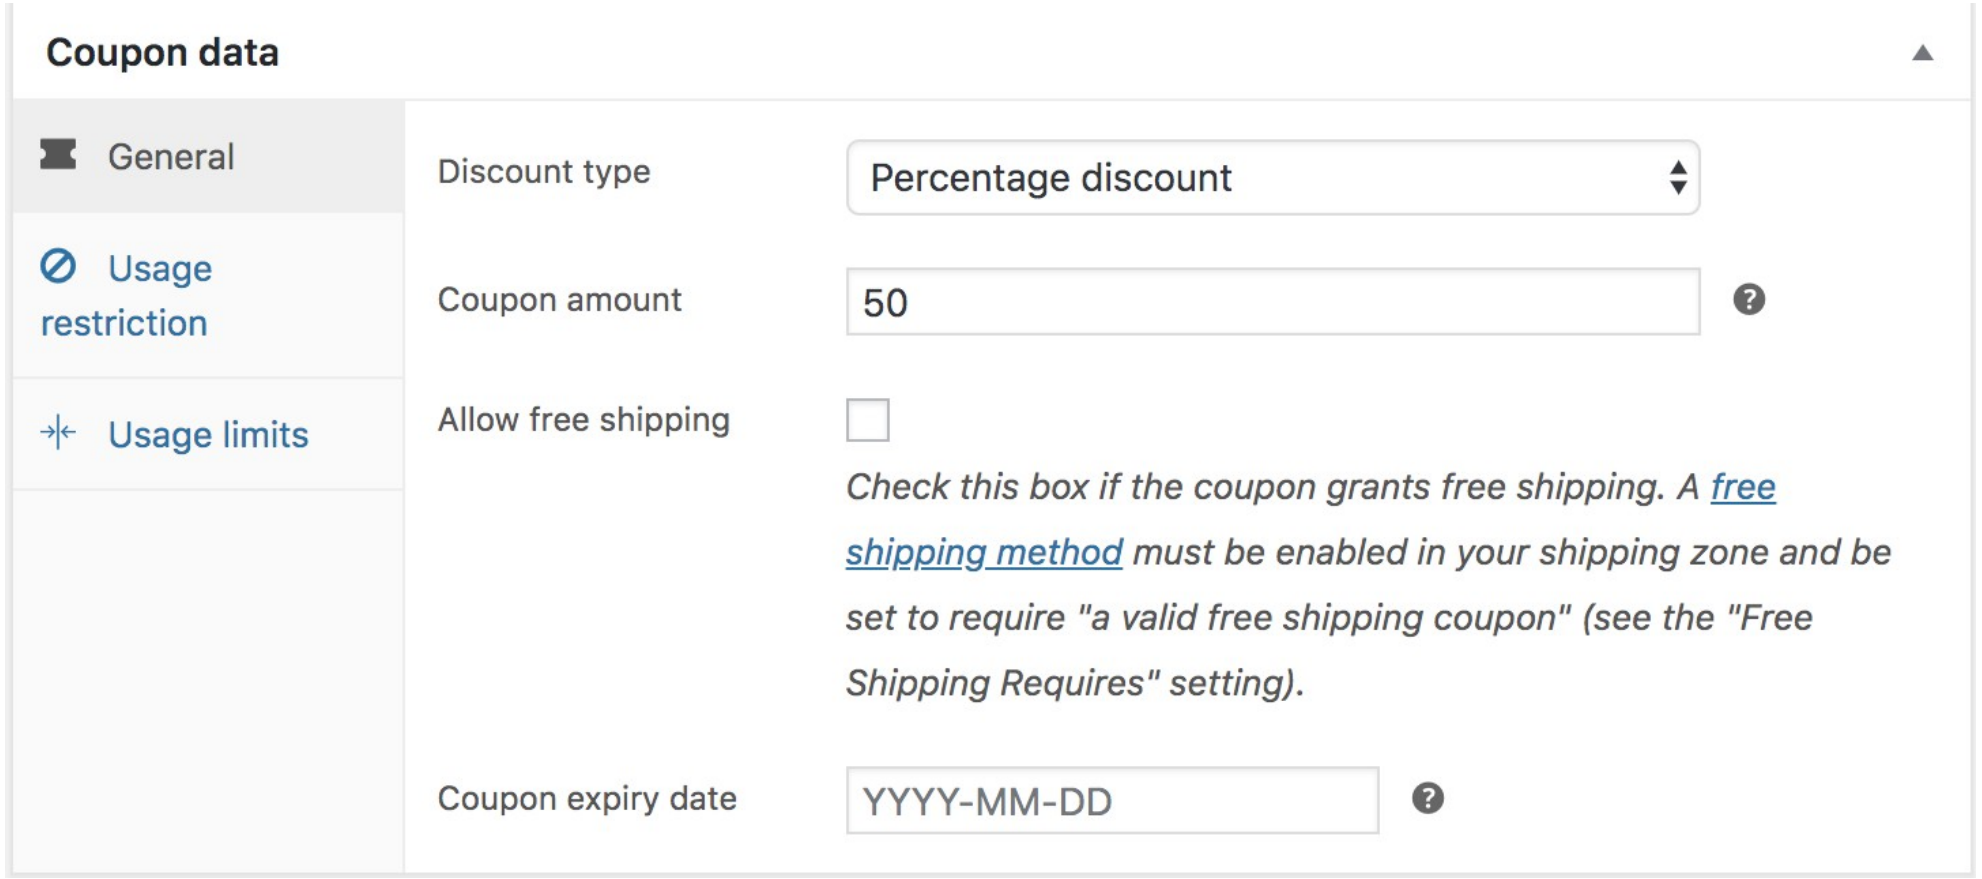

Adding a Coupon

Marketing > Coupons > Add coupon — enter or generate a unique code.

© 2026 Tertiary Infotech Academy Pte Ltd

Coupon Discount Settings

Discount type and amount, free shipping, and an expiry date.

© 2026 Tertiary Infotech Academy Pte Ltd

The Three Discount Types

1

Percentage discount

A share off the qualifying items. 3 shirts at $20 = $60; 10% off gives $6.

2

Fixed cart discount

A flat sum off the whole cart. 3 shirts at $20 = $60; $10 off gives $10.

3

Fixed product discount

A set amount off EACH qualifying item. 3 shirts, $10 off each, gives $30.

4

Restrictions & limits

Minimum spend, product and category limits, usage limit per coupon and per user.

TOPIC 04 · HANDS-ON LAB

Process Orders, Refunds and Coupons

LAB 6

Highlight and resolve issues related to sales, stock, refunds and promotions.

Run the store as a shop manager. You walk an order through its statuses, edit and manually create orders, issue a refund that restocks the item, then build a coupon and prove it applies at checkout — the day-to-day issue resolution the CMS is used for.

YOU'LL BUILD

A processed order, a completed refund with restocking, and a working discount coupon

WHY THE BUSINESS CARES

Orders, refunds and promotions are where customer problems surface. Resolving them quickly and correctly — with stock and revenue staying accurate — is the operational heart of the store.

TOOLS WooCommerce > Orders · Order statuses · Refund · WooCommerce > Coupons · Checkout

05

TOPIC 5

Manage WooCommerce Performance

Sales reports · Customer & stock reports · Dashboard widgets · eCommerce metrics · Google Analytics

© 2026 Tertiary Infotech Academy Pte Ltd

TOPIC 05 · WHAT YOU'LL LEARN

Key Concepts in This Topic

1

WooCommerce Reports

Orders, Customers, Stock and Taxes — the built-in view of how the store is performing.

2

Sales reports

Gross and net sales by date, product and category, plus top sellers, top earners and coupon usage.

3

Customer and stock reports

Customers versus guests, and low-stock, out-of-stock and on-backorder items.

4

Dashboard widgets

At-a-glance store status on the WordPress dashboard, configurable through Screen Options.

5

eCommerce metrics

Conversion rate, traffic, revenue by source, retention, repeat purchase and refund rate.

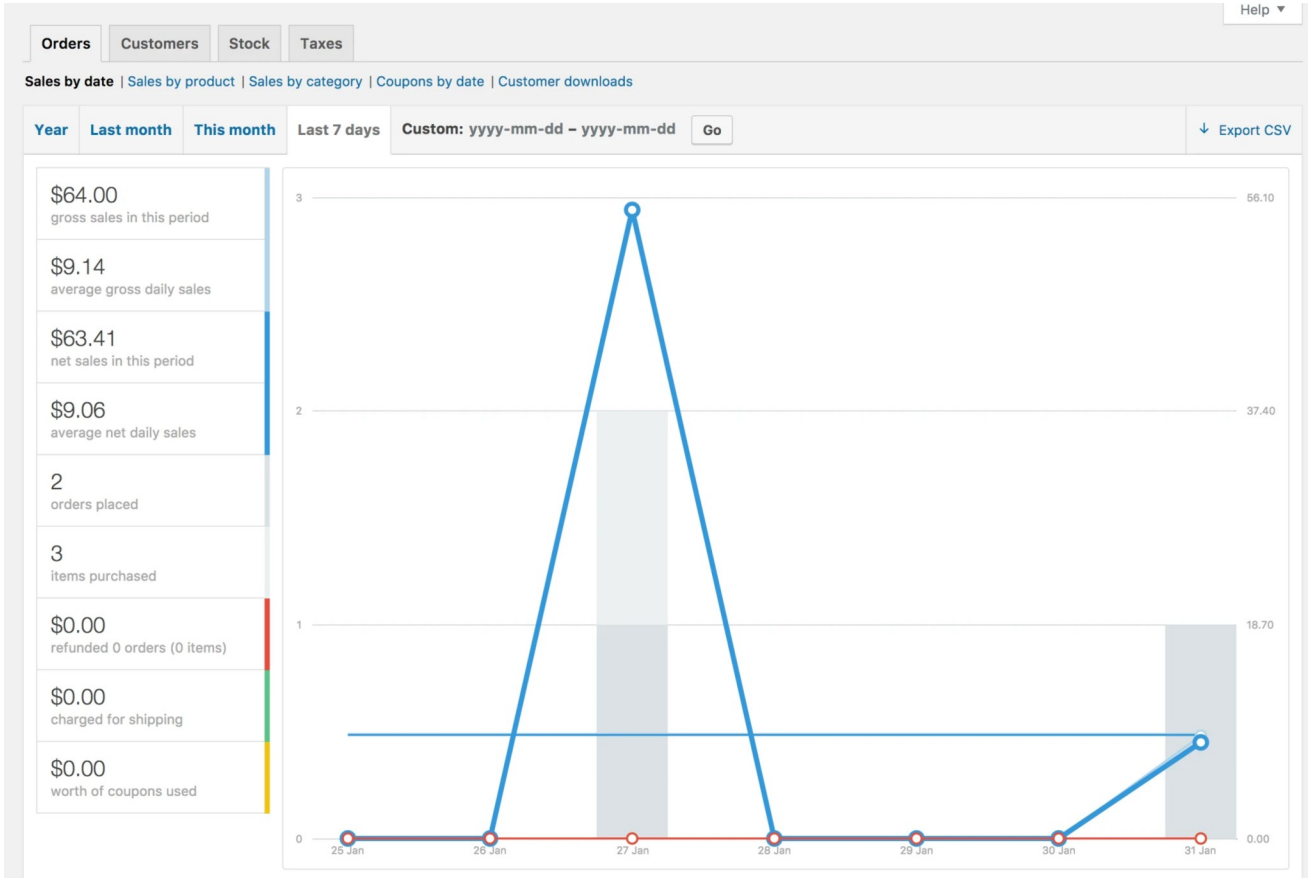

6

Google Analytics

Integrating analytics attributes revenue to channels and shows where customers drop off.

WooCommerce Reports

WooCommerce > Reports — Orders, Customers, Stock and Taxes.

© 2026 Tertiary Infotech Academy Pte Ltd

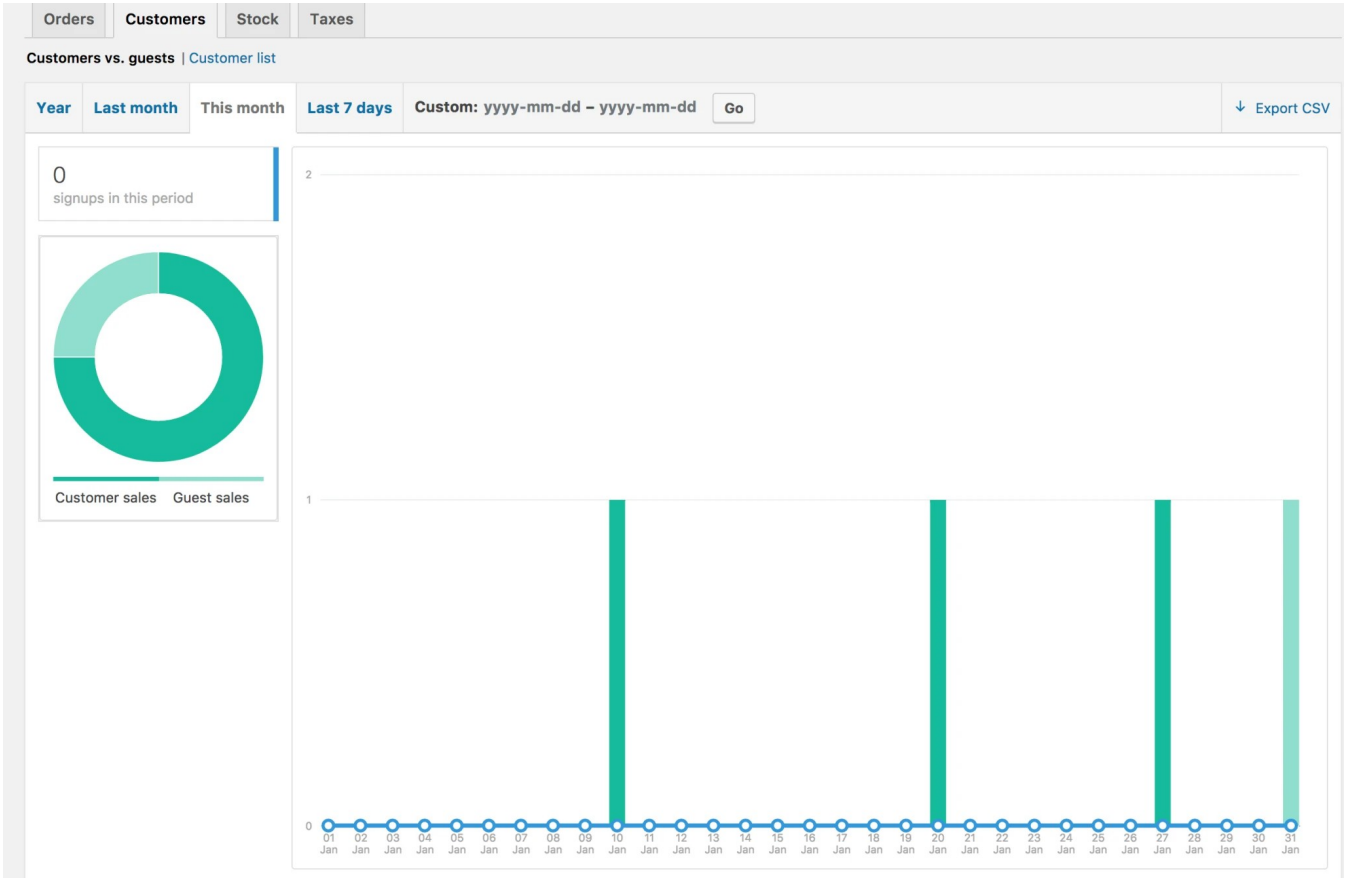

Order Reports

Sales by date, by product, by category, coupons by date and customer downloads.

© 2026 Tertiary Infotech Academy Pte Ltd

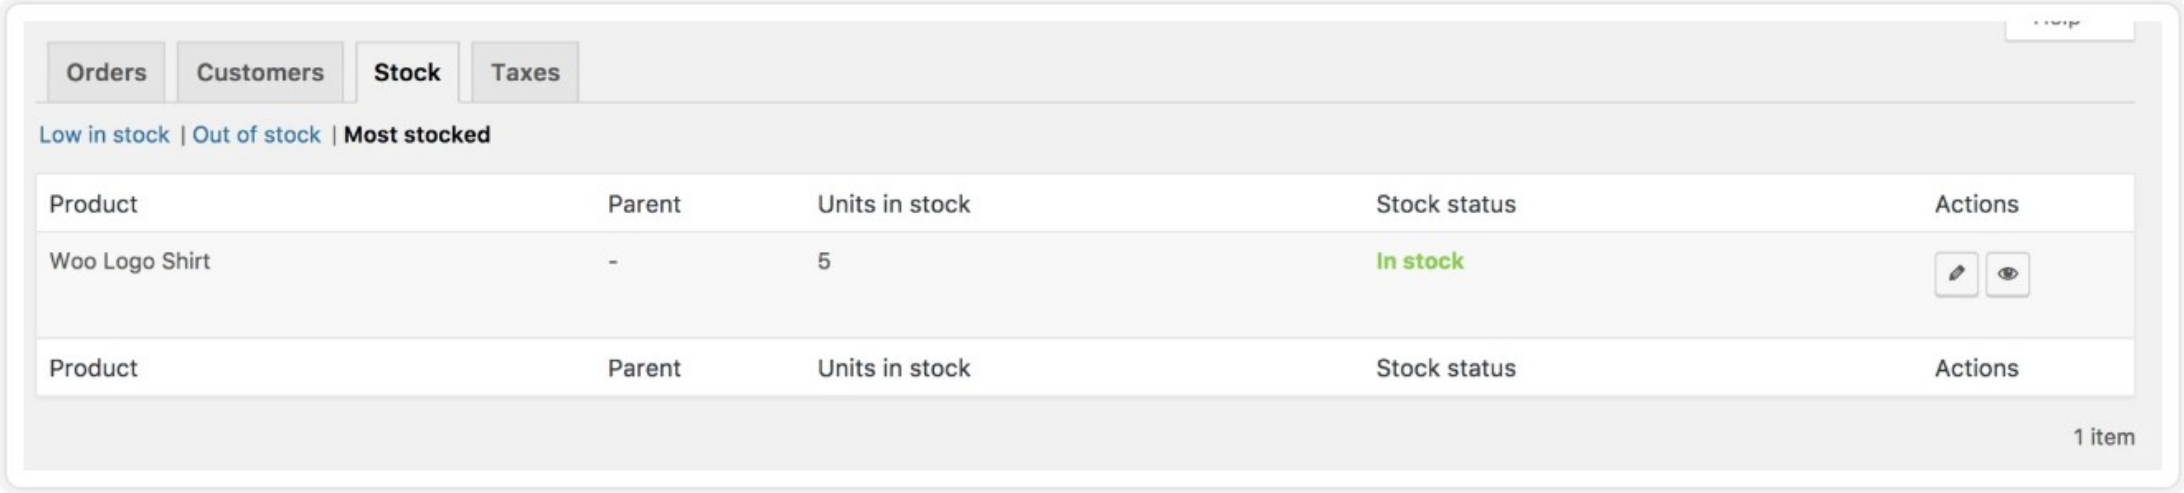

Customer Reports

Customers vs. Guests, and the customer list — sortable across time periods.

© 2026 Tertiary Infotech Academy Pte Ltd

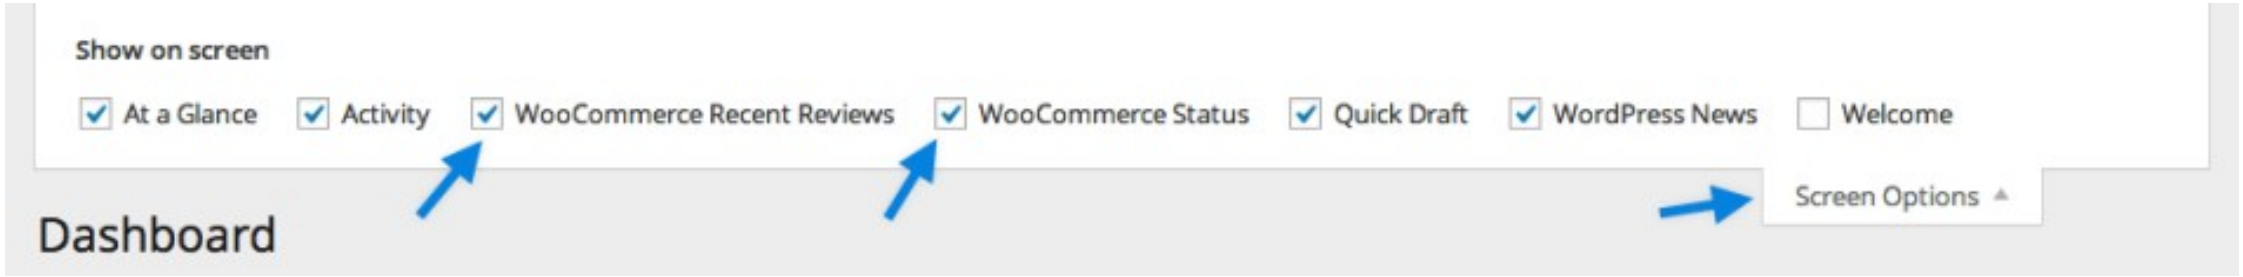

Stock Reports

Low in stock, out of stock, and most stocked — lost revenue you can prevent.

© 2026 Tertiary Infotech Academy Pte Ltd

Dashboard Widgets

WooCommerce adds status widgets to the WordPress dashboard; tune them via Screen Options.

© 2026 Tertiary Infotech Academy Pte Ltd

Metrics for a Successful Store

1

Sales & revenue

Gross and net sales, revenue by traffic source, and average order value.

2

Conversion

Sales conversion rate — the share of visitors who actually buy.

3

Traffic

Website traffic and organic acquisition traffic.

4

Engagement

Email click-through rate, email subscription rate and social media engagement.

5

Loyalty

Customer retention rate and repeat customer rate.

6

Problems

Refund and return rate, and customer enquiries.

© 2026 Tertiary Infotech Academy Pte Ltd

Criteria for Evaluating a Metric

1

Actionable

Does a change in this number tell somebody to do something differently?

2

Comparable

Can you track it consistently over time and against a target?

3

Attributable

Can you tell which channel, campaign or product caused the movement?

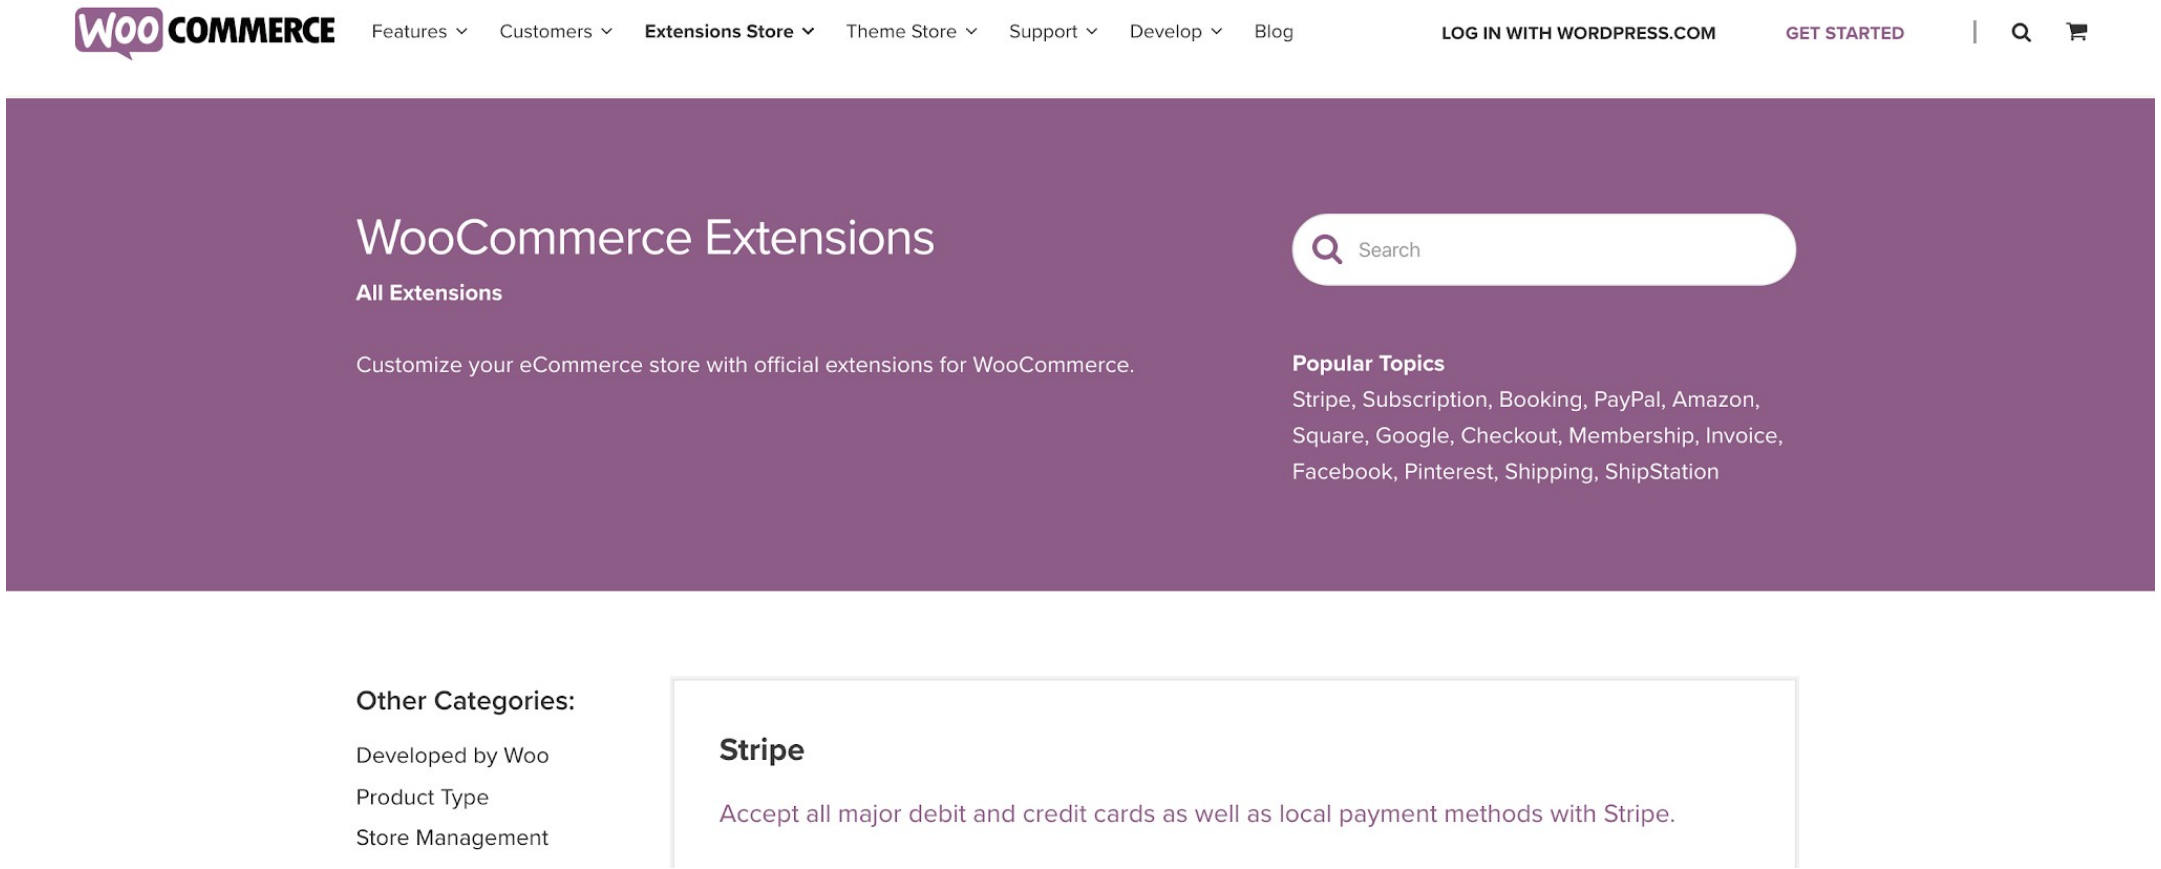

4

Owned

Is there a person responsible for it, and a threshold that triggers a response?

TOPIC 05 · HANDS-ON LAB

Measure Store Performance with Reports and Analytics

LAB 7

Develop and review metrics to measure the performance of the store.

Turn the store's activity into evidence. You read the Orders, Customers, Stock and Taxes reports, arrange the dashboard widgets a manager would want, install the Google Analytics integration, and select the handful of metrics you would actually use to judge whether the store is succeeding.

YOU'LL BUILD

A reviewed set of store reports, a configured dashboard, and a defined list of performance metrics

WHY THE BUSINESS CARES

Metrics are only useful if they change a decision. Choosing which few to track — and knowing what each one would tell you — is what separates a measured store from a busy one.

TOOLS WooCommerce > Reports · Analytics · Dashboard widgets · Screen Options · Google Analytics plugin

© 2026 Tertiary Infotech Academy Pte Ltd

Discussion — Metrics to Measure Store Performance

DISCUSSION · 15 MIN

Decide which metrics you would use to judge whether the store is succeeding, and what criteria make a metric worth tracking at all.

1. Which three metrics would you put in front of the business owner every week?
2. What makes a metric useful — is it actionable, comparable, and tied to a decision?
3. What does a rising refund rate or a falling repeat-customer rate actually tell you?
4. Which report or tool produces each metric — WooCommerce Reports or Google Analytics?

YOUR OUTPUT A shortlist of performance metrics with the criteria used to select them and their data source.

WRAP-UP

Course Summary & Next Steps

© 2026 Tertiary Infotech Academy Pte Ltd

AFTER TODAY

Your Next Steps

1

Keep building your store

Your WooCommerce site and catalogue stay yours after the course.

2

Launch with a real product

Pick one product, price it properly, and take a real order.

3

Revisit the Learner Guide

Every lab's step-by-step instructions are there for you to repeat.

4

Explore the documentation

Official guides at https://woocommerce.com/documentation/

SUMMARY

Summary & Q&A

1

The platform

WooCommerce turns WordPress into a complete, fully customisable online store.

2

The content

Products, categories, attributes and variations are what you curate and maintain.

3

The commerce

Payments and shipping are customer-experience decisions that shape conversion.

4

The operations

Orders, refunds and coupons are the day-to-day issues a store manager resolves.

5

The evidence

Reports and analytics tell you whether any of it is actually working.

6

Over to you

Any questions?
